INDIA-GAZZ

APR TO JUNE

1916

REGISTERED No. C. 696.

The Gazette of India.

PUBLISHED BY AUTHORITY.

CALCUTTA, SATURDAY, APRIL 1, 1916.

☞ Separate paging is given to this Part in order that it may be filed as a separate compilation.

PART II.

Notifications by High Court, Comptroller-General, etc.

GAZETTE OF INDIA.

NOTICE.

The 18th March 1916.

On and after 8th April and until further notice, Parts I, IV, V and VI of the *Gazette of India* and the Weather and Crop Report will be published in Simla. Parts II and III will continue to be published in Calcutta. All notifications and other matter intended for publication in those Parts should be addressed to the Publisher at Simla and Calcutta, respectively.

Attention is invited to the following Circular Memorandum of the Government of India, Home Department, of August 1901:—

"It has been brought to the notice of this Department that matter for the *Gazette of India* is sometimes sent to the Press late on Friday evenings for publication in the next day's *Gazette* and that this involves considerable inconvenience to the Press and expense to Government In the Circular Memorandum of this Department, No. 777- 79, dated 9th February 1870, the Government of India directed that all notifications or other matter intended for insertion in the *Gazette of India* should be delivered at the Press not later than 2 P.M. on Friday, and that any papers sent thereafter must be certified to be extremely urgent in order to ensure their appearance in the next day's *Gazette*. The undersigned is directed to request that these orders may be more strictly observed in future, and that Departments will refrain from sending to the Press as extremely urgent any papers which can without harm or inconvenience be held over for the next *Gazette*.

J. P. HEWETT,
Secretary to the Government of India."

NOTICES.

THE PATENT OFFICE, 1, COUNCIL HOUSE STREET, CALCUTTA.

Public room, open 11 a.m. to 4 p.m.; Saturdays, 11 a.m. to 1 p.m.

1. *All communications* relating to applications for patents and for registration of designs under the Indian Patents and Designs Act (II of 1911), or in continuation of applications under the Inventions and Designs Act (V of 1888) should be addressed to the Controller of Patents and Designs, 1, Council House Street, Calcutta. Documents sent by post should be carefully packed.

2. *Directions* for the guidance of inventors and others are given in the Patent Office Handbook (price one rupee) which contains the Indian Patents and Designs Act, 1911, the Indian Patents and Designs Rules, 1912, the Indian Patents and Designs (Temporary Rules) Act, 1915, the Indian Patents and Designs (Temporary) Rules, 1915, together with current regulations and instructions. These should be consulted before an application is made to the Controller.

3. *Advice*. The Patent Office cannot undertake (1) to give opinions on the interpretation of Patent Law, or on the advisability of protecting inventions and designs or on their infringement; (2) to make searches in respect of information available in the public room; (3) to recommend any particular agent; or (4) to assist in the disposal of inventions. Applicants are warned that the Indian Patents and Designs Act, 1911, is in force in British India only, and patents granted under it do not extend to the United Kingdom or any of the British possessions. The International Convention for the Protection of Industrial Property does not include India. For information regarding patents in countries other than India applications should be made to the patent offices in the countries concerned.

4. *Fees* are payable in *cash* and must be received in the Patent Office within the time allowed by the Acts. When cheques are offered in payment of fees, it must be clearly understood that the office cannot hold itself responsible for any delay that may occur in the collection of cash on the cheques; any cheque not payable in Calcutta is subject to commission. In cases where it is not possible to have the fees handed in at the Patent Office, it is preferable to send them by money-order or postal order payable at Calcutta to the Controller of Patents and Designs, and to advise him that they have been so sent. Stamps will not be received in payment of fees.

5. *Trade and property marks and names* are not registered and *medicines* are not patented under the Indian Patents and Designs Act. There is no provision of Law in British India for their registration. Neither does this Act deal with *pictures, photographs*, etc., for which copyright is obtainable under the Indian Copyright Act, 1914.

6. *Printed Specifications* of applications, which have been accepted, are published within about three weeks after acceptance has been notified in the *Gazette of India*. These specifications can be purchased at the Patent Office at a uniform price of 8 annas per copy; and may be seen free of charge, together with other publications of the Patent Office, at the following places:—

HIS MAJESTY'S MINT;
Calcutta, the 25th March 1916.

A. McCORMICK, MAJOR, R.E.,
Master of the Mint.

GOVERNMENT OF BENGAL, MUNICIPAL DEPARTMENT.

NOTIFICATION.

The 20th March 1916.

No. 1075-M.—In pursuance of section 42 of the Land Acquisition Act, 1894 (Act I of 1894), it is hereby notified that the following agreement has been executed under the provisions of section 41 of the said Act between the Secretary of State for India in Council and the Calcutta Tramways Company, Limited, for the acquisition of land for enlarging the Company's existing car-shed at 298, Upper Circular Road in the town of Calcutta or for building a new car-shed :—

Calcutta.

MEMORANDUM OF AGREEMENT made this 17th day of March one thousand nine hundred and sixteen BETWEEN THE CALCUTTA TRAMWAYS COMPANY LIMITED a Company incorporated under the English Companies Act having its registered office at No. 1 Queen Victoria Street in the City of London (hereinafter called " the Company ") and carrying on business at No. 1 Corporation Street in the Town of Calcutta of the one part and THE SECRETARY OF STATE FOR INDIA IN COUNCIL (hereinafter called " The Secretary of State " of the other part WHEREAS upon the application of the Company the Government of Bengal has consented to take up or acquire on behalf of the Company under the provisions of the Land Acquisition Act (Act No. I of 1894) for the purpose of enlarging the existing car-shed erected by the Company on the southern portion of the premises No. 298 Upper Circular Road Calcutta or building a new car-shed required to provide additional accommodation for the cars of the Central Sections of the Company's system the piece or parcel of land with the buildings erected thereon containing seven bighas five cottahs and eight chitaks and twenty-eight square feet of standard measurement being premises No. 298-1 Upper Circular Road Calcutta bounded on the north—partly by premises No. 297-1 Upper Circular Road belonging to Rasick Lal Dhar partly by premises No. 11-1 Harsi Street belonging to Hem Kumari Dasi on the east partly by premises No. 11-1 Harsi Street belonging to Hem Kumari Dasi partly by premises Nos. 8-1 and 8-2 Harsi Street belonging to Manmatha Nath Mukherjee and partly by premises No. 8 Harsi Street being Surati burial ground on the south by premises No. 298 Upper Circular Road belonging to the Calcutta Tramways Company Limited and on the west by approach passage from Upper Circular Road and more particularly described in the plan * hereto annexed and thereon hatched with red it having been shown to the satisfaction of the said Government of Bengal that the proposed acquisition for the purpose aforesaid is likely to prove useful to the public AND WHEREAS the said Government of Bengal have required the Company under the provisions of section 41 of the abovementioned Act to enter into the Agreement with the Secretary of State hereinafter contained NOW THESE PRESENT WITNESS and it is hereby agreed and declared as follows :—

*Not reproduced.

1. The Company shall and will pay and reimburse to Government within such time as may be fixed and notified to the Company by the Secretary of State or his officer duly authorised in that behalf the entire cost of acquiring the said piece or parcel of land in accordance with the provisions of the Land Acquisition Act including all compensation damages or expenses which may have been or may be paid or incurred in respect or on account of such acquisition and all law costs which have been or may be incurred by Government upon or in respect of or incidental to the said acquisition including the costs of any litigation arising thereout either in the Original or Appellate Courts and including also the cost of the establishment and the salary of the officer of Government employed or to be employed by Government in connection with or for the purposes of such acquisition.

2. Upon payment by the Company of all moneys payable by them under the last preceding clause or as soon thereafter as may be practicable the said piece or parcel of land forming the subject of the said acquisition shall be transferred by the Secretary of State to and vested in the Company.

3. The said piece or parcel of land shall be held by the Company for the purpose of the erection construction and maintenance thereon of such a car-shed or extension loops sidings offices and godowns as are next hereinafter mentioned and for no other purpose and the Company shall not assign transfer or part with the possession of the said piece or parcel of land or any part thereof without the previous consent in writing of the Secretary of State or his officer duly authorised in that behalf first had and obtained.

4. So soon as the said piece or parcel of land shall have been vested in the Company the Company shall forthwith at its own cost and expense erect and construct or cause to be erected and constructed thereon and in accordance with plans and specifications to be approved of on behalf of the Secretary of State a new car-shed or an extension of the existing car-shed of the Company and all loops sidings offices and godowns required to provide additional accommodation for the cars of the central sections of the Company's system. The Company shall also at the like cost and expense execute and carry out to the satisfaction of the Secretary of State such works as it may be required by him to carry out for the safeguarding or otherwise of

the public or owners occupiers or persons using and visiting the premises adjoining the said piece or parcel of land or any part thereof. The said car-shed loops sidings offices and godowns and other works as aforesaid shall at all times be maintained by and at the expense of the Company in a good and efficient state of repair and the Company shall not make any alterations therein or additions thereto or erect or construct any other buildings or works on the said piece or parcel of land or use the same for any purpose other than as aforesaid without the consent in writing of the Secretary of State or his duly authorised officer as aforesaid first had and obtained.

5. The said car-shed or extension loops sidings offices and godowns shall be completed by the Company fit and ready for use within two years from the date when the said piece or parcel of land shall become vested in the Company.

6. The public shall be entitled to use the said loops sidings offices and godowns only in so far as may be necessary in the usual course of the working of the present and future tramway system of the Company.

7. Should any dispute or difference arise touching or concerning the subject matter of this agreement or any covenant clause or thing herein contained the same shall be referred to the said Government of Bengal and the opinion and decision of the said Government upon such dispute or difference shall be final and conclusive and binding on the parties hereto.

As witness the hands of the parties the day and year first above written.

Signed for and in the name of the above named Calcutta Tramways Company Limited by their duly constituted attorney Thomas Edmund Pallant under Power of Attorney dated the twenty-ninth day of October one thousand nine hundred and nine in the presence of } The Calcutta Tramways Company Limited by their constituted attorney T. E. Pallant.

TREASURE TROVE.

NOTIFICATIONS.

No. 5832-*L. R.*—In accordance with the provisions of section 5 of the Indian Treasure Trove Act VI of 1878, notice is hereby given to all whom it may concern that on the 29th day of July 1915, while excavating earth from land on Nowroji Hill, formerly belonging to Mr. Jalbhai Ardeshir Sett but now acquired by the City of Bombay Improvement Trust in case No. 495 of Scheme III East, 28 coins (11 of gold and 17 of silver) were found by certain coolies named in the margin.

1. Sadashiv Ramchandra.
2. Ooko Chanio.
3. Namlo Hirio.
4. Sakhio Ramo.
5. Bhiklo Chamanio.
6. Simla Kalia.
7. Suku Deolo.
8. Pemli Methli (woman).

The coins bear impressions of Urdu character, the gold ones weighing about 7¼ tolas and the silver weighing 16¾ tolas.

All persons claiming the said treasure or any part thereof are hereby required to appear personally or by agent before the Collector of Bombay, on Saturday, the 1st April 1916, when the Collector will proceed to hold an inquiry in accordance with provisions of the said Act.

A. H. A. SIMCOX,
Collector of Bombay.

BOMBAY COLLECTOR'S OFFICE,
10th September 1915.

It is hereby notified under section 5 of the Indian Treasure Trove Act, VI of 1878, that in the beginning of October 1915 an idol of Vigneswaraswami made partly of bronze and chiefly of copper valued at Rs. 70 was found buried underground in S. No. 335 of Mel Bhuvanagiri village in the Chidambaram taluk, South Arcot District, Madras Presidency (held on patta by one Pushpavalli Thayaru), by one Ayyakannu Padayachi, son of Ponnappadayachi, while digging up the roots of prickly pear.

2. All persons claiming the said treasure or any part thereof are hereby required to appear personally or by agent before the Collector of South Arcot at his office at Cuddalore on Monday, the 7th day of August 1916, in view to the matter being enquired into and determined according to law.

M. AZIZUDDIN
Collector.

It is hereby notified under section 5 of Act VI of 1878, that the undermentioned treasure was found on 24th September 1915, by one Venkatachala Paradesi *alias* Venkatachala Padayachi while levelling the ground in Survey Field No. 337 (Inam dry) of 63 Vellalagaram village, Mayavaram Taluk, belonging to Sri Pashupathiswaraswami and Ramalingam Pillai.

No. 1955-*Home*.—Under the provisions of section 14 of the North-West Province and Oudh Land Revenue Act, III of 1901, the Chief Commissioner, Delhi, is pleased to appoint, and hereby directs, that the following officers of Delhi Province shall exercise all the powers conferred on a Collector by the said Act in respect to the territory added to the Delhi Province under Act VII of 1915, the Delhi Laws Act, and specified in Schedule 1 thereto attached :—

(1) Lieutenant-Colonel H. C. Beadon, Deputy Commissioner.

(2) Mr. V. Connolly, Additional District Magistrate.

Lieutenant-Colonel H. C. Beadon shall be deemed to be the Collector of the District of Delhi.

No. 1956-*Home*.—Under the provisions of section 15, sub-section (1), of the North-West Province and Oudh Land Revenue Act, III of 1901, the Chief Commissioner, Delhi, is pleased to appoint the following persons to be Assistant Collector of the 1st Class, in respect to the territories added to the Delhi Province by Act VII of 1915, the Delhi Laws Act, and specified in Schedule 1 thereto attached :—

(1) Rai Sahib Lala Nathu Mal, Treasury Officer.

(2) Chaudhri Nabi Ahmad, Revenue Assistant.

No. 1957-*Home*.—Under the provisions of section 172 of the North-West Province Tenancy Act, II of 1901, the Chief Commissioner, Delhi, is pleased to empower Chaudhri Nabi Ahmad, Assistant Collector, 1st Class to exercise all the powers conferred by sections 40, 42, 43 and 48 of the said Act.

No. 1958-*Home*.—Under the provisions of section 15, sub-section (1), of the North-West Province and Oudh Land Revenue Act, III of 1901, the Chief Commissioner, Delhi, is pleased to appoint the following person to be an Assistant Collector of the 2nd Class in respect to the territories added to the Delhi Province by Act VII of 1915, the Delhi Laws Act, and specified in Schedule 1 thereto attached :—

S. Fazl Muhammad Tahsildar.

The 28th March 1916.

No. 2066-*Home*.—In exercise of the powers conferred by section 12, sub-section (1), of the Indian Press Act, 1910 (I of 1910), the Chief Commissioner, Delhi, hereby declares to be forfeited to His Majesty all copies wherever found of the leaflet entitled "Hindustani Sipahion" beginning with the words "Kaid ki zanjiron ko toro" (break the fetters of bondage) and ending with the words "mulk ki azadagi ke waste laro—ye paigham Hindustan se tumhare waste agiya hai" (fight for the freedom of your country—this message has come from Hindustan for you) and all copies of all other documents containing the matter of the said leaflet, on the ground that the said leaflet contains words which have a tendency to incite to acts of violence and are of the nature described in section 4, sub-section (1), clause (*a*), of the said Act.

No. 2070-*Home*.—Under section 5 (1) of the Foreigners Ordinance, 1914 (III of 1914) and in supersession of Notification No. 6269-Home, dated the 4th September 1914, the Chief Commissioner is pleased to direct that, within the Province of Delhi, every householder or keeper of hotel, inn or lodgings, in whose abode a foreigner is residing at the time of this notification or shall after the date of this notification take up his or her residence, either permanently or temporarily, shall forthwith report to the Senior Superintendent of Police, Delhi, the following particulars :—

1. Name of foreigner.
2. Nationality.
3. Date of arrival.
4. Place of residence immediately preceding arrival.
5. Date of proposed departure, if known, and destination.

NOTE—This order does not apply to Asiatic foreigners.

GOVERNMENT OF INDIA.

DEPARTMENT OF COMMERCE AND INDUSTRY.

TARIFF VALUATION OF SUGAR.

The following statement shows in respect of each of the descriptions of sugar distinguished in the Tariff Schedule II (excepting molasses and all other kinds of sugar), *firstly*, the total imports into India in the month of February 1916, and the average value per cwt. as calculated on the returns received from the Customs Houses; and, *secondly*, a running total showing the total imports into India since the beginning of the year (1st October to 30th September) and the average net value per cwt. so far established. It is published in conformity with the procedure laid down in Customs Circular No. V of 1911, in order to enable merchants to compute the probable rate of duty for the year 1917:—

Description of sugar.	Imported during the month of February 1916.		Imported since 1st October 1915.

LEGISLATIVE DEPARTMENT.

NOTIFICATIONS.

Delhi, the 30th March 1916.

ERRATUM.

In Legislative Department Notification No. 18, dated 20th March, 1916, published at page 348 of Part I of the Gazette of India of the 25th March, 1916, *for* the word "Regulation," where it occurs for the first time, *substitute* the word "Resolution."

H. M. SMITH,

Deputy Secretary to the Government of India.

The 29th March, 1916.

No. 19.—In pursuance of the provisions of Regulation XI(*b*) of the Regulations for the nomination and election of Additional Members of the Indian Legislative Council, published in the Notification of the Government of India in the Legislative Department No. 61, dated the 14th November, 1912, as amended by the like Notification No 46, dated the 20th August, 1915, the Governor General is pleased to call upon the electorate mentioned below to elect in accordance with the said Regulations the two Members assigned to them, by the 15th day of May, 1916.

ELECTORATE.

The non-official members of the Council of the Lieutenant Governor of the United Provinces of Agra and Oudh.

The 30th March, 1916.

No. 20.—In exercise of the powers conferred by section 76 of the Government of India Act, 1915 (5 and 6 Geo. V., c. 61), the Governor General in Council, with the approval of the Secretary of State in Council, is pleased to make the following amendments in the regulations for the nomination and election of members of the Legislative Council of the Lieutenant Governor of the Punjab, published in Notification No. 19, of the Government of India in the Legislative Department, dated the 15th November, 1909 as amended by Notification No. 51, dated the 5th October, 1912, and Notification No. 51, dated the 20th August, 1915 :—

1. In Regulation I :—

No. 1440-D.—In exercise of the powers conferred by the Indian (Foreign Jurisdiction) Order in Council, 1902, and of all other powers enabling him in that behalf, the Governor General in Council is pleased to direct that the following additions shall be made to the Schedule to the notification of the Government of India in the Foreign Department, No. 784-I.B., dated the 9th April 1913, applying the provisions of the Indian Railways Act, 1890 (IX of 1890), and of the Indian Railway Board Act, 1905 (IV of 1905), to the lands occupied by certain railways in Native States, namely :—

After the entries relating to the North Western Railway System, the following shall be added namely :—

Jullandur Doab Railway . .	Kapurthala . .	The Government of the Punjab.
Phagwara Rahon Railway . .	Do. . .	

No. 1441-D.—In exercise of the powers conferred by the Indian (Foreign Jurisdiction) Order in Council, 1902, and of all other powers enabling him in that behalf, the Governor General in Council is pleased to direct that the following amendments shall be made in the Berar Rural Boards Law, 1885, namely :—

1. In clause (*b*) of the Preamble, the words "town-fund assessment and" shall be omitted.

2. For section 3, the following section shall be substituted :—

Aggregation of villages in circles and groups for purposes of local self-government.

"3. (1) For the purposes of the local self-government of each district, the Chief Commissioner shall, by order in writing, aggregate the several villages thereof in circles and the circles in groups.

(2) There shall be excluded from the circles and groups formed under this section such portions of the district as are for the time being included within the limits of a Municipality or of a Civil Station.

(3) The Chief Commissioner may, from time to time, by order in writing, vary any orders or alter any arrangements made under this section."

3. For section 4, the following section shall be substituted :—

Establishment of local boards for groups and of district boards for districts.

"4. (1) There shall be established for each group of circles a local board having authority over that group, and for each district a district board having authority over the entire district except such portions thereof as are for the time being included within the limits of a Municipality or of a Civil Station.

(2) Within the area subject to its authority, a local board so established shall be the agent of the district board and, as such agent, shall have such authority and shall discharge such duties as the district board may, by an order in writing in this behalf, from time to time, confer or impose upon it."

4. In sub-section (1) of section 5, for the word "taluq," the words "group of circles" shall be substituted.

5. For sub-section (2) of section 5, the following sub-section shall be substituted :—

"(2) The elective members of a local board shall be elected, in the manner prescribed, by persons paying the prescribed amount of *jaglia* and local cess and by such members of the mercantile classes and professions as are resident within the area comprised in the group and are in possession of the prescribed amount of income, in such proportions as the Chief Commissioner may, from time to time, direct."

In clause (*c*) of sub-section (1) of section 22, the words "town-fund assessment and" shall be omitted.

7. In section 35, for the word "taluq" where it occurs for the first time, the words "part of a district" shall be substituted, and for the same word wherever it occurs subsequently, the word "part" shall be substituted.

8. In section 40, the words "town-fund assessment and" shall be omitted.

9. Throughout the Law, for the words "Resident" and "taluq board" wherever they occur, the words "Chief Commissioner" and "local board" shall be substituted.

JUDICIAL.

No. 356.—In pursuance of section 2 of the Defence of India (Criminal Law Amendment) Act, 1915, IV of 1915, as subsequently amended, the Governor General in Council is pleased to direct that the following amendment shall be made in the Defence of India (Consolidation) Rules, 1915, namely :—

After Rule 11A of the said Rules, the following rule shall be inserted, namely :—

"11B. (1) The Director or any gazetted officer of the Indian Marine Service generally or specially authorised by the Governor General in Council in this behalf, may, by order in writing, require the owner or other person in charge of any vessel which is, in the opinion of the Director or such officer, suitable for river navigation, to place such vessel at his disposal for the service of His Majesty at such time and place as may be specified in the order.

(2) Where, in accordance with an order made in exercise of the powers conferred by sub-rule (1), any vessel has been placed at the disposal of the Director or such officer, the Governor General in Council shall pay to the owner of such vessel compensation for any loss immediately attributable to such order, and for any services rendered or expenditure incurred in complying therewith.

(3) The amount payable as such compensation shall, in default of agreement, be determined by a committee of arbitration consisting of three members, of whom the Governor General in Council and the owner shall each appoint one, and the third shall be such person as may be agreed upon by the Governor General in Council and the owner, or, in default of agreement in this respect, shall be a person appointed by the Governor General in Council.

(4) The decision of the committee shall be determined by the opinion of the majority and shall be final.

(5) If the owner of any vessel, or any person in charge thereof fails to comply with any order made under sub-rule (1), he shall be deemed to have contravened these rules, and the authority making the order may forthwith take possession of the vessel specified in the order and may dispose of and use the same in such manner as he may consider necessary or expedient."

B. HOLLOWAY, *Major-General,*
Secretary to the Government of India.

NOTIFICATIONS.

Simla, the 24th March 1916.

No. 540-3 E.-16.—Mr. J. J. Inglis, Carriage and Wagon Superintendent, North Western Railway, is granted combined leave for 6 months (privilege leave due and furlough for the remaining period) under Articles 233, 260 and 308 of the Civil Service Regulations, with effect from the 1st April 1916, or subsequent date of relief.

No. 540-4 E.-16.—With reference to Railway Board's Notification No. 540-3 E.-16, dated the 24th March 1916, and No. 185, dated the 19th May 1915, Mr. H. Armitstead, Officiating Deputy Carriage and Wagon Superintendent, North Western Railway, is appointed to officiate as Carriage and Wagon Superintendent of that Railway.

No. 540-5 E.-16.—With reference to Railway Board's Notification No. 540-4 E.-16, dated the 24th March 1916, Mr. H. J. Charlton, District Carriage and Wagon Superintendent, North Western Railway, in Class II, grade 5, of the Superior Revenue Establishment of State Railways, is appointed to officiate as Deputy Carriage and Wagon Superintendent in Class I of that establishment.

The 27th March 1916.

No. 46 T.-16.—The following is published for general information.

No. 46 T.-16.

GOVERNMENT OF INDIA.

RAILWAY DEPARTMENT.

(RAILWAY BOARD.)

Dated Simla, the 27th March 1916.

Adoption on the Arrah-Sasaram and Jessore-Jhenidah Light Railways and on such portions of the Bengal-Nagpur, Bombay, Baroda and Central India, East Indian, Great Indian Peninsula and Madras and Southern Mahratta Railway systems, as are situate in British territory, of an amendment in Part I of the General Rules of 1906 for working open lines of railway.

The Agents and Managers of the Railways, noted on the margin*, have applied for permission to adopt on those railways the amendment, specified in the enclosure to Railway Board's Circular No. 1382 T, dated the 20th September 1915, and published under their Notification No. 278, dated the 8th October 1915, in Part I of the General Rules of 1906, for working open lines of railway in British India, which rules and certain amendments thereto were sanctioned for adoption on the marginally† noted Railways and on such portions of the Bengal-Nagpur, Bombay, Baroda and Central India, East Indian, Great Indian Peninsula and Madras and Southern Mahratta Railway systems, as are situate in British territory, in the following Railway Board's resolutions and notifications.

*Arrah-Sasaram Light Railway.
Bengal-Nagpur Railway.
Bombay, Baroda and Central India Railway.
East Indian Railway.
Great Indian Peninsula Railway.
Jessore-Jhenidah Light Railway.
Madras and Southern Mahratta Railway.

†Arrah-Sasaram and Jessore-Jhenidah Light Railways.

Resolution No. 227 R. T., dated the 13th February 1911, and Notification No. 53, dated the 22nd February 1911.

Resolution No. 559 R. T., dated the 31st March 1913, and Notification No. 98, dated the 3rd April 1913.

Resolutions Nos. 585 R. T. and 735 R. T., dated, respectively, the 9th July 1907 and the 26th April 1909, and Notifications Nos. 172 and 127, dated, respectively, the 15th July 1907 and the 29th April 1909.

Resolutions Nos. 383 R. T. and 741 R. T., dated, respectively, the 10th June 1907 and the 26th April 1909, and Notifications Nos. 150 and 129, dated, respectively, the 18th June 1907 and the 29th April 1909.

Resolutions Nos. 35 R. T. and 826 R. T., dated, respectively, the 17th April 1907 and 7th May 1909, and Notifications Nos. 97 and 144, dated, respectively, the 24th April 1907 and the 13th May 1908.

Resolutions Nos. R. T. 121-A—5 and 743 R. T., dated, respectively, the 29th January 1907, and the 27th April 1909, and Notifications Nos. 20 and 136, dated, respectively, the 30th January 1907 and the 4th May 1909.

Resolutions Nos. 330 R. T., 346 R. T., and 734 R. T., dated, respectively, the 30th May 1907, the 1st June 1907 and 26th April 1909, and Notifications Nos. 135, 141 and 130, dated, respectively, the 6th June 1907, the 11th June 1907 and the 30th April 1909.

2. In exercise of the powers conferred by the Notification of the Government of India in the Department of Commerce and Industry, No. 801, dated

the 24th March 1905, the Railway Board sanction, under section 47, sub-section (3), of the Indian Railways Act, 1890 (IX of 1890), the adoption of the amendment cited in paragraph 1 above, on the marginally noted* railways and on such portions of the Bengal-Nagpur, Bombay, Baroda and Central India, East Indian, Great Indian Peninsula and Madras and Southern Mahratta Railway Systems as are situate in British territory.

*Arrah-Sasaram and Jessore-Jhenidah Light Railways.

ORDER—Ordered that this resolution be published under a notification in Part I of the *Gazette of India* as required by section 47, sub-section (3), of the Indian Railways Act, 1890 (IX of 1890), and that a copy of the amended General Rules be kept open for inspection at railway stations as directed by sub-section (6) of the same section; also that a copy of this Resolution be communicated to the Local Governments and to the officers noted on the margin for information.

The Government of Bengal, Railway Department.
The Government of Bihar and Orissa, Public Works Department.
The Agents, Bengal-Nagpur, Bombay, Baroda and Central India, East Indian, Great Indian Peninsula and Madras and Southern Mahratta Railways.
The Senior Government Inspector of Railways, Circles Nos. 1, 2 and 5—7.
The Secretary, Indian Railway Conference Association.

The 28th March 1916.

No. 34 P.-16.—It is hereby notified for general information that the Railway Board have sanctioned a detailed survey being carried out by Messrs. Martin & Company, Calcutta, for a line of railway on the 2′ 6″ gauge from Jagatpur to Kendrapara, a distance of 33·5 miles.

This survey will be known as the Jagatpur-Kendrapara Railway Survey.

The 29th March 1916.

No. 451 E.-16.—Mr. B. Stapleton, Superintending Engineer, 3rd class, *s.p.t.*, State Railways, whose services are lent to the Burma Railways Company, is granted privilege leave for 3 months combined with furlough for 6 months, under articles 233 and 308 (6), Civil Service Regulations, with effect from the 13th March 1916.

The 30th March 1916.

No. 35 P.-16.—The Senior Government Inspector of Railways, Circle No. 4, Lahore, having inspected the Mandra-Bhaun Railway, authorised its opening for passenger traffic with effect from 15th February 1916.

The Railway Board after considering his report have confirmed his action.

No. 53 P.-16.—The Senior Government Inspector of Railways, Circle No. 4, having nspected the Sialkot-Narowal Railway, authorised its opening to public traffic with effect from 16th February 1916.

The Railway Board after considering his report have confirmed his action.

P. C. YOUNG,
Offg. Secretary, Railway Board.

PART VI.

Proceedings of the Indian Legislative Council.

GOVERNMENT OF INDIA
LEGISLATIVE DEPARTMENT.

PROCEEDINGS OF THE INDIAN LEGISLATIVE COUNCIL ASSEMBLED UNDER THE PROVISIONS OF THE GOVERNMENT OF INDIA ACT, 1915 (5 & 6 Geo. V, Ch. 61).

The Council met at the Council Chamber, Imperial Secretariat, Delhi, on Monday, the 20th March, 1916.

PRESENT :

His Excellency BARON HARDINGE OF PENSHURST, P.C., G.C.B., G.C.M.G., G.C.V.O., G.M.S.I., G.M.I.E., I.S.O., Viceroy and Governor General, *presiding*, and 57 Members, of whom 49 were Additional Members.

QUESTIONS AND ANSWERS.

The Hon'ble Sir Gangadhar Chitnavis asked :—

Enhancement of rents in temporary settled Province in India.

1. " (*a*) Is it a fact that in some temporary settled Provinces in India, tenants' rents have been enhanced by Settlement Officers in recent years by more than 100 or even 200 per cent ? If so, will Government be pleased to state whether these enhancements are due to raising of the classification of the soil ?

(*b*) Do Government propose to fix a limit to such enhancement in individual cases, say not more than 33 per cent. where the Settlement has taken place once and not more than 25 per cent. where the Settlement has taken place more than once ?"

The Hon'ble Mr. C. H. A. Hill replied :—

" (*a*) It is only in the Central Provinces and in a portion of Orissa that there is any general fixation of rents in the course of re-settlement operations. The Government of India have no information regarding the enhancements which have been imposed in individual cases, but at no recent re-settlement has the all-round enhancement of rents been anything like the figure mentioned by the Hon'ble Member. Only in a few small areas, the circumstances of which have been exceptional, has it exceeded 33 per cent.

[*Mr. C. H. A. Hill; Rai Ghanasyam Barua Bahadur; Mr. Dadabhoy; Sir William Meyer.*] [20TH MARCH, 1916.]

(*b*) In these circumstances, the Government do not consider that any action in the direction suggested by the Hon'ble Member is called for. Article 217 of the Central Provinces Settlement Code provides for the grant of an abatement of rent in individual cases in which the *per saltum* enhancement is more than can, in the opinion of the Settlement Officer, be fairly imposed."

The Hon'ble Rai Ghanasyam Barua Bahadur asked :—

Grazing grounds for cattle.

2. " (*a*) Is it a fact that complaints about the want of sufficient grazing grounds for village cattle are frequently brought to the notice of Government. If the answer is in the affirmative, is it a fact that the deficiency of grazing grounds accounts for the distress and deterioration of cattle?

(*b*) Do Government propose to consider the advisability of directing all Local Governments to allot a sufficient and suitable area to each village for pasturing their cattle and to publish periodical reports of the progress made in this connection ? "

The Hon'ble Mr. C. H. A. Hill replied :—

" The Hon'ble Member is referred to the answer given by the Hon'ble Sir Robert Carlyle to a somewhat similar question put by the Hon'ble Maharaja Ranajit Sinha at the meeting of the Legislative Council held on January 12th, 1915, a copy of which is placed on the table.* I would add that at the meeting of the Board of Agriculture held at Pusa last month, the Committee which considered the general question of the measures which should be taken in regard to the preservation of grazing areas, the improvement of waste areas and the general question of fodder supply expressed the opinion that Local Governments were in most cases taking such action in regard to these matters as lay within the means at their disposal. In the circumstances, the Government of India do not at present propose to address any communication on the subject to Local Governments."

The Hon'ble Rai Ghanasyam Barua Bahadur asked :—

Sources of fodder supply.

3. " (*a*) Will Government be pleased to state whether the results of any inquiries made by the Local Governments regarding sources of fodder supply have been submitted by them ?

(*b*) If so, will Government be pleased to lay on the table the papers received from the Local Governments."

The Hon'ble Mr. C. H. A. Hill replied :—

" (*a*) The reply is in the affirmative

(*b*) Papers on the subject are laid on the table."*

The Hon'ble Mr. Dadabhoy asked :—

Reduction in the Railway programme.

4. " With reference to the statement by the Hon'ble Finance Member in paragraph 21 of his speech of the 1st March that 'the Railway programme was reduced by some £250,000 almost at the outset in consequence of pressure from the Treasury at home,' will Government be pleased to lay on the table the correspondence on the subject between the Government of India and the Secretary of State for India in Council ? "

The Hon'ble Sir William Meyer replied :—

" It is not proposed to lay the correspondence on the table. But I may explain that the Home Treasury require their previous concurrence to any flotations on the London market during the war, and this applies not only to private company issues, but also to public issues on behalf of India and of the

* Not included in these Proceedings.

[20TH MARCH, 1916.] [*Sir William Meyer ; Khan Bahadur Mir Asad Ali Khan ; Sir C. Sankaran Nair.*]

self-governing colonies. The restriction is natural, and indeed, inevitable, in view of the paramount claim of the Home Government for the funds required for the prosecution of the war. It results therefrom that the programmes of development expenditure to be financed by borrowing in London are scrutinised by the Treasury with a view to ensuring all possible curtailment. In the case of India in the current year, the borrowing contemplated at home was £6½ millions. Following similar action already taken in regard to the self-governing colonies, the Treasury desired the omission of the bulk of the provision which we had included in our Railway programme for new lines, a request which was acceded to."

The Hon'ble Khan Bahadur Mir Asad Ali Khan asked :—

Muhammadan graduates and scholarships granted to Muhammadans.

5. "Will Government be pleased to state for each of the Indian Provinces—

(*a*) the number of Muhammadan graduates in Arts, Law, Medicine, and Engineering, respectively ;

(*b*) the number of scholarships for Muhammadans in each of the Indian Universities ; and

(*c*) the number of Muhammadans employed in the higher grades of the Public Services ?"

The Hon'ble Sir C. Sankaran Nair replied :—

"(*a*) A statement* is laid on the table.

(*b*) According to the most recent University Calendars there are 9 scholarships of the Bombay University exclusively reserved for Muhammadans, and 15 Government scholarships similarly reserved in connection with the Matriculation of the Punjab University. Scholarships in Persian and Arabic are also given in the Allahabad and Punjab Universities.

(*c*) The Hon'ble Member will find from a reference to the Gazette of India of the 13th January, 1912, that on the 10th January, 1912, the Hon'ble Sir James Meston, then Financial Secretary, laid a statement on the table which, among other things, showed for India as a whole the number of Muhammadans who in 1910 held appointments of the value of Rs. 500 and over, which is a reasonably fair definition of the higher grades of the public services to which the Hon'ble Member refers. Some later figures were compiled for the use of the Public Services Commission, but these can scarcely be made public in anticipation of the report of that body, and neither, in fact, were they in the precise form now asked for. These compilations involve very detailed inquiries, and as it is probable that relevant statistics will be attached to the report of the Public Services Commission, I would ask the Hon'ble Member to await the publication before pressing for anything further."

The Hon'ble Khan Bahadur Mir Asad Ali Khan asked :—

Candidates for University and public examinations.

6. "With reference to the reply given in Council on 22nd September, 1915, to parts (*b*), (*d*) and (*e*) of my question regarding candidates for University and public examinations, have the Government of India received the required information from Local Governments and the University of Calcutta? If so, will they be pleased to lay it on the table?"

The Hon'ble Sir C. Sankaran Nair replied :—

"The information has not yet been received from the Government of Bengal and the University of Calcutta. The replies received from the other Local Governments are laid on the table."†

* *Vide* Appendix A.

† Not included in these Proceedings.

[*Khan Bahadur Mir Asad Ali Khan; Sir R. W. Gillan; Maharaja Ranajit Sinha of Nashipur; Sir C. Sankaran Nair; Sir Fazulbhoy Currimbhoy.*] [20TH MARCH, 1916.]

The Hon'ble Khan Bahadur Mir Asad Ali Khan asked :—

Third and intermediate class carriages on mail trains.

7. "(*a*) Has the Railway Board referred my proposals *re* the provision of third and inter class carriages in mail trains between Manmad and Delhi, to the Railway Administration concerned, as promised in the answer given in Council on the 24th February, 1915, to my question on the subject?

(*b*) If so, will Government be pleased to state the result?"

The Hon'ble Sir R. W. Gillan replied :—

"(*a*) The reply is in the affirmative.

(*b*) The Railway Company report that it is impossible to attach either intermediate or third class carriages to the mail trains between Bombay and Delhi, as the first and second class carriages and the mail vans make up the full load of these trains. The Company run a fast daily train at mail speed between Bombay and Delhi, composed entirely of intermediate and third class carriages. Though this service is well patronised, it is not considered necessary at present to supplement it. The Railway Board, having considered the matter, are of opinion that they would not be justified in asking the Company to incur the large additional outlay involved in the running of yet another fast train between these points."

The Hon'ble Maharaja Ranajit Sinha of Nashipur asked :—

Experiments in clearing jungles.

8. "Will the Government be pleased to state if experiments in clearing jungles and undergrowth as an anti-malarial measure have been undertaken in any Province? If so, where and with what results?"

The Hon'ble Sir C. Sankaran Nair replied :—

"The effect of jungle or vegetation has been investigated in various tracts, as for instance by Major Marjoribanks in Salsette and Major Lalor in Katha, but the only experiment in clearing jungle and undergrowth as an anti-malarial measure which is mentioned in the official reports is an experiment recently concluded at Singanama in the Central Provinces The experiment lasted for 3 years, and after 2 years the spleen rate in the area affected fell from 92 to 62 per cent."

The Hon'ble Sir Fazulbhoy Currimbhoy asked :—

Infant mortality in India.

9. "(*a*) Is it a fact that infant mortality in India is 48 per cent, whereas it is 8 per cent in England and Wales, and 7 per cent in Australia?

(*b*) If so, is Government in a position to state the causes of this high rate of deaths in India?

(*c*) If the answer to (*b*) is in the negative, do Government propose to ascertain the causes at an early date, and publish the result for the information of the public?"

The Hon'ble Sir C. Sankaran Nair replied :—

"(*a*) The information available to Government appears to show that the figures stated by the Hon'ble Member need correction. In 1913, the mortality rate among infants under one year of age was in England and Wales 10·8 per cent and in the Commonwealth of Australia 7·2 per cent, while, in India, it was 19·2 per cent for males and 19·7 for females.

(*b*) The Government of India would refer the Hon'ble Member to paragraph 28 of their resolution on Indian sanitary policy dated 23rd May, 1914, and to the reply given to a somewhat similar question asked by the Hon'ble Sir Gangadhar Chitnavis in the Imperial Legislative Council on the 25th February, 1914."

[20TH MARCH, 1916.] [*Rai Sita Nath Ray Bahadur; Sir R. W. Gillan; Sir William Meyer.*]

The Hon'ble Rai Sita Nath Ray Bahadur asked :—

The Railway Commission.

10. "(*a*) Has the attention of the Government been drawn to the following portion of paragraph 61 of the Report on the Administration and Working of Indian Railways, by Mr. Thomas Robertson, C V.O., Special Commissioner for Indian Railways, namely :—' Under the provisions of the present Indian Railway Act, the calling into existence of the Railway Commission to hear complaints against Railways is considered so costly an undertaking that the Commission has never once been created ? '

(*b*) If so, do Government propose to give effect to the suggestion, put forward by Mr. T. Robertson, in the first portion of paragraph 61 of the Report referred to above that ' the Commissioners, in addition to their duties on the Board, should be employed in association with a Law Member when a question of law arises, as Commissioners for the purposes of Chapter V of the Indian Railways Act (IX of 1890), which regulates ' Railway Commissions and Traffic facilities ', the present Act being revised on the lines of the English Railway and Canal Traffic Act, 1888 (a copy of which is printed as Appendix F of the said Report) so as to permit of the Railway Commission always being in session ? '

The Hon'ble Sir R. W. Gillan replied :—

"(*a*) The reply is in the affirmative.

(*b*) As there is in India a Department of Government entrusted with the control of all railway matters, it is considered unnecessary to legislate in the manner suggested."

PRESIDENCY BANKS (AMENDMENT) BILL.

The Hon'ble Sir William Meyer :—"My Lord, I move for leave to introduce a Bill further to amend the Presidency Banks Act of 1876. The legislation proposed is really a corollary to the amendment of the Indian Trusts Act, effected during the current session of this Council, which enables trust funds to be invested in India sterling stock. When the Bill to amend the Trusts Act was published towards the close of last year, the Presidency Banks represented that, if India sterling stock was not one of the securities in which trust funds might be invested under section 20 (*a*) and (*b*) of the Trusts Act, as it then stood—this being the assumption on which the proposal to amend the Trusts Act was based—it is equally not a security in which the Presidency Banks are authorised to deal under section 36 (*a*) (1) and (2) of the Presidency Banks Act of 1876, the wording of the law being identical in each case in its description of securities of the British and Indian Governments

"The view taken by the Presidency Banks is correct. Under the Presidency Banks Act, as it stands at present, the position as regards this class of securities is, that the Banks are at liberty to transact business in the rupee paper of the Government of India and the sterling securities of the United Kingdom. It is now proposed to add India sterling stock to this list. The Amending Bill does not therefore represent any new departure : it will, if passed into law, merely have the effect of removing an unintended and inappropriate disadvantage which at present attaches to that portion of the securities of the Government of India which is issued in sterling. I may also refer incidentally to the fact that the Banks are at present authorised to deal in several other classes of securities besides those of Government, such as municipal debentures ; and it is anomalous that any class of Government securities should have a lower status than these for the purposes of the Presidency Banks Act.

"It is proposed to effect the object in view by adding to section 36 of the existing Act, as in clause 2 (*i*) of the Bill, a provision making express mention of India sterling stock. The Bill also contains some minor consequential amendments.

[*Sir William Meyer; The President; Pandit Madan Mohan Malaviya.*] [20TH MARCH, 1916.]

"As is mentioned in the Statement of Objects and Reasons, the Presidency Banks have in the past been under the impression that the existing Act already confers the power to transact business in India sterling stock, and in certain cases such stock has been actually purchased in this belief. Clause 4 of the Bill validates these past transactions, this following naturally from the fact that the legislation proposed is, as I have already explained, intended merely to rectify an evident anomaly.

"With these remarks, my Lord, I move for leave to introduce the Bill."

The motion was put and agreed to.

The Hon'ble Sir William Meyer :—"My Lord, I know formally introduce the Bill. Also, in view of the urgency of the matter, and the fact that this Bill, as I have explained, is merely ancillary to an amendment already effected in the Indian Trusts Act by this Council the other day, and that it merely sanctifies, so to speak, a practice which, as I have mentioned, has already been adopted in several cases, I beg to move your Excellency to suspend the Rules of Business, so as to admit of the Bill being taken into consideration."

His Excellency the President :—"I suspend the Rules of Business."

The Hon'ble Sir William Meyer :—"I now move that the Bill be taken into consideration."

The motion was put and agreed to.

The Hon'ble Sir William Meyer :—"My Lord, I now move that the Bill be passed."

The motion was put and agreed to.

RESOLUTION *RE* ABOLITION OF THE SYSTEM OF INDIAN INDENTURED LABOUR.

The Hon'ble Pandit Madan Mohan Malaviya :—"My Lord, I beg to move—

'That this Council recommend to the Governor General in Council that early steps be taken for the abolition of the system of Indian Indentured Labour.'

"It is now nearly eighty years since the system of indentured labour was first introduced in India. It followed in the wake of the abolition of slavery by the British Parliament in British Colonies. That happened in 1834, and at that time the planters in British Colonies, who severely suffered from the total abolition of slavery, tried to get labour from India in order to carry on their work. They could not reconcile themselves to the loss of slave labour, and the object that they had in view was to get persons who would work for them under conditions as favourable to them as they could establish. The Sanderson Committee, which was appointed a few years ago, said that the object of these planters was to re-establish the conditions of labour, so far as they could, which existed when slavery had not been abolished. 'The aim of the planters who had suffered so severely from the entire discontinuance of slave labour,' said the Committee, 'was too often to acquire complete control over the labour market by means of regulations and administrative measures which aimed at compelling the coolie to re-engage himself on the expiry of his indenture rather than encouraging free settlers.' In consequence of this feeling, the laws relating to Indian immigrants, introduced into several colonies, 'gradually assumed a complexion less and less favourable to freedom, and, as the report of subsequent

[20TH MARCH, 1916] [*Pandit Madan Mohan Malaviya*]

Commissions show, they were framed and administered in a spirit of substantial injustice to Indian immigrants.'

"Various serious abuses naturally cropped up under this system in different Colonies, and Commissions were appointed in Mauritius, British Guiana and Natal, and some of the most flagrant abuses were remedied. In the meantime, the establishment of recruiting depôts in India at various centres gave rise to complaints of kidnapping and other objectionable practices, and the question of revising the existing enactments relating to emigration was taken up for consideration in 1882, and an Act was passed in 1883. The aim of the new Emigration Act, Act XXI of 1883, was to ensure prompt and careful registration of emigrants, so as to enable them to be easily traced, and to provide for magisterial supervision of up-country depôts. But as the Resolution of the Government of India, issued in 1883, and the speech of Mr. Ilbert showed the object also was to make recruitment more popular: and in his evidence before the Sanderson Committee, Sir Edward Buck, who was for fifteen years Secretary to the Government of India in the Department of Revenue and Agriculture, said that the legislation of 1883 did make recruitment much easier.

"In 1908, the Emigration Acts were consolidated, and up to that time the Government of India were not much perturbed in mind as to the treatment which Indians received in the Colonies. In 1909, Lord Crewe appointed a Committee 'to consider (1) the general question of emigration from India to the Crown Colonies; (2) the particular Colonies in which Indian immigration may be most usefully encouraged; and (3) the general advantages to be reaped by India itself and each Colony.'

"During all this time the Government of India put their trust exclusively in the Colonial Governments and laws for the fair treatment of Indians during the period of indenture there. As the Hon'ble Mr. Ilbert stated, in presenting the Report of the Select Committee on the Indian Emigration Bill, in 1883, every precaution had been taken which our law could enforce 'that the emigrant should be properly treated from the time when he leaves the place where he is recruited to the time when he lands in the Colony for which he is bound. Further than this our law cannot follow him, and after this point we can only provide for his welfare by such influence as we can bring to bear on the Government of the country in which he has established himself.'

"In 1909, Lord Crewe appointed a Committee, as I have said, to go into various questions relating to Indian emigration, but the main object of that Committee also was to find into what particular Colonies Indian immigration could be most usefully encouraged. Evidently up to that time the Government did not realise that the treatment meted out to Indians in the Colonies by those under whom they were placed was such as called for very serious consideration.

"The Indian public was in a state of ignorance about the conditions to which Indians under indenture were subjected until the nineties, when Mr Gandhi began to expose its evils. But both the public and the Government realised the seriousness of the problem when the subject was forced upon their attention by the anti-Indian policy of the Transvaal Government. Since then the condition of Indians in all parts of the world has been a matter for anxious consideration, and it would be no exaggeration to say that, since it was brought to the fore, no question has exercised the public mind more or given rise to greater bitterness of feeling than the ill-treatment of Indians outside their country. I do not propose, my Lord, to refer here to the general question of the status of Indians in the British Empire, though it is a matter of deep and keen concern to all Indians. It may be that that question can best be settled when the war is over. But the question of indentured labour stands on quite a different footing and can be solved without delay.

"The Council will remember that, in 1910, our late lamented friend, Mr. Gokhale, moved a Resolution urging the prohibition of the recruitment of

[*Pandit Madan Mohan Malaviya.*] [20TH MARCH, 1916.]

indentured labour for the Colony of Natal. He was convinced even then, as he said, that the system should be done away with altogether. But he was content with urging, at the time, as a prudential measure, the prohibition of indentured labour to Natal, and the Government of India was pleased to accept that recommendation, and prohibited the supply of indentured labour so far as Natal was concerned. Two years later, he brought forward another Resolution urging the total abolition of the system, the evils of which he graphically described, and which he rightly characterized as 'a monstrous system, iniquitous in itself, based on fraud and maintained by force, a system so wholly opposed to modern sentiments of justice and humanity as to be a grave blot on the civilization of any country that tolerates it.' It was a matter of deep disappointment to the public that the Government of India were not convinced till then that the system was one which must be ended. They still hoped that it might be mended, and in that hope they appointed a Committee to visit the Colonies and to report on the actual working of the system. The report of Messrs. McNeill and Chimman Lal was submitted to Government more than a year ago, and I regret to say that the report was received by the public with great dissatisfaction and disappointment, as it unmistakeably showed a tendency to underrate the evils of the system and even to apologise for it. The facts, however, which the Committee have recorded tell their own plain tale, and supply abundant evidence to enable every impartial man to form his own judgment. That judgment is entirely against the system. For what in essence is the system? It is one under which simple, illiterate, ignorant village people, belonging largely to the poorest classes, are inveigled into entering into a very solemn agreement which compels them to leave their homes, to leave their kith and kin, and to go to a distant country of the conditions of existence in which they are entirely ignorant, to work in circumstances in which they are practically at the mercy of their employers, for a continuous period of five years, to work under men who do not understand their language, custom and manners, who have no sympathy with them, under conditions in settling which they have no voice, without being informed that they will be liable to be punished criminally, the punishment extending sometimes to two or three months' hard labour, if they fail to perform the tasks which are assigned to them.—tasks, in the fixing of which they have no voice and in making complaints against which they find but little support.

"A system like that, my Lord, is an utterly unfair system. It ought not to be called by the name of a contract as the word is known to legal minds and the legislative codes of the Government of India. Under this system these simple village people go out to distant lands, and are tied down to work there for five years. They cannot buy their freedom, because they have no means to do so. My Lord, in order to show how injuriously this system has worked, I would invite attention to some of its principal features. I will take up the question where the Emigration Act of 1908 left it. When the Bill of 1883 was under discussion in Council, it was proposed by the late Mr. Kristo Das Pal that the nature of the agreement into which the emigrant was asked to enter ought to be explained to him in a written statement with a copy of which he should be supplied. The Hon'ble Mr. Kristo Das Pal urged that it was highly desirable that, in the initial stage of the engagement, the emigrant should have a clear idea of the agreement he was about to enter upon. The Hon'ble Member said :—

'It is well known to Hon'ble Members that the emigrant is often an ignorant and illiterate person unable to read the statement before him, and would often ask the recruiter to read it. The recruiter, if he was inclined to deceive him, could quite easily do so. The emigrant was often entirely or almost entirely in the dark as to the nature of the life he would be called upon to live. It was at this stage that it was of the utmost importance that every facility should be given to him to understand the nature of his agreement, and that a statement should be given to him so as to enable him to take it home to show to the villagers and the village headmen and to consult them about it before making up his mind.'

[20TH MARCH, 1916.] [*Pandit Madan Mohan Malaviya.*]

"This amendment, my Lord, was carried by the casting vote of the then Viceroy, Lord Ripon and a provision was inserted, in the Act as follows :—

'The recruiter shall give a true copy of the statement to every person whom he invites to emigrate, and shall produce the statement for the information of any magistrate or officer in charge of a police-station, when called upon to do so by the magistrate or officer.'

"It is in consequence of this amendment, my Lord, that in the form of agreement now supplied to those whom it is sought to emigrate, a clause is put in stating that the period of service would be five years and the nature of the labour expected of him, and yet unfortunately all the information that is given to the man who is to be engaged of the nature of the labour which he is to be engaged on is, that it will be work in connection with the cultivation of the soil or the manufacture of produce at a plantation or domestic service. My Lord, nothing is said in the agreement as to the conditions under which he would have to live and work He was never informed that the moment he would set foot on board the steamer all his cherished ideas and beliefs about caste and religion would have to be abandoned under sheer compulsion ; that he would have to sit and dine in conditions under which he would never have consented to dine if he was a free man. My Lord, this has led to grave results. In the admirable report which Mr. Andrews and Mr. Pearson have published on indentured labour in Fiji, they say :—

'We found, further, on examination that the agreement, which the coolie signs before going out, does not truly represent the facts of coolie life in Fiji. It is a misleading document. Not a word, for instance, is said concerning the penalties which await the coolie, if, for any reason (which he may regard as valid) he refuses to work. Another serious omission from the agreement (seeing that those who sign it are for the most part ignorant and illiterate people) is the failure to record the fact that food-rates in Fiji differ materially from those in India. The coolie is told in the agreement, that he will be paid at the minimum rate of twelve annas a day. But he is not told that the purchasing power of twelve annas in Fiji is scarcely equal to that of five annas in India. He is not told, also, that more is required in the way of clothing and other necessaries of life in Fiji than in India. So that the bare living expenses are nearly three times as high in Fiji as in India itself.'

I should add that he is also not told that the 12 annas which is promised will not be paid to him unless he is able to finish the full task that will be set to him. He is also not told that he will be liable to lose in the shape of fines a good portion of the 12 annas. And as I have said before, he is also not told that there will be any interference with his religion. Apart from all other considerations, I am certain that if he was informed that there would be a violent interference with his religion, few of the recruits, however humble their caste, would consent to go to the Colonies.

"Let us, my Lord, now consider the nature of the service which the emigrant is to render. That service is described in the printed form of agreement as agricultural work or domestic service. But Messrs. Andrews and Pearson state it as a fact that some of these coolies, as they are called, have been compelled to perform the hateful task of cutting up meat in a butchery. My Lord, it would be utterly repugnant to all sense of fairness to suggest that domestic service can include the cutting up of meat in a butchery, and yet this has been forced upon our people. The results have been very sad. Mr Andrews says :—

'A low caste Hindu, who was brought out under indenture for 'agricultural work' was set to cut up meat in a butchery. When asked by us how he, a Hindu, could engage in such work, he replied that he could not help it, as he was ordered to do it.

'A *Kabir Panthi*, now out of indenture, had been originally obliged to do the same kind of work. He told us that he had continually refused and had been imprisoned. We looked up his record on the estate and found he had been given 692 days' imprisonment while under indenture'

"My Lord, the *Kabir Panthis* are a sect who have a deep-rooted honour of injuring life. That a man like that should be forced to cut up meat under compulsion in a place where he is utterly helpless is a matter which is very sad to reflect upon.

[*Pandit Madan Mohan Malaviya*] [20TH MARCH, 1916.]

"My Lord, let us now see who the recruiters are, and what are the devices that they resort to in dealing with the emigrants? In his evidence before the Sanderson Committee, Mr. J. A. Brown, C.S.I., a Commissioner of my Province, stated as follows :—

'My impression is that the recruiting staff is very bad; the recruiters are the worst kind of men they could possibly have. They are generally very low class men, and as far as I understand, they are paid by the results, by the number of emigrants that they get. The consequence is that they very often try to entice married women away from their husbands and try to get any body they can.'

In the western districts of the United Provinces the recruiter gets Rs. 45 per head for every male and Rs. 55 per head for every female whom he can induce to emigrate. In the eastern districts, he gets less; and so also in Madras My Lord, the temptation is strong enough to induce low class people to practise every fraud and deception they can for their selfish gain. The Sanderson Committee admit that a fair proportion of the emigrants leave India without having any clear idea of the duties they have to perform. 'They are uncomfortable it may be and welcome any change of circumstances, or they have quarrelled with their families, with their parents and leave their home in search of work and have not been able to find it.' But that is not all. Several of them are actually deceived and most unscrupulously so Say Mr. Andrews and Mr. Pearson :—

'In a very large number of cases the coolie's own home people knew nothing about his recruitment. Very possibly many such coolies were escaping from justice, or running away from some family quarrel at the time. But others were clearly quite simple village people, involved in no such trouble. They had lost perhaps their relations in a crowded railway station. They were on a pilgrimage and did not know the way. They were merely going from one village to another, when the recruiting agent came along and tempted them with his story. It was noticeable among the women how many were recruited at the pilgrim centres. The common narrative was, that the recruiting agent came up, offering to take the woman to her relations, or to show her some sacred shrine, and then took her to the depôt instead. The evidence given of such practices was far too circumstantial in detail, and far too frequently given with fresh detail and fresh names of places, to allow of any doubt concerning its substantial accuracy.'

"My Lord, time will not permit of my mentioning all the cases of deception which have been referred to by Messrs. Andrews and Pearson, and which are mentioned in the memorial of the Marwari Association. But there are just one or two which, I think, I should mention. After speaking of other cases, Mr. Andrews goes on to say :—

'We then went to see a *Gaur* Brahmin who had gone mad on account of his wife being taken away by the recruiting agent. The whole neighbourhood collected, showing their sympathy and pity. The madman was a pathetic sight to witness. Then a respectable Jat came up to us. His brother was blind and had an only son who was taken by the recruiters. A Hindu, by caste a Bania, spoke to us concerning his wife. She had been taken by the recruiters, and he was very bitter against them. We asked him if he had made any attempt to get her back. He said he could not.'

"My Lord, I have personal knowledge of several cases of deception practised by recruiters which have happened during the last few years in my Province. Many a time have I or some of my friends tried to get a woman rescued from the depôts. None but a magistrate or a person who has obtained a permit from a magistrate can enter any such depôts. When we enter them we ask for the woman who, we have been informed, has been induced by false pretences to go there. Either she is not produced, she is produced after being tutored to say exactly what the recruiter wishes her to say. If she says anything different, she knows she will be dealt with harshly by the recruiters. Mr. Andrews truly observes that the recruiting agent is able to stupefy these victims of his fraud with fear; he is able to coach them in the questions they will have to answer, and they very rarely refuse to reply according to his directions when the time comes.

"When the emigrant has embarked on board the steamer, he is confronted with the state of things which I have already mentioned. In addition to that there is absolutely no privacy for the modesty of women. Altogether the

[20TH MARCH, 1916.] [*Pandit Madan Mohan Malaviya.*]

conditions in which emigrants find themselves are so hard that, as Mr. Andrews points out, there have been lamentable and tragic cases of Indians, both men and women, who have thrown themselves into the Hughli in order to escape from the emigrant ships, and also of actual suicides occurring on the high seas.

"When the emigrants get to the Colonies, they are confronted with trouble of different characters. The hours of work fixed are about 7 hours in British and Dutch Guiana, and 9 hours in the remaining three Colonies. Including intervals for meals, the labourers have to be out for about 10 hours. This, my Lord, is too long, and in the case of women it is harder still. They have to get up between 3 and 4 in the morning to cook their food, and to be at the farm at about 5 and to remain there the whole day. What is worse, in the case of those who have children, they have to leave their children behind in order that work should not be interfered with. This is cruel enough But to show that it is worse still in practice, we have a case mentioned by Mr. Andrews in which an overseer actually whipped a woman who was taking her child with her because it was ill, and compelled her to leave it behind.

"In every Colony an adult male is paid, roughly speaking, at the rate of 12 annas per day, while the women receive 8 or 9 annas a day. But it would be a great mistake to think that their daily earnings amount to 12 or 9 annas. On the contrary their average earnings are very much less. As the subject is a very important one—it having been frequently asserted in favour of indentured emigration that it benefits the labourer financially—it is necessary to go into details. In Trinidad, the daily wages of an able-bodied adult male and an adult female are 12½ and 8 annas, respectively. But the average weekly earnings on the estates visited by the members of the Committee of 1913 amounted to 4*s*. 3*d*. or Rs. 3-3 only. The food of an active industrious man, says the report of the Committee of 1913, costs about Rs. 2-4, and that other wants may increase the expenditure to Rs. 2-10. This is the minimum expenditure. Thus the savings cannot amount to more than 9 annas per week. But so far no account has been taken of the labourer's family responsibilities. If these be taken into consideration the margin will appear to be more nominal than real. That this is the correct view to take is abundantly clear from the fact that the Committee appointed by the Government of India recommends that an average of 5*s*. 6*d*. or Rs. 4-2 should be aimed at. And if this result cannot be secured in any other way, it proposes that the wage unit should be raised or a bonus given to steady workers.

"Women earn from ½ to ⅔rds of what men do, and their wants cost from 2*s* 6*d*. upwards. Thus they hardly earn enough to maintain themselves. It is worth mentioning that, while the Committee of 1913 states that the wages per adult male averaged 4*s*. 3*d*. per week, it was stated before the Sanderson Committee that the labourers had long 'ceased to receive the 5*s*. 2½*d*. solemnly promised in India as a minimum, their present earnings being in the neighbourhood of 3 shillings per week.' It was contended that this was 'nothing short of deliberate misrepresentation.' 'The immigrants', it was said, 'were not promised 5*s*. 2½*d*. per week but 25 cents (12½ annas) per day for every day they worked. This they have never failed to receive' Were the labourers made to understand these subtleties when they were tempted to leave their country?

"My Lord, according to the figures supplied to the Sanderson Committee, the average weekly earnings in British Guiana in 1906, 1907 and 1908 amounted roughly to Rs 3. The average has apparently risen, as it is stated to have been Rs. 3-10 for 1910, 1911, 1912 and 1913. The cost of living being much the same as in Trinidad, it is clear that there is no margin for savings here. In Jamaica, the loss of working days owing to sickness is excessive, and it appears from the figures given by the Committee of 1913 that average earnings are below 9 annas per day, or less than Rs. 3-6 per week. The cost of living being slightly higher than in Trinidad, it is quite clear that the wages are insufficient. In Fiji, the wages are the same as elsewhere, while the cost of food and clothing is higher.

[*Pandit Madan Mohan Malaviya.*] [20TH MARCH, 1916.]

There is therefore even a smaller chance of saving anything here than elsewhere.

"The daily wages of an adult male are 13 annas in Dutch Guiana. But the average number of working days in 1909, 1910 and 1911 was 187, 187 and 177, respectively. Roughly speaking the average number of working days is about 180. The annual earnings therefore come to about Rs. 150. As the cost of food and clothing is about 4 shillings per week, the annual expenditure too is about Rs. 150. And yet the Committee of 1913 felt no compunction in saying—

'The proportion of annual remittances to India or deposits in the Savings Bank contributed by indentured immigrants is not known, but habits of remitting or saving are almost always formed during indentured service!'

"The observations of the Sanderson Committee confirm the accuracy of the facts mentioned above. It states that during the first one or two years the labourers can hardly be expected to save anything. That they are unable to lay by anything even in subsequent years is also clear from the facts mentioned by it. In British Guiana an attempt was made to induce the ex-indentured labourers to settle in the colony by enabling them to commute the right to a return passage for a grant of land. But the attempt proved unsuccessful, and in Sir Charles Bruce's opinion—

'The cause of failure was that the immigrants, when they became entitled to the return passage, were hardly yet in a sufficiently independent position to make their living entirely by the produce of their own land.'

And it may be noted here, adds the Committee,

'that later experiments of the same nature in other Colonies have been equally unsuccessful.'

Can there be a more convincing proof of the poverty of the Indian immigrant?

"The economic condition of the labourers may be tested in another way. In 1911-12, 469 statute adults, excluding those rejected or sent back as unfit, returned to India and brought back with them from Trinidad about £9,150. This gives an average of less than £20 per head after a stay of at least ten years. In 1912-13, 608 statute adults returned to India from British Guiana with savings amounting to about R1,45,000, which gives an average of R240 per head after a stay of at least ten years. From Fiji, 414 men brought back savings amounting to £13,800, which gives an average of £33 per head after a stay of at least ten years From Dutch Guiana, 603 men returned in 1911-12 bringing with them savings amounting to about £5,700, or about £9 per head after a stay of at least five years. With the exception of Fiji, the savings do not amount to much in the case of any colony. Besides, it has to be remembered that the savings include the earnings of immigrants—for at least five years in the case of the British colonies—as free men. There is nothing to show that any appreciable portion of the savings was accumulated during the period of indenture.

"Then, my Lord, as to the nature of the tasks imposed and the hardships of the conditions under which these immigrants work, the number of prosecutions gives very remarkable evidence. This is the cruellest part of the story. That the number is excessive has been admitted by the Sanderson Committee and the Committee appointed by the Government of India, and both have referred pointedly to it in their reports. It reveals the true nature of the indenture system, and shows that it is perilously akin to slavery. Men can be prosecuted not only for desertion or criminal conduct, but even for using insulting words or gestures. The whole of the evidence before the Committees of 1909 and 1913 was to the effect that Indians are very docile and law-abiding and very easy to manage. Why should there be such a large number of prosecutions then? Obviously, the system places too much power in the hands of overseers who seem to regard everything but silent and unquestioning obedience as a crime. In order to give an adequate idea of the extent of the evil, it is necessary to mention a few figures. There has been some improvement in recent years, but the position is still intolerable. In 1911-12, the indentured population in Trinidad was about 9,600, and

[20TH MARCH, 1916.] [*Pandit Madan Mohan Malaviya.*]

the number of prosecutions about 2,000! The percentage of prosecutions to the indentured population was, therefore, 21! The Committee appointed by the Government of India recommends that prosecutions should be reduced by the direct interference of the Immigration Department; and remarks that reliance on the Courts seems to have become 'a habit of mind with the majority of the managers.' In British Guiana, the number of indentured labourers was about 9,600 in 1912-13, and the percentage of prosecutions, which was much higher in previous years, was 18·3. On large estates the percentage varied from 0 to 32 per cent. The Committee of 1913 explain this in their own characteristic manner by saying —

'Though managers are very far indeed from being harsh towards their labourers, the majority have developed a wrong sense of proportion.'

" In Jamaica, with an indentured population of about 4,200, the percentage of prosecutions was 12 in 1912-13. Formerly it was much higher, but it has fallen very recently. For Fiji, the corresponding figures are 15,400 and 7·4 per cent. This figure is the lowest when compared with the percentages of other colonies, nevertheless it will be admitted that it is high enough. But for the peccant employers, say the Committee of 1913 in their cynical style —

'the palliating circumstance may be noted that they have been taught in a school which shows very little consideration for neglect or incompetence, and the impatience which they manifest towards the Indian is exactly the same as they manifest to all others.'

In Dutch Guiana, with its indentured population of 5,800, the percentage of complaints was 16·6 in 1911. It is thus seen that the position everywhere is highly unsatisfactory. The labourer's life is practically made intolerable. He is in a country where his language is not understood, and the Inspectors and Magistrates belong as a rule to the class from which the planters come. Knowing human nature as we do, it is idle to expect justice under such circumstances. Yet the Committee of 1913, in reviewing the whole subject, has the heart to say that—

'if too many labourers were judicially punished, all but the most worthless were gainers in skill, enterprise and self-respect!'

Can cynicism go further? One may be pardoned for asking what faith can be placed in the impartiality of men imbued with such extraordinary sentiments.

" My Lord, the most degrading feature of the indenture system is the immorality associated with it. The law requires that the number of female immigrants must be 40 per cent of that of the male immigrants, and the women need not be the relations of the male labourers The consequent paucity of women and the character of the women recruited have been a fruitful source of immorality. With the exception of Trinidad, the number of adult males in every colony is about twice that of the adult females. In Fiji and Dutch Guiana, the males are almost exactly twice as numerous as the females. In Jamaica, the number of men is 2½ times that of women. In Guiana, the proportion in the population above 15 years of age is as 3 to 2, and in the population above 20 years of age it is as 5 to 3. In Trinidad, the proportion of males to females in the total population is 7 to 5. If the adult population only were considered it would perhaps be appreciably higher. As to the character of the women recruited, the Sanderson Committee states that—

'the Government of India wrote long ago to the Secretary of State that they largely consisted of prostitutes, or women of the lowest classes in whom habits of honesty and decency are non-existent.'

And the Committee of 1913 states that —

'the women who come out consist, as to one-third, of married women who accompany their husbands, the remainder being mostly widows and women who have run away from their husbands or been put away by them. A small percentage are ordinary prostitutes.'

"The evil results of this outrageous system are easily—too easily—discernible in the lives of the people. We have fuller material to judge of them in the case of Fiji than in the case of other colonies. It will therefore be more profitable to discuss the state of things in Fiji. Mr. J. W. Burton denounced the immorality prevalent in the estate population some years ago

[*Pandit Madan Mohan Malaviya.*] [20TH MARCH, 1916.]

in scathing terms, and Messrs. Andrews and Pearson's experience confirms the accuracy of his statements—

'We cannot forget, they write, our first sight of the coolie lines in Fiji. The looks on the faces of the men and the women alike told one unmistakable tale of vice. The sight of young children in such surroundings was unbearable. And again and again, as we went from one plantation to another, we saw the same unmistakable look. It told us of a moral disease which was eating into the heart and life of the people. . . . . . Though we were no novices to conditions such as these, yet what we met with in Fiji was far worse than we had ever anticipated. There seemed to be some new and undefinable factor added,—some strange unaccountable epidemic of vice. The sanctity of the marriage tie is utterly disregarded and bestiality reigns supreme. Women exchange their husbands as often as they like, and girls are practically bought and sold. And the marriage law has made things worse. Religious marriages have no validity, and the children of unregistered unions are regarded as illegitimate. As the majority of Indian marriages are unregistered, one has not even to take the trouble of applying to the Courts for dissolving a union.'

"Sexual jealousy has inevitably led to a great increase in suicides and murders. A good proportion of the suicides must be attributed to the conditions of life on plantations, but the disproportion between the sexes is also partly responsible for it. The rate of suicide during 1908-1912 among the indentured Indians stood at the appallingly high figure of 926 per million, and among the non-indentured population at 147, while the rates for Madras and the United Provinces—the provinces from which the immigrants largely come—are only 45 and 63, respectively. As for murder, Messrs. Andrews and Pearson state that—

'There has been one conviction for murder each year in every 300 persons, or 333 per million per annum,'

while the corresponding proportion for Madras and the United Provinces is only 4.

'It is noticeable,' they add 'that the greater portion of the people murdered are women. On the other hand, almost all the suicides in Fiji are those of men. In India, what few suicides exist are generally those of women.'

"My Lord, what a horrifying record of shame and crime is unfolded here? One hopes that the other colonies are not subject to the same curse, but one fears that they are unfortunately no better.

'There is no doubt,' wrote the Committee of 1913, 'that the morality of an estate population compares very unfavourably with that of an Indian village, and that the trouble originates in the class of women who emigrate.'

While as to suicides, in Jamaica the mean suicide rate among indentured labourers during the decade 1903-04 to 1912-13, was 396 per million; among the indentured population in Trinidad during the same period the rates were 400 and 134 for the indentured and the free immigrants, respectively. In British Guiana, the corresponding figures are 100 and 52, and for Dutch Guiana, 91 and 49. These figures conclusively demonstrate the difference between the conditions of life of the indentured and the free labourers, and show the appalling state of things existing in Fiji, Trinidad and Jamaica. If anything were wanting to complete this picture of human degradation and misery, it might be stated that 90 per cent of the violent crime in Fiji is committed by Indians, while according to an Indian doctor of British Guiana the last census showed that 90 per cent of the beggars and 78 per cent of the lunatics were Indians.

"Even if all that is said about the financial prosperity of the indentured labourers is true, it is a matter of no consideration, when we reflect on the broken hearts and the blasted lives that are the outcome of the indenture system. Can any amount of wealth ever compensate for the utter loss of character that it necessarily entails? Of what use can such moral wrecks be to themselves or their fellow-men? What shall it profit a man if he gain the whole world but lose his own soul?

"My Lord, it has been shown that the indenture system is thoroughly indefensible. It begins, as Mr. Gokhale observed, in fraud and is maintained by force. It does not benefit the labourer. He can earn as much at home as abroad. On the contrary, it is a curse to him. And it lowers the status and wages of the free population and brings the name of India into contempt. It is

[20TH MARCH, 1916.]   [*Pandit Madan Mohan Malaviya ; The President.*]

a source of advantage to the capitalist only who uses the labourer as a tool, and the sooner a system like this, which permits of such heartless exploitation of human beings, is put an end to the better will it be for all concerned.

"My Lord, no reforms will prove sufficient; tinkering will not do; the system must be abolished root and branch. During the last three-quarters of a century a policy of tinkering has been tried and has failed. Commissions have been appointed to inquire into abuses, deputations have been sent to other countries, and changes have been made in the law to safeguard the interests of the labourers, but they have failed to combat the evil. On the contrary, the complaints are growing louder and louder, and its victims are crying to us for deliverance. Nothing short of a complete abolition of the system will meet the requirements of the case, and it is the duty of the Government of India to take that step unhesitatingly.

"My Lord, wherever the indenture system has been tried it has failed. It was tried in Natal, the period of indenture being five years, and we know how miserably it failed there. The introduction of Chinese labour under contract for five years led in the Transvaal to equally undesirable results, and it had to be abandoned. In the Straits Settlements and the Federated Malay States, the agreement is for 600 days only, but indentured labour is being steadily replaced by free labour, and the change has been attended with beneficial results.

"My Lord, European labour is employed all over the world, but nowhere are such degrading restrictions attached to it as those that attach to Indian labour. And although the European labourer is far more capable of judging of his own interests than the Indian labourer, the greatest care is taken to ensure that he has understood the exact terms of his contract. And then the contract, which is always for a very short period, is a purely civil contract, and can be cancelled if the labourer can prove in a Court of justice before a magistrate of his own race that unfair advantage was taken of his ignorance.

"My Lord, human reason and experience alike show that indentured labour is an unmitigated curse, and the greater the inequality between the contracting parties and the longer the period of contract, the greater is the extent of the evil. And both humanitarian and political considerations—humanitarian far more than political—demand that it should be abolished as early as possible and replaced by free labour, which is, after all, the most efficient form of labour. Indian indentured labourers have too long been denied their birthright as human beings, and it is high time that the yoke of slavery was removed from their necks.

"My Lord, I shall now conclude. I feel I have sufficiently pointed out the evils which are inseparable from the system of indentured labour It is a system which cannot be mended ; it is therefore necessary that it should be ended. My Lord, since it was announced that the Government of India had recommended the abolition of this system to the Secretary of State, there has been a great feeling of relief and thankfulness. The system has worked enough moral havoc during 75 years. We cannot think, my Lord, without intense pain and humiliation of the blasted lives of its victims, of the anguish of soul to which our numerous brothers and sisters have been subjected by this system. It is high time that this should be abolished. My Lord, the British Government abolished slavery and paid down £25 million for emancipating the slaves. The Government of India have sacrificed their opium revenue in order to save the Chinese people from its demoralising effects. It is to such a Government that we appeal against the utterly degrading and immoral system of indentured labour, and I am sure we do not appeal in vain. I feel confident that your Excellency's Government will be pleased, as we humbly beg to recommend, to put an end to this system at as early a date as possible."

His Excellency the President :—"We have listened with interest to the speech of the Hon'ble Pandit Madan Mohan Malaviya which has been

[*The President.*] [20TH MARCH, 1916.]

given with great clearness and moderation, and I rise at this early stage in the debate in order that Council may know at once that Government propose to accept this Resolution. I and my Government have, in fact, already taken the first steps towards the abolition of the system of Indian indentured labour which the Resolution recommends. In the autumn of last year, the Government of India addressed the Secretary of State reviewing the whole position in the light of the information contained in Messrs. McNeill and Chimmanlal's report, and especially bringing to his notice the feeling against the system which has intensified year by year in this country. We informed him that, in our opinion, the moment had come to urge His Majesty's Government to assent to the total abolition of the system in the four British Colonies where it still prevails, and in Surinam. We added that we could well understand that His Majesty's Government, with their heavy pre-occupations during the course of the war, might prefer to postpone the final settlement of the question till after the conclusion of peace; but that we felt that this was no reason why we should not place our views before them on the main issue of the continuance of the system, together with some preliminary suggestions for the solution of the problem of what the future conditions should be under which recruitment and emigration should be permitted. The Secretary of State has informed us, in reply, that he is entirely prepared to accept the policy of eventual abolition advocated by us, and we have his full authority to accept this Resolution. On behalf of His Majesty's Government he has asked us, however, to make it clear that the existing system of recruiting must be maintained until new conditions, under which labour should be permitted to proceed to the Colonies, should have been worked out in conjunction with the Colonial Office and the Crown Colonies concerned; until proper safeguards in the Colonies should have been provided; and until they should have had reasonable time to adjust themselves to the change, a period which must necessarily depend on circumstances and on conditions imperfectly known at present. I am confident that everyone will agree that, as the policy of the abolition of this system has now been definitely accepted and will be carried out, India can afford to accept this delay in a reasonable and generous spirit, recognising that the change should be effected with due regard to existing interests, especially to those important industries in the Colonies which have been built up on Indian labour, and on which the prosperity of some of the Colonies largely depends There is another reason why this measure of delay need not cause anxiety. Marked improvements have already been made in the treatment of indentured labourers, and others are now in process of realisation. The Government of Fiji passed in 1912 legislation substituting fines for imprisonment in the case of all ordinary offences against the labour law, and has now passed an Ordinance completely eliminating imprisonment for purely labour offences. An Indian Settlement Trust is being established in the same Colony to acquire and administer lands for Indian time-expired labourers, and the Colonial Sugar Refining Company, the principal concern which employs labour in the island, has guaranteed the advance of the necessary sums for financing this undertaking up to £100,000. Similarly, the Government of Trinidad has submitted to the Colonial Office and obtained approval of a draft Ordinance abolishing all imprisonment for labour offences. The Government of India also learn that the Secretary of State for the Colonies proposes to inform Jamaica and British Guiana, and also, in order to avoid all possibility of misconception, Fiji and Trinidad, that the power of imprisonment for labour offences must be completely eliminated from their respective Labour Ordinances before the end of the present year. There is therefore the less degree of urgency so far as the immediate interests of the coolies are concerned, and having the pledge of the British Government for the abolition of the indentured system, India can freely accept the condition that due time should be allowed for other arrangements to be made before the present system disappears for ever. For that matter the delay is also necessary in Indian interests. Some of the worst evils associated with indentured labour, for instance, the morally undesirable features of coolie life in the Colonies, cannot be attributed wholly, or even mainly, to the indenture, and might be found in much the

[20TH MARCH, 1916.] [*The President.*]

same degree under a system of free emigration, merely to abolish indentured emigration, a course which implies the refusal to allow any emigrant to leave the country under a contract, would only bring another set of evils in its train. It would mean that recruiters would induce coolies to go without any agreement, but by the grant of advances, or by fraud, while the Government of India would have greatly weakened their power of interference. Consequently an alternative plan for controlling the conditions of recruitment and emigration has to be worked out, and this must of necessity take some little time; but this need in no way detract from the sense of gladness with which Indians of all classes will learn that the indentured system is now doomed.

"It is a source of great satisfaction to me that I am able to make this announcement in Council to-day. I have always felt an irreconcilable prejudice against the system of indentured emigration from India to British Colonies, and as Council is aware, one of the earliest acts of my administration, and one which gave me profound pleasure, was the prohibition of such emigration to Natal. This narrowed the field of the problem, since the exclusion of Natal left indentured emigration open only to a small number of British Crown Colonies and to Surinam. In 1910, emigration to Mauritius was also prohibited ; and though the Government of India have subsequently been approached with a view to its resumption, we declined to consider the proposal. In this way considerable progress was made towards the abolition of the system, which was thus left in force only in respect of emigration to the four British Colonies of Jamaica, Trinidad, British Guiana and Fiji, and to the Dutch Colony of Surinam. My Government then passed the whole question under review in connection with the report of a Committee appointed by the then Secretary of State for the Colonies to consider the general question of emigration from India to the Crown Colonies, including the question of the general advantages to be reaped by India herself and by the particular Colonies concerned. The Committee was presided over by a distinguished ex-member of the Home Civil Service, and contained two gentlemen who had served in India and one member now in the Indian Civil Service, who had had special experience of the recruiting districts of the United Provinces. There was no reason to suppose that the Committee did not conduct their inquiry with due care and impartiality. The whole trend of their report was to show that the system afforded so much economic and material benefit to the coolies that it ought to be maintained in their interest, and when that late distinguished member of our body, Mr. Gokhale, raised the question four years ago, it was on these grounds, based on the data supplied by the Committee's report that my Government were unable to accept his motion that steps should immediately be taken for the total abolition of the system. But though we did not accept his motion, I was greatly impressed, as no one could fail to have been, by the intensity of the feeling against indentured emigration which the debate revealed in this country. Shortly afterwards, also, facts came to my notice which caused me to think that the examination of the question by the Colonial Emigration Committee had not been sufficiently thorough, and I decided to send a special deputation to examine the question anew on the spot in each of the Colonies concerned and in Surinam. I selected for this mission a member of the Indian Civil Service and an Indian gentleman chosen from the United Provinces, the province from which so many emigrants are drawn ; and, I confess, I hoped that their investigations would prove the deathblow of the system. In one sense, as I shall shortly explain, it has done so, but not in the immediate and decisive manner which I had hoped and expected. It must be admitted that the first impression produced on reading Mr. McNeill and Mr. Chimmanlal's report is that the evils of the system are not so serious as has sometimes been alleged ; and, in fact, the authors of the report have recorded their opinion that the advantages of the system as a whole outweigh its disadvantages, though they by no means ignore certain undesirable features which they wish to see removed. But in spite of their failure to condemn the system root and branch,

[*The President.*] [20TH MARCH, 1916.]

a detailed examination of their report has furnished material which forms an overwhelmingly strong indictment against the further continuance of indentured labour It has brought to our notice damning facts, which so far as I am aware had not been elicited by any previous inquiry, and which I am sure have impressed His Majesty's Government as they have impressed us, with the necessity of the system being brought to an end. I will tell Council briefly what these are.

"From the purely material point of view, the Government of India, like many other people, had in years gone by looked upon emigration to the Colonies as affording, if only to a limited extent, a means of relief for the congestion and poverty that unhappily prevail in the districts whence the supplies of emigrating labour are mostly drawn. A good deal of detail was given in the report regarding the earning capacity of coolies in the different Colonies. The opportunity was taken, when examining these figures, of comparing the wages which a cooly could earn in the different Colonies, with the wages which were being offered to the same class of men in the numerous parts of India, where there was a good demand for labour, of comparing not only the wages, but the purchasing power of those wages. The elaborate details given in the report brought out in a very striking fashion the effect of the high prices which prevailed in most of the labour Colonies on the value of the cash earnings of the labourer and his family. Not to weary Council with a mass of details, I may state that in the four British Colonies, of which I have been speaking, the average adult labourer, provided that he spends little or nothing except on food and clothes, can save from under 1*s*. to about 3*s*. a week. I need hardly explain that, as a matter of fact, he never saves anything like as much as this, but that is after all a matter of human nature. Now I do not wish it to be understood that I am in any way accusing the Colonial employers of paying unreasonably low wages; nor do I wish to minimise the advantages of the prospects that lie before the cooly who has worked through his term of indenture. The labourer who works hard and lives thriftily and keeps himself out of trouble among surroundings which, as I shall explain presently, are morally very undesirable, is usually in a very few years after the period of what we may call his 'economic probation,' able to find for himself a home and a piece of land, or employment in one of the towns from which he can soon gain a very comfortable competence. This I am ready to admit, but why should the labourer have to journey thousands of miles over the 'black water' to settle in a strange country and to place himself for a long period under conditions often of an undesirable, and in some cases of a revolting, nature, in order to achieve the desired end, when he can obtain in India the choice of either better-paid labour, as, for instance, in the big jute areas of Eastern Bengal; or almost equally well-paid labour with the prospects of obtaining in a very few years a home and a piece of land on the Assam tea gardens? It seems rather absurd to find a man going to Fiji for a wage of 26*s* a month with rice at 2¼ seers to the rupee when he can readily earn 6 or 7*s*. a week during the jute season in Eastern Bengal with rice selling at a third of the price prevailing in Fiji, with the additional advantage that he can, if he likes, with far greater ease, take his family with him to add to his earnings than in the case of distant Colonies. It is clear, then, that the cooly himself does not stand to gain very much by emigration. From the point of view of India as a whole, it can hardly be seriously argued that indentured emigration to the Colonies is an important safety-valve for congested districts in India, seeing that the total emigration on indenture to the four tropical Colonies during the year 1913, amounted only to a little over 7,700 persons, whereas in the same year, Madras alone sent 117,000 coolies to the Straits Settlements and 190,000 to Ceylon.

"I now turn to a more important and far more unpleasant aspect of the case. It has very long been known and regretted that the sex proportion of the emigrants was unsatisfactory. This of course is not a matter which arises out of the question of indenture. What we are, however, concerned with is the effect which this sex ratio has on the conditions under which the indentured

[20TH MARCH, 1916.] [*The President.*]

cooly has perforce to live during the period of his indenture. Here the Government of India for the first time received full information of certain details which showed that there must be something very wrong indeed with the conditions under which these men were living. The death-rate among indentured coolies has been decidedly high in some Colonies, but the Government of India had never before been able fully to examine details regarding the share in this death-rate attributable to suicides. The figures were truly startling. The average rate of suicides per million of all ages are 45 in Madras and 63 in the United Provinces. Suicides are especially frequent among persons of the usual age of the indentured labourers, *i.e.*, between the ages of 20 and 30, and we may make a liberal allowance in this respect. But in the Colonies we find the following figures for suicides per million. British Guiana, free population 52, indentured 100; Trinidad, free population 134, indentured 400; Fiji, free population 147, indentured 926. I do not think we have to seek very far for the cause of the state of things which these figures reveal. In a Parliamentary Report for March 1914, the sex proportion among the average Indian population of the various Colonies showed that in Trinidad and Tobago, there were nearly twice as many males as females; in British Guiana, there were about 26 per cent. more, while in Fiji, there were nearly 2½ times as many males as females. As might be expected from these figures, there is strong unofficial evidence to show that the sexual immorality prevailing among the coolies is appalling, and that domestic relations are largely in abeyance. Such sordid and miserable conditions may well predispose an unhappy man to suicide.

"Again, a necessary result of all systems of indentured labour is the enforcement in the Courts of law of breaches of its conditions. I gladly admit that prosecutions have, largely in response to our repeated and earnest representations, shown a considerable diminution; but, even so, the average percentage of prosecutions to indentured population during recent years has been—

In Trinidad	23 per cent.
In British Guiana	19 "
In Jamaica	12 "
In Fiji	13 "

"The same individual is no doubt often prosecuted more than once, and we must make due allowance for this fact. But it is surely an inevitable deduction from the facts and figures I have just been placing before you that the ultimate force which drives to his death a cooly depressed by home sickness, jealousy, domestic unhappiness or any other cause, is the feeling of being bound to serve for a fixed period and amidst surroundings which it is out of his power to change. We may fully admit that the undesirable sex proportion may have more to do with this even than the system of indenture itself. This is a matter which in any case will have to be put right. But, at any rate, we are at last in a position to free ourselves from the responsibility of compelling the cooly to remain under these conditions without the power of being able to select the place in which, and the master for whom, he will work. I do not wish it to be thought that I am taking a prejudiced view of the action of the Colonies; in matters that concern the physical well-being of the coolies, they have done their utmost. I have already told you of the action taken by the Colonial Government in Fiji to abolish the system of imprisonment for labour offences, how this action has been approved by His Majesty's Government, and its extension to other Colonies insisted on. I mentioned also the Fiji scheme for the settlement of Indian labourers on the land. I am not in a position to say that the action taken in Fiji was directly due to the proposals made by Messrs. McNeill and Chimmanlal, but it is no doubt true that the recent policy of the Colonial Government has been largely in keeping with their recommendations.

"I feel that we all owe a deep debt of gratitude to the Secretary of State for India and to His Majesty's Government for their prompt and sympathetic

[*The President: Mr. Dadabhoy; Khan Bahadur Mian Muhammad Shafi.*] [20TH MARCH, 1916.]

response to the representations which I and my Government placed before them, and it is fitting for me to take this opportunity of publicly acknowledging their action. Their attitude in the matter fills me with assurance that, what has been promised, will be performed to the letter, and that the end of the system, which has been productive of so much unhappiness and wickedness and has been, relatively speaking of so small an advantage to this country, is now in sight. No one, who knows anything of Indian sentiment, can remain ignorant of the deep and genuine disgust to which the continuance of the indentured system has given rise. Educated Indians look on it, they tell us, as a badge of helotry. This is soon to be removed for ever; and it is a source of deep personal satisfaction to myself that one of the last official acts that I shall perform in this country is to tell you that I have been able to do something to ensure that Indians, who desire to work as labourers in the tropical Colonies may do so under happier conditions; and to obtain from His Majesty's Government the promise of the abolition in due course of a system which educated opinion in India has for long regarded as intolerable and as a stigma upon their race."

The Hon'ble Mr. Dadabhoy :—" My Lord, I shall not detain the Council after the full, exhaustive and pathetic history of the system placed before the Council by your Excellency.

"The announcement which your Excellency has just made will be received with feelings of genuine satisfaction all over the country and with a sense of great relief. The theory was long held that this indentured system benefited the Colonies, but the truth is now dawning upon the Colonial authorities also that the moral degradation inseparable from it may prove a serious offset to the temporary material gain. It is not necessary to quote the high authority of Lord Selborne, who, as High Commissioner of South Africa, stated that the system was even worse for the emplcyers than for the employed. For the peace, security and good name of the Colonies and in the interests of colonial administration, therefore, the system should be abolished. To my mind the facts laid before the Council by your Excellency to-day are conclusive, and the system stands condemned and is absolutely wanting in justification. Your Excellency has always felt strongly for the Indian emigrant, and has championed his cause with an earnestness and firmness which have been a surprise to the world, and which have excited comment in interested quarters. The abolition of this system is a fitting sequel to all your Excellency has done before. The short delay that will be caused in giving effect to this decision of your Excellency's Government wiil not, I would fain hope, cause any serious hardship. As your Excellency has rightly remarked, the delay may be even justified in Indian interests. My Lord, before I sit down, I desire to add my humble tribute of respect and gratitude to the Secretary of State for India and to your Excellency's Government for this great act of justice to India."

The Hon'ble Khan Bahadur Mian Muhammad Shafi :— " My Lord, on behalf of the people of my Province I crave permission to offer to your Excellency our grateful thanks for the wise and statesmanlike action taken by your Excellency's Government in connection with the abolition of indentured labour and to His Majesty's Government for their acceptance of the recommendation of the Government of India. After the exhaustive survey of the whole question contained in the eloquent speech which your Excellency has delivered to-day, it is absolutely unnecessary for me, or for any other member of this Council to take up unnecessarily the time of the Council in discussing it further. Indeed so unjustifiable is the existence of this iniquitous system, and so directly opposed to all British ideas of freedom and liberty, that some of us have often wondered why this system has been permitted to exist so long. But, in accordance with the well-known Arabic saying *kúllo shai an marhoonan ba aúqatiha* it was destined for a Viceroy who by reason of his sympathy for the people of this country has won a place all

[20TH MARCH, 1916.] [*Khan Bahadur Mian Muhammad Shafi; Pandit Madan Mohan Malaviya; Mr. C. Vijiaraghavachariar; The President.*]

his own in their affections, to obliterate this modern blot on the Indian escutcheon.

"My Lord, I do not wish to detain the Council much longer. I will content myself by saying that by the recommendation which your Excellency has made to His Majesty's Government in regard to the abolition of the indentured system, you have added to the heavy debt of gratitude which India and her people already owe you.

"With these few words, my Lord, I support the Resolution."

The Hon'ble Pandit Madan Mohan Malaviya:—"My Lord, on behalf of the people of my country I beg to offer our humble and deep gratitude to your Excellency, to your Excellency's Government and to the Secretary of State for India for the righteous decision which has been arrived at and which your Excellency has been pleased to announce to-day. My Lord, the news of that decision will be received with great relief and deep gratitude all over the country, and Indians will be particularly grateful to your Excellency for having added one more obligation to the many which your Excellency had already placed them under, particularly so in a matter in which humanity was so deeply concerned. My Lord, there is only one request which I beg leave to place before you. In the circumstances which you have explained, the country will understand that a little time must elapse before the system can be entirely obliterated; but I submit, my Lord, that as the Government are aware that a great deal of fraud and misrepresentation are practised in recruiting emigrants, the Government should be pleased to issue instructions that, so long as recruiting is permitted, every care should be taken to eliminate fraud and misrepresentation from it. Secondly, my Lord, that full effect should be given to the intention of the legislature as embodied in the law which was passed in 1883, requiring that the emigrant should be fully informed of the nature of the service he is called upon to enter, and should be given a clear idea of the life he will be called upon to live. It should be insisted upon that not a single more Indian should be allowed to go out of his country in ignorance of the facts which will materially affect his life and happiness. And lastly, that no service or condition of life should be imposed upon any Indian who emigrates under the sanction of the Government, which will go against his religion.

"I hope, my Lord, that it will be possible to consider these three questions and to give effect to them, so that, so long as the system does continue, these causes of complaint shall be eliminated.

"With these few words, my Lord, I once more beg to offer on behalf of the people of this country our deepest gratitude to your Excellency and the Government for the acceptance of this Resolution."

The Hon'ble Mr. C. Vijiaraghavachariar:—"My Lord, although the Government have accepted the Resolution and the Hon'ble Pandit has replied, there are some other speakers who would like to say something. I believe that the Hon'ble Pandit was a little too soon on his legs."

His Excellency the President:—"If you wish to speak I will allow you to do so."

The Hon'ble Mr. C. Vijiaraghavachariar:—"Thank you, my Lord, I only wish to say a few words in connection with one part of your Lordship's speech. I need hardly say this is the crowning act of your Lordship's administration, and the gratitude of the country will forever follow you wherever you are, and I need hardly say also that the gratitude of the country is due to His Majesty's Government and to the Secretary of State

in particular. I would call special attention to one part of your Lordship's speech, and that is, with regard to the important observation that this question of indentured labour and so-called free immigration should be dealt with together. The wisdom of this observation is apparent. We must take very great care that in the abolition of indentured labour, we do not permit the so-called free immigration to assume the evils which indentured labour assumed on the abolition of slavery. In the light of that weighty observation of your Lordship's, I do venture to say that we are prepared to welcome the delay that will be necessary in working out a proper plan and a proper programme. But as to another part, *viz.*, that the Colonies should be consulted, I am not clear that the country will be so very easily satisfied. With due respect to your Excellency and to His Majesty's Government, it looks as if India had entered into a treaty with the Colonies to supply indentured labour to all of them. I very respectfully but firmly protest against the Colonies being given a voice in the adjustments of this country for the well-being of the poor and peasantry of this country. This indentured labour and so-called free immigration have been emasculating this country and have been demoralising it. Your Excellency has already stated, and stated in a few words, that the disproportion of the sexes abroad causes demoralization. I would add as a supplement and corollary, the great surplus number of the women left here, together with the returned emigrants, all these contribute to a kind of demoralization in India which we have not thoroughly investigated

"For all these reasons I very respectfully submit that, while we are entitled to consult the wishes of the Colonial Governments, we must take very great care that the solution of the problem does not rest in their hands, and that they should not be allowed to retard the progress which your Lordship has conceived and which your Lordship has succeeded in persuading His Majesty's Government to accept.

"With these few remarks, I very respectfully tender my thanks on behalf of this country to your Lordship and to His Majesty's Government."

The Resolution was put and accepted.

The Council adjourned to Tuesday, the 21st March, 1916.

A. P. MUDDIMAN,

Secretary to the Government of India,

Legislative Department.

DELHI:

The 29th March, 1916.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

PROCEEDINGS OF THE INDIAN LEGISLATIVE COUNCIL ASSEMBLED UNDER THE PROVISIONS OF THE GOVERNMENT OF INDIA ACT, 1915 (5 & 6 Geo. V, Ch. 61).

The Council met at the Council Chamber, Imperial Secretariat, Delhi, on Tuesday, the 21st March, 1916.

PRESENT:

The Hon'ble Sir WILLIAM CLARK, K.C.S.I., C.M.G., *Vice*-President, *presiding*, and 56 Members, of whom 49 were Additional Members.

QUESTIONS AND ANSWERS.

The Hon'ble Pandit Madan Mohan Malaviya asked :—

Public Works Department Rest Houses in the Punjab.

1. "(*a*) Is it a fact that a circular issued by the Government of the Punjab in 1904 prohibits the use of departmental rest-houses by families of the Indian officers of the Public Works Department, unless the written sanction of the Superintending Engineer has been previously obtained, while no such permission is required in the case of the families of European officers and even of European upper grade subordinates of the Department?

(*b*) Have the Government of India received a memorial submitted to them through the Punjab Government by Indian officers of the Public Works Department of that province praying for a redress of this grievance?

(*c*) Is it a fact that both European and Indian officers were treated alike in this respect in the Punjab till 1904 without giving rise to any complaint?

(*d*) Do the Government of India propose to advise the Punjab Government to cancel the circular above referred to?"

[*Mr. C. H. A. Hill; Khan Bahadur Mir Asad Ali Khan; Mr. Low; Sir Reginald Craddock; Sir C. Sankaran Nair.*] [21ST MARCH, 1916.]

The Hon'ble Mr. C. H. A. Hill replied :—

" (*a*) and (*c*). The Government of India have no information in regard to the Circular in question. The framing of rules regarding the occupation of rest-houses is a matter entirely within the discretion of the Local Government.

(*b*) A number of Memorials were recently received direct by the Government of India from Indian Officers of the Punjab Public Works Department, and this being in contravention of the rules relating to submission of Memorials, they were forwarded to the Local Government for return to the Memorialists for resubmission through the proper channel, namely, through the Local Government.

(*d*) The Government of India do not propose to take any action in the absence of full information."

The Hon'ble Khan Bahadur Mir Asad Ali Khan asked :—

Levy of fees under the Indian Companies Act.

2. " With reference to the answer given in Council on the 8th September, 1915, to my question *re* levy of fees under the Indian Companies Act, 1913, have the Government decided to reduce the fees payable under the Act ? "

The Hon'ble Mr. Low replied :—

" The matter referred to in the Hon'ble Member's question is still under consideration. It is regretted that, owing to the pressure of more urgent business, it has not been found possible to arrive at any conclusion regarding the levy of the fees in question, but the Government of India hope to do so shortly."

The Hon'ble Khan Bahadur Mir Asad Ali Khan asked :—

Indian Police and Criminal Investigation Department.

3. "With reference to the answer given in Council on the 1st October, 1915, to my question *re* the strength of the Indian Police and Criminal Investigation Department, have the Government now obtained complete figures in answer to the same; if so, will the Government be pleased to lay them on the table ? "

The Hon'ble Sir Reginald Craddock replied :—

" The Government of India have not yet been furnished with replies from all Local Governments to the reference made to them. The figures in question will be laid on the table when available."

The Hon'ble Khan Bahadur Mir Asad Ali Khan asked :—

Village panchayats.

4. " (*a*) Will the Government be pleased to state the number of village panchayats entrusted with general administrative functions and established under the various Local Self-Government Acts in the different provinces of British India ?

(*b*) Do such panchayats contain non-official members ?"

The Hon'ble Sir C. Sankaran Nair replied :—

"(*a*) Village panchayats of the kind referred to by the Hon'ble Member exist in Madras, Bengal, Bihar and Orissa, and Assam. In 1914-15, there were 398 union panchayats in Madras, 76 union committees in Bengal, 12 union committees in Bihar and Orissa, and 8 village authorities in Assam.

(*b*) In Madras all union panchayats contain non-official members.

In Bengal and Bihar and Orissa, save for reasons to be stated in an order in writing made by the Local Government, members of union committees are bound to be elected from among the residents of the union.

[21ST MARCH, 1916.] [*Khan Bahadur Mir Asad Ali Khan; Mr. Low; Mr. Rama Rayaningar; Mr. C. H. A. Hill; Mr. C. Vijiaraghavachariar.*]

In Assam, members of a village authority may be wholly appointed or wholly elected or partly appointed and partly elected."

The Hon'ble Khan Bahadur Mir Asad Ali Khan asked :—

Post office holidays in Madras.

5. "With reference to the answer given in Council on the 22nd September, 1915, to my question *re* Post Office holidays for Mussalmans in Madras, have the Government considered the desirability of including Id-uz-Zuha in the list of holidays to be observed in 1916, and if not, do Government propose to do so?"

The Hon'ble Mr. Low replied :—

"In connection with the question of allowing in Madras a second Post Office holiday for Mohammadans in addition to the Ramzan, the desirability of making that holiday the Id-uz-Zuha was considered. But the Id-uz-Zuha in 1916, is expected to fall on Sunday, the 8th October, which is already a regular Post Office holiday, and for this reason it was considered advisable to make the Moharam the second Muhammadan Post Office holiday."

The Hon'ble Mr. Rama Rayaningar asked :—

Economic condition of the rural population in India.

6. "(*a*) Have Government had under consideration the economic condition of the rural population in India?

(*b*) If not, will Government be pleased to consider the desirability of holding an inquiry into such condition?"

The Hon'ble Mr. C. H. A. Hill replied :—

"The economic condition of the rural population is one of the most intimate concerns of the Government; it is a matter on which they possess very full and continuous information; and it is the governing factor in many lines of administrative activity. There is no particular aspect of it, however, which, in their view, calls for special inquiry at the present moment."

The Hon'ble Mr. C. Vijiaraghavachariar asked :—

Representation of Indian interests on the Trade Conference to be held in Paris.

7. "(*a*) Has the attention of Government been called to a report which has appeared in the press that the Allied Governments propose to hold a Trade Conference at Paris?

(*b*) If so, do Government propose to take steps for the purpose of securing direct representation, in that Conference, of Indian interests by representatives from this country, official and non-official?"

The Hon'ble Mr. Low replied :—

"(*a*) The answer to the first part of the question is in the affirmative.

(*b*) As regards the second part, the Conference in question has been convened to consider, firstly, the possibility of putting further concerted economic pressure on the enemy during the war; and, secondly, to interchange views as to meeting the changed economic conditions after the war. The Prime Minister in a speech delivered on 7th March to a deputation from the Chamber of Commerce, has emphatically stated that the interests of every part of the Empire, India being specifically mentioned, would be borne in mind in entering on the Conference, and on the next day in the House of Commons he further explained that His Majesty's Government's representatives would return from Paris absolutely uncommitted to any specific measures, and that the Empire would be taken into Council before any policy was settled. The Government of India have further been informed by the Secretary of State in reply to their inquiry that, if as a result of the Conference any action should be contemplated, no step will be taken without full consultation with this Government and with the Governments of the Dominions."

[*Raja Sir Muhammad Ali Muhammad Khan of Mahmudabad; Sir C. Sankaran Nair; Maharaja Ranajit Sinha of Nashipur; Mr. Low; Mr. Dadabhoy; Mr. Abbott.*] [21ST MARCH, 1916.]

The Hon'ble Raja Sir Muhammad Ali Muhammad Khan of Mahmudabad asked:—

Dacca and Patna Universities.

8. "Is it a fact that the proposed Dacca and Patna Universities are intended to be teaching Universities, but with power to affiliate outside Colleges and Schools?"

The Hon'ble Sir C. Sankaran Nair replied:—

"The Patna University will exercise jurisdiction over all Colleges situated in the Province of Bihar and Orissa. The University will also itself impart instruction in certain branches and grades. The Dacca University will be a local teaching University with constituent Colleges within a very limited area. The Universities will have no connection with High Schools."

The Hon'ble Maharaja Ranajit Sinha of Nashipur asked:—

Indentured emigration to the Colonies.

9. "Will the Government be pleased to state if they have received a memorial from the Marwari Association of Calcutta regarding the abolition of the system of indentured emigration of Indians to the Colonies? If so, what orders have been passed in the matter."

The Hon'ble Mr. Low replied:—

"The memorial referred to by the Hon'ble Member has been received by the Government of India and forwarded to the Secretary of State with reference to their despatch recommending the abolition of indentured emigration."

The Hon'ble Mr. Dadabhoy asked:—

Excise duty on beer and potable spirit manufactured in India.

10. "With reference to 'the usual practice' alluded to in the Hon'ble Finance Member's speech on the 1st March in connection with the excise duty on locally manufactured beer and potable spirit manufactured in India known as 'foreign spirit,' will Government be pleased to state the principles on which it is based, and to lay on the table the papers relating to the imposition?"

The Hon'ble Mr. Low replied:—

"With regard to the first part of the Hon'ble Member's question, I would invite his attention to the late Sir Edward Baker's speech in Council on the 26th January, 1906, to the Statement of Objects and Reasons to the Tariff Amendment Bill of 1910, and to Sir James (then Mr.) Meston's speech of the 25th February, 1910, introducing that Bill. In accordance with their policy in enhancing the rates of duty on country liquor, the Government of India have consistently advanced the rates of excise duty on foreign spirits and fermented liquors produced in India to the highest possible level, and have therefore imposed excise duties equal to the import duties on such liquors.

With regard to the second part of the question, I lay on the table copies* of the orders issued to the Local Governments and Administrations on the subject on the 26th and 28th February and the 1st March, 1916."

The Hon'ble Mr. Abbott asked:—

Indian Subordinate Medical Department.

11. "(*a*) With reference to the reply given in Council on the 17th September, 1913, to my question on the subject, have the Government come to any decision on the question of the elimination of the term 'Subordinate' from the official designation of the Indian Subordinate Medical Department?

* Not included in these Proceedings.

[21ST MARCH, 1916.] [*Mr. Abbott; The Commander-in-Chief; Sir William Meyer.*]

(*b*) If the answer to (*a*) is in the negative, will the Government be pleased to state—

(1) whether any other Military Department or Corps is officially termed 'Subordinate,' and

(2) whether it has been brought to the notice of Government that, owing to the use of this term, Military Assistant Surgeons, when employed as Civil Surgeons or as Medical Officers of Railways, labour under grave official and social disadvantage?

(*c*) Is it a fact that in November, 1914, an increased rate of pay was sanctioned for Military Assistant Surgeons, but that a higher rate of pension proportionate to such increased rate has not been granted to them? If so, will Government be pleased to state their reasons for deciding to withhold such increase of pension, and do they propose to reconsider their decision?

(*d*) Is it a fact that commissions in the Indian Medical Service have never been granted to Military Assistant Surgeons, while such commissions have been granted to Civil Assistant Surgeons serving in a subordinate capacity under Military Assistant Surgeons?"

His Excellency the Commander-in-Chief replied:—

"(*a*) The reply is in the negative. As stated on the 8th March, 19·5, in reply to a similar question by the Hon'ble Member, the matter has been referred to the Right Hon'ble the Secretary of State for India, who has deferred his decision, pending the report of the Commission on Public Services regarding medical organisation.

(*b*) (1) The reply is in the affirmative.

(2) The reply is in the negative. Members of the Indian Subordinate Medical Department holding charge of Civil Surgeoncies or employed as medical officers of Railways are designated Civil Surgeons (District Medical, and Sanitary Officers or Civil Surgeons in Madras), or Railway Medical Officers, and not Military Assistant Surgeons of the Indian Subordinate Medical Department.

(*c*) Rates of pension in the Indian Subordinate Medical Department are granted according to military rank at the time of retirement, and not with reference to the rates of pay drawn. The question of revising the rates of pension is, however, under consideration.

(*d*) The reply is in the affirmative so far as Military Assistant Surgeons are concerned. During the war some Civil Assistant Surgeons have been granted *temporary* commissions in the Indian Medical Service, but the Government of India have no information whether any of these have ever served in a subordinate capacity under Military Assistant Surgeons."

BUDGET FOR 1916-17.

The Hon'ble Sir William Meyer:—"Sir, I rise to present the Budget of the Government of India for 1916-17. The Preliminary Estimates which I laid before the Council on the 1st March have been revised in the light of our latest information. The Financial Secretary's Explanatory Memorandum has also been checked and brought up to date.

"2. The final figures of the Revised Estimate for 1915-16 and of the Budget Estimate for 1916-17 are given in the statements which I have to-day laid before the Council. The broad results of the revenue account are brought out in the table below, in which I have also shown, in brackets, for convenience of comparison the figures now superseded, which were given in the corresponding

[*Sir William Meyer.*] [21ST MARCH, 1916.]

table appearing in paragraph 61 of my speech introducing the Financial Statement.

[In millions of pounds]

	Budget, 1915-16.			Revised, 1915 16.			Budget, 1916-17.		
	Imperial.	Provincial	Total.	**Imperial.**	Provincial	Total.	**Imperial.**	Provincial	Total.
Revenue	**49·650**	30·750	80·400	**52·594 (51·982)**	30·732 (30·638)	83·326 (82·620)	**55·925 (55·651)**	30·603 (30·548)	86·528 (86·109)
Expenditure	**52·607**	31·828	84·435	**54·388 (53·968)**	31·297 (31·296)	85·685 (85·264)	**55·099 (54·599)**	30·956 (30·913)	86·055 (85·512)
Surplus (+) or deficit (—).	**—2·957**	—1·078	—4·035	**—1·794 (—1·986)**	—·565 (—·658)	—2·359 (—2·644)	**+·826 (+1·052)**	—·353 (—·365)	+·473 (+·687)

" 3. The effect of our corrections in the Revised Estimate for the current year is to reduce the Imperial deficit previously announced by £192.000 and the Provincial deficit by £93,000. On the Imperial side, there are three alterations of some importance. The Railway revenue has shown a still further improvement in February, and we have raised our estimate of gross receipts by £400,000. On the other hand, we have had to allow for an increase of £175,000 in Opium expenditure, owing to the circumstance that our payments for the Malwa opium which we purchase in the spring are being effected for the most part just at the close of the financial year instead of at the opening of the following year. This is due to our beginning our purchases a little earlier than in previous years, and it seems likely that the same thing will happen next year, so that the advancement of payments on this occasion will not relieve us in respect of the corresponding expenditure in 1916-17. The third material increase is one of £200,000 under Military Services, which is due to the possibility of our having to raise our contribution adjustments in favour of the Home Government for reasons which I will explain presently. These larger corrections almost counterbalance one another: and the comparatively small net change in both the Imperial and Provincial deficits is attributable to minor improvements under Customs, Land Revenue and other heads.

" 4. As regards the Budget of next year, the effect of the changes made is to reduce the Imperial surplus by £226,000, and the Provincial deficit by £12,000. There is no important change on the Provincial side, and I need not refer to that further. On the Imperial side, we have allowed, as in the Revised Estimate, for an improvement of £400,000 on our previous estimate of gross Railway receipts, but in this instance we have to make a proportionate increase under working expenses also, so that the improvement in net receipts is £233,000 only. The only other important change occurs under the Military estimates, which have been raised by £500,000, this being due partly to provision for further urgent military requirements which have matured since the Financial Statement was presented; and partly to allowance being made for the possibility of a higher total contribution to the Home Government. The extra provision of £300,000 included on the former account will enable us to undertake a further development of the mechanical transport service, to increase the provision of motor ambulances, and to establish in India a factory for the manufacture of acetone—an industrial development of considerable interest and importance.

" 5. As regards the contribution, the additional provision proposed is £200,000 in the Revised, and £200,000 in the Budget. As I pointed out in paragraph 27 of my speech introducing the Financial Statement, and further emphasised in replying to a recent question in Council, the adjustment of charges between the Home Government and ourselves in respect of the many units of our expeditionary forces is a very complicated matter, and the questions which arise are not yet completely settled. Since the Financial Statement was presented, the point has been prominently raised whether, in calculating the 'normal cost' of a unit, allowance should be made for the fact that

[21ST MARCH, 1916.] [*Sir William Meyer.*]

in ordinary peace-time conditions a certain number of British officers are absent on leave and draw furlough allowances instead of their full sanctioned pay and allowances; or whether India's contribution should not be based on the assumption that, in present circumstances, even if the units in question had remained here, prudence would have required the recall of officers from leave, as in the case of certain Civil services. As I explained in this Council the other day, all such questions must be finally settled with reference to the terms and spirit of the Resolutions of the Houses of Parliament. Meanwhile, we have thought it prudent, without prejudice to the eventual decision, to include provision in our Budget and Revised Estimates, in case it should be decided that India should fairly pay the higher amount.

"6. These very recent instances of additional requirements and of the points of difficulty which arise in calculating our share of the expenditure of the expeditionary forces, emphasise the necessity of maintaining a reserve for unforeseen Military expenditure. We have, therefore, retained the reserve at its original amount, namely, £½ million, while making specific provision for the requirements and contingencies mentioned. The gross Military budget for 1916-17 will thus stand at £23·7 million, and the net budget at £22½ million, instead of £22 million provided in the Financial Statement.

"7. Turning to Ways and Means, we now expect the total cash balance in England and India at the end of the current year, exclusive of the amount held in the Home Treasury on account of the Gold Standard Reserve, to be about £18 1 million or £460,000 higher than the figure taken in the Financial Statement. This is due to the reduction already mentioned in the Imperial and Provincial deficits, and to a further improvement in the position in regard to withdrawals of post office savings bank deposits, which we are now able to take at £133,000 less than was previously estimated. There has also been a small further lapse under railway capital expenditure.

"Next year, however, there is a worseness of £298,000, principally caused by the reduction of the Imperial surplus which I have already explained. On the whole, therefore, combining the corrections of both years, we expect the closing balance on the 31st March 1917, exclusive again of the holding of the Gold Standard Reserve, to be about £17·6 million, or some £160,000 better than we anticipated in the Financial Statement.

"8. Since I presented the Financial Statement, the Secretary of State's sales of Councils have continued to be very large in view of the requirements of trade, a matter which I shall deal with more fully presently in connection with a Bill that I have to introduce, and are now estimated for the whole year at £20·1 million. Of these drawings our Treasury balances will meet £4·1 million, as compared with £3 7 million previously estimated. Our estimates of recoverable military expenditure in this and the following year have also been raised by £200,000 and £500,000, respectively.

"9. These changes *pro tanto* diminish the extent to which it will be necessary for the Secretary of State to draw on us next year, and accordingly, we now estimate the amount to be met from Treasury balances in 1916-17 at £3·9 million, or £1,200,000 less than the figure taken in the Financial Statement. But, as I said in my speech on that occasion (paragraph 104), this must for the present be regarded as a purely provisional announcement."

THE INDIAN PAPE CURRENCY (AMENDMENT) BILL.

The Hon'ble Sir William Meyer:—"Sir, I beg for leave to introduce a Bill to amend temporarily the Indian Paper Currency Act, 1910. The necessity for this legislation arises from the situation in respect of the Secretary of State's Council drawings to which I referred in paragraphs 101-103 of my speech introducing the Financial Statement. The relevant

[*Sir William Meyer.*] [21ST MARCH, 1916.]

facts are that, owing to the heavy demand for Councils at home for trade purposes by reason of the excess of India's exports over her imports, the Secretary of State has had to draw upon us to an extent which we are unable to meet from our Treasury balances. As I said then, the normal course would, in these circumstances, have been for the Secretary of State to draw against the Paper Currency Reserve, paying the proceeds of his bills and telegraphic transfers into the Reserve at home in the shape of 'earmarked' gold, and thus permitting us to utilise a corresponding quantity of the rupees in the Reserve on this side. In present circumstances, however, it is very undesirable for the Secretary of State to lock up more gold than is absolutely necessary, and it is, of course, still more out of the question for him to stop Council drawings and let gold come out here as a private import. Nor, again, could the difficulty be met by the purchase of silver for fresh coinage, since, in present circumstances, this would take a long time and the Secretary of State's drawings are very largely in the shape of telegraphic transfers.

"Consequently, as I explained in my speech introducing the Financial Statement, we had to fall back on the additional investment powers in respect of the Currency Reserve given to us last year by Act V of 1915. Prior to that the total extent to which we could invest assets of the Paper Currency Reserve, instead of holding them in coin or bullion, was limited to 10 crores in rupee paper and 4 crores (£2⅔ million) in sterling securities in England. The Act of last year—which gave temporary force, for the period of the war and for six months after, to a recommendation of the Royal Commission on Indian Finance and Currency—permitted us to increase this investment by a sum of 6 crores (£4 million), and the primary intention then was that we should employ this money, if required, for the assistance of trade through the Presidency Banks, or for meeting liabilities of our own in the event of unexpected emergency. So, while previously section 22 of the Currency Act of 1910 permitted a total investment of 14 crores (Rs. 140 million), of which 4 crores (Rs. 40 million) might be Home securities, the Act of last year raised the first figure to 20 crores (Rs. 200 million). Last January, however, in consequence of the Secretary of State's heavy drawings, we were obliged, as I explained in paragraph 103 of my speech of 1st March, to enable him as well as ourselves to take advantage of this additional investing power, and we therefore (by Ordinance) temporarily altered the second sub-section of section 22 of the Act of 1910 by permitting investment in Home securities up to 10 crores (Rs. 100 million). Thus while the total power of investment remained at 20 crores, the additional 6 crores could be used either here or in London; and, as I stated on the 1st March, the Secretary of State made use of this power to the extent of £3 million or Rs. 4½ crores, an amount which has now been temporarily increased by £500,000.

"The Ordinance also made it clear that, in the event of our investing from the Paper Currency Reserve in India, we could do so by the creation of fresh Government paper *ad hoc*.

"I said on 1st March that I would presently ask the Council to give this Ordinance the force of law for the duration of the war and six months after; but it has now become necessary, owing to the Secretary of State's continued drawings, to go a step beyond this. We do not propose to give him or ourselves larger power to invest money out of the Paper Currency Reserve in the normal sense of the term; but in present circumstances, and given the necessity of assisting the Home Government by refraining from further earmarking of gold on account of Paper Currency in London, we think it is desirable to allow the Paper Currency Reserve to hold, instead of gold, a limited quantity of first class short-term sterling securities issued by His Majesty's Government, to wit Treasury Bills, to a total amount not exceeding £4 million. Treasury Bills have by Statute a maximum currency of 12 months, and as a matter of fact the investments already made by the Secretary of State under his existing powers have been in 3 months' Bills.

"This measure will enable the Secretary of State to satisfy the demand for Council drawings without dangerous depletion of our Treasury balances,

since he will, when necessary, apply the proceeds of his Council sales to the purchase of these short-term securities, and we on our side will obtain, for the purpose of meeting the bills, an equivalent amount of Indian currency from the Paper Currency Reserve here, the rupee stock in which is at present very strong. I think it will be admitted that the holding of these short-term sterling securities, which can be readily sold and converted into gold when required, is the best thing that can be done to meet the present circumstances, and that it does not go counter to the real spirit of the Currency Act.

"Consequently, the Bill, which I now propose to introduce, is of a two-fold character. In the first place, it re-enacts the provisions of the Ordinance of last January. Secondly, without enhancing the power of normal investment against the Paper Currency Reserve, it enables the temporary holding in that Reserve of short-term securities to take the place of gold up to a limit which, in present circumstances, we fix at £4 million

"I mentioned in paragraph 103 of my speech of 1st March that, in applying the additional investment power given to him in January last, the Secretary of State had purchased short-term securities of the same general character as those which he will obtain under the additional powers now proposed—as a matter of fact (as I have already said) three months' Treasury Bills. Consequently, should circumstances oblige us to borrow from the Paper Currency Reserve on our side as originally contemplated, he will be able to sell these readily and so enable us to operate

"The Bill, which was placed informally in the hands of Hon'ble Members for information yesterday, will, as I have already indicated, apply only for the period of the war and six months subsequently. It is, therefore, an emergency war measure, and as such I propose to ask that it be passed at once. Any permanent alterations in the Currency Act which may be necessitated by the Report of the Finance Commission, or by the experience of the war, will be undertaken apart from the present legislation when peace returns and normal conditions are restored.

"I move for leave to introduce the Bill."

The motion was put and agreed to.

The Hon'ble Sir William Meyer—"I now formally introduce the Bill and also, for the reasons I have indicated, move you, Sir, to suspend the Rules of Business to admit of the Bill being taken into consideration."

The Hon'ble the Vice-President—"I suspend the Rules of Business."

The Hon'ble Sir William Meyer—"I now move that the Bill be taken into consideration."

The motion was put and agreed to.

The Hon'ble Sir William Meyer—"I now move that the Bill be passed."

The motion was put and agreed to.

THE INDIAN REGISTRATION (AMENDMENT) BILL.

The Hon'ble Pandit Madan Mohan Malaviya—"Sir, I beg leave to introduce a Bill further to amend the Indian Registration Act, 1908. The reason for proposing the amendment is simple. In a recent case decided by

[*Pandit Madan Mohan Malaviya.*] [21ST MARCH, 1916.]

the Privy Council, the case of Jambu Prasad *v.* Aftab Ali Khan (I L.R. 37 All., page 49), it was held by their Lordships that, in order that a document requiring registration should be valid, it should have been presented for registration either by the person who executed it, or, if it was presented on behalf of a person in whose favour it was executed, by the agent, representative or assign of such person duly authorised by power-of-attorney executed and authenticated in the manner mentioned in section 33 of the Registration Act, though such agent may have been accompanied at the time of such presentation by the executant himself. Until that decision was passed, it was a common practice with well-to-do landlords, money-lenders, men of business and *pardanashin* ladies, in whose favour the document was to be executed, to send agents, munibs, gumashtas, servants or relations to the registration office with the executant to pay the money payable before the registering officer, and to see that the document was duly registered. In some cases, such agents might possess a power-of-attorney of the kind required by section 33 of the Indian Registration Act, 1908, but in the majority of instances where the creditor, trader or lady concerned was not a landed proprietor, the most suitable man in the service of the person who was going to advance the money or in the family circle available at the time, was sent to pay the money because he was the most trusted man in the family or in the service of the person. No harm accrued, and I submit no harm could accrue to the person who borrowed the money. He was present at the registration and received payment. The agent who presented the document was the agent of the man who advanced the money, and whose interest it was to see that the document was duly registered, he was sent merely to pay the money down to the executant before the registering officer and to get the document registered But, Sir, section 32 of the Act required 'that such agent should be a person, representative or assign, duly authorised by power-of-attorney executed and authenticated in manner mentioned in section 33 of the Registration Act. ' That section laid down that for the purposes of section 32, the powers-of-attorney next hereinafter mentioned shall alone be recognised, (that is to say)—

'if the principal at the time of executing the power-of-attorney resides in any part of British India in which this Act is for the time being in force, a power-of-attorney executed before and authenticated by the registrar or sub-registrar within whose district or sub-district the principal resides.'

"The language of the section being what it is, their Lordships of the Privy Council decided, in the case to which I have referred, that where the person who presented a document on behalf of the man who advanced the money did not possess such a power-of-attorney as has been described above, the document had not been duly presented, and, the document not having been presented according to law, their Lordships further held that the registering officer did not have any authority to register the document, and that the registration effected by him was ineffective. In that view, the claims of mortgagees to recover amounts which they had secured by mortgages of property, which had been registered on presentation by the agent of the creditor who did not hold a power-of-attorney as required by section 33 of the Registration Act, were defeated. The result was that persons who had actually advanced money, and who had taken all the care which they were required to take under the law, except in one particular, which by the practice of many years was regarded as an unimportant matter of form, had failed to obtain the justice to which they were entitled.

"It is to remedy injustice in such cases that I seek the leave of the Council to amend the Registration Act. The object of the amendment that is suggested is to provide that the mere fact that the physical act of handing over a document to the registrar for registration was performed by a relative or agent not holding a proper power of attorney, ought not, by itself, to stand in the way of the document being accepted as one validly registered, if the document was otherwise duly registered. In the circumstances of the case, the need for amending the Registration Act is obvious. The question that arises is, what is

[21ST MARCH, 1916.] [*Pandit Madan Mohan Malaviya.*]

the best way of doing it ? What I have suggested is, that it should be provided by an additional section in the Act that—

'Notwithstanding anything contained in this Act, the registration of a document registered before or after the commencement of this Act, shall not be deemed to be invalid by reason only of the fact that the document was presented for registration by an agent not duly authorized by a power-of-attorney executed and attested or authenticated under the provisions of any enactment in force.'

"Such an amendment would not affect any other provision of the Registration Act relating to registration, and if this was accepted, the result would be that where a document had been presented by an agent of the person who advanced the money, his claim would not be defeated.

"The object of the second clause that I have suggested is to remedy injustice done by reason of this decision in cases decided before the amendment I propose is effected. For this I propose that 'where any claim has wholly or in part been dismissed, rejected or withdrawn after the 25th day of November, 1914,'—the date on which the decision of their Lordships was pronounced,—'and before the commencement of the Indian Registration (Amendment) Act, 191 , in a Court of first instance or of revision or appeal, by reason only of the fact that a document was presented for registration under any enactment in force by an agent not duly authorized by power-of-attorney under the provisions of such enactment, the case may, if the dismissal, rejection or withdrawal has had the effect of invalidating, in whole or in part, the said document as between persons claiming or liable thereunder, be restored on review in the manner provided by the Code of Civil Procedure, 1908, for review of judgments, on application in writing made within six months from the commencement of the said Act.'

"Support for this provision to give effect to the measure in a retrospective way in order to save injustice, is to be found in the action of this very Council when, in order to nullify the effect of another decision of their Lordships' relating to mortgages, this Council passed an Act to amend the Indian Limitation Act of 1908, and gave retrospective effect to the legislation.

"Now, Sir, I am sure that it will be conceded on all sides that it is hard that a man who has honestly advanced a loan should not be able to obtain the help of the Court in recovering it, merely because of a technical omission, that technical omission consisting in the fact not that the person who presented the document on his behalf was not authorized by him to do so, but merely that he did not at the same time hold a power-of-attorney from him executed according to the provisions of section 33 of the Registration Act.

"There are three ways in which the remedy can be applied. One is that which I have suggested. A second one is by way of an amendment of section 33 of the Act. That section runs as follows:—'Except in the cases mentioned in section 31 and section 89, every document to be registered under this Act, whether such registration be compulsory or optional, shall be presented at the proper registration office—

by some person executing or claiming under the same, or in the case of copy of a decree or order, claiming under the decree or order, or

by the representative or assign of such person, or

by the agent of such person, representative or assign, duly authorized by power-of-attorney executed and authenticated in manner hereinafter mentioned.'

It has been suggested that the section should be amended by the omission of the words, 'duly authorized by power-of-attorney executed and authenticated in manner hereinafter mentioned.'

"The third course, which has been suggested, is that the legislature may provide that documents which have been improperly admitted to registration in disregard of the provisions of section 33, may be registered again on production of a proper power-of-attorney or on presentation by the parties themselves, within a prescribed limit of time, and that a suit may be brought on the basis of the document so registered within a specified time.

[*Pandit Madan Mohan Malaviya.*] [21ST MARCH, 1916.]

'attested' in dealing with documents which require to be attested under the Act. For a long time the word 'attested,' which is used in section 59 of the Act, was interpreted in more than one Province as including not merely the witnessing of a document by the person in whose presence it was executed, but also the witnessing of it by a person to whom an acknowledgment was made by the person executing it that he had executed it. That was the view taken by the Bombay High Court; that was the view which was taken by the Allahabad High Court. In Calcutta and Madras, however, a different view had been taken. There it had been held that 'attestation' meant that the document had been witnessed by a person in whose presence the document had been actually executed. In this state of affairs, in the case of Shama Patter *vs.* Abdul Kadir (reported in I.L.R 35, Mad., p. 607) which went up to the Privy Council, their Lordships there held that the word 'attested' used in section 59 of Act IV of 1882 meant signed by a witness who saw the actual execution of the deed, and that the attestation of a mortgage deed on a mere acknowledgment of his signature by the executant was not a compliance with the law. As I have said, until that decision was passed, there was a divergence of opinion among the Indian High Courts as to the meaning to be attached to the word 'attested.' The Calcutta and the Madras High Courts took the view which their Lordships of the Privy Council have now taken. The Bombay High Court had, at one time, held that the word 'attested' included attestation upon acknowledgment, but in a subsequent case, that Court also arrived at the same conclusion as the Calcutta and Madras High Courts. The Allahabad High Court had always held that the word 'attest' would include attestation upon a personal acknowledgment by the executant of his signature. This being so, the effect of the decision of their Lordships of the Privy Council in a large part of the country is that money-lenders seeking redress in Courts of law for the recovery of monies advanced on mortgage securities, often find themselves at the mercy of attesting witnesses, who, if they should be dishonestly inclined, are able to utilise the occasion to extract payment from one party or the other. This will particularly be the case where most of the attesting witnesses are dead, and only one or two are left alive. It is apprehended that many claims have already been dismissed on the authority of the decision mentioned above, and while redress has thus been denied to those rightfully entitled to recover their debts, dishonest debtors have found a new method available to them of avoiding payment, by trying to tamper with the evidence. In the United Provinces and the Punjab, in the case of mortgage deeds executed by *Pardanashin* ladies, who, according to the custom of the country, do not appear except before very near relations, the hardship caused by the restricted interpretation of the word 'attested' will be still greater.

" It is in this state of things that I have been pressed to invite the attention of the legislature to the need for amendment of the existing Act, to define what 'attest' should be held to mean. Naturally, Sir, in considering the question, reference has been made both in this country and in the Privy Council to cases decided under the English law, dealing with the question of attestation. Their Lordships have followed modern decisions in England in which it has been held that the word 'attest' means that the person who witnesses a document should have seen the person executing it actually sign it. In earlier cases, however, for a long time past, it was held in England that attestation would include not merely the witnessing of a document which had been executed in the presence of the witness, but also the witnessing of a document the execution of which had been acknowledged to him by the executant. In Grayson *versus* Atkinson (2 Ves. Sen. 455, Sc. 28 English Reports, 291 at pages 292-293) decided in 1752, Lord Hardwicke said :—

'It is insisted that the word *attested* superadded to *subscribed* imports they shall be witnesses to the very act and *factum* of signing, and that the testator's acknowledging that act to have been done by him, and that it is in his handwriting, is not sufficient to enable them to attest : that is, it must be an attestation of the thing itself, not of the acknowledgment. To be sure, it must be an attestation of the thing in some sense; but the question upon this clause, as abstracted from the subsequent, is, if they attest upon the acknowledgment of the testator that that is his handwriting, whether that is not an attestation of the

[21ST MARCH, 1916.] [*Pandit Madan Mohan Malaviya.*]

attestation and signing might be proved? At the time of making that Act of Parliament, and ever since, if a bond or deed is executed by the person who signs it: afterwards the witnesses are called in; and before these witnesses he acknowledges that to be his hand; that is always considered as an evidence of signing by the person executing, and is an attestation of it by them.'

"A similar view was taken in Ellis *versus* Smith decided in 1754. These cases were followed in White *versus* Trustees of the British Museum (6 Bing, 319, Sc. 130 English Reports, 1303) decided in 1829. In that case Tindal, C. J. said—

'It has been held in so many cases that it must now be taken to be settled law, that it is unnecessary for the testator actually to sign the will in the presence of the three witnesses who subscribe the same; but that any acknowledgment before the witnesses that it is his signature, or any declaration before them that it is his will, is subscription of the witnesses complete. The case of Ellis *versus* Smith, which was decided by Lord Chancellor Hardwicke assisted by the Master of the Rolls, Sir J. Strange, Lord Chief Justice Willis, and Lord Chief Baron Parker, all persons of high and eminent authority, is express to the latter point.'

"Now, Sir, as I have already stated, in subsequent cases the view taken in English law has been that 'attested' meant that the witness should have been present as a witness and should have seen the executant sign the document. These cases are of 1843, 1850, and 1855. The question is in what sense the Indian legislature used the word 'attested' in its enactments. The first Act to which I will refer is Act X of 1865. In section 50 of the Indian Succession Act the word 'attested' has been used, and that section says that—

'The will shall be attested by two or more witnesses, each of whom must have seen the testator sign or affix his mark to the will...... or have received from the testator a personal acknowledgment of his signature or mark.'

"I submit, Sir, that it is important to note the date of this enactment, which is 1865, while the last English case relied on had been decided several years before, about ten years before. And yet after that decision had been passed, the legislature in India, in laying down the meaning which should to the attach word 'attest' expressly said—

'The will shall be attested by two or more witnesses, each of whom must have seen the testator sign or affix his mark to the will........., or have received from the testator a personal acknowledgment of his signature or mark.'

"According to the more recent English decisions this meaning could not be attached to the word 'attest,' because it went clear against those decisions. But if in spite of them, the legislature here thought it fit in enacting that the will must be attested by witnesses, to explain that these witnesses might be either those who have seen the testator sign or affix his mark to the will, or those who have received from the testator a personal acknowledgment of his signature or mark, I submit, Sir, that the Indian legislature clearly indicated that it attached the larger meaning which was attached to the word 'attested' in England according to the earlier decisions, *i.e.*, the meaning which would include not merely the signing of the document by a witness who had seen it, but also the signing of the document by a witness to whom execution of that document had been acknowledged. I therefore venture to think that it would be more correct, more in the fitness of things, in construing an Act of the Indian legislature, to take that as a guide in deciding what meaning should attach to the word 'attest'

"It was subsequent to this that the word 'attest' was used in the Transfer of Property Act, IV of 1882. And therefore I submit that the view taken by the Allahabad High Court, that it was reasonable to suppose that the interpretation put upon the word 'attest' in section 50 of the Indian Succession Act should, in the absence of good, technical or substantial reasons to the contrary, be taken to be the meaning in which the word is used in section 59 of the Transfer of Property Act, is the correct view.

"Now, Sir, that was in 1882. But we have other indications to show that the Indian legislatures have attached the larger meaning to the word 'attest,' and one such indication is to be found in an Act passed so recently as 1910, I

[*Pandit Madan Mohan Malaviya.*] [21ST MARCH, 1916.]

mean the Oudh Estates Act III of 1910. That Act contains a definition of the word 'attest' as follows :—

'Attest with its grammatical variations, when used with reference to any instrument other than a will, means to sign such instrument as a witness, in the presence of the executant after having seen the executant sign the same or after having received from the executant a personal acknowledgment of his signature to the same'.

"No doubt that Bill was passed by a local legislature, but no enactment is put on the Statute Book of any Province unless it has received the sanction of the Government of India, and so we take it that the Government of India, so recently as 1910, gave its full authority to an interpretation incorporated in section 2(2) of the Oudh Estates Act III of 1910, wherein the larger and older meaning is attached to the word 'attest' I submit, Sir, that the Government of India did so because they probably had in mind the fact that in earlier years the word 'attest' had been used in the larger sense, and had been interpreted in that sense by various Courts in this country; and they probably also had in mind the circumstances peculiar to this country. They knew, for instance, that the provisions of section 59 would govern all documents whether they were executed by men or women, and so documents executed by *pardanashin* ladies; and they knew that in the case of *pardanashin* ladies it was impossible, owing to the customs which prevail in this country, that they should come and sign a document in the presence of other persons. This difficulty was probably present to their minds, that in the case of those ladies it would be only near relations before whom a document could be attested by them, and that it was not safe for the creditor to rely on such persons as witnesses.

"In view of all these considerations, it is not improbable that the legislature attached the larger meaning to the word 'attest'; and while it was no doubt open to their Lordships of the Privy Council to follow the more recent English decisions, I venture to say that they should have—I say it with great respect, but I think it my duty to say so—that they should have given more weight to the special circumstances of this country and to the fact that the enactments passed by the Indian Legislature are intended to govern the dealings of persons residing in India and for the special circumstances of India. I hope what I have submitted is sufficient to show that it cannot be affirmed without doubt that in using the word 'attest' in section 59 of the Transfer of Property Act the Government of India—the Legislature of India—really intended; it cannot, I submit, be said without question, without doubt—that the Legislature in this country intended to attach the stricter meaning to the word 'attest' which has been attached to it in the later decisions in England, when we have, in section 50 of the Indian Succession Act, a clear indication to the contrary.

"Now, Sir, there are two courses open to us in order to remedy what injustice has been done. So far as my Provinces are concerned, ever since the time that the Transfer of Property Act was passed until the decision in the case of Shama Patter *v.* Abdul Kadir in 1912, the public at large believed, and the Courts accepted and supported the belief, that attestation included signing by a witness to whom the execution of a document had been acknowledged. In that state of things came this decision. It came like a bolt from the blue, and it has been the source of much injustice. In England, Sir, there is much greater hesitation shown in unsettling decisions which have long been uniform even though there may be a doubt entertained as to the correctness of those decisions on strictly technical grounds. Here in my Provinces the effect of this decision of their Lordships has been that the practice of 33 years has been put aside and a new view has been enforced upon the public to their great detriment. In this state of things I am driven to seek the help of the legislature. I ask that the legislature should now clearly say what meaning it intended to attach to the word 'attest' as it is used in section 59 of Act IV of 1882. Their Lordships may be perfectly correct; I have no doubt they are correct—it would be impertinence on my part to suggest they are not correct in interpreting the word 'attest,' so far as England and English law are concerned, in the way they do; but I submit with great respect that it is not so clear that they are equally

[21ST MARCH, 1916.] [*Pandit Madan Mohan Malaviya; Mr. Madhu Sudan Das.*]

correct in saying that the Indian legislature used the word in the stricter and narrower sense. I therefore suggest that in conformity with the practice which has prevailed in the United Provinces, and which prevailed for a long time also in Bombay, the legislature should now declare what meaning it intends to be attached to the word 'attested' as used in the Transfer of Property Act by an amendment of the kind I have suggested. What I have suggested, Sir, is that after the definition of the word 'instrument' in section 3 of the Transfer of Property Act, the following definition should be inserted :—

''Attest' with its grammatical variations, when used with reference to any instrument, means to sign such instrument as a witness in the presence of the executant thereof after having seen the executant sign the same, or after having received from the executant a personal acknowledgment of his signature to the same.'

"This is in conformity with section 50 of Act X of 1865 and with section 2(2) of the United Provinces Act III of 1910, from which I have borrowed the wording largely.

"It is open to the legislature to say that it will not do anything of the kind that I suggest. It is open to the legislature to say that the decision of their Lordships is sufficiently clear and that it should be binding upon the people of this country. But then it will leave an obvious wrong unremedied. And I submit that in all such matters the people of the country are entitled to have a wrong of the nature in question remedied; they are entitled to ask the legislature to define the meaning of an important word used by them, when the highest Courts have differed in interpreting them, in order that the ends of justice should be promoted and not defeated. There is no danger, Sir, I submit, that if the interpretation, I contend for, is accepted there will be any harm done to any party. On the contrary, it is more likely, as has been pointed out, that the danger of witnesses perjuring themselves will be minimized. And in that view, and for these reasons, I ask for leave to introduce this Bill, and I submit that it should be referred to a Select Committee, consisting of the Hon'ble Sir Reginald Craddock, the Hon'ble Mr. Lowndes, the Hon'ble Mr. Wheeler, the Hon'ble Mr. Achariar, the Hon'ble Mr. Qumrul Huda, the Hon'ble Mr. Setalvad, the Hon'ble Mr. A. P. Muddiman, the Hon'ble Sir Edward Maclagan and myself.

"There is only one thing more which I have to add. I have suggested that retrospective effect should be given to this measure, and as I apprehended, opinion is very much divided on this point. I know that opinion is divided also on the main provisions of the Bill; but I submit, Sir, that the reason for my suggestion is to be found in the action which this very legislature took in the case of mortgages in 1908 by enacting section 31 of the Indian Limitation Act of 1908. If this recommendation is not accepted, there is no other remedy open to the people who have suffered injustice by reason of the decision of their Lordships of the Privy Council. It has been said that *bonâ fide* transfers might have been effected in the interval that has passed, and that they should be protected. That is a matter certainly worth considering, and when the Bill goes into Select Committee, all these and other aspects of the question will, I have no doubt, be considered. But my main object in introducing the Bill is that there should be some relief provided in order to save people from the injustice which has been wrought upon them by a too strict interpretation of the law, which I venture again to say, with all the respect that is due to their Lordships of the Privy Council, is clearly not in consonance with the intentions of the legislature, as is indicated by the other enactments to which I have drawn attention. I beg to move, Sir, that the Bill be referred to a Select Committee."

The Hon'ble Mr. Madhu Sudan Das:—"Sir, whether a particular decision of the Privy Council works hardship in this country or not is altogether a different question. But the Hon'ble Pandit Malaviya in introducing this Bill has argued that when the legislature used the word 'attest' in the Transfer of Property Act, it had before it the larger meaning

[*Mr. Madhu Sudan Das.*] [21ST MARCH, 1916.]

which it has in section 50 of the Indian Succession Act. I do not think that section 50 of the Indian Succession Act puts a larger meaning upon the word 'attest,' because that very section says that either a will must be attested by a person or the signature or mark of the executant must be admitted before a witness. That very fact that there is an additional provision to the effect that an acknowledgment of one's signature might be sufficient shows that it has not got the larger meaning. There can be no question that the legislature when enacting that provision had before it no larger meaning than the word 'attest' naturally means; but in the case of will the legislature found it necessary to make an additional provision considering the condition of the country, knowing that there are many ignorant men here who do not know to write, and consequently put their marks; I say taking all these things into consideration the legislature thought it prudent to have a provision in addition to the ordinary attestation. Now, with this additional provision before it the legislature passed the Transfer of Property Act, using the same word that had been used in the Succession Act. The necessary legal inference is, according to known laws of legal interpretation, that the word was used by the legislature in the subsequent Act in the same sense in which it was used in the previous Act. Consequently, the learned Mover's argument that the legislature in passing this Transfer of Property Act had before it the larger meaning of the word 'attest' does not hold good. Then, Sir, it is very true perhaps that, considering the difference in the conditions of life between England and India, what is good law in England, suited to the conditions of that country, may not be suitable in India; it is for the legislature to decide whether there should be any variation in provisions on similar subjects. But the Privy Council could not do otherwise than interpret the word 'attest' as it stood in the Indian Statute Book then. Sir, if this Council considers that the word 'attest' with the meaning that has been attached to it by this legislature is not suited and requires a particular definition, then it cannot lay down a definition of the word without at the same time incorporating that definition in the Succession Act. It is one thing to define a word and it is another thing to provide an additional provision. If a definition of the word 'attest' is made, then the same definition would apply to the Succession Act or any other Act. So perhaps it would be a better thing, if the Council is of opinion that a change, in the circumstances, is necessary, to add an additional provision as there is in the Succession Act. But I think there is an objection to this, because an amendment of the Succession Act is not before this Council. It is only an amendment of the Transfer of Property Act, and we cannot define a word in amending an Act in a way which might affect the significance of that very word in another Act. Then, Sir, this attempt to give retrospective effect to a provision like this places the Legislative Council in a very novel position. I do not remember the circumstances under which a particular amendment was made to which reference has been made by the Hon'ble Mover of this Bill; but if we think it proper to bring before the Council and seek at the hands of this Council remedy against decisions of the highest Judicial tribunal in the British Government, this would actually be using the Council as a Court of review of the judgment of the Privy Council or any other Court. 'Retrospective effect' means practically setting aside their judgments; and there would be a good deal of confusion if this principle is introduced. Where would be the limit of the review? Suppose, for instance, the Privy Council and the High Courts have passed a decision interpreting a certain clause which is not suited to the conditions of the country or has worked hardship in a particular case, and some person in this Council takes up this matter and brings in a Bill before this Council say five years or ten years after, saying that there has been a hardship and that an amendment should be made. Should the Council undertake this? Of course it is quite open to the legislature, when it finds that a particular section has been working hardship in the country from reports of cases, to deal with it in the periodical amending of enactments. But if a Bill is introduced with reference to a particular case, then I submit with all my sympathy for the particular case and for the parties concerned in the case, that it is introducing a very dangerous principle into the Legislative Council.

[21ST MARCH, 1916.] [*Mr. Madhu Sudan Das; Mr. Lowndes.*]

"I daresay that if it is thought proper that in a particular case hardship has been done the legislature will do what is proper. But as I said I think this is a very novel principle; a Bill is introduced, and after it is introduced it is said 'do anything you like, here is the Bill, you may expunge the Bill' and enact something else. If you expunge the provisions of the Bill where is the Bill except its headline? Then where is the Bill before the Council to go to a Select Committee?"

The Hon'ble Mr. Lowndes:—"Sir, it seems to me that this Bill stands on very much the same footing as the last, and should be treated in the same manner. The Hon'ble Mover has treated us to a foretaste of the nature of the discussion that is appropriate to a Bill of this sort. Probably, it will suit the convenience of the majority of this Council that this discussion should take place in the more informal atmosphere of a Committee-room than in this Council Chamber. There may be various arguments by which the Bill can be supported, but I doubt if we can enumerate among them the fact that the Hon'ble Member disapproves of the decision of the Privy Council to which he has referred. There may be good reasons for altering the law, but certainly there appear to be no reasons for sitting in appeal upon the Judicial Committee. The replies which the Government of India have received to the circulation of this Bill seem to make it quite clear that the main proposals of it, both as to the definition of the word 'attest' and as to the retrospective effect which it is proposed to give to the emendation of the law, have met with no response, or, I might, put it better, have met with an unfavourable response.

"It seems to me that it is expedient that I should explain to the Council very shortly, what are the real objections to the Bill because, if my Hon'ble friend will forgive me for saying so, he has not touched upon them. The position is that at present a mortgage is only valid if it is signed by the mortgagor actually in the presence of two attesting witnesses. Now it unfortunately happens that forged documents are got up from time to time and produced sometimes some years after the date when the original is alleged to have been executed. If you have this safeguard that three people have got to be present at the same time and in the same place and must sign the document in the presence of one another, which is the law as declared by the Privy Council, it is obvious that there is much greater difficulty put in the way of the forger and of those who seek to support the forgery than if the law says that it may be signed by the mortgagor in his own house. It may be signed by one attesting witness to-day in the attesting witness's house merely on the acknowledgment of the mortgagor and be signed by the second attesting witness in his house the day after merely on the acknowledgment of the mortgagor. It is a common thing in this country to have half a dozen witnesses to such a deed, and if they can all attest at different times and different places, their signatures are no real guarantee of the genuineness of the deed. There would be no difficulty, for instance, in one witness deposing in the case of a forgery that he was sitting in his verandah at 10 o'clock on Friday and the second witness that he was in his verandah at 10 o'clock on the Saturday, and that on each occasion the mortgagor came up and said 'I have signed this deed will you put your signature'. I think it will be clear therefore to the Council that there are very grave objections to accepting the provisions which this Bill seeks to enact, and this has been very clearly recognized by the judgment of the Privey Council itself in the case which has been already referred to, and which is the foundation apparently of this Bill. That what I am saying is of great importance will be seen from the following passage in the judgment; their Lordships say:—

'Section 59 of the Transfer of Property Act in requiring that in a certain class of cases a mortgage can be effected only by a registered instrument signed by the mortgagor and attested by at least two witnesses could only mean that the witnesses were to attest the fact of execution. And any other construction in their Lordships' opinion would remove the safeguards which the law clearly intended to impose against the perpetration of frauds.'

[*Mr. Lowndes; Sir Ibrahim Rahimtoola.*] [21ST MARCH, 1916.]

I only put forward this as showing the other side of the picture to that which has been brought before the Council in the arguments of my learned friend. At the same time, it seems to me that we have to recognise the fact that the High Court in the United Provinces has, for many years past, adopted a different interpretation to the word 'attest', and that it has laid down that, according to the law in the Transfer of Property Act, it is sufficient for the attesting witnesses to attest not what the Privy Council call the execution of the document, but merely an acknowledgment of the mortgagor on a subsequent occasion. It is not unreasonable to suppose that innocent parties may have been misled for some years past by the decision of the United Provinces Courts, and seeing that the mistake that has been made is a mistake of the Court, it is not unreasonable for Government to do anything that can fairly be done to remove the injustice which may result. Whether this can best be provided for by anything in the nature of a Bill applicable to the whole of India, or whether the simpler course would not be for the United Provinces themselves to pass a validating Act applicable to the particular cases in question in that province, is for consideration; but, under the circumstances, we think it would be better that the question should be discussed in Committee and if the Council agrees, this Bill can go to a Special Committee in order that the various aspects of the case can be discussed there If this course commends itself to the Council, I would ask that they should agree to the present motion, on the understanding that the course I have indicated will be followed."

The motion was put and agreed to.

RESOLUTION *RE* THE GROWTH AND DEVELOPMENT OF INDUSTRIES IN INDIA.

The Hon'ble Sir Ibrahim Rahimtoola:—" Sir, I beg to move—

'That this Council recommends the Governor General in Council to be pleased to appoint a Committee of Officials and Non-Officials to consider and report what measures should be adopted for the growth and development of Industries in India.'

" Two years ago when I first tried to bring forward a Resolution on the subject of industrial development in India, I had intended remarking that it was merely a commonplace to say that a wealthy or even a well-to-do India was of far greater advantage to England than a poor India. How well this view has been borne out by subsequent events must now be apparent to all. The experience of the war has clearly shewn that the economic well-being of the component parts of the British Empire is a tower of strength to Great Britain, in every crisis which may arise in the history of that country. No one can deny that India has contributed her best towards carrying the world war to a successful conclusion, but what she has done is nothing compared to what she would have willingly done, had her economic resources been helped to be developed in the past. In this connection, the people of India gratefully acknowledge the warm tribute which His Excellency and the Hon'ble Sir William Meyer have paid, both in this Council and outside, to the burden which India has borne so willingly in this world-conflict.

" It cannot be gainsaid by anyone acquainted with Indian conditions that the greatest need of the country has been its economic well-being, and many able minds have been engaged in finding effective remedies for the solution of the problem. British rule in India, with all its beneficent measures for the welfare and well-being of its people, has in a way contributed towards accentuating the economic backwardness of this country. Steady progress has been made in various directions. India, through the use of steam power, has been brought nearer to England, and may, by the help of science, be

[21ST MARCH, 1916.] [*Sir Ibrahim Rahimtoola.*]

expected to be brought much nearer still. An extensive programme of railway construction has been carried out. Education and sanitation have been fostered. In consequence of the cumulative effects of all such factors, our wants have largely multiplied, and the cost of living has steadily risen. What were once regarded as luxuries have now become necessaries. It can be easily imagined what economic effects must be produced upon a poor country in such close contact and association with one of the wealthiest countries in the world.

"In drawing attention to these points, I do not wish to be misunderstood. It is not my intention to create any impression that I desire in any way to deprecate these measures. I fully recognize that they have contributed towards our enlightenment and improvement, better conditions of public health, facilities of travelling and transit, and our comforts and convenience. The country wishes to press for more educational institutions, more extended application of sanitary science and more railways. My object is to merely invite the attention of this Council to the fact that, with the progress and advance which India has undoubtedly made in various directions under British rule, our economic backwardness has come more prominently to the fore, and that the country demands unanimously and insistently for suitable and adequate measures to be adopted for substantial advance in the direction of our economic well-being. It is with this object that I have brought forward my Resolution before this Council, in the firm conviction that Government will be pleased to confer a lasting obligation on the people of this country by helping in the growth and development of industries in India as one of the principal factors to ensure our economic advancement.

"I recognize that it will be within the discretion of the Government of India to determine what specific points should be referred for the consideration of the Committee which I am asking them to appoint. I should like, however, to suggest that the following may suitably form some of these points :—

(1) Whether representation should be made to the Home authorities through the Secretary of State for India for securing to the Government of India full fiscal autonomy, specially in reference to Import, Export and Excise duties;

(2) whether (*a*) protection (*b*) granting of bounties and subsidies (*c*), guaranteeing certain rates of interest on capital invested in approved industries, should be availed of in such cases and for such time as may be deemed necessary ;

(3) whether a special expert staff should be maintained to carry on research work and institute detailed inquiries into the possibility of successfully initiating and establishing new industries in India and to supply expert advice for the development of existing industries ;

(4) what means should be employed far securing a sufficient supply of skilled labour ;

(5) what special railway facilities in the matter of fares and otherwise are needed ; and

(6) whether any special measures are necessary to attract capital and secure banking facilities ?

The list I have given is in no way comprehensive. I have not included in it such points as the foundation of commercial museums to bring the producer and the consumer together, or the establishment of Provincial Departments of Commerce and Industry to render ready help and encouragement. I have also not included points in regard to the development of our agricultural industry It must not be understood that I am in any way indifferent to an industry which is not only the mainstay of the country, but upon the development of which successful industrial enterprise depends. I have not included agricultural development in the list, because the Government of

[*Sir Ibrahim Rahimtoola.*] [21ST MARCH, 1916.]

India have a free hand, and are keenly alive to the great importance of the subject. They have provided a special department with a Member of Council in charge to look after it, and from the able and business-like speech which my Hon'ble friend Mr. Hill made in introducing the Budget heads of revenue and agriculture, he gave the Council interesting and valuable information as regards the measures which are being adopted to promote this industry. I feel confident that, during his term of office, he will do everything in his power to further the interests of agriculture, and thereby contribute towards the economic well-being of India. India wishes to depend upon her own soil and her own factories to supply her wants, and to build up her economic strength In this connection, I should like to draw the attention of this Council to a Resolution which was to be placed before the Associated Chambers of Commerce in London. It runs as follows :—

'The strength of the nation lies in our power to produce our requirements from our own soil and our own factories'

"Indian public opinion demands that India's national strength should be developed on identical lines. If a powerful and wealthy nation like England considers it necessary to add to its economic strength by means of producing her requirements from her own soil and factories, how much more necessary the same policy must be for a poor country like India? India is very favourably situated in this matter. It has been held by experts that there are four principal factors necessary for the success of industrial enterprise, namely (1) supply of raw material, (2) supply of labour both skilled and unskilled, (3) capital, (4) markets. India has an abundant supply of raw materials which she wishes to turn into manufactured products. She does not wish to engage at present in the manufacturing of articles the raw materials for which she does not produce She has a plentiful supply of unskilled labour, and she has extensive markets of her own. She is certainly deficient in skilled labour, but that deficiency can be overcome by importing it to begin with, and by producing it for the future by the foundation of technological institutions, and by apprenticeship in going manufacturing concerns both in India and elsewhere. The question of capital is rather a difficult one It has been stated, and I think correctly, that Indian capital is shy. It is shy, because under present conditions the chances of success are doubtful. I venture to think that if, existing conditions are changed and the prospects of successful industrial enterprise become reasonably possible, capital in India will lose its shyness, and will be available for all immediate wants. India will gratefully accept and pay for any help she may receive from England in her efforts towards her industrial regeneration both in the matter of supply of skilled labour and capital I wish to make it perfectly clear that, in moving this Resolution, I have not the least feeling of jealousy against British enterprise in India. On the contrary, I firmly believe that English capital and English skill will be materially helpful in the economic salvation of India. Provided that the factories are established and worked in India, I would warmly welcome British enterprise and wish it every success. Establishment of successful industrial undertakings in India by Englishmen is, to my mind to the present and ultimate advantage of this country. The people will find employment in such factories, and be trained in the course of time to start similar undertakings. As an example of what I mean, I will mention the jute industry in Bengal. It has been established by British enterprise, and is still mostly in British hands. It has been, and is still, paying handsome dividends Let such profits go into the pockets of really enterprising men, be they Englishmen or Indians, provided, as I have already said, that the factories are established in this country. India cannot always remain an open market for the manufactures of other countries. She earnestly desires to gradually reach a position of one of the foremost manufacturing countries in the world, a position which her resources make it easily possible to attain.

"I need not tell you, Sir, that there is a consensus of opinion amongst the people of this country that, as a condition precedent to the growth and

[21ST MARCH, 1916.] [*Sir Ibrahim Rahimtoola.*]

development of industries in India, and to build the national strength of this country, it is essentially necessary that the Government of India should have complete freedom in fiscal matters. India desires that her Government, following the lines adopted by other civilised Governments, should take a direct hand in co-operating and helping the development of industries in India. If Japan and Germany have succeeded within a short period of about 40 years to reach a foremost position as manufacturing countries amongst the nations of the world, by the joint co-operation of Government and the people, there appears to be no reason why India, with all its natural advantages, should not reach equal, if not a higher, standard. For many of their manufacturing industries, both Japan and Germany are obliged to depend upon imported raw materials. If, in spite of this drawback, they have successfully accomplished their aim, there appears no reason why India should not be able, with a cordial and wholehearted support of her Government, to achieve success with all the necessary raw materials available on the spot.

"The outbreak of the European war has opened the eyes both of the Government and the people to the unsatisfactory conditions prevailing in India in consequence of her helpless dependence upon foreign countries for her everyday requirements. I readily recognize that efforts are being made by the Government in many directions to meet the needs of the situation. It appears to me, however, that, unless the hands of the Imperial Government are free in fiscal matters, the results will not be adequate. If the Government of India were free to adopt measures solely in the interests of the people of this country, without any restrictions or limitations in fiscal matters, our industrial development would be in a fair way of successful accomplishment. India wants fiscal autonomy as the first step towards her industrial regeneration, and if Indian public opinion is to have any weight in the determination of this question, we ought to get it at once. Government will have noticed that in recent times many Conferences have been held and many newspaper articles and correspondence have been published putting forward a demand for fiscal autonomy. There is nothing unusual in this demand. The British Empire consists of large territories in different parts of the world, and each self-contained unit has a Government of its own. The Governments of the British Dominions are empowered to determine their own fiscal policy suitable to their economic conditions and circumstances Each unit of the Empire has its own special economic needs and requirements which require to be promoted in accordance with local conditions. Whether the Government of each self-contained territorial unit takes office by the vote or voice of the people, or occupies its position by nomination by the Crown, it is the form of Government regarded as best suited to it by Great Britain. Whatever may be the method by which Government is constituted, there can be no question that such Government, if you give it the exalted name, should be allowed full freedom to determine what fiscal policy is suitable to the special conditions prevailing in the territory under their charge. My claim that the right to determine fiscal measures best suited to the economic needs and requirements of India should vest in the people who are entrusted with the administration of the country, appears to me unassailable. As illustrating what can be accomplished by sincere co-operation between the Government and the people, the case of the industrial development and economic growth of Japan may be advantageously cited. It was in the year 1868, *i. e*, about 47 years ago, that the first Joint Stock Company was formed in Japan under the auspices of, and direct encouragement of, the Japanese Government. Ever since that time the industrial development of the country has formed one of the principal tasks of the State How eminently successful these efforts have proved is known to every one who has taken any interest in the subject. No difficulty, however unsurmountable it may have appeared at first sight, was allowed to stand in the way. If railways and steamers were required to facilate transit, they were built, and raw materials imported and manufactured goods exported at special rates in many cases below what may be justifiable on the commercial basis. To help the provision of

[*Sir Ibrahim Rahimtoola.*] [21ST MARCH, 1916.]

capital, banks were started and capital was encouraged to become liquid and available. When in 1898 it was found that the development of industries needed the help of protection, tariffs were thought out and applied. They were not deterred by any scientific arguments in favour of free trade. Undeterred, as I have said, by fanciful ideas as to what was best suited to other countries, Japan went on the lines which she regarded to be most suitable to herself, and she has achieved a measure of success unparalleled in Asiatic countries within a period of less than half a century. If Japan, with joint co-operation between the people and its Government, has successfully accomplished so much within so short a time, I cannot understand why India cannot be equally, if not more, successful. India possesses many natural advantages as compared with Japan. With such advantages she can, without doubt, reach a higher standard of industrial development by a sincere and genuine co-operation between the Government and the people. The interests of India and her people should be put above all others.

"In order to show some of the methods which Japan adopts, I will quote from the report of Mr. E. F. Crewe, the British Commercial Attaché at Yokahama. Mr. Crewe says—'that subsidies for new enterprises will be granted under the following regulations:—The Japanese Government will pay three subsidies, (1) to a company specialising in the manufacture of dye-stuffs whose capital is at least 6 millions yen, (2) to a company manufacturing glycerine and carbolic acid whose capital is at least 1,200,000 yen, and (3) to a company manufacturing drugs whose capital must be 500,000 yen. Anyone who desires to organise a subsidised company for the manufacture of dye-stuffs and chemicals, must apply to the Minister of Agriculture and Commerce for permission to establish the projected concern, but in the case of drugs permission should be sought from the Minister for Home affairs. When part of the capital is paid up, the first general granting of the shareholders completed and the new company duly registered in the Courts, the promoters of the company are entitled to ask for a subsidy. The Government guarantees to each company a dividend of eight per cent. per annum making up any deficit. Each company must lay aside one-twentieth of its net annual profits as a reserve fund. If its shares are issued at above par, the premium must be included in the reserve fund.'

"This quotation shows in what manner the State helps to initiate new industrial enterprises The work undertaken by the State and that performed by the people appears clearly defined. The State carries out all research work, all inquiries and investigations as to the means which are likely to provide materials for successful enterprise. As soon as all this work is completed and the Government is satisfied that a new industrial enterprise can be successfully established, it calls upon people, who are best able to manage the concern, to get up a company with the required capital, and the concession is granted. As you will observe, Sir, the concession carries with it the guarantee of such a high rate as 8 per cent. per annum. Indian capital will, I am sure, be content with a much smaller guarantee, if such a system was adopted in favour of manufacturing industries.

"There is nothing new in the Japanese method quoted by me. As a matter of fact, the same system is adopted by the Indian Government in promoting railway construction in this country. In this connection, the Government of India has been conceded practically a free hand. They are not only allowed to develop railway construction in India, but they are encouraged to push it on.

"Facilities of speedy transport develop trade, and provide markets for manufactured goods. The Government of India have taken full advantage of the liberty of action thus conceded to them. They carry out surveys in all directions in which railway enterprise seems likely to be successfully undertaken. All the surveys, inquiries, investigations and the financial prospects of railway projects are thoroughly gone into by a large expert establishment maintained for the purpose. When the State is satisfied, as a result of these

[21ST MARCH, 1916.] [*Sir Ibrahim Rahimtoola.*]

elaborate inquiries, that a particular project is worth undertaking, they decide whether it should be carried out through State agency or by private enterprise. In the case of the latter, a suitable firm is chosen to find the capital and undertake the work. In addition to all the necessary facilities, a guarantee of interest is also given. This method appears to me to be on all fours in principle to that adopted by the Japanese Government. In each case the object aimed at is successfully accomplished. If it was not for this system, it can be said, without fear of contradiction, that railway progress, specially in the direction of feeder lines, would not have reached anything like the present proportions. I venture to think that the railway policy so successfully adopted by the State, is due to the freedom of action conceded to them, and I am confident that, if the Indian demand for full liberty in favour of the development of manufacturing industries was also conceded to them, the result would be equally satisfactory.

"It was at one time my intention to deal with the question of free trade. I intended to discuss the arguments urged in favour of free trade and the principal objections advanced against any system of 'protection' In the first place, I cannot do so within the time-limit imposed, and in the second place, it does not appear necessary, as I am asking for the appointment of 'a Committee to go exhaustively into the whole question, and to determine whether 'protection,' 'subsidies and bounties' and 'a guarantee of interest' should be allowed 'in such cases and for such time as may be deemed necessary.' I will, therefore, content myself by merely pointing out that every civilized country in the world, including the British Dominions, has abandoned this principle, and follows a line of fiscal policy including protection, as appears best suited to its own needs. England has been the only civilized country in the world which has persevered in her policy of free trade and has enforced it upon India. I maintain that the principles of free trade, however unexceptional in theory, are totally unsuited to the conditions and circumstances prevailing in this country. England has to depend largely for her raw materials, and even for her foodstuffs, upon foreign imports. India has a plentiful supply of raw materials, and produces an abundance of foodstuffs. England is a highly developed industrial country. India may be said to be on the first rung of the ladder in the matter of industrial development. India's position under free trade has been that she has the proud privilege of being the supplier of raw materials to outside countries and furnishing an open market for the factories of the world. In dealing with this subject, however, my task is greatly simplified by the fact that a considerable change has come over British sentiment since the outbreak of the war Even the Manchester Chamber of Commerce, which has been the stronghold of Cobdenism, has recently rejected a Resolution in favour of free trade after the war. There is one point, however, to which reference is necessary. During the many discussions which have recently taken place in England on the subject of the future trade policy to be adopted after the war, India appears by tacit consent to be left out of consideration. I am referring particularly to the recent debate in Parliament upon Mr. Hewin's Resolution. Though the motion was confined to the war period, the whole question was fully debated. Mr. Runciman, in a long and elaborate reply, gave some indication of what is likely to be the outcome of changed conditions due to the lessons taught by the war. The whole time was taken up in the consideration of measures in consultation and co-operation with the Dominions and trade treaties with the Allies. There was not the slightest reference to any consultation with the Government of India, nor a word as regards the part which she was to play in the Imperial Customs Union of the Empire. Before any one corrects me, I will myself admit that there actually was one reference to India in this elaborate speech, and that was to India's ability to supply manganese ore. I earnestly trust that it is not intended to convey that, whatever may be the changes effected by the war in the fiscal views in England, India's position will remain the same, *viz.*, the supplier of raw materials to foreign countries and the dumping ground for the factories of the world. I cannot conceive that such

[*Sir Ibrahim Rahimtoola.*] [21ST MARCH, 1916.]

can be the intention. It is, however, necessary to point out that a copy of the proceedings of the House of Commons has been forwarded to each of the British Dominions, and their views invited on the points raised, while it has not been sent to the Government of India. May I take this opportunity to respectfully remind the responsible Ministers of the Crown that the educated people of India closely follow the proceedings in Parliament which in any way affect the interests of their country and form their impressions from all such pronouncements? His Excellency has kept himself thoroughly conversant with Indian thought and sentiment. I hope he will impress upon the Ministers in England that India will not be satisfied with the position of a trusted dependant, but claims the rights and privileges of equal status in the Imperial partnership. India will not willingly accept a subordinate position in any scheme of Imperial Customs Union. India claims that she is entitled to participate on equal terms in all the deliberative assemblies called for the purpose to determine the lines on which the future Customs Union shall be formed. In claiming this right, India accepts her full share of responsibility. India has its own economic needs and requirements as much as the Dominions, and she claims perfect freedom to pursue such fiscal policy as may, in the opinion of her Government and her people, be best suited to her own conditions. At the same time, she is ready and willing to accept full responsibility of the Imperial partnership in which each member, while working to advance its own economic interests in its own way, participates in schemes for the promotion of the best interests of the Empire as a whole.

"Sir, I am constrained to make these remarks in view of India's past experience. We have been encouraged to hope by clear pronouncements of high authorities, but when the time comes for such hopes to fructify, various reasons are discovered against a full recognition of our just rights. I fully appreciate the difficulties in the way. However much the Ministers of the Crown may be sympathetic, they have to take into consideration the prevailing political conditions in England. Lancashire has 60 votes in the House of Commons, while India has none. The combined effect of these votes has an overwhelming influence on the party system of Government in Great Britain. They have a telling effect upon the determination of the policy which should govern India's economic and industrial development Only two years ago a motion to reduce the duty on Indian tea brought forward to afford relief to the breakfast table of the poorer classes in Britain was negatived on the ground advanced by the Chancellor of the Exchequer that it would be construed as giving preference to India over China, and that it meant 'picking a quarrel with Lancashire's best customer.' China has the power to retaliate, India has none. China imports from Great Britain merchandize to the extent of about £15 millions, and due consideration must be shown to her as a customer. India's imports from great Britain amount to £85 millions, but India is only a British dependency. Russia does not hesitate to give preference to China by lower rates of duty on Chinese tea than on Indian tea. She does so, by differentiating between imports by land and by sea. Germany has imposed a heavy import duty on jute manufactures, while raw jute is admitted free. She secures her raw material in this way, and promotes her industries by penalizing the imports of jute manufactures. America has by similar means tried to throttle our tanning industry, she has imposed heavy import duties on tanned hides and skins, while raw hides and skins are admitted free of duty. Japan, which was not very long ago a large buyer of Indian yarns, has so managed her industrial development that she takes instead a large quantity of Indian raw cotton, and supplies not only her own requirements but also competes with Indian yarns in the Chinese market. Not content with this, she is trying to compete with our mills in the Indian markets, and her exports to India of hosiery and cotton piece-goods have already reached about a crore of rupees. India has, under present conditions, to be merely a patient spectator of what is going on. She has no power of talking about retaliation. She occupies a strong position. Her imports amounted to £122 millions in 1913-14, out of which £96 millions represented manufactured goods.

[21ST MARCH, 1916.] [*Sir Ibrahim Rahimtoola; Sir Gangadhar Chitnavis.*]

Her exports during that year amounted to £162 millions, of which £124 millions represented food-stuffs, tobacco and raw materials, or nearly 77 per cent.; 50 per cent. of raw materials and about 27 per cent. of food-stuffs and tobacco. The Council will clearly see how well India is situated in the matter of her imports and exports. Her imports largely consist of manufactured goods and exports of raw materials, food-stuffs and tobacco. If India was free to talk of retaliation she can do so to some purpose. Such a power in the hands of her Government would enable them to enforce better trade terms and obtain for this country at least 'fair trade' principles.

"I do not wish to go over the ground again how, in spite of the opposition of the Government of India and Indian public opinion, Lancashire's view prevailed in 1894 in regard to the imposition of excise duty on cotton manufactures, and even during the current year in regard to increasing the duty on textile fabrics. I need not mention here how highly India appreciates His Excellency's sympathetic administration or the deep regret with which she is parting from him. We know how highly the British Ministers appreciate Lord Hardinge's valuable services and esteem his great gifts. I earnestly trust that His Excellency will try to render a lasting service both to Great Britain and India by impressing upon the Home authorities that the time has come when fiscal freedom should be conceded to this country, that India should be raised to the status of equal partnership in the British Empire, and that every help and encouragement should be afforded in her efforts for her economic advancement. With the great grasp of Indian problems which His Excellency undoubtedly possesses, I hope he will make it perfectly clear that any disappointment in this direction will be keenly felt throughout the country. The greatest need of the Empire at the present time is high-minded statesmanship. It is essentially necessary that Imperial problems should be dealt with in a broad-minded spirit of Imperial brotherhood, and I earnestly trust that such spirit shall prevail. With these words I will commend my Resolution to the favourable consideration of the Council."

The Hon'ble Sir Gangadhar Chitnavis :—" Sir, I have listened with very great interest to the exhaustive speech of the Hon'ble Sir Ibrahim Rahimtoola. The Resolution has my unstinted support. I feel the necessity of a Committee as much as the Hon'ble Mover does. Not that I hold that the Local Governments are not wideawake to the importance of industrial development, or that they have not moved in the matter as far as possible within the limitations imposed by higher authorities. I am glad the Hon'ble Mover himself gratefully appreciates the work done by Government before now in this direction. I can myself testify to the good work done in the Central Provinces and Berar by the Local Government there under the sympathetic and capable guidance of the Hon'ble Mr. Low as Director. We have in certain matters made some progress, but that is hardly enough. I believe the time has come for a dash forward. A nice opportunity has presented itself. We are freed to a large extent from foreign competition, and that at a time when the pre-war economic theories have received a rude shock. The British Empire has, as the Hon'ble Mover has said in his speech, awakened as from a dream; all round there is a sincere desire to prevent Germany and Austria regaining their hold on the market of any of the units, India included. Unless, however, we make full use of our opportunity there is precious little chance of our wishes being fulfilled. And Government is moved for the appointment of a Committee, because we are anxious that the best use shall be made of the short time at our disposal. If the revival of old industries and the creation of new industries be not helped in the initial stages by Government, there is the very great risk of our adopting wrong lines and of our energies being frittered away in idle attempts to compass the impracticable. The deliberations of a committee like the one under discussion, will help to give us accurate ideas of what is practicable at present,

[*Sir Gangadhar Chitnavis; Rai Sitanath Ray Bahadur.*] [21ST MARCH, 1916.]

There are also several points which must be very carefully considered by such a Committee We have often urged ourselves, and we have seen others urging it, that model factories should be started by Government for the popularisation of different industries I believe in their educative value. We have experience, too, in our support But we cannot forget that the scheme is opposed to the policy laid down by Government. The *pros* and *cons* of the whole subject in these circumstances must be sifted by a strong committee before we can expect Government to accept our recommendation. Similarly, other important suggestions made by the public for the resuscitation of our decaying industries—and reiterated by my friend the Hon'ble Mover—await careful examination. The Hon'ble Mover has raised many other questions regarding capital, labour, etc, intimatly concerning the development of industries in this country. These difficult questions relating to our industrial development, and questions such as the grant of subsidies to promising companies, expert advice about industrial matters to the public and market-pushing cannot be satisfactorily and finally discussed either in this Council or on the public platform Such discussion, to be fruitful, must be undertaken by a committee of experienced gentlemen who will devote their whole time and attention to industrial subjects, and who will verify their inferences at large industrial centres. The appointment, therefore, of an investigating committee is every way desirable. I will not touch here on important fiscal questions connected with the development of our industries. My views about them have been expressed before more than once. But we must recognize that in existing arrangements the Government of India is not the supreme authority in fiscal matters, and the Secretary of State for India, as one of His Majesty's Ministers, has to consider them from a broader standpoint. All the same, it is necessary that our resources should expand in proportion to the increase in our population and the cost of living This can only be when our industries are fully developed, and therefore it is that an exhaustive consideration of the whole subject of industrial development is necessary. The Colonies have taken up this work in right earnest, and it is right that we should have a programme ready which will help us also when the war is over."

The Hon'ble Rai Sitanath Ray Bahadur :—"Sir, the Hon'ble Sir Ibrahim Rahimtoola's Resolution is, in my opinion, only an articulate expression in a concrete form, of a feeling which is uppermost in the minds of all classes of people throughout the country. With his usual powerful advocacy my Hon'ble friend has ably discussed the subject-matter of the Resolution, from all points of view, indicating the line of action to be taken for attaining the object we all have in view. The object being to take advantage of the present situation, to capture as much as possible, of the markets which were in the hands of our enemies. At the outbreak of the war, we were suddenly awakened to the painful consciousness that in respect of many important and necessary commodities, of daily use, the supply came entirely from enemy countries. and the pity of it was that India supplied the raw materials for the manufacture of some of these commodities. This was not only true of our own country, poor as she is, in her industrial aptitude and equipment, but in some respects, equally true of England, the greatest industrial country in the world. In England, many movements were immediately set on foot and some undertakings were taken in hand, just as the situation was realised, and it soon became evident that some definite and systematic course of action would have to be adopted with regard to this question. Even in the height of the present crisis, when the mind of the English nation is wholly engrossed in the prosecution of this great war, they have not lost sight of the importance and necessity of further developing their industries with a view to substituting their own goods in the place of enemy manufactures at Home and abroad Responsible Statesmen not only in England, but also in the Colonies and in the Allied countries, have spoken out their minds, all supporting a policy of concerted action to oust the enemy goods from our own markets,

[21ST MARCH, 1916.] [*Rai Sitanath Ray Bahadur; Khan Bahadur Mir Asad Ali Khan.*]

but no policy has yet been announced in this country. I must admit that the Imperial and Provincial Governments have already done something in this direction. We know that an Industrial Exhibition was organised last year, and the show was exhibited in several places. We know that an Industrial Museum has been recently opened at Calcutta. There have been some industrial investigations and inquiries conducted under the auspices of some Provincial Governments.

"These and all other efforts in this direction are indeed laudable, but I fear their cumulative effect will be very small unless vigorous and concerted action is taken to give all possible encouragement of a nature which would go to stimulate industries. To be plain enough, what I beg to suggest is, that our Government should, in the light of what has been done in Japan, Formosa and Java, take the initiative in launching some selected industries, so that the people might follow their lead, which, I daresay, will have a stimulating effect in developing industrial enterprises. There are other ways in which Government might very well help in developing and stimulating industries, as for instance, by giving subsidies, imposing protective tariffs, regulating railway freights and by expert advice What we urge upon the Government in this connection is that a comprehensive committee should be appointed to thoroughly study the question in all aspects as it relates to India as a whole. What I further beg to suggest is that after the committee, as suggested by my Hon'ble friend, has submitted its report, a permanent Board of Trade should be appointed to assist the Hon'ble Member in charge of the Commerce and Industry Department, in developing the trades and industries of the country. It requires a strong committee to discuss the question in all its bearings. All the important trading interests of the country should be well represented in this committee. The matter is so urgent and imperative that it requires no special pleading on my part to recommend its acceptance to the Council.

"It is a matter of great gratification to us to see the announcement made by Reuter last evening that the *Times* understands that the Government propose to appoint a representative commission, including several Indian members, to survey the economic resources and the industrial possiblities of India, with a view to the promotion of business enterprise aftes the war. The annoucement is as if in anticipation of our Hon'ble friend's Resolution. We hope the information contained in the *Times* will prove true. This is as it should be. Our only prayer is that the proposed commission should be a little more comprehensive.

"Sir, with these few words, I heartily beg to support the Resolution which has been so ably moved by my Hon'ble friend Sir Ibrahim Rahimtoola."

The Hon'ble Khan Bahadur Mir Asad Ali Khan :—" Sir, in heartily supporting the Resolution of my friend, the Hon'ble Sir Ibrahim Rahimtoolah, I should like to emphasise the need for a complete industrial survey of India, as would suggest great commercial possibilities in the near future. The real prosperity of the country depends upon her economic independence. With the exception of the cotton and jute industries, there is perhaps no large industry worth the name. Next in importance to these is the tanning industry which needs even greater attention than in the past. Among other industries requiring particular attention may be mentioned the mining, paper and sugar industries. Mica mines may be worked with success, and manganese ores are to be found in abundance in certain tracts of the country. The war has brought to prominence the question of the paper industry. More than half a dozen paper mills are working in this country, most of them not as efficiently as they should. For instance, the Punalur Paper Mill in Madras needs badly State aid. It is even proposed that the Madras Government should take over and manage that concern. As for sugar, too, why India should import such a large quantity from Java is really inexplicable, when we find

that that industry can profitably be worked here. Besides, small cottage industries can be revived or encouraged, and small model factories, too, may be set up at important centres through State aid.

"Food and clothing are the prime necessaries of life, and India, rich in her natural resources and in her varied climate, need not depend upon any foreign country for the very necessaries of life. And yet it seems strange that under food and clothing she imports large quantities, especially the latter. The development of her internal trade, therefore, means her assured commercial prosperity. Even as they are, all the 240 cotton mills are too inadequate to meet the large needs of the country. The less cotton goods imported, the better. India imports to-day about sixty-six crores worth of cotton goods (including yarn and twist).

"Any committee that may be appointed, I venture to submit, should concentrate its efforts upon a few large industries that can easily be developed to the country's great advantage. Smaller industries, such as the glassware, pencil-making and match industries, may be allowed to take care of themselves. The Board of Scientific Advice should increase its usefulness and enlarge its sphere of operation by applying chemical knowledge to the promotion of industries.

"In Madras, Sir, we had successful experiments conducted through State aid in the aluminium and chrome leather industries. If similar attempts were continuously made in regard to smaller industries, such as glass-making, pencil-making and match industries, these industries will surely thrive better under Government auspices. The leather industry has of late received increasing attention, and new companies are being floated for the manufacture of leather goods. The Director of Industries, be it said to his credit, has been a useful factor in the investigation of industrial possibilities.

"Industrial expansion in India, Sir, is one of the crying needs of the hour. Closely associated with the growth and development of Indian industries is the fiscal policy of the Government. Though I do not propose to enter into that large question, yet I believe that a beneficial change of that policy so as to afford protection to our infant industries is indispensable to any real industrial advancement in the country.

"Now that trade has ceased with the enemy countries, the State with its great power of organization and vast resources, should not let go this golden opportunity by suffering either neutrals or even Allies to capture the Indian market. I do hope, therefore, that the outcome of this Resolution will result in the gradual expansion of Indian trade both internal and foreign, and in building up the commercial prosperity of the Indian Empire.

"With these words, I beg to support the Resolution."

The Hon'ble Mr. Dadabhoy:—"Sir, though I readily acknowledge that Government has done a great deal in the past in the matter of collecting useful information by industrial surveys and otherwise, I still hold that Government can do much to help the industrial development of India, and I have more than once indicated the manner in which this help can be usefully rendered; but in the pre-war days Government continued wedded to an economic policy which did not hold out a great promise to the people of direct State assistance or even guidance. Proved success and the example of foreign countries were equally powerless to wean the Government from a policy of strict non-interference in industrial matters In Madras, the experiment of direct official association with the industries proved so successful that the Provincial authorities contemplated an extension of the principle, but the idea had to be abandoned under orders from the Secretary of State The war, however, introduced a new force, and necessity was expected to prove at least more effective than abstract reasons. But while even in Free Trade England the State has stepped forward

[21ST MARCH, 1916.] [*Mr. Dadabhoy.*]

to lead the people to manufacture articles the supply of which has become short on account of the war, we in India have not yet got through the preliminary stage of investigation It is only right therefore that the Resolution should be accepted by Government, and that a strong committee should be appointed. The task before the committee is important; a good deal of our future development will depend upon the results of its investigations.

"It will have the advantage of having before it the report of the British Advisory Committee, but the difference in the local conditions will in all likelihood lead to a somewhat different programme.

"Sir, in my humble opinion, the development of the existing industries should engage the earnest attention of the committee even more than the question of the introduction of new industries. I do not deny the need, in some cases the urgent need, for new manufactures. Nothing would satisfy us more, or would serve our interests better, than the larger utilization of our raw products in the manufactures and the replacement of foreign manufactures by the finished products of our own mills. Our success in this direction would undoubtedly depend in a large measure upon new manufactures. But it should be borne in mind that perhaps the sounder course would be to conserve what manufacturing industry we have, and to consolidate the ground already gained before we launch into new ventures. I find that some of our important industries are in an unsatisfactory condition, and in some others we are actually losing ground. I find that down to 1912 the development in certain industries was either slow or retarded, and in certain other industries there was an actual decline. The paper industry and the sugar industry may be cited as illustrative of the former proposition, and the lac industry, the woollen manufactures, the distillation of spirits, the iron and brass manufactures and the silk filatures, of the latter. The factories of each one of this last group of industries have shown a steady decline in number, productive capacity and the total strength of labour employed, the lac factories showing the heaviest decline. The existing industrial reports do not enlighten us about the causes of this regrettable state of things. Every effort should be made to prevent the ruin of these industries, and the committee recommended in the Resolution before the Council will have done a real service to the country by suggesting simple means of their preservation and development. These industries are suited to the country, and nothing inherently wrong is noticeable. With regard to the paper industry, it is difficult to believe that it does not admit of immense expansion. It may be that the cheap supply of wood pulp is the first condition necessary for development, but the investigations so far made warrant the conclusion that the solution of this problem is practicable. The development of the sugar industry, on the other hand, appears to depend upon the utilisation of the by-products. Here too it will be possible for the committee, I doubt not, to formulate simple and workable schemes of supplementary industries, with a view to prevent waste of materials and to make the main industries more profitable, and to suggest improvements in the manufacture. If the committee succeed in helping the development of these two industries at least, it will have done something to earn the gratitude of posterity. There are other industries, however, little undertaken now for one reason or another, which are more or less both individually and collectively important and the possibilities of the introduction of which appear reasonably great. Matches, dyes, drugs, soaps, fertilisers, glassware and a number of other articles are now imported in large quantities from abroad, and the only change which the war has so far effected is to transfer the business from Germany and Austria to Japan and the United States of America. We do not lack the principal materials. They are to be found in abundance within the country, but the great drawback appears to be that the necessary chemicals have to be purchased abroad, and the prices demanded are prohibitive. Our first effort accordingly should be to organize the manufacture of chemicals. And in this matter especially the committee's report ought to be suggestive. My own view is that we should follow the German example, and a body of scientific experts should be maintained at State cost for discovering and advising

[*Mr. Dadabhoy; Mr. Low.*] [21ST MARCH, 1916.]

new processes of manufacture. Germany owes all her present greatness both industrial and military, and go-aheadness, to the labours of her scientists and research scholars. We should not be slow to profit by that example. The importance of science and research work in our national life must be recognized, and the public funds must be freely used for the support of great laboratories. This subject in all its details can only be properly examined by a special committee, but a committee of industrial experts are expected to throw considerable light on the lines in which an immediate beginning is possible. For the development of most of the industries this question of research institutes is of supreme importance, and the sooner it is handled in a thorough manner, the better it is for India.

"Sir, I do not deem it necessary to emphasize the importance in this connection also of an early and satisfactory settlement of large political questions like those of fiscal autonomy and the right to determine independently our industrial and commercial relations with foreign countries, or of economic questions like those of a protective tariff, subsidy to industries, supply of cheap capital, banking facilities, facilities of transport and advertisement. The committee cannot leave them out. The result of their investigation will be anxiously awaited by the people of this country. In the view I take of the importance of an early and thorough investigation of the numerous points connected with the whole question of the industrial development of India, I accord my hearty support to the Resolution."

The Hon'ble Mr. Low:—"I crave the indulgence of the Council while I make a few remarks about an aspect of the matter with which to-day's Resolution is concerned, which has not, I think, received sufficiently full treatment in the speeches of Hon'ble Members hitherto. Much has been said of the industrial helplessness of India, and of the failure of Government to lend assistance. I propose to explain briefly what is India's real position as a manufacturing country, as a corrective to the somewhat pessimistic views which have been expressed in to-day's debate, and in order to show on what foundations those of us who look forward to a still brighter future build our hopes. I shall also briefly recount the various efforts which have been made by Government, in spite of difficulties, to help towards a fuller industrial development. I should like, before proceeding to discuss these topics, to say a few words about my own personal views. I have for many years felt the extreme importance of a definite Government policy for the encouragement of industries in this country: a cause in which I confess to being an enthusiast. Such small efforts towards the attainment of this ideal as were possible for an official in a minor and industrially somewhat backward province, I have made, with the feeling, it is true, that the task on which I and others were engaged was long and full of difficulties and unlikely to show any immediate results, whatever the policy adopted and however fully it might be supported by Government, but with the assurance that it was the bounden duty of Government to adopt all right and fair means to accomplish the end in view, and with the sure and confident hope that the co-operation of Government and people and the working of inevitable economic causes would, in the future, distant though it may be, secure for India and her people a fair share of the individual profits and national strength that may be expected from the conversion of her raw products into manufactured goods.

"The Hon'ble Mover calls on the Government to make a great effort to a great end: we admit the necessity, we have for long admitted it and acted on it so far as circumstances permitted, but the path bristles with difficulties.

"I should like to give some reasons for the faith that is in me. Several Hon'ble Members have spoken as if there were no industries in India, as if her only economic rôle hitherto had been the tame surrender of her natural wealth for foreign manufacturers to work their wicked will with. Did I believe that this was the case, I should esteem any effort that Government could make

[21ST MARCH, 1916.] [*Mr. Low.*]

to remedy this state of affairs to be vain : but I am far from such a belief. I think it can be shown that, where circumstances admit, private enterprise in India has taken no mean toll of the possibilities of creating wealth afforded by the manufacture of her raw products ; and that the difficulties in the way of future progress lie mainly in the fact that in several directions it has come within sight of the end of any further advance on the lines which it has hitherto followed, and must seek for new ones. In all industries for which the agricultural, mineral and industrial products of the country supply means and materials, or, for which the assistance of foreign countries can with advantage be obtained, India has made substantial progress. The cotton industry was started in India as long ago as 1851. It was for long conducted by European enterprise, but the force of example was felt in time, and since Indian capital began to regard it as a possible field for investment, its progress has been extraordinarily rapid In 1884, there were only 63 mills at work, with a capital of about 6⅝ crores, and a labour force of a little over half a lakh. By 1914, the capital invested had nearly quadrupled, the number of mills had more than quadrupled and the labour force had been multiplied more than five times.

"The production of the higher counts, in spite of the fact that India has to pay higher freights than her competitors on most of her imported long-staple cotton, and in spite of the handicap inflicted on her by the fluctuating nature of her labour supply, has increased very largely. Though for long insignificant, it has trebled within the last 20 years: and with the hope of an increasing production of long-stapled cotton in certain important areas in this country, the future prospects of this section of the industry seem promising.

"The increase in the jute industry has been equally striking. The number of mills at work has grown from 21 to 64 in the last 20 years, and in the same period the capital invested has increased from 270 to 1,309 lakhs, and the employés from 38,000 to 2,16,000. Jute is an Indian monopoly, and the coal fields are near at hand. With these factors in its favour, it cannot be doubted but that, if there had been in Bengal the same bent towards industrial enterprise as was to be found among the hereditary trading and industrial castes of Bombay, a city whose face has always been turned towards a wide ocean and the distant ports of Africa and Arabia, the investment on a larger scale of Indian capital would have led to a still greater increase.

"But the profits of the industry are by no means monopolised by Europeans The jute growers of Bengal have gained enormous sums by the increased prices and extended demand : very large sums have been invested in mills and in the finance of the trade by Indians: and the great wealth of Calcutta and the opportunity it gives for trade and employment are largely, if not mainly, due to the jute industry. In the year 1901, apart from these two industries, there were no other large power actuated manufacturing industries, strictly so called, that employed as many as 20,000 persons and only 4 that employed 4,000 or more.

"At the present time among power using industries, iron and brass foundries employ some 25,000 hands, and rice mills about 22,000, while saw mills employ 11,000, and woollen mills, petroleum refineries, coffee works, sugar factories, oil mills, paper mills, tile factories, leather and tanning works and silk filatures all employ over 4,000 hands.

"Turning to other than strictly manufacturing industries, we have first the coal industry. The first Indian coal mine was opened in 1820: in 1912, India was (and doubtless is still) the ninth coal-producing country in the world, her production having increased from under a million tons in 1880 to over 16 millions in 1913. And all of this but ¾ of a million tons she used on her own manufactures or on the transport of her goods, I need not perhaps say anything of the rapid rise of comparatively recent mining industries, such as manganese, mica, gold, petroleum, in some of which Indian capital and enterprise have no unimportant part: for after all, these are of little direct assistance at

[*Mr. Low.*] [21ST MARCH, 1916.]

present to manufacturing industries, though by familiarising Indian labour and capital with the conduct of organized industries, they exercise a certain educative effect. Nor need I add to these rather dull statistics by speaking of the rise of the tea industry.

"There are, however, other lines of industrial enterprise which have, till recently, been altogether neglected or pursued half-heartedly. To exploit to the full such industries as the manufacture of oil and oil products, of paper, of glass, dyes and paints (and be it remembered, we have in India ample supplies of the raw material in all these cases) India needs a 'heavy chemical' industry; she can hardly obtain this, nor can she hope to manufacture her own machinery, without an iron and steel industry Fortunately, however, here a most promising beginning has been made. Messrs. Tata and Sons, whose name will ever stand high in the roll of Indian industrial fame, have started and successfully organized a modern steel making plant, which has now passed the stage at which the infantile diseases that attack youthful industries are a source of danger, and is mainly concerned with what shall be the next direction in which it shall expand Messrs. Tata and others have now installed a number of modern by-product coke ovens, which will render available many products, valuable alike for agricultural and industrial purposes, which have hitherto been wasted With achievements such as these to point to, what room is there for despair of India's industrial future? Is it necessary for so many of her existing industries to lie at the mercy of foreign—possibly hostile—sources for indispensable materials? It may be a long day before we see dye-works like those of Germany established in India, but there is no reason why at no very distant date we should not make our own ferro-manganese (I believe Messrs. Tata have already begun to do so), our own ferro-tungsten, our own bleaching powder and alkalis for paper and soap making; and in due course, a good deal of the less elaborate machinery that we now import from abroad.

"But it may be asked what share have the Indian Government taken in Indian industrial progress apart from the gift of internal peace and order which the Hon'ble Mover of the Resolution acknowledged, and the creation of cheap and easy means of communications, both indispensable to industry and trade, but not specially brought into being for that end? The great organized industries of jute and cotton, tea and coal were called into being by existing opportunities; they received the sympathy and countenance of Government in their first inception, and it has been the task of Government since to smooth difficulties from their way, where possible; but it has not been necessary for Government to give any more direct assistance, although something has been done by means of Government institutes like Sibpur College in Calcutta and the Government-aided Victoria Jubilee Technical Institute, Bombay, to supply trained staff for organized industries that were in a position to offer them employment.

"We may now examine the nature and effects of the various efforts which Government have recently made. and I think I shall be able to show that, in spite of certain difficulties, these efforts were not inconsiderable, that their results were beneficial, and will yield useful data for a more extended future policy.

"They began with the development of aluminium hollow-ware manufactured by the Madras School of Arts, an undertaking which was carried on between the years 1898 and 1903 and, after successfully proving that aluminium hollow-ware could be manufactured in this country at a profit, was sold to the Indian Aluminium Company for over two lakhs of rupees. The result of this experiment has been to introduce an important industry to multiply the imports of unmanufactured aluminium by more than 25 times in eight years, and to provide for the Indian public a most convenient article of daily use. A similar attempt in Madras at introducing chrome tanning, though it was not so completely successful as the aluminium factory, was at any rate of great assistance in starting the new and promising industry of chrome tanning in this country, at the net cost to Government of upwards of

[21ST MARCH, 1916.] [*Mr. Low.*]

half a lakh of rupees. In the United Provinces, a sugar engineer was appointed in the year 1912, who re-modelled a sugar factory under Indian ownership, and enabled it to work at a profit. Loans amounting to over seven lakhs of rupees were given for the establishment or improvement of cane factories and a small experimental factory was also started by Government. A cotton seed oil factory was established in Cawnpore and managed for some time on behalf of Government, although at a loss. It was closed in the year 1911 in consequence of certain orders of the Secretary of State, but it had at any rate successfully proved the possibility of manufacturing cotton seed oil in India as a commercial proposition, and cotton seed oil mills are now working under private management in several centres. We all know about these orders of 1910 and what was their result on our efforts, but it is only right to say here, that they were due very largely to the difficulties presented by existing industries, with which it was thought that they might unduly interfere. In the case of the sugar industry, the problem is mainly agricultural. It is necessary for the cultivator to be shown how to increase his yield per acre sufficiently to enable him to supply cane to factories at a price and of a quality which will enable India to compete successfully with sugar makers in other countries. Much of the intricate and detailed work of investigation necessary to this end has been accomplished, though much still remains to be done. Prolonged investigations, involving a good deal of expense, have been undertaken by the Forest Department into the possibilities of manufacturing paper pulp from bamboos, and from certain species of grasses which have not hitherto been used for that purpose. The results are most promising; but no Indian capitalist has so far come forward to make use of the results obtained by Government research; and to encourage such attempts the United Provinces Government are, it is understood, considering the idea of starting an experimental factory for the manufacture of pulp from *ulla* grass.

"It is perhaps hardly necessary to detail the various steps which Government has taken to help industries during the last year and a half. These were described by the Hon'ble Sir William Clark and the Hon'ble Mr. Carr in their speeches of last year in reply to Hon'ble Raja Khushalpal Singh's Resolution. Since then, we have had the very successful Madras Exhibition, while the peripatetic exhibition of Indian industries and of competing foreign industries has been permanently established on a wider basis, and has now been given a local abode in Calcutta. In the United Provinces, a Government loan of Rs 35,000 has recently been given to help an oil mill in Cawnpore to lay down improved plant; a small loan has been provided for the Naini glass works, and another for glass bangle works; efforts have been made to recruit glass workers from the United Kingdom and Belgium which have, we have just heard, been successful: an expert has been sent out to assist lamp makers in the United Provinces and in Delhi; the manufacture of bichromate of potash from Indian chrome iron ore has been started with the aid of a Government subsidy. The manufacture of thymol from *ajwain* seeds has been investigated, and a company, which is proposing to start work in Dehra Dun, has applied for a grant of land on favourable terms, which is under consideration. A bureau for the sale of cottage manufactures has been established, and assistance and advice have been given in numerous other directions, for which I may refer Hon'ble Members to the proceedings of the United Provinces Board of Industries, as published from time to time in the press. In Bombay, an Indigenous Industries Committee has been instituted, on which Indian capitalists figure very largely. The possibility of the extraction of magnesium chloride and glauber salts, chemicals of much importance to the cotton trade, from the Kharaghoda bittern, has been investigated with promising results, and a concession has been given to an Indian contractor for its removal and manufacture. The difficulties of the present time in respect of finance and in the obtaining of plant and chemicals and of experts for the conduct of experimental industries are very great. In spite of these, Government has done its best to bring to the notice of the public promising openings for industries and, so far as present circumstances admit, to help initial attempts. I hope I

[*Mr. Low; Mr. Surendra Nath Banerjee.*] [21ST MARCH, 1916.]

have now made good the position which I set out to prove. I have tried to show that no mean degree of success has attended the efforts of Indian industrialists in exploiting such industries as can be carried on with imported machinery and a comparatively small amount of imported material : and that the efforts of Government, so far as circumstances permitted, have not been so unimportant as is often somewhat unfairly alleged. If you will admit these two points as proved, I think that, with a continuance of mutual good-will and co-operation on the part of Government and people, there is no reason to despair of India's industrial future; but both alike must now make up their minds to a special effort."

The Council here adjourned for lunch, and after adjournment, the **Hon'ble Sir Reginald Craddock** took the chair.

The Hon'ble Mr. Surendra Nath Banerjee:—"Sir, I beg to support this Resolution. Sir, there is abundant evidence that since the outbreak of the war and partly due to the war, there has been an awakened interest created in the educated mind of India regarding the development of our industries. The discussions which have taken place in this Council and the other Legislative Councils. and the utterances of our newspapers and of our public men, unmistakeably point to the conclusion that there is an industrial ferment amongst us. The dominant note of this sentiment is that the Government should actively participate in the encouragement of our industries, and should no longer retain a position of isolation which it occupied in relation to the great problem of industrial development. Sir, along with this feeling, there is a sense of disappointment to which I feel it my duty, from my place in this Council, to give expression. And that feeling is, that the Government has not done what it might have done, and that, when the Government begins to move, the machinery moves slowly indeed. My Hon'ble friend, Mr. Low, referred to the activities of the various Local Governments in regard to our industrial development. I desire to remind the Council of a very important pronouncement that was made by the Hon'ble Sir William Clark in February 1915, when this question was under discussion. I will not quote the words of my Hon'ble friend, though I have got them here, but I will reproduce the substance of what he said. He deprecated the starting of new industries, but he said that in regard to certain existing industries, the moment was suitable for encouraging and developing them, and he mentioned some of those industries. They were the manufacture of various types of glassware, earthenware, the manufacture of celluloids, pencils, matches, etc. I fail to find in the speech of my Hon'ble friend, Mr. Low, any reference to those industries, and I should like to know what has been done in that connection. The Hon'ble Mr. Low referred to the activities of the various Provincial Governments in this connection. Sir, I do not for a moment dispute the fact that Provincial Governments, at least some of them, are very earnest about the matter. The Bengal Government is very earnest; the Madras Government and the Government of the United Provinces pre-eminently so; but there seems to be an absence of co-ordination in the efforts of the various Provincial Governments. Some of them are very active; others move with a slower pace. I hope and trust that the Government of India will see to this and, being the Central Government, bring about a co-ordination in the activities of these various Governments. Sir, I hope and trust that the labours of the Committee which is to be appointed will be fruitful of good in that direction.

"Sir, I do not know whether my Hon'ble friend, the Commerce Member in the speech that he will deliver in this connection, will refer to any of the instructions that may be given to the Committee. My friend has moved for the appointment of a Committee to report upon industries; but the Committee must have instructions as to the lines upon which they are to proceed. Those instructions must be formulated by the Government; they cannot evolve them out of the depths of their inner consciousness. There must be a regular mandate—if I may use that word, though, perhaps it is too strong a word to use—coming from the Government of India. I hope the Hon'ble Member in charge

[21ST MARCH, 1916.] [*Mr. Surendra Nath Banerjee.*]

will be able to tell us the nature of the instructions he proposes to issue to this committee. In the absence of any light or guidance upon the subject, my friend, the Mover, undertook to formulate some of them. I think he gives the place of honour to fiscal autonomy. I am in entire agreement with him, and I hope and trust this Council will be in entire agreement with him in this matter. We have been too long in the leading strings, I hope I am not using disrespectful language, of the India Office and of the Cabinet. Our interests are subordinated to the interests of the British Government. I think, Sir, it was time that we were permitted to stand upon our own legs and to decide the great problem of industrial development according to our needs and according to our consciences, with due deference undoubtedly to Imperial interests. England is the mother of her Colonies and Dependencies It is not for one moment to be supposed that, in any scheme of industrial development that we may formulate, we should cut ourselves adrift from the mother country, or adopt any programme that may be detrimental to her commercial interests. That is unthinkable Canada, Australia and other parts of the Empire have all got fiscal autonomy, and why should we not? I regard that, Sir, as the fundamental condition of our industrial progress, and I do hope and trust that you, Sir, will be able to tell us from your place in this Council that that is one of the points in regard to which the committee will be asked to report.

"The next point to which my Hon'ble friend, the Mover, referred is the question of protection. He said and he did not in the slightest degree conceal the fact that he was a protectionist We are all protectionists in a more or less qualified form, and, Sir, we claim to be in very good company I desire to call the attention of the Council to a preface written by the Secretary of State for India, Mr. Austen Chamberlain, to Sir Roper Lethbridge's book on Tariff Reform. I tried to get that book from the library, but I could not get it; I tried to get it in Calcutta, and I could not; I had a copy sent to me by the publishers, and in the preface to that book, Mr. Chamberlain declares himself out and out as a protectionist as regards India. Japan has risen to her present position of eminence in the industrial world by following a policy of protection suited and adapted to her interests The Government of Japan placed itself at the head of the industrial movement and helped it by subsidies, by bounties, by grants, by reduction of railway freights, and by a hundred other means. Japan encouraged her infant industries, and to-day she has captured the markets of India, now that Germany and Austria have disappeared from them. Go to any market and try to purchase any toys or things of that kind, you will find that they are all Japanese. I am interested in a girls' school and wanted to give the girls some toys as prizes. I could not find any other toys; they were all Japanese. I think, Sir, instruction should be given to this committee to consider the circumstances and the conditions which have brought about the marvellous industrial development of Japan. Let them report upon the question as to whether protection is suitable to India or not, protection qualified or unqualified, let them report upon the conditions which have brought about the marvellous industrial development of Japan. I am sure that will throw a great deal of light upon the policy and the programme which the Government will have to follow in this connection.

"Sir, we know nothing at all about the personnel of the committee, but the 'Times' indulges in what may perhaps be called a bit of intelligent anticipation. I find in it the names of an Hon'ble Colleague; I find in it the name of Sir Dorab Tata, and, from Bengal, I find the name of Sir Rajendra Nath Mukerji. No better selection could have been made. Sir Rajendra Nath Mukerji is not only a captain of industry but, having risen from the ranks, he is familiar with all the phases of our industrial evolution and the conditions of life among our people which conduce to industrial development.

"I do not find the name of any leader of public opinion on that committee. Sir. I have a great regard for expert knowledge, but, I think, expert knowledge should be combined with knowledge of human affairs. The expert—I speak with the utmost respect of experts—is apt to be narrow in his views; the man

[*Mr. Surendra Nath Banerjee; Mr. Rama Rayaningar.*] [21ST MARCH, 1916.]

of affairs is apt to be liberal and broadminded; and the association of men of affairs with experts will be helpful to the committee.

"There is only one other remark that I desire to make. I have come across a notable observation made by an English writer. He says 'Education and hungry stomachs are the raw materials of revolution.' The Hon'ble Mr. Low has brought this remark prominently to the notice of Government in connection with certain conditions that he thought were existing in East Bengal. Sir, education you cannot stop: the tide is flowing on with irresistible vigour and with growing intensity and volume; but the hungry stomachs you must fill, and you can only do so by the development of our industries.

"Sir, it is a delusion to imagine that India has always been an agricultural country. Why did the East India Company come out to this country to trade with us? Not for our rice, not for our dhal, not for our wheat, not for our jute—jute did not exist at that time; they came to this country to purchase our muslins, our calicoes, our cotton fabrics; and under proper guidance, under the fostering care of the Government, we may again develop ourselves into a manufacturing nation. Our agricultural capabilities will help our industrial resources, and our industrial resources will strengthen our agricultural capabilities: they will act and react upon each other and strengthen each other, and the poverty of India will be a thing of the past.

"I wish every success to this committee, but I hope and trust that definite instructions will be given to them. I hope and trust that they will be called upon to report upon the question of protection and fiscal autonomy, upon the conditions which have enabled Japan to achieve her marvellous success in the industries. The committee's labours, thus guided and directed will, I am sure, mark the inauguration of a new era in the industrial development of this country."

The Hon'ble Mr. Rama Rayaningar :—"Sir, I support the Resolution. I am convinced of the great importance of the question of the industrial development in India. The economic condition of the people, though it is better now than it had been before, is far from being what it should be. The average income per head of the people is indeed very low; it is the lowest in the civilized world The only way to effect an improvement in the condition of the people lies in the development of the manufacturing industries of the country. The need for the development of industries in India is always present, and the war has accentuated the need. Hitherto, we have been depending upon Germany and Austria and other foreign countries for the supply of manufactured goods required for our every day use, but the war has cut off the source and the people are put to great deal of inconvenience. We must take steps to avert a similar contingency in the future. Moreover, now there is an opportunity for us, the like of which we shall not have. If we miss this opportunity, there will be no chance for our industrial advancement. There is ample scope for industrial development in the country. We have materials for many manufactures, yet we continue to import from foreign countries articles of those manufactures. We must therefore try our best to take this opportunity and start manufacturing industries. There are, however, difficulties in the way: what these difficulties are and how to surmount them is the problem? It is to solve this problem that we want a committee of experts. I am glad the appointment of a commission has been announced. I have no doubt the commission will take the difficult problem into consideration and try to solve it.

"I wish to invite Government attention to one point in this connection, Sir, too much importance is attached to the establishment of big factories. Those who advocate the establishment of big factories do not seem to pay attention to the conditions of Indian life, as also the evil consequences of modern factory life. The villager is not drawn away from his home without being exposed to the risk of being deteriorated both morally and physically. It is therefore necessary to consider an alternative scheme of factory industry which will keep the villager employed in his home. There are authorities who

[21ST MARCH, 1916.] [*Mr. Rama Rayaningar; Rai Ghanasyam Barua Bahadur*]

hold that such a scheme is feasible. An industry can be started on co-operative principle, with different parts of the plant put up in different villages and worked with electric power. The produce of these small factories can be credited to some central organization. Big industries can be divided and successfully worked on co-operative principles. If such a scheme is possible, I should think the villager, having in his own place employment throughout the year, will not be driven to live the urban factory life. I hope the Committee will carefully consider this aspect of the question and formulate practical schemes for the establishment of such rural work, house industries.

"Sir, there are also other questions. I do not wish to detain the Council any longer. I only suggest that the commission should investigate what industries are possible. We in Madras were beginning to have oil industry, but unfortunately the war has put a stop to it. The possibility of this and other industries, such as the manufacture of soap, matches, chemicals, manures, etc., must be investigated. The commission must ascertain what minerals, what agricultural and forest produce could be economically obtained and utilised in these manufactures. Then there is the question of State pioneering and State subsidizing. We have made some experiments in the direction of State pioneering in Madras, and they were successful; but unfortunately, owing to the interference of the Secretary of State, the experiments were discontinued. Whatever reason there might have been for the interference then, there is no reason now why the experiments should not be renewed. State subsidy will greatly encourage indigenous enterprise."

The Hon'ble Rai Ghanasyam Barua Bahadur :—"Sir, I have no doubt that one of the foremost thoughts of the Indian to-day is the rapid advance of India on industrial and commercial lines. The figures given by the Hon'ble Mr. Low are encouraging indeed, and they prove that India is not only thinking but doing some work, and that the speed of progress has been greater of late years than before.

"I had the honour of making some remarks in the course of my Budget speech last year, which I take the liberty of repeating to-day. I said—

'Nothing short of a policy like the Railway policy will meet the demands of the country, and I feel convinced the country will be prepared to bear the burden. Bounties, subsidies, and even partnership by Government, as well as guidance and supervision are in the present stage of India necessary to induce private capital, which is so shy, to come out to the field of enterprise; when the people will under such guidance and support be widely and extensively trained in western methods of business and will begin to have confidence in their own undertakings, there will be no longer any need of such extra privileges; but, till then the Government should, I think, be prepared to conceive and shape a comprehensive policy to help the people. It is not the time to-day to dilate on this vast subject. All I beg to submit is, that it will be no labour lost to Government to consider seriously the subject, and formulate a policy of its own to make possible the rapid development of this vast Empire into an industrially and commercially prosperous country'

"And the Resolution now before us repeats my sentiments in a more comprehensive form. In spite of the progress made by India as shown by the Hon'ble Mr. Low, the size of the country and the largeness of her population apparently make the progress seem none the less very insignificant yet. India is conscious of her poverty and wants to shake it off as quickly as possible; she is anxious to grow more repidly than a normal course would permit It is often said that developments on such lines must be natural and spontaneous, and that India must patiently wait and work on. But, Sir, I beg to point out that the ideas of India are really in advance of their capacities in many things, just as the wants of the average Indian to-day are often above his income. The prolific source of English education and the imbibing through it of many advanced ideas not only of England but of other civilised countries, are developing a precocious mental growth which must be supplemented by means of suitable methods of material growth by the same benign Government who have made them taste of the tree of knowledge. India cannot, I submit, keep her proper balance unless upheld by Government in the matter of material development, of commercial and industrial advancement in keeping with her

[*Rai Ghanasyam Barua Bahadur; Mr. Madhu Sudan Das.*] [21ST MARCH, 1916.]

mental growth The proposition has been broadly laid down by some civilised countries like Germany and Japan that the poverty and ignorance of a nation are only removable evils, and they have proved the truth of it almost to the hilt Will not therefore India look to her Government with the same spirit of confidence that Government will make the same demonstration here? That is the real situation, and happily enough we are daily coming to more and more feeling relations as between the Government and the people; and I have no doubt that this national question will soon find easy solution in the hands of our rulers. Co-operation, as the Hon'ble Mr. Low said, between the Government and the people will make all we want possible, and that co-operation is becoming more patent, more real, and more substantial every day.

"It will perhaps be going out of the way to discuss about particular industries in to-day's debate, but I may mention that even remote Assam has also had her sentiments awakened in this respect, and last year an industrial conference was held under Government auspices, where a number of Resolutions about various local industries were passed which may not be unworthy of the consideration of the committee proposed by this Resolution.

"The Resolution aims at forming the basis of a well-considered policy to be pursued by the Government in this matter, and I strongly support it. I have no doubt that Government will see its way to accept it; and if the committee proposed is formed, I hope all the provinces will have facilities of representation"

The Hon'ble Mr. Madhu Sudan Das:—"Sir, this Resolution has, I believe, been moved at what I consider a psychological moment. The war has opened the eyes both of England and of India, to the fact (more so perhaps the eyes of the Indian Government than of the Indians generally) that foreign goods find their way in immense quantities to India. By foreign goods I mean especially German and Austrian goods. Only yesterday, a sympathetic Viceroy removed the fetters of indentured labour so that our hands might be free; and I have no doubt that in this very Council where the shackles of indentured labour were struck, after a short time on the same anvil the Manu mission will be forged. I believe in my heart of hearts that the two countries, England and India, have been brought together by a benevolent dispensation of Providence. The two countries have not been brought together so that one of the countries only should be benefited by the contact to the prejudice of the interests of the other country. At a psychological moment like this, if we realise the importance, the far-reaching significance, of this Resolution and imagine to ourselves that outside this Chamber there are millions and millions of people, of whom it has been said, and sympathetically said, and very often said, that they do not get a full meal twice a day, that their hands are paralysed and fettered, that they are the children and grand-children of those very men who were the architects of all the beautiful edifices that we see in India, when we realise these facts and also that in this Council Chamber we have non-official members of India representing the interests of millions, and also official members most of whom are Englishmen representing the traditions, the history, and the glorious past of England, then I feel, Sir, that this is a meeting the real significance and far-reaching consequences of which are very great. It is a pity that we do not like to see one another's weaknesses I suppose, Sir, before the invention of mirrors, before mirrors were introduced into the world, every woman thought she was the prettiest woman in the world, and every man thought that he was the most handsome man in the world. Mirrors soon showed them their real features. Consequently, on occasions like these, psychological mirrors are very much needed. Crimination and recrimination will not bring about that co-operation between Government and the people to which Mr. Low has referred in his speech. Here is a fact that we have discovered, that there is a common enemy; we are all determined to crush him; both countries are shedding their life-blood through thousands of their sons. The question is, cannot anything be

[21ST MARCH, 1916.] [*Mr. Madhu Sudan Das; Mr. Surendra Nath Banerjee; Raja Syed Abu Jafar of Pirpur.*]

done by Government, with the people to co-operate with Government, to shut out goods that India had got from Germany before these days? I think I understood this Resolution to mean that questions of this nature should be referred to a committee, but I suppose we are drifting into matters which may perhaps embarrass Government and perhaps embarrass the committee, should the committee be empowered to deal with such questions. The power of the non-official member is confined to this, that he can recommend certain Resolutions to the Governor General in Council.

"Sir, is it practicable by a Resolution in a Council like this to recommend to the Governor General that India should have autonomy in its fiscal policy? Can a reference like this be made at the instance of India alone? Reference to a question like this might disprove that there was a point of contact where, in an emergency like this, there might be co-operation between the people and the Government which would bring about beneficial results. The remarks of the Hon'ble Rai Sita Nath Bahadur show that the Government had an exhibition in Calcutta to show the industrial products of Germany and Austria which found their way to India. Austria and Germany have been sucking the blood of India, like the American bat which, while it sucks human blood, actually fans its victim with its wings. It has been discovered that they are blood suckers. The question is can Government, in the interests both of India and England, do something to supply these things—I say England, because as a matter of fact some of the things which Germany and Austria sent to India were not manufactured in England, and England had in many cases to depend on the manufactured products of Germany. Consequently, we have common interest and a common enemy to kill. So let there be no indulgence in crimination and recrimination with reference to the past; let us not go back to the past, and inquire whether anything has been done by Government in the past or not, whether the people have done their quota or not; that is not the question, but here is the situation and the question really before the Council is, what can be done to get the greatest benefit out of the present situation. As regards the suggestion as to what should be done by this Committee (my friend Mr. Banerjee knows even the names of the Committee, I am not such a prophet) . . . ."

The Hon'ble Mr. Surendra Nath Banerjee:—" I quoted from the 'Times.' There was no prophecy at all."

The Hon'ble Mr. Madhu Sudan Das:—"Of course, Sir, we submit our raw materials to other countries and let us hope that our raw material, that is the crude ideas that we put before the Council like raw materials, will be received by the committee and something good turned out by the machinery of their intellect which will be acceptable to the Government and the people."

The Hon'ble Raja Syed Abu Jafar of Pirpur:—"Sir, in support of the Resolution of the Hon'ble Mover, I would crave your permission to make a few observations. The question of improving the condition of the industries and manufactures of this country is a supremely important and vital problem for the advancement and welfare of its people. So far agricultural occupations have been the main source of living of the bulk of the population. But the ever-growing increase in the population of the country and the enormous rise in prices of the necessaries of life have rendered it impossible for the people to be contented with that pursuit only. Large numbers of the unemployed have proved alike injurious to the country and to the administration. From time immemorial this country was one of the most important manufacturing centres, but the modern methods of manufacture and the improved conditions of industry in other parts of the world have affected our industries immensely. India by no means lacks natural advantages for its industrial and commercial advancement. It is one of the greatest productive countries for raw materials. But partly because it does not possess

[*Raja Syed Abu Jafar of Pirpur; Mr. Birkett.*] [21ST MARCH, 1916.]

sufficient means for the manufacture of raw materials into finished products, and partly through want of enterprise in the people, we have lost ground and have become mere suppliers of raw products and dependents on foreign goods for our daily requirements as well as for luxuries It is beyond all doubt that the real prosperity of our people depends on the revival and improvement of our industries and our industries alone. The Government has not been able to help and encourage our industrial enterprises as much as we are indebted to it in other matters of our well-being, and not even as much as some other Governments are doing in like respect, and it is not possible to compete with them unless we adopt similar lines of working, and unless the Government lends its helping hand and extends its fostering care to the advancement and development of our industries. For regulating our commercial and industrial problems, it is most essential that the Government of India should have a free hand in all matters concerning fiscal questions, and as long as it is handicapped by the control of the Home Government, it will not be able to handle the problem in a more useful and effective manner. I think the Resolution is a most reasonable and modest one, and it only asks for the formation of a committee to consider the best way of taking proper steps in this respect I trust it will not fail to commend itself to the acceptance of the Government."

The Hon'ble Mr. Birkett :—" Sir, I rise to say a few words to support the Resolution that has been proposed by the Hon'ble Sir Ibrahim Rahimtoola.

"I understand however from the papers that Government have anticipated the proposals, and a strong commission is now being formed with Sir Thomas Holland as Chairman.

"I congratulate Government on having taken the initiative, and it must be very gratifying to the Hon'ble Sir Ibrahim Rahimtoola to have his wish anticipated. Already in the Presidency I come from (and I have no doubt the same has been done in other Presidencies), a local committee has been sitting for some time inquiring into the question of how new industries may be started, and how existing industries may best be developed, and I believe a good deal of spade work in these directions has already been accomplished. No doubt the commission will have the benefit of the preliminary inquiries made and will take evidence from the members of these Provincial Committees.

"I have the greatest sympathy with the objects of the commission, and it is perhaps only natural that I should, seeing that throughout my residence in India I have been concerned with local industries and railways promoted and developed by means of capital wholly obtained in this country.

" I have great hopes that under the auspices of a strong commission such as has been foreshadowed, backed up by Government as far as research and experimental work is concerned, old industries will be revived and new industries sprung into life.

" But, Sir, I feel that this commission or any commission supported in their work and their recommendations to the utmost degree by Government, can go very little further than indicate and perhaps start in an experimental way these new industries.

" It must be left to the people to find not only the capital to promote them but the enterprise to carry them on.

" With the example of the Tatas before us, I have very little doubt that both will be forthcoming, and I hope room on the commission will be found for a member of this enterprising family.

" I do not wish to follow the Hon'ble Sir Ibrahim Rahimtoola into the question of fiscal reform. No doubt the commission will make recommendations in all cases where they think that protection by duties is necessary. It will be for Government then to see, in consultation with the Home Government, and, if necessary, with our Colonies, and possibly even with our Allies, how far protection can be given without interfering with the wider interests of this Empire.

" With these few remarks, I beg to support the Resolution."

[21ST MARCH, 1916.] [*Mr. Stewart; Sir William Clark.*]

The Hon'ble Mr. Stewart:—" Sir, I also desire to say a very few words with reference to the Resolution now under discussion. It was—I speak of it in the past tense—an important Resolution and well timed; so timely, indeed, that, as the Hon'ble Mr. Birkett has just pointed out, it has scored an anticipatory success, for we have all read in the papers that the commission asked for is to be appointed. That being so, I take it that the Resolution, strictly speaking, is dead; it vanishes in victory; and if it is dead, why not say so? Instead of this, we have got it embalmed so liberally by the Hon'ble Mover and other speakers in extraneous matter, that it is altered almost past recognition, or would be if others followed his example, and might last for ever. I do not wish in any way to belittle the most interesting and valuable discussion which has taken place, particularly the brilliant speech of the Hon'ble Mover and the illuminating contribution of the Hon'ble Mr. Low. But I wish, in my few remarks, to confine myself strictly to the terms of the late Resolution. What I want to say is, that this great war has given India an opportunity for which she would otherwise almost certainly have had years to wait, and if advantage is taken of this opportunity to develop the enormous latent natural resources and industrial possibilities of India as they should be developed, the result is bound to be enormously valuable, not only to India herself which is much, but to the whole Empire, which we all agree is much more: and I do agree—though we business-men are not particularly enamoured of commissions, which are somewhat apt to be amorphous in their constitution and rather indeterminate in their results—I do think that a small body of practical business-men and experts should succeed in focussing and in facilitating the solution of the very many difficulties which are inseparable from this important question. There is indeed need and scope for all of us, officials and non-officials, Europeans and Indians, in this work, and I congratulate Government heartily on having obtained so able and so practical a man as Sir Thomas Holland to be President of the suggested Commission."

The Hon'ble Sir William Clark:—" Sir, I think the moment has come when I ought to intervene in this debate and say without further delay, although it is something of an anti-climax, that Government propose to accept this Resolution. There is no subject to which we have given closer attention recently than to the problem of industrial development in India. We have not suffered that attention to be distracted even by the special and pressing demands of the war, but have endeavoured to look beyond the turmoil to the victorious peace which will ensue and endure, and so to shape our policy that India's industrial interests may not be prejudiced by delay. As a result, we have anticipated the recommendation of the Resolution. We have already taken steps to constitute not a committee but a more important body, a commission, whose duty it will be to consider and report upon the possibility of further industrial development in this country. This debate comes, therefore, at a singularly apt moment. It shows that our ideas and those of Non-official Members coincide on the main issue, though, for reasons which I will shortly put before Council, the scope of the inquiries entrusted to the commission which we are appointing will not be quite so wide as some Hon'ble Members would have wished.

" Manifestly it is impossible in the short time allowed to me under our rules, to attempt anything in the nature of an exhaustive survey of Indian industrialism. I can only hope to deal with certain salient features, and especially, if only in broad outline, with the question of the legitimate scope of the State in the promotion of industries and the practical steps which in our judgment can now be taken. But I must first touch on two topics of great intrinsic importance which have formed a not inconsiderable part of to-day's speeches, one what I may call the constitutional issue, and the other the question of fiscal protection.

" I have not infrequently observed that, when a Resolution comes to be discussed in this Council, it is found to wear a different complexion to that with which it was endowed when it first appeared, a mere innocent bantling,

[*Sir William Clark.*] [21ST MARCH, 1916.]

on the Order paper. The present motion is certainly a case in point. Ostensibly it recommends that a committee should be appointed to consider and report what measures should be adopted for the growth and development of industries in India, and, I think, any one who had merely read the terms of the motion would have assumed that the chief functions of the committee would be to inquire into the immediate causes which have been obstacles in the path of industrial development in India—the shyness of capital, the difficulty of securing efficient labour, the lack of experts in the more scientific branches of industry, and so on. The speech of the Hon'ble Mover shows, however, that he has also very different matters in mind. He wishes his committee to be entrusted with no less a matter than an inquiry into the constitutional relations between the Secretary of State and the Government of India, in so far as they impinge on commercial and financial interests. He wishes the committee to consider whether the Government of India should not be given complete freedom in such matters, and especially in the control of import and export duties He is himself a strong advocate of such a course. He holds—and herein lies the immediate connection with the subject-matter of this Resolution—that a Government of India, uncontrolled by the Secretary of State, untrammelled by the conceptions of fiscal policy which may be held by the British Government of the day, would be a far more potent instrument for the development of industries in India than the administration of this country under its present constitution. I am very far from complaining in any way of the introduction of this topic into the debate. It has led to a very interesting and valuable exposition of the views of the Hon'ble Mover and of other Members who have followed him, and has shown, as indeed we have already reason to know, the same point was urged. for instance, by Sir Fazulbhoy Currimbhoy at the first meeting of the new Indian Commercial Congress—that there is a weighty body of opinion tending in this direction. The Government of India certainly do not underrate the importance of the question, nor do they fail to appreciate the confidence which the Hon'ble Mover and other Hon'ble Members have been good enough to show in them by their advocacy of this constitutional change. At the same time, I think, Council will recognize that I cannot follow them into a discussion of it, and will acquit me of any suspicion of discourtesy if I abstain from doing so. I think they will readily realize that this is a topic outside of our purview, and one on which we are not entitled to express an opinion. But the fact that the Government of India cannot take part in a discussion of this topic will not impair the value of what has gone before in this debate Hon'ble Members have had an opportunity of expressing their views Those views will be duly recorded in the Proceedings of our Council, and will doubtless receive from the British Government, when the time comes, the consideration which is due to them. But, when the Hon'ble Sir Ibrahim Rahimtoola presses for the immediate consideration of this question by a committee, I must remind Hon'ble Members of the announcement made by my Hon'ble Colleague the Finance Member, when the Financial Statement was laid before Council. His Majesty's Government, he told us, feel that the fiscal relationships of all parts of the Empire as between one another and the rest of the world must be reconsidered after the war, and they wish to avoid the raising of all such questions until that fortunate time shall have arrived. That being so, to press for an examination of this constitutional issue as an essential part of the consideration of the many other questions involved in the problem of industrial development in India, could only spell delay, and delay is of all things that which we should now most sedulously endeavour to avoid. What we are considering in Council to-day is a business question, and I would put it to Council that the most businesslike course is to grapple with it in the way which is most practical at the moment. I shall hope to show that there are steps which can be taken without raising this constitutional issue now, and equally without prejudicing its future discussion ; and I would earnestly press on Council that, in pursuit of the larger aim, they should not in the meantime place unnecessary obstacles in the way of immediate practical advance Of one thing I am quite certain. I am certain they may rest assured that, in that re-examination of Imperial fiscal

[21ST MARCH, 1916.] [*Sir William Clark.*]

relations which His Majesty's Government have foreshadowed, the economic claims and interests of India will be fully considered.

"The Hon'ble Sir Ibrahim Rahimtoola, though he spoke with studied moderation, does not seem entirely to share that conviction. But I do not know that his chief example was very well chosen. The Hewins Resolution in the House of Commons urged a closer economic co-operation among the different parts of the Empire, not after the war, but during the war and, though I entirely agree with the Hon'ble Member that the part which India has played during the war might have received a fuller recognition in the debate, the debate does not in any sense imply that she will be neglected in the future settlement. As to the Resolution not having been sent to us, as it was sent to the Dominions, I do not know myself that I should have regarded it in the light of a compliment to India if we had been invited to offer a closer economic co-operation in the conduct of the war. We have throughout the war, as Hon'ble Members well know, placed all our resources at the disposal of His Majesty's Government, often to the detriment of the ordinary course of trade, and His Majesty's Government, I fancy, know very well that if there was any other matter on which we can give them help, they have only to ask us. I think the Hon'ble Member must have overlooked the very important answer which was given this morning to a question by the Hon'ble Mr. Achariar about the Allied Trade Conference in Paris. The Prime Minister has categorically stated in the House of Commons that, if any action affecting economic relations after the war is contemplated as a result of that Conference, the Government of India and the Governments of the Dominions would all be consulted before definite action is taken. That does not look as if it was proposed to neglect India after the war.

"It is clear that the same pronouncement must affect the question of protection, which has also formed a large part of the speeches to which we have listened to-day, since the question of any important modification in our fiscal system is manifestly inseparable from the question of the fiscal relationships of the parts of the Empire and of the rest of the world. We can all, I think, appreciate the objections to raising in war time a question which affects India's relations not only with the United Kingdom, but also with foreign countries. In a sense, protection is a very live issue in India, since it is an issue in which all classes take a vigorous interest, and on which most educated Indians hold strong opinions, but, in view of this pronouncement by the British Government, it is not an issue which can be taken up at the moment. Nor, as Sir Guy Fleetwood Wilson said when we discussed the same subject three years ago, is it a question on which the Government of India are in a position to declare a policy of their own. Their policy is, and must be, the policy of His Majesty's Government It is not therefore necessary for me—indeed it would be practically impossible in the time at my disposal and with the other questions to discuss which cannot be ignored—to endeavour to examine in detail the question in its application to India. All I would urge on Council is a warning—a warning against regarding protection, or indeed any other measure, as in itself a panacea for all industrial ills. Can we be sure that if protection were established in India, it would in effect secure the object which we have in mind to-day, namely, the building up of industries where the capital, control and management should be in the hands of Indians? That, of course, is the special object which we all have in view. It is of immense importance alike to India herself and to the Empire as a whole, that Indians should take a larger share in the industrial development of their country. Such progress means a higher standard of living, greater prosperity, and, not least, greater scope for political development. But can we be sure that protection would in itself necessarily bring about this end? Might it not merely mean that the manufacturer who now competes with you from a distance, would transfer his activities to India and compete with you within your own boundaries? That has been the case not infrequently in other countries. Nor does the example of the past indicate with any certainty that Indians would be the quickest to seize the opportunities which might be afforded to them by high tariffs,

[*Sir William Clark.*] [21ST MARCH, 1916.]

if such tariffs were instituted in India. The fact is that the competition of foreign imported goods is not by any means the only obstacle to industrial development in this country. It is curious to note, if we take the three most prominent and flourishing industries in India, jute, tea and cotton, that the industry in which Indians have taken the most important and most successful share, is the manufacture of cotton, where they have had to meet foreign competition both from the west and from the east, not only in overseas markets, but in India itself It would be very unsafe therefore, whatever may be the subsidiary causes of this phenomenon, to assume that protection, apart from any other question of its merits or demerits, would afford a complete solution of the problem, still less that it affords the only solution. Japan has been quoted from time to time in this debate as a country with a high protective system, but Japan made a very large part of her industrial progress under a tariff system of low duties, and only adopted a definite protective policy five years ago, by which time, of course, she was already a prominent manufacturing country. I wish to avoid entering into any controversy on this fiscal aspect of the case, but I would ask Hon'ble Members to bear these considerations in mind, when they hear protection urged as a remedy for all industrial shortcomings That attitude can only mean neglect of other important aspects of the problem, which, whether you have a high or a low tariff, equally demand most careful consideration. Let me remind Council of the words recently used in this connection by Sir Dorab Tata, the son of one of the most famous pioneers of industry whom India has yet known, and himself the head of one of the greatest of Indian industrial firms, speaking as President of the Indian Industrial Conference last year. He was prepared, he said, to accept such advantages as might accrue from a moderate protective tariff, but he added—I will quote his words :—

'I would point out that a protective duty by itself can be of little use in stimulating the growth of home industries...............A manipulation of the tariff alone cannot create industries..........................There are numerous ways, other than the introduction of a protective tariff, in which the State can, in my opinion, materially help the growth of industries, and I for one would, immediately at any rate, concentrate on them.'

"The sketch of industrial development in India which the Hon'ble Mr. Low has just put before Council, from the institution of the earliest cotton mills to the great enterprises undertaken by Messrs. Tata in recent years, shows that successful industries can be started and developed in this country by Indians. Why is it then, that in spite of these successful enterprises in the past, in spite of the fact that capital is forthcoming and in the industrially more progressive parts of India, such as Bombay, is freely forthcoming, for schemes backed by names which have earned the confidence of the public, the general tendency of the people is still to stand aloof from commercial enterprises and that confidence has not yet been established? Both the history of the past, and the facts, as we know them of the present, are against finding the sole reason for this in causes such as the climate, the inferior quality of labour or foreign competition, though these of course all bear their part. I think we must face the fact that there are also other causes which are in part the fault of the people themselves. Sufficient knowledge, sufficient business experience, sufficient energy has not always been brought to bear on the launching of Indian enterprises. The vital necessity of sound business organization has not always been recognized, nor the almost equal importance of thorough technical and expert examination of an industrial project before it is put before the public. I am afraid it must also be acknowledged that Indian commercial enterprise has not always shown the energy and the determination to persevere in the face of set-backs, which is essential to eventual success. Much naturally is said in India to-day of what has been done by the Japanese Government to promote the development of industries in Japan, but perhaps hardly sufficient stress has been laid upon the qualities which the people of Japan themselves have shown, and the way in which they have imported into their commercial enterprises the same hardihood of body and spirit which have made them conspicuous among

[21ST MARCH, 1916.]   [*Sir William Clark.*]

the fighting nations of the world. Not only have they displayed great pertinacity and perseverance, but they have also, I believe, proved themselves to possess an unusual genius for combination and co-operation. Their largest industries are organized as guilds, and different branches of trade co-operate closely in the common aim of pushing Japanese goods against those of the rest of the world It is vitally important that Indians should acquire the same qualities. Let me make my meaning perfectly clear. Many of those who have been concerned in India's commercial development have exhibited these qualities in a degree which proves that they need fear no comparison with other nations, either in the west or in the east. It is only necessary to cite the names of the Tatas, the Sassoons, of the concerns with which our Hon'ble Colleague here Sir Fazulbhoy Currimbhoy is associated, of Sir Rajendranath Mukerji and others. But what I have just said is, I am afraid, true of much Indian enterprise which has endeavoured to follow in their steps without having appreciated the methods by which they have achieved their success. Where there is lack of thoroughness ; lack of vigour and perseverance ; where there is also lack of technical or business knowledge, and an absence of the instinct for combination, there is almost bound to be failure, and failure reacts on the public and means that capital is not forthcoming. What we want to see established is confidence in the first place that success will be attained ; and the justification of that confidence by results. There has been too often in India a tendency towards two extremes both equally fatal—to an excessive timidity on the one hand, and on the other to a disastrous recklessness. The only real remedy for either is experience—experience which will warn promoters that success is not to be easily achieved, and that only thoroughness in all stages of an enterprise can achieve it, but which will then prove to investors that on these terms it can be won, and that industrial ventures can be a legitimate and sound outlet for their money.

"Much, then, must rest with the people themselves, and there is plenty of evidence to show that a keener spirit is being developed, and that the essentials to success are being more generally appreciated. But can the State also take a share, and, if so, in what manner ? I think it is very clear that it can. By the general spread of education it can help to improve the efficiency of the labour force. It can unquestionably help in providing information as to markets, and can set up the necessary machinery for the collection and dissemination of commercial intelligence which it has sometimes opportunities of securing, not available to private persons. It can facilitate that most important pre-condition to the establishment of new industries to which I have just referred, the thorough technical and scientific examination of a project before it is launched. It is clearly within the province of the State, especially in countries, such as India, to assist in technical education and scientific research, and it may properly be asked to provide experts to advise on promising lines of commercial enterprise Sir Dorab Tata, in the speech from which I have already quoted, spoke with legitimate pride of the immense care taken to investigate the scientific aspects of the schemes undertaken by his firm. This indeed is essential, but unless scientific institutions are provided either by the State or by such princely private munificence as led to the foundation of the Tata Institute, it will often be very difficult for private persons to conduct the necessary researches in countries such as India where the necessary laboratories and equipment are not forthcoming on other terms. But even when this is provided for, I myself believe that there is yet more which the State may not improperly undertake. It must be remembered that there may still be a hiatus, the existence of which it is not fair to attribute altogether to lack of enterprise on the part of the commercial community. The path of the pioneer in the west, as in the east, has been always a thorny one. There have been many failures before success has been achieved. Any one who cares to read the history of the gradual development, for instance, of the iron and steel trade in England will see how true that is. It is the case, of course, that in starting new industries in India the promoters will not be taking the same degree of risk as is involved in the launching of

[*Sir William Clark.*] [21ST MARCH, 1916.]

a new invention in which unforeseen imperfections may be found when working begins. But they are faced with conditions not altogether dissimilar owing to the especial difficulties which often arise in the transplantation of industries from one hemisphere to another. There are differences in climate, differences of labour and so on which may well affect seriously the cost of manufacture. Whatever care may have been taken in the preparation of a project, there may still be unexpected obstacles. It may, I think, fairly be asked whether this is not the point at which the State should step forward and assist in what are in effect industrial experiments. This may be achieved in more ways than one. The State may provide, or at any rate facilitate the provision of finance for such industrial experiments or, alternatively, it may conduct the experiments itself; or it may take steps to provide especially cheap transport for manufactures made under certain conditions, either for internal consumption or for export. There are obvious difficulties. There is the difficulty in all such schemes of how far the State is to go in spending the taxpayers' money on one particular branch of national development. What the Hon'ble Sir Ibrahim Rahimtoola told us this morning about certain activities of the Japanese Government throw a considerable light on that. He mentioned one industry, I think, which is capitalised at 6 million yen, which is something like a crore of rupees, on which Government are guaranteeing interest at 8 per cent. When one hears figures like that, one understands why a recent report calls attention to the vast increase in Japan's national expenditure. In 1895, the Japanese national expenditure was 85,000,000 yen; in 1914-15, it was 559,000,000 yen. The taxation per head in 1900-01 was 2·75 yen; in 1914-15, it was 6·50 yen. And the writer adds—'Japan still has 60 per cent. of her people engaged in agriculture, and it is largely on the agricultural classes that this extra taxation falls.' That might possibly be not inapplicable to India. I do not mean to say that that is an objection that ought to stand in the way of all advance, but it is one which people might perhaps consider a little more when they attack the Government somewhat fiercely, as the Hon'ble Mr. Banerjee did just now, for not having achieved more in the past. There is the difficulty of avoiding any appearance of favouritism in the selection of concerns or industries to be assisted by the provision of funds; or, in the case of the State itself, pioneering industries, the difficulty of avoiding interference with private enterprise. But the end to be achieved is of immense importance to the country, and it may well be argued that such risks are risks which Government may properly undertake, and the difficulties, difficulties which Government ought to face.

"The Government of India and Local Governments can fairly claim that they have already done a good deal on the lines I have just indicated. On the instructional side, large sums, especially of recent years, have been spent on technical education, and there has been a very considerable advance both in the direction of technical institutes and schools, and in the quality of instruction given therein. Experts in particular industries have been appointed in certain Provinces, and steps have been taken to add to their numbers. The Hon'ble Mr. Banerjee asked what we have done about glass. We have an expert on glass now on his way out to India. The delay has not been our fault, because it is extremely difficult at this time, owing to the war, to obtain the services of experts. An especially significant advance has been made in the creation of the Sydenham College of Commerce at Bombay which, it may well be hoped, will result in raising the standard of business aptitude and knowledge among Indians. Apart from directly educative work, the Government of India have taken up the question of improving their system of commercial intelligence, and after a thorough examination of the subject, have placed proposals before the Secretary of State, which, if accepted, will, we hope, enable the Director-General of Commercial Intelligence to deal far more comprehensively with the huge subject entrusted to him, and will make his office of more practical utility to men of business. We have also within the last few weeks instituted the first Commercial Museum in India, and we intend to make this a permanent exhibition,

[21ST MARCH, 1916.] [*Sir William Clark.*]

where samples of Indian made goods will be shown to wholesale buyers. The great advantage of these Museums, I may remark in passing, has long been recognised in other commercial countries, such as Japan and Germany, and similar exhibitions have recently been organized with remarkable success in the United Kingdom. As to the more direct forms of assistance to industry, the Hon'ble Mr. Low has given Council a brief account of what has been done in rendering financial assistance to certain selected enterprises and in the direct pioneering of industries by Local Governments. We all know that this pioneering of industries met with some measure of success in Madras, but that Lord Morley desired its discontinuance, on the ground that one of the enterprises concerned had resulted in interference with private enterprise. It is certainly unfortunate that the experiment could not have been more fully tested, though every one will admit that the closest attention should be paid to the necessity of avoiding action which might operate in any way to discourage private endeavour, which is, above all things, what we wish to stimulate. Since that time experiments have been permitted for the demonstration of the commercial possibilities of industries on a small scale, but it is doubtful whether, under such conditions, the results can be sufficiently conclusive. The Railway Board also have impressed upon the different Railway Administrations the desirability of watching carefully for opportunities for fostering local industries by the quotation of favourable rates for the carriage of raw material required in manufacture and of the finished product. They circularised all the Administrations on this subject early last year. The interests of railways and of the industries in this matter are identical, since the new industry brings more traffic to the railway, and there is no reason to suppose that the matter has been generally neglected by railways in the past, but it seemed desirable to impress it upon them once more. At the same time, the Railway Board addressed a Communiqué to the commercial public calling attention to their letter to the Railway Administrations and impressing on the public the importance of giving the fullest particulars when asking for a concession. I have recently asked for a return of the results of this circular, and they are decidedly satisfactory. It is true that not very many applications have been made, but practically all those which have been made have been granted. The Government of India, therefore, can certainly claim that the question of the promotion of industries has not been neglected, but for reasons partly beyond our own control, the action which has been taken hitherto has not been sufficiently continuous and co-ordinated to furnish conclusive guidance for the shaping of our policy in the future, especially as we wish that policy to be more definite and more comprehensive. The more Government considered the question, the more they have felt that there are many points which require further investigation, both as to the industries which afford the best opening for further development in India and as to the way in which Government can best help, and they are convinced that for that investigation they ought to have the assistance of unofficial, and especially of commercial, experience. In other words, we had already come to the same conclusion as is set forth in the terms of the Resolution. I may remind Council that, in a speech at the close of the last session, His Excellency the Viceroy, welcoming the prominent place which this problem had taken in the debates of Council, said that it was receiving the most careful consideration of himself and of the Government of India, and that he hoped to see it taken up vigorously and effectively as soon as normal conditions supervened. In pursuance of the policy foreshadowed in these words, the Government of India addressed the Secretary of State in the autumn of last year, pointing out their difficulties in the matter and asking his approval to the appointment of a commission composed of a suitable number of business-men, experts and officials, some of whom should be acquainted with Indian conditions, some with industrial progress in other countries where similar objects have been pursued, and others with industrial problems, generally, on their business side. We proposed that the whole question should be examined of whether new openings can be found for the profitable employment of Indian capital and whether, and if so in what manner Government can usefully give direct encouragement to industrial development; and we proposed that, in examining this latter question, the

[*Sir William Clark.*] [21ST MARCH, 1916.]

Commission should be free to consider the question of pioneer industries *de novo* as well as such other methods of stimulating industries as the supply of technical and expert advice, the provision, directly or indirectly, of financial assistance, or other means which might seem good to the commission. I am glad to say that the Secretary of State has sanctioned this proposal, and has enabled us to make what I trust will be the beginning of a new and important departure in the history of Indian industrial development. His consent—and I need not say that this is a source of special satisfaction to Government—enables me, as I have already said, also to accept this Resolution, which has been supported to-day by all Hon'ble Members who have spoken in this debate. We have secured for Chairman of the Commission Sir Thomas Holland, who will be well-known to many Members here as the late Director of the Geological Survey, who did so much to bring that Department into close touch with the commercial life of India. In addition to the Chairman, there will be seven or eight members, of whom three will be Indians. I am sorry that I am not yet in a position to give Council the names of all the members of the Commission, but two of the Indian members have already accepted, our Hon'ble Colleague Sir Fazulbhoy Currimbhoy and Sir Rajendranath Mookerji. I am sure that both these names will commend themselves to Council. We hope also to secure the services of a representative of the Parsi community in Bombay, a community which has always been associated with industrial progress in India. From official circles we have appointed Mr. Low, now Secretary in the Department of Commerce and Industry, who, as Council all know, has taken throughout his career in India a special interest in this question of promotion of industries. It is necessary that my successor should have the benefit of Mr. Low's experience for his first few months of office, so that probably Mr. Low will not join the commission until the early autumn ; but in view of his previous knowledge and experience of the subject, I do not think that this will in any way militate against his usefulness on the commission. There will also be a representative of European commerce in India, and probably two members who will bring an outside experience from the United Kingdom. No time will be lost before commencement of work. Sir Thomas Holland himself leaves England in the middle of April, and will begin preliminary work at Simla, but I cannot say for certain yet when the commission, as a whole, will assemble. In framing the terms of reference we have excluded from the commission's inquiries, for the reasons I have already mentioned, any consideration of the present fiscal policy of the Government of India. Nor do we propose that they should re-examine those aspects of technical and industrial education which have recently been dealt with by committees working in England and India, whose reports are at present under the consideration of the Government of India The terms of reference to the Commission will be as follows :—

"They will be instructed to examine and report upon the possibilities of further industrial development in India, and to submit their recommendations with special reference to the following questions :—

(*a*) whether new openings for the profitable employment of Indian capital in commerce and industry can be indicated ;

(*b*) whether, and if so, in what manner, Government can usefully give direct encouragement to industrial development—

(*i*) by rendering technical advice more freely available ;

(*ii*) by the demonstration of the practical possibility on a commercial scale of particular industries ;

(*iii*) by affording, directly or indirectly, financial assistance to industrial enterprises ; or

(*iv*) by any other means which are not incompatible with the existing fiscal policy of the Government of India.

"It will be clear, therefore, to Hon'ble Members that the commission will not be authorized to examine either the constitutional issue raised by the

[21ST MARCH, 1916.] [*Sir William Clark; Mr. C. Vijiaraghavachariar.*]

Hon'ble Sir Ibrahim Rahimtoola, or the existing fiscal policy of the Government of India. I hope Council will appreciate, even if they would have preferred an inquiry which would have embraced these topics, that there are good and sufficient reasons for the limitation imposed on the Commission's labours, a limitation which will in no way prejudice the examination of either of these two questions hereafter. I hope also that I have been able to show that there is a very large field of important and valuable matter to be investigated by a commission limited, as is proposed, to the more purely industrial aspect of this problem.

" One other proposal of ours I may also mention to Council. Japan is the most interesting example of a nation which has developed a structure of modern industrial and commercial enterprise from a past which knew nothing of Western economic conditions. It is therefore of great interest and value to know exactly what her Government has done to aid her people in this notable advance which they have made. The Government of India have already received some information on the subject, though there has not been time for me to deal with it this afternoon, but we felt that it was very desirable to obtain more detailed particulars for the use of the Industrial Commission, and we have therefore arranged that Professor C. J. Hamilton, the Minto Professor of Economics in Calcutta, should visit Japan—he has in fact already started—and should prepare a report which will be available in the early autumn.

" In conclusion, Sir, let me repeat that it is a source of great satisfaction to the Government of India that they have been able to accept this Resolution. May I add that I am especially glad that we should have been able to take this definite step in advance before the close of my own time in India? I make no apology, so far as my own responsibility is concerned, for this step not having been taken earlier. India is an immense country where the economic conditions are unusually complex, and sometimes, almost paradoxical; and for a newcomer there is much to learn and something also perhaps to unlearn. But I am glad to think that, before the end of my period of office as Commerce Member, we have been able to see our way more clearly towards an industrial policy. I am a firm believer in India's industrial future, and though I shall have left India before the commission has even commenced its sittings, no one will look forward with greater interest to the outcome of its labours."

The Hon'ble Mr. C. Vijiaraghavachariar :—" Sir, I wish to make two observations on the motion before us.

" I am unwilling to treat the Resolution as a dead one, and I am not going to join in its funeral. On the other hand, I think I have to render my thanks to the Hon'ble Sir Ibrahim Rahimtoola for his very important motion and the excellent statement he made in support of it. I would also thank the Hon'ble Sir William Clark for the able and sympathetic statement he has made. Reading between the lines of his speech—if one can read a speech when it is being made—it seems clear that the Government has abandoned the policy outlined some years ago by Lord Morley, then Secretary of State for India. On that account and on that account alone, I render my most hearty thanks on behalf of the country to the Government, both here and at Home And yet I have some considerable doubts whether the commission at this time is most opportune. The Resolution asks for a very comprehensive scope of this inquiry in view to advance this country to be on a par with the great nations of the world. I am not sure whether the Hon'ble Sir Ibrahim Rahimtoola has not raised and challenged a premature issue, considering the circumstances in which the Empire is just now involved; and I am not sure whether this premature challenge of this great issue is not responsible for a hasty,—I beg pardon —I mean a rapid decision on the part of Government, both here and in England.

" In England itself most of the doctrines, economic and political and international, are on their diet and trial. They will all be revised for the

[*Mr. C. Vijiaraghavachariar.*] [21ST MARCH, 1916.]

benefit of England, for the benefit of the Empire and for the benefit of humanity. We know that we are to take part in the reconstruction of the whole Empire, and Sir William Clark also has told us so just now. May I know therefore what is the object of this commission in the meanwhile? How many years more will the war last? Assume that the war will be over in a year, and that peace will be reached in about 18 months or a maximum of 2 years. We have lost over a century and a half under the British Government since the Indian industries have been killed What is the value of these two years then that we cannot postpone this inquiry and wait till the peace is reached? Sir William Clark, while saying that certain vital questions are beyond the purview of this commission, yet traverses them somewhat. I think it is wholly unnecessary for me during the limited time at my disposal to traverse them too He talked of two important matters, protection and climatic conditions, which will make it difficult for India to manufacture certain things. It is not the ambition of India to manufacture things which cannot be manufactured at a profit. It is often stated, for instance, that certain finer cotton counts cannot be manufactured in India with profit in order that we may compete with the rest of the world. It is not our ambition to attempt to manufacture such if impracticable, or only practicable at a loss. But at the same time, our feeling is that the best experiments have not been made in India in this direction. India contains all sorts of climates. It may be possible to make these counts in some hill stations with profit; or it may not be profitable at all; that is outside the question now. As regards protection, the Hon'ble Member for Commerce and Industry simply asked a question and did not give the answer, and very properly too. 'Would it be good' he asks us 'to have protection for India?' He has not told us whether it would be good or bad. I am very glad he has left it at that point. My answer is that it would be very good. In this matter we must go by the examples of other countries. The Colonies, the United States of America, and all the countries in the west have adopted protection. Whatever may be the *a priori* views of writers on the subject, the fact remains that these countries have grown immensely wealthy. It might be that in the beginning, when they first introduced protection, such countries may have to pay a little more for what they want than they would otherwise have to, if foreign exports were freely allowed; but soon this settled itself; the increase in wealth in those countries—the enormous wealth—is the best answer to the question put by the Hon'ble Sir William Clark At any rate, the Government here and the Government in England do not choose to make these experiments in the direction of protection for India I do not see any reason why it has not been done and why it cannot be done, and all that I say is the fact that the question remains an open one. This country is in a very different position from several other countries. Other countries which adopted protection did so with a clean slate and without history to guide them. We were able to clothe India and clothe the whole world once upon a time as is well known. Our industries were killed by the East India Company and by those who succeeded it in its sovereign functions, by the adoption of narrow and in the end suicidal policies That being so, it is not fair to say that protection would not be good for India. Then, I respectfully protest against the exceedingly narrow scope of the reference to the coming commission. Now, either protection will be allowed us or it will not be allowed us after the war. I cannot understand why the Right Hon'ble the Secretary of State should not arm himself with a report, with a judgment, and with the evidence of prominent Indians for use later on in either case The reference prohibits any question, any investigation as to this policy. I even believe that the commissioners will have an exceedingly difficult task to perform in these circumstances. They are told that they could not put a single question as to the existing policy; but I can easily imagine a position wherein the questions will be so dove-tailed that it would be impossible for the commission satisfactorily to execute the command given to them by Government. That being so, I ask the question in my ignorance and doubt—I do not oppose the motion—whether it is useful. Why should we not wait a little longer? What is the object of this commission

[21ST MARCH, 1916.] [*Mr. C. Vijiaraghavachariar; Mr. Setalvad.*]

to inquire and report under conditions so very unnatural I should say, and against the aspirations of the Indians? In short what is the object of this commission?

"There is another point which Sir William Clark has not touched upon. In these matters it is not enough that Government judges for us always. It must always try to meet us half-way and to let agitation compose itself. In this matter it is not likely that the Indian agitation will compose itself. It did not ask any of us; it did not take the views of us, the quasi-representatives in this Council, even informally in the matter of the reference. It did not ask us to assist them even in the matter of the names of the personnel. In one point of view, however, I am glad of that and I congratulate Government in their choice so far as the names announced to us are concerned; and I am more glad still that the other names are not announced, because it leaves me free to say exactly what I wish to say. Even if there be one member on this commission, whose views against us in connection with national industries were ill-disguised and hostile, then this fact will make the report of the commission to be received with suspicion if it be against the cherished views, by us all. That is to say, the commission is appointed without any reference to the wishes of the people of India and without any reference to public opinion in India. Apart from all these, taking the fact as it is, the scope of the proposed inquiry is, in my humble opinion, so narrow that its usefulness is highly problematical. I am one of those who believe that this commission should stand over for two years."

The Hon'ble Mr. Setalvad:—"Sir, while welcoming the announcement made by the Hon'ble Member for Commerce and Industry about the appointment of this commission, I join with my friend, the Hon'ble Mr. Achariar, in regretting the restriction of the scope of reference. The Hon'ble Sir William Clark said that the question of fiscal autonomy, being a constitutional question as well as the question of protection, would be excluded from the purview of this commission. As I said, I deprecate the restriction put upon the scope of this inquiry It may be that on inquiry it will be found that protection is not good for India, but why not allow the commission to inquire into it and come to the conclusion that it is not needed Then the hands of the Government will be strengthened by that conclusion. If, on the contrary, the commission is of opinion on inquiry, that it is needed, why should that expedient be thrown away? Speaking of protection further, the Hon'ble Sir William Clark said that that was not the only solution of the problem. He said that a good deal depended upon the people themselves, and he said that the success of Japan was greatly owing to the enterprise and self-reliance shown by the people of that country. That is perfectly true. But may I ask my Hon'ble friend to remember how far that self-reliance and enterprise must have been engendered and stimulated by the consciousness that behind them was their own Government, quite prepared to do anything for the purpose of fostering their industries and manufactures. Can that be said in any measure of the people of this country? Can it be said that the Government of India, even if they wished to do so, are free to take any measures necessary to accomplish such an object? Why have we not a standing example in this country of the excise duties to demonstrate that the Government of India is not free? The Government of India have acknowledged time after time that it is a tax that ought to be abolished. Still they are unable to do it, because they are helpless before the Home Government, unable to carry out a reform which they themselves feel to be absolutely necessary for the purpose of fostering the cotton industry in this country. That is where the difference comes in between Japan and India. There, as I pointed out, the people have the consciousness of having the Government fully behind them, not only willing, but having the power, to accomplish what they think is necessary for the purposes of fostering their industries. That unfortunately cannot be said of the Government of India; and that is why my friend, Sir Ibrahim Rahimtoola, has raised the question about the fiscal autonomy of the Indian Government.

[*Mr. Setalvad; Khan Bahadur Mian Muhammad Shafi.*] [21ST MARCH, 1916.]

"Sir, if the people of India had behind them the Government of India with full power to do what they feel is necessary for the trades, industries and manufactures of this country, enterprise and reliance would be stimulated and engendered as it has been in a country like Japan; that is where I say the question of fiscal autonomy comes in, and still that matter is not allowed to be considered by this commission. I followed the Hon'ble Mr. Low's speech with great interest, and I confess I admired the current of self-satisfaction running through his remarks. He strove by a mass of facts to establish the point that a great deal had been accomplished in this country not only by the people but also by the Government. I wish I could be as optimistic as Mr. Low. But do the facts justify any such optimitism at all? Why, only the other day we had a very striking illustration of the fact that the commerce, trade and industries of this country are far behind what they ought to be. During the discussion on the Income-tax Amendment Act and the Financial Statement it came out, Sir, that in the whole of this country there were only 13,000 people who pay income-tax on Rs. 24,000 a year.

The Hon'ble Khan Bahadur Mian Mohammad Shafi:—"3,500."

The Hon'ble Mr. Setalvad:—"It is still worse if it is only 3,500. But I understood 13,000 was the figure mentioned by the Finance Member and I will take that figure. Among these 13,000, are included officials with salaries of more than Rs. 2,000 a month; there are also included non-officials employed in private firms drawing such salaries, there are also included professional men, lawyers and medical gentlemen. If we exclude roughly 3,000 on all these heads we have a residue of only 10,000 persons, including Joint Stock Companies, who pay income-tax on more than Rs. 24,000, *i.e.*, only £1,600 a year. If that is the fact with regard to incomes of Rs. 24,000 a year, can you say that trades and industries, and especially manufacturing industries, are so far advanced that we can say that the progress has been what it ought to be? I feel, Sir, that the progress made both in manufacturing industries and in trade and commerce is really infinitesimal when we look at the large population and the vast expanse of this country. I think immediate efforts should be made to put things right. In that point of view I welcome the appointment of this commission which will tell the Government what is really to be done in this direction. There is another point that should be borne in mind; industrial development will also largely relieve the horrors of famine that periodically devastate this country. If you divert the population, the extra population, from agricultural to industrial pursuits, you will thereby lessen the calamaties of famine; that was clearly exemplified during the last famine in 1910-11 in Bombay. In Guzerat, Deccan and Konkan there was a very severe famine in 1899-1900; then they had the next famine in 1910-11 and this is what the Bombay Government said—

'The increase in industrial activity and the number of large works in progress which created a demand for labour in excess of the supply has rendered the labouring classes largely independent of agricultural employment. Thus, when the strain came the people displayed an unexpected power of resistance, and though the failure of the harvest was nearly as complete and the prices of food grains rose nearly to the same level as in 1899-1900, the assistance the people required from Government was infinitely less.'

That shows that industrial devlopment in this country will also mitigate very much in future years the horrors of famine. Therefore, as I said, I welcome the appointment of this commission, but I deprecate the restriction of its reference. Then, the Hon'ble Sir William Clark said that after the war the larger constitutional questions and the position occupied by India with regard to commerce and industry in the Empire, and other large questions will be undertaken. I do hope that when this is undertaken, that India will have economic and political justice done to her, and that industries and commerce will be stimulated and encouraged in the manner they deserve to be."

[21ST MARCH, 1916.] [*Pandit Madan Mohan Malaviya.*]

The Hon'ble Pandit Madan Mohan Malaviya:—" Sir, I offer my hearty thanks to the Hon'ble Sir Ibrahim Rahimtoola for the Resolution which he has placed in such an admirable speech before the Council, and I offer my deep thanks to the Government of India and the Secretary of State for having accepted the Resolution. The anticipatory announcement by the 'Times' of the appointment of a commission to carry out the recommendation contained in the Resolution has caused not a little surprise, because it is against the practice usually followed on such occasions that an announcement should be made in respect of a Resolution before it has been moved. It has also caused surprise because the personnel of the commission has been announced in London, while it seems proper that it should have been announced in Delhi. However, that should not take away the satisfaction that we feel at the appointment of the commission, and the selection of the members of the commission whose names have been made public. I particularly wish to express the satisfaction that we non-official members, no less than, I believe, the official members, feel at the fact that Sir Thomas Holland is to be President of this commission. We know his broad sympathies, and his keen interest in the development of India; we know he will bring a broad outlook to bear on questions affecting us, and we have every confidence that under his presidentship every question referred to the commission will be considered with great thoroughness and freedom from bias. I hope, Sir, that in deciding the names of other members which, I understand, have not yet been settled, the Government will be pleased to consider the view that has been expressed as to the composition of the Commission. Government no doubt are the best judges with regard to that matter We cannot claim that we should be consulted formally about it; but we expect that non-official sentiment both here and outside, will receive a little more consideration in the selection of the remaining members It is not only experts who have got special knowledge of industrial matters, but also representatives of the educated public, who are keenly interested in the industrial development of the country and in the well being of the community, who can bring a great deal of useful knowledge to bear on the discussion of the questions which will come before the commission. It is therefore desirable, and I hope the Government will view the matter in this light, that there should be some more responsible non-official representatives of public opinion on the commission. Sir, one Hon'ble Member has said that the Resolution having been accepted it is dead. I say the Resolution is not dead. It lives, and will bear fruit. Further discussion on it is needed, because the discussion which has preceded, makes it necessary to draw attention to certain points.

" The appointment of the commission is a great event in the industrial history of India. For a long time past Indians have been incessantly praying that more should be done to promote indigenous industries than has been done and was being done. My friend, Sir Ibrahim Rahimtoola, expressed his intention—I do not betray a secret—to bring forward a Resolution like this more than a year ago, and the subject has been alluded to by many speakers in this Council on various occasions Therefore, the appointment of the commission is a matter of great national importance to us, and it is necessary that we should freely express our opinions as to the matters which we think ought to be taken up by it. From that point of view and because the matter has been referred to by the Hon'ble Sir William Clark also in his speech, I would request the Government to reconsider the question of the scope of the reference. It is no doubt true that during the time of the war, action cannot be taken in regard to the recommendations of the commission on certain questions. A decision on matters of constitutional issue may be delayed, because a decision on such matters can only be arrived at after consulting the Government in England; but it seems to me that that offers no bar, but on the contrary furnishes a very strong reason why the commission should be asked to submit definite opinions on those issues, formed after cool consideration and formulated with care. in order that the Government of India should examine them betimes, and be prepared to put them forward, before the

[*Pandit Madan Mohan Malaviya.*] [21ST MARCH, 1916.]

Government in England when the time comes, as it must soon come, for arriving at a decision on those questions.

"I am certain, Sir, nobody will dispute, the Hon'ble Sir William Clark's remarks made it clear that he certainly does not dispute, the necessity and importance of a consideration of those issues. He did not find fault with the discussion raised here anent those issues. But if those issues are material to a proper consideration of the question of the development of India's indigenous industries, it is certainly necessary that they should be considered calmly by the Commission, and that their report should be considered by the Government of India, and be ready to be laid before the Government in England when the time comes for it.

"So also in regard to protection. Those are matters, Sir, which affect the question of the growth of Indian industries in a very large way. It is no good fighting shy of them ; they must be faced and solved. There is almost a settled conviction in the minds of a great body of Indians, if not of all Indians, who give any thought to these matters, that the interests of India are not always considered, and that the Government of India are compelled by their very situation, by the very circumstance of being subordinate to the Government in England, which undoubtedly is a fact which nobody can ignore, they are compelled at times to arrive at decisions, if I may say so without meaning the smallest disrespect, both in the way of commission and omission, which they do not in their heart of hearts approve and which they sometimes distinctly and decidedly oppose and consider to be harmful That has often been the history of Indian finance in our relations with England in the past, and there is a strong feeling growing that that history should now end ; that a new chapter should now open, and that the British Government should look at Indian questions primarily from the Indian point of view, and only secondarily from the English point of view. For all that, it is necessary that the Government should reconsider the question of the scope of the inquiry of the commission.

"There are some other points to which I would like briefly to invite attention. I wish we would draw the veil over all the past and not refer to it all ; but when somewhat exaggerated claims are made on one side of progress achieved, and attention is drawn on the other side to opportunities neglected, it becomes necessary to refer to the subject, not in a spirit of controversy, not in a spirit of hurting susceptibilities, but to point out that in all conscience there is room, and very great room, for initiating a new and large departure A memorandum was published in 1911 under the orders of Lord Morley, showing some of the results of Indian administration in the fifty years from the time that India passed under the Crown until 1911. An excellent summary was given in it of the progress which had been achieved in various departments of national activity, during that period. In dealing with the question of manufactures, it was stated there in paragraph 44—

'In old times India was a self-contained country, where every tract, more or less, made its own clothes from its own cotton, produced its own iron and made its own tools, grew and consumed its own food. Yarn was spun, cloth was woven, iron was smelted, and tools were made on a small scale by individual workmen after rude methods Before 1858, the old order was changing, but the change has been very much more rapid since. Machine-made fabrics and tools have largely taken the place of the local manufactures ; and no doubt many thousands of families have lost the trade and the custom their ancestors had enjoyed for generations.'

"The memorandum then went on to point out what could be put in the opposite scale and it said :—

'But this change has not been without compensating advantages. Some of the Indian art industries, such as embroidery, carpet-weaving, and work in silver and gold have experienced the beneficial demand of a growing foreign trade. Agriculture, which always was, and still is, the mainstay of the population, has expanded enormously. Other industries have arisen.'

[21ST MARCH, 1916.] [*Pandit Madan Mohan Malaviya.*]

"It referred to the growth of cotton mills, jute mills, rice mills and other mills, like flour mills, oil mills, woollen mills, paper mills, pottery works, and the great workshops attached to railways and shipbuilding yards.

"It would be clear from that reference that the Government must recognize that they have never yet done much worth speaking of in the direction of encouraging manufactures. The fact is unfortunately indisputable. In one branch, the Irrigation branch, the achievements of Government stand out eloquent to show what a great and beneficial work has been done there. In the matter of railways also, great credit can rightly be claimed by Government for what has been done; but not so, I am sorry to think, in the field of manufactures Education and industries go very much together. And as Sir John Hewett, speaking a few years ago, said there was no subject on which more had been written and less done than on the subject of technical education. I regret also to say that there is no subject on which less has been done by the Government than in the direction of promoting indigenous industries It is a reproach to us, Sir, that while we have enormous natural resources, raw materials which we can and ought to turn into manufactures. we allow those materials to be exported out of the country, to be worked up and utilized by other countries, to their immense benefit and our immense loss This state of things should soon come to an end.

"In that connection my friend the Hon'ble Sir William Clark has drawn attention to two facts. In the first instance, he has pointed out that there are some parts of India, like Bombay, where there are men of vigour, men of business capacity who have prospered: I wish them more prosperity. But he deplored that in other parts of India people showed a lack of these qualities, and he argued that if there was not an equal degree of industrial progress in other parts, the fault, partly at least, lay with the people. I do not dispute that proposition altogether; but I submit that the blame for this state of things lies largely also on the Government, because Sir, as the history of Japan, which has been referred to again and again, shows, it is technical education, and practical training in business which have to be imparted to the people in order that they should develop qualities of business men and become fit to promote indigenous industries. That has unfortunately not been done. Let us not quarrel with the fact, let us accept it as an unfortunate and sad fact; and let us try to make up for past deficiencies by an honest earnest endeavour to do all that ought to be done in this direction in the future. What is needed is that there should be a larger and more systematic policy of promoting industrial, technical and commercial education. There is very little of it yet to speak of. My friend the Hon'ble Member for Commerce and Industry had better not ask us to go closely into that aspect of the question. Secondly, even without touching the larger questions of fiscal autonomy and protection, there is a great deal which the Government can do in the way of pioneering industries and in other ways pointed out by the Hon'ble Sir Ibrahim Rahimtoola. Japan holds out an excellent example to us Forty years ago. Japan was in a bad way—much worse, perhaps, than India. In the course of thirty years, by a system of industrial education and by affording every necessary help and encouragement to its nascent industries, in the course of thirty years, Japan has changed the face of its country. Its raw exports have been steadily diminishing; the exports of its manufactured articles have been steadily growing That has been the history of other countries too. Less than 100 years ago Germany was in the most backward condition, so far as manfacturing industries were concerned. It has in the course of the last 75 years become a great manufacturing country. That has been the history of many other countries. Our first necessity therefore is a recognition by the Government of the need of the insistent need, of providing on a larger scale for a systematic training of our youths in industrial and technical matters, and for giving them that practical training without which business capacities cannot be developed. Our second need is—"

[*The Vice-President; Pandit Madan Mohan Malaviya; Sir Ibrahim Rahimtoola.*] [21ST MARCH, 1916.]

The Hon'ble the Vice-President :—"The Hon'ble Member's time is up now."

The Hon'ble Pandit Madan Mohan Malaviya :—"May I finish?"

The Hon'ble the Vice-President :—"I think you have already taken up your time. I must ask the Hon'ble Member to sit down."

The Hon'ble Pandit Madan Mohan Malaviya :—"I bow to your ruling, Sir, but with regret."

The Hon'ble Sir Ibrahim Rahimtoola :—"Sir, I wish to say a few words in reply. In the first place, I appreciate the courtesy of the Hon'ble Mr. Stewart in pointing out that the whole debate which has taken place has been a waste of time. Sir, the difference between the Hon'ble Member and myself is merely this. He implicitly believes that what a newspaper understands has the force of a Government Resolution published in the Government Gazette. I have not yet acquired that faith in what appears in newspapers in the form which has now become common, that it understands that a certain thing is going to happen. I may tell him, that it has been for the last two years that I have been sending Resolutions on this subject and that they have been disallowed; that last year a Resolution identically in the same words was sent in to Government and was also disallowed. I may, therefore lay claim to the fact that my perseverance in giving notices of a Resolution on the subject has promoted the consideration of the question, and has very probably led to the formation of this commission. Sir, I have never said that India is not making industrial progress. What I have contended is, that our progress is not adequate; that if the Government of India had a free hand and made earnest efforts in the development of industries as other civilized countries have done, our progress would have been enviable. The very fact that we have made substantial industrial progress in certain provinces of India without any direct help from the Government is to my mind proof positive of the fact that our natural advantages are overwhelming, and that, in consequence of such advantages, we have been successful to a certain extent in spite of the serious drawbacks which we have had to work under. I therefore wish to point out that, if we had our Government at the back of the enterprising people in India to the same extent as other civilized countries, then our natural advantages would have led to an enormously greater industrial development than has actually taken place. In support of that view, may I, Sir, once again point out that out of our total imports of 122 millions, 96 millions or 80 per cent is represented by manufactured goods. Out of our total exports of 162 millions, 81 millions are raw materials which work out to exactly 50 per cent, and that 43 millions are food-stuffs and tobacco, bringing the total of both to about 77 per cent. Now I should like to ask whether any country importing manufactured goods to the extent of 80 per cent. of its total imports and exporting 77 per cent. of raw materials and food-stuffs can by any stretch of imagination be said to be progressing satisfactorily in industrial development? Sir, it is in order to bring forward the industrial and economic backwardness of this country that I have brought forward the present Resolution at the only time when I am permitted to do so, though I have been making efforts in this direction for the last two years. Sir, I think even the Hon'ble Mr. Stewart will admit that, though a little time of the Council has been spent in the discussion of this question, the very illuminating reply which has been elicited from the Hon'ble Sir William Clark amply compensates for it. Though I do not agree with some of the points made by the Hon'ble Member and to which I intend to refer, I think the Council will agree that the subject was dealt with by him in a masterly manner.

[21ST MARCH, 1916.] [*Sir Ibrahim Rahimtoola.*]

"Before I proceed to deal with some of the points made by the Hon'ble Member, I will make a brief reference to what he said in regard to my not following the reply which was given to-day to an interpellation of my Hon'ble friend Mr. Achariar. Sir, may I take this opportunity of pointing out that, under the present system, we find it extremely difficult to hear and to follow the answers read out to us in this hall. If the answer was given this morning, in the terms mentioned, no fault can be found with me in not noticing it because I could not hear it distinctly. In the Bombay Legislative Council we have a different system. The questions and answers are printed and put on the table in front of each member, who can therefore follow the replies when the Secretary calls attention to the number of the interpellation. If some such system was followed in this Council, we would not remain under the present disadvantage.

"Sir, my attention was drawn to the taxation per unit of population in Japan which is stated to have gone up by more than 125 per cent. I think that furnishes a very strong reason in favour of the view which I have placed before the Council. What India wants is, that her Government should help the people in their efforts towards her econmic advancement in order that my Hon'ble friend the Finance Member may have plenty of money to spend. The country would be very willing to pay additional taxation and find means for extended provision for education, sanitation etc., if our economic condition was advanced. Our estimated national income is Rs. 30, as against a minimum estimate of Rs. 700 in England. Let the Government of India help us to raise our national income to even 100 rupees, which is only one-seventh of what it is in England, and let the Finance Member then come and say that he wants more money for the public good, and he will find the then Council ready and willing to give him all the money he wants. Japan has grown economically prosperous and she is willingly submitting to increased taxation. Help us in the same direction, advance our material prosperity, and we will do the same, if not better.

"Sir, I share the regret which has been expressed by my Hon'ble friends, Mr. Vijiaraghavachariar, Mr. Setalvad and Pandit Madan Mohan Malaviya as to the restricted references which have been decided upon for the consideration of the commission. I should like to point out that it is with the utmost difficulty and after a long time that we have succeeded in prevailing upon the Government of India to appoint a commission such as the present one. I do not think there is any possibility of another commission of a similar character being appointed for many years to come. That being so, it appears to me to be essentially necessary that the references to this commission should be of such a comprehensive nature as to deal fully with the question as a whole. Unless these references are enlarged and made comprehensive, the commission will be obliged to work in a manner which cannot lead to the solution of the problem. The reasons which have been advanced in favour of these restricted references are that at the end of the war the fiscal relations of the members of the British Empire as amongst themselves, and as with their Allies, will be determined. If that is so, it furnishes a very strong reason why this commission, which is appointed to report what measures should be adopted for the purpose of promoting industries in India, should be asked to consider whether fiscal autonomy should be conceded to the Government of India, and whether fiscal protection, as I have carefully put it, only in such cases and for such length of time as may be deemed necessary, is required or not. If these issues are not considered by the commission, the hands of the Government of India will be weakened when these deliberations are undertaken. If these references are made, and if the commission in the course of the inquiry which they will carry out come to the conclusion that in certain directions fiscal protection is absolutely necessary, then it will strengthen the hands of the Government when this deliberative assembly meets, and will greatly help this country in pressing to obtain what the Dominions have already secured.

"Sir, I think that, taking it from every point of view, there are strong reasons why the references to this Commission should be of such a comprehensive

[*Sir Ibrahim Rahimtoola; Sir William Clark.*] [21ST MARCH, 1916.]

nature that the whole question may receive solution, at all events for 10, 15 or 20 years. I should like to appeal to the Government of India once again carefully to consider the matter in view of the unanimous non-official opinion in this Council, and to widen the scope of the references by including fiscal autonomy and fiscal protection amongst them. Sir, I feel that, unless that is done, the result of this inquiry will not prove as satisfactory as we all desire that it should.

"I will only say one word in regard to what fell from my Hon'ble friend Mr. Vijiaraghavachariar, because I have only one minute more. He seems to think that a delay of two years would not have mattered. May I tell him with your permission, Mr. President, that the reason why I still renew my appeal to the Gonernment of India to enlarge the scope of these references and allow the whole question to be investigated by a representative commission on the present occasion, is that when the time actually arrives for an Imperial Conference, at which I trust India will be represented on a footing of equality with the Dominions, that our representatives may be able to press, on the strength of the support of such a commission, for full freedom to the Government and complete liberty to apply fiscal protection in such cases and for such time as may be found necessary. Our great aim is that India with the help of her Government shall make a strenuous effort to advance industrially and economically, as rapidly as is reasonably possible without any impediments being placed in her way. With these words I commend my Resolution for acceptance to the Council."

The Hon'ble Sir William Clark :—"I Sir, think I ought to make one point clear in view of what has fallen from the Hon'ble Pandit Madan Mohan Malaviya and the Hon'ble Sir Ibrahim Rahimtoola as to the question of whether we can extend the reference to this commission. The Home Government have surely made their position perfectly clear. They say that they feel that the fiscal relations of the Empire within itself and with the outer world must be taken up after the war. They have also made it quite clear that they feel that such questions should not be raised during the war. It is quite impossible for a commission to consider that question without raising these points. It sounds almost an absurdity when it is stated like that. That is the crucial difficulty. I may also point out, although I did not lay stress on this factor before, that it would be extremely difficult to appoint a commission which would be suitable to deal with these purely industrial matters, such as our commission will have to deal with, and which would also be a suitable body to revise the constitutional relationship between the Secretary of State and the Government of India. Such a revision would have to be conducted to a very large extent in England. The Hon'ble Sir Ibrahim Rahimtoola says that we shall not get another Commission for 15 or 20 years, and therefore he wants the reference to this one to be as wide as possible. If a commission were really appointed to consider all the subjects which he wants it to consider, I think it might very easily be sitting 15 or 20 years hence, and what we want now is to see an immediate practical advance made with this important question."

The motion was put and agreed to.

The Council adjourned to Wednesday, the 22nd March, 1916.

A. P. MUDDIMAN,
Secretary to the Government of India,
Legislative Department.

DELHI:
The 30th March, 1916.

GOVERNMENT OF INDIA.
LEGISLATIVE DEPARTMENT.

PROCEEDINGS OF THE INDIAN LEGISLATIVE COUNCIL ASSEMBLED UNDER THE PROVISIONS OF THE GOVERNMENT OF INDIA ACT, 1915 (5 & 6 Geo. V, Ch. 61).

The Council met at the Council Chamber, Imperial Secretariat, Delhi, on Wednesday, the 22nd March, 1916.

PRESENT :

The Hon'ble SIR WILLIAM CLARK, K.C.S.I., C.M.G., *Vice*-President, ***presiding***, and 56 Members, of whom 50 were Additional Members.

RESOLUTION *RE* TRANSFER OF CONTROL OF THE CALCUTTA UNIVERSITY.

The Hon'ble Mr. Surendra Nath Banerjee :—" Sir, I have the honour to move the following Resolution which stands against my name, namely :—

'That this Council recommends to the Governor General in Council to consider the advisability of placing the University of Calcutta on the same footing with the Universities of Madras and Bombay in respect of the relations between the Calcutta University and the head of the Local Government for purposes of administration and control.'

" Sir, under the provisions of the Indian Universities Act of 1904, His Excellency the Viceroy is the Chancellor of the Calcutta University, and large powers of control are vested in the Government of India. To us, who are graduates of the Calcutta University, it is a matter of pride and honour that His Excellency Lord Hardinge should be the head of our University, and speaking for myself, I will say this, that but for the approaching retirement of His Excellency, I for one would not have brought forward this Resolution. Speaking as Chancellor of the University of Calcutta at the Convocation held on the 15th March, 1915, His Excellency was pleased to observe that his position

[*Mr. Surendra Nath Banerjee.*] [22ND MARCH, 1916.]

as Chancellor of the University brought him in direct contact with the student community of India. In them and in their welfare, Lord, Hardinge has always felt a keen and abiding interest. We cannot forget the incognito visit which His Excellency paid to some hostels in Calcutta, with a view to ascertaining for himself, after personal examination, the conditions under which the students lived in those hostels. Sir, nothing so powerfully appeals to the imagination of an Oriental people as when a ruler conceals his personality when doing good ; and the memory of this visit will long remain an abiding possession with the student community of Calcutta. Lord Hardinge has always been a generous patron of the Calcutta University. The Government of India have paid a sum of over 42 lakhs of rupees for our hostels, besides other grants, the capitalised valuation of which would amount to about 36½ lakhs. Sir, I feel it my duty to make this public statement as some acknowledgment, however inadequate, of the obligation which we are under to our retiring Chancellor.

"Sir, my Resolution has a constitutional bearing, and it is intimately connected with the raising of the status of our Province to that of a Presidency Government. Bengal was made a Presidency Government by the Royal Proclamation of the 12th December, 1911. A part of that proclamation was embodied in a Parliamentary Statute in January, 1912—Statute 2 & 3 Geo. V, Chapter 6. I will read the first clause of the Statute, which is pertinent to the Resolution now under discussion, Clause 1 says:—

'It is hereby declared that the Governor and Governor in Council of the Presidency of Fort William in Bengal shall, within that Presidency as so delimited as aforesaid, have all the rights, duties, functions and immunities which the Governors and Governors in Council of the Presidencies of Fort St. George and Bombay, respectively, possess, and all enactments relating to the Governors of those Presidencies, etc., etc.'

"Now, this is the important part:

'Provided that, if the Governor General in Council reserves to himself any powers now exerciseable by him in relation to the Presidency of Fort William in Bengal, those powers shall continue to be exerciseable by the Governor General in Council in the like manner and to the like extent as heretofore.'

"Therefore, Sir, it is obvious that, under the provisions of this Statute, the Governor of Bengal is placed exactly on the same footing with the Governors of Madras and Bombay, save and except in respect of certain powers and functions which are reserved to the Governor General in Council, and which at the time were being exercised by him Those powers and functions are two in number: (1) authority to fill temporary vacancies on the Bench of the Calcutta High Court, and (2) authority as Chancellor of the Calcutta University. Lord Crewe was then Secretary of State, and when introducing this Bill he made certain observations which, with the permission of the Council, I will read as bearing upon this particular proviso. I am quoting from Hansard. He said—

'I now come to the clauses of the Bill. The first clause (that is the clause I have just read) declares that the Governor of Bengal should have all the rights, duties and functions which the Governors of Madras and Bombay possess. The effect of the clause is to give the Governor of Bengal these extra powers given by the later enactments under which power was taken to apply to any new Presidency the powers which the Governors of the other Presidencies possess. Then, the House will observe—this is the important part—that two provisions are attached to this first clause. These provisions depend upon the fact that the powers of the Calcutta High Court are not, as matters stand, curtailed although the area of Bengal is changed and a new Lieutenant-Governorship is created. The power which is pointed to in proviso (a) is this : that the High Courts Act of 1871 gives the Governor General in Council power to appoint temporary Judges to the High Court of Calcutta.'

"Nothing is said about the Calcutta University, for the simple reason that the same grounds apply. The size of the Province of Bengal was curtailed, but the jurisdiction of the Calcutta University remained the same as before, extending over the new Province of Bihar and Orissa, over Burma and Assam. It was not thought desirable at the time that a local Governor should exercise authority over areas outside his territorial limits. The same

[22ND MARCH, 1916.] [*Mr. Surendra Nath Banerjee.*]

objection, of course, would not apply to the Governor General in Council. The Governor of Bengal, who succeeded the Lieutenant-Governor of Bengal, stepped into his position as Rector of the Calcutta University. That is a new office altogether in connection with the Calcutta University, which does not exist in any other University. The powers and functions of the Rector are defined in section 28 of the Universities Act. Clause 1 says that the Rector shall take precedence at Convocations next after the Chancellor, but before the Vice-Chancellor. Clause 2 says that the Chancellor may delegate all or any of his powers to the Rector. Sir, I do not know whether any powers have been delegated. My own impression is that they have not been; but I should like to be corrected if necessary. This I do know as a matter of fact, that from time to time in reference to important considerations, the opinions of the Rector are invited by the Government of India. These opinions—I am not a lawyer, but I venture to think that I am right in making the observation—these opinions have no statutory force, but they have a moral value, as coming from the Governor of a great Province and a Governor of such great popularity and one held in such high esteem and regard as Lord Carmichael.

"Sir, I have dwelt upon the constitutional aspect of this question in order to indicate that the conditions which led to the acceptance of the constitution at that time are now in process of change and transformation. I take it, Sir, that the new province of Bihar and Orissa will soon have a University of its own. I presume that the Bill is nearly ready; and with Sir Harcourt Butler, our ex-Education Minister, as Lieutenant-Governor of Burma, I take it that within a measureable distance of time, Burma too will have a University suited to its own requirements. Sir, the Governor or the Lieutenant-Governor of every province in India is the Chancellor of the University belonging to that province. Why should an exception be made in the case of Bengal? I urge this proposition, not indeed on the ground of administrative symmetry. Administrative anomalies may and do exist, and they are tolerated so long as no inconvenience is caused, no injustice is perpetrated; but I rest my case upon far higher grounds. My submission is this, that the University system of a province should be in direct touch with and controlled by the public opinion of that province, and for this purpose the head of the Government should be the Chancellor of the University. Sir, I look forward to a time—it will not perhaps be within our life-time, it may be a dream, but many of our dreams have become realities—when the Chancellors and Vice-Chancellors of our Universities will be elected by the members of those Universities, and I think we who are here working for the future, may prepare the ground for this consummation. I do not indeed place my Resolution upon that exalted basis. But I give expression to a suggestion which occurs to me as I am speaking upon this matter. Sir, the Government of India, when it was located in Calcutta, was in direct touch with the sources of local public opinion; but that is not and cannot be the case now. I will say this, that I can conceive of no possible objection to the acceptance of my proposition except this, that the Governor of Bengal as Chancellor of our University may exercise authority over areas outside his jurisdiction. I ask, are there not Governors and Lieutenant-Governors who are doing that now? The Lieutenant-Governor of the United Provinces is the Chancellor of the Allahabad University, and as such he exercises authority over affiliated institutions in the Central Provinces and in Ajmer, which are distinct and separate administrative units. Take another case, which is even more pertinent and apposite. The Governor of Madras as Chancellor of the University exercises authority over affiliated institutions in Ceylon, which is not a part of the Government of India, and is not even subject to the jurisdiction of the Secretary of State for India. Yet, Sir, no catastrophe, no cataclysm has occurred. The authorities in Ceylon have not complained of the curtailment of their power or of the loss of their dignity. Educated Ceylon goes to sleep without any perturbation of conscience or loss of self-respect. In view of these cases, may I not ask those who are opposed to this proposition to re-consider their views in the light of the facts to which I have referred? But,

[*Mr. Surendra Nath Banerjee; Mr. Dadabhoy.*] [22ND MARCH, 1916.]

Sir, I desire to place my case upon a still higher ground. We have been promised provincial autonomy by the great Despatch of the 25th August, 1911. Attempts have been made to whittle down the significance of that message. What has been written, however, cannot be unwritten, *scriptum manet*; and we as the representatives of the people will see to it that this beneficent message is redeemed in the fulness of time. Provincial autonomy is bound to come sooner or later. I hope it will come in the train of those political readjustments that are inevitable after the war. Provincial autonomy, if it means anything, means this, that each province should be self-contained, self-dependent, self-governing. If my Resolution is accepted and given effect to, it will be a distinct step towards the fulfilment of the pledge which is contained in the Despatch of the 25th August, 1911, and which will for ever be associated in the annals of Indian administration with the name and fame of Lord Hardinge Sir, it does not seem to me that it is necessary that there should be immediate legislation upon this point, if my proposition is accepted. The Chancellor may delegate his powers, under the section to which I have referred, to the Rector. The Rector, without the name, will then become the *de facto* Chancellor. The experiment may be tried; and if it is found successful, legislation may be undertaken afterwards My proposition is an exceedingly moderate one. All that I ask the Government to do, is not to jump to a conclusion or to come to a finding with regard to the great issues which I suggest. All that I ask the Government of India to do, is to consider—mind you, nothing more than to consider—the advisability of carrying out a reform which will make the head of the Local Government the responsible head of the University I do not want that my Hon'ble friend should get up in his place and say 'we are not in a position to accept that proposition, and we cannot make Lord Carmichael at once Chancellor of the University.' I do not want that. I want you to consider the proposition. I want you to consider it from the standpoint which I have suggested, in the light of the facts which I have mentioned. I want you also in justice to those who are opposed to me, to consider the objections that may be raised. I do not think that any proposition can be more modest, or more reasonable, and therefore it is with some confidence that I submit this Resolution for the acceptance of the Council."

The Hon'ble Mr. Dadabhoy :—" Sir, I have not the slightest desire to oppose this Resolution. But, in my opinion, the Council should carefully weigh certain relevant facts. At present, besides Bengal, Bihar, Assam and Burma are served by the Calcutta University. So long as that University is under the direct control of the Government of India, Bihar, Assam and Burma have no cause to complain. But if that control is taken away and the University is placed under the direct control of the Government of Bengal, those provinces may have a just cause for complaint. This question of the Calcutta University being placed under the direct control of the Government of Bengal would not have arisen had the Capital not been transferred to Delhi; but it is curious that after the Durbar announcement, the then Vice-Chancellor, Sir Ashutosh Mukherjee, emphasised the point in his Convocation address with evident satisfaction that the Calcutta University would still be connected with the Government of India, and that His Excellency the Viceroy would continue to be the Chancellor. I need not apologise for reading a passage from Sir Ashutosh Mukherjee's celebrated Convocation speech. He said :

'Gentlemen, at the beginning of my speech, I referred to a kind of crisis in the affairs of our University. We are all conscious, conscious not without deep regret, that this crisis is indeed not confined to the academic precincts. Great changes are accomplishing themselves which affect the life of our whole province. Bengal has been for more than a century the leading province of India; Calcutta has been the capital, in name no less than in fact, of a great Empire; and now these high distinctions are all at once passing away from us. Calcutta, Bengal are discrowned and cannot help feeling desolate. The gloom of grievous bereavement lies heavy on our minds; we feel like men who have 'fallen from their high estate.' The changes which

[22ND MARCH, 1916.] [*Mr. Dadabhoy; Mr. Surendra Nath Banerjee; Lieut.-Col. Gurdon.*]

we somehow cannot help deploring may indeed ultimately be fraught with good to the general; .... in fact we hope and trust that this will be so; but this reflection on the good of the whole naturally is but cold comfort to that part which is called upon to pay the price. Our University—to return to what concerns us most nearly—loses the distinction it has enjoyed for so long a time as the University of the capital city of India. We only trust that the privilege to have our gracious Viceroy as the Chancellor of our University will be preserved to us. But in any case he will no longer reside in our midst, and highly prized opportunities of confiding to him direct our needs and wishes will be taken away from us......'

The Hon'ble Mr. Surendra Nath Banerjee :—"What is the date of the speech?"

The Hon'ble Mr. Dadabhoy :—"1912. I have not finished the quotation. Now comes the most important passage —

'The University has in the past been indebted to its benevolent Chancellors for so much that we naturally view the possibility of severance, even the possibility of weakening of the customary bond with distress and apprehension. In addition, as misfortune never comes single, it appears likely that before long the jurisdiction of the University may be contracted very considerably; and a large section of the members of the University apprehend that this may mean to us loss of prestige, (and such loss is no light matter), loss of influence, loss of income, and with it loss of power to do good work. It is an irony of fate that all this happens to us just at a moment when we held ourselves justified in looking back with some pride and satisfaction on the work accomplished in the immediate past.'

"Apparently the Vice-Chancellor reflected on that occasion the Bengal public opinion. Since then nothing exceptionally serious has happened to discount the advantages referred to by Sir Ashutosh. We have not found so far any expressed desire on the part of Bengal for a change in the administrative control and status of the University. The only act of serious interference on the part of the Government of India since the transfer of the Capital to Delhi was the requisition made by that Government sometime ago for the dismissal of three University lecturers for political reasons. Even if the Government of India ceased to have any direct connection with the Calcutta University, and it was found that certain lecturers were undesirable, it would be easy for that Government to secure their dismissal through the Government of Bengal. The advantage to Bengal from the suggested change is not therefore clear.

"Sir, my Hon'ble friend has remarked that things are now in a process of change and transformation, and all what we ask is that the matter may be closely inquired into by the Government of India. Surely there can be no objection to such a modest request. I hope that the Government will see its way to accept this Resolution, and ascertain whether the Governments of Bihar and Orissa, Assam and Burma would like the proposed change, or whether they would prefer to remain under the existing arrangements."

The Hon'ble Lieutenant-Colonel Gurdon :—"Sir, speaking from our point of view in Assam, it is impossible not to regard the Hon'ble Mr. Banerjee's Resolution except with feelings of considerable apprehension. I would venture to submit that so long as the University of Calcutta ministers to the needs of more than one Province, it cannot safely, with due regard to the interests of the other Provinces, be brought under a single Provincial Government. The University of Calcutta, assuming that it is Calcutta under control as well as in name, must be governed always by the interests of Calcutta, which obviously cannot always coincide with the interests of a frontier Province like Assam, with its peculiar tribes and peoples, both of the hills as well as of the plains, many of which differ so greatly, both in languages and customs, from the inhabitants of Bengal. What can the professional men of Calcutta, who form the majority of the University Syndicate, know or care of the interests of Assam? We may be quite sure that occasion for conflict would not be infrequent, and that when it arose, we should find it difficult to obtain a hearing. With the Government of India, however, as the controlling authority, our interests are safe.

"I can quite understand the position of the Bengali who does not see why he should not have a University of his own. We, in Assam, would like to have a University of our own when the time comes – but there is no reason why the Bengali should be allowed to interfere with existing rights and to claim exclusive control of the University which was founded more than half a century ago for the 'Presidency of Fort William in Bengal and other parts of India,' and which has by later orders or enactments, been given the Provinces of Bihar and Orissa, Burma, and Assam, as well as Bengal, in which to exercise the powers which have been conferred upon it. I spoke of 'existing rights.' The rights referred to are the powers which are conferred upon the Government of India by the Act of Incorporation, the Indian Universities Act (Act VIII of 1904), the Regulations, and the powers conferred by the University Act of 1904 on the Chancellor, in which Assam, as a coparcener in this University with the Province of Bengal and other parts of India, is materially interested. I would refer, in particular, to section 25 of the Indian Universities Act which lays down that the Senate, with the sanction of the Government (*i.e.*, the Government of India) may, from time to time, make regulations consistent with the Act of Incorporation, as amended by the Universities Act, and with the University Act to provide for matters relating to the University. The present regulations for examination, according to the Matriculation, Intermediate Arts, and B. A standard, provide for papers in composition in certain vernacular languages which include Assamese and certain other languages. It is a matter of the greatest importance to us in Assam that these examination rules should not be altered without our consent. Under the existing law no alterations in the regulations can be made without the sanction of the Government of India, and under existing circumstances, no alterations would, I venture to think, be made by that body without obtaining the views of the Chief Commissioner of Assam. Should the control of the Government of India in respect of sanctioning regulations be withdrawn, what guarantee have we that no alterations would be made in the regulations without our consent being previously obtained?

"Burma and Bihar are contemplating Universities of their own; Assam, in process of time, will adopt a similar course. When that happens, Bengal may be safely left, I venture to think, so far as we are concerned, to manage the University of Calcutta, which will then have no authority in Assam.

"In conclusion, Sir, although there would seem to be good grounds for not disturbing, on the lines indicated by the Hon'ble Mr. Banerjee, the existing state of things as regards the University, I can only submit that should it be decided to undertake the inquiry suggested in the Resolution, Assam interests may be very carefully considered before a decision is arrived at."

The Hon'ble Mr. Setalvad:—"Sir, as one connected with the active, day by day work of the Bombay University for many years, I have followed this debate with great interest. My Hon'ble friend Mr. Banerjee has pleaded for the transference of the control of the Calcutta University from the Government of India to the Government of Bengal. When I saw the Resolution on the Agenda paper, I expected to hear from my Hon'ble friend the reasons why he wants this transfer I hoped to hear from him of the inconvenience felt by the Calcutta University and the disadvantages suffered by it by being controlled by the Government of India. I also expected to hear of the advantages that he hoped the Calcutta University would derive by having the control transferred to the Government of Bengal. But in his eloquent speech I have searched in vain for these reasons. He has told us that the Bombay and Madras Universities are controlled by the Local Governments, and he pleaded that the same should be the state of things with regard to the Calcutta University. May I tell my Hon'ble friend that there have been occasions in the history of the Bombay University when we wished that the control of the University rested with the Government of India, and not with the Government of Bombay.

[22ND MARCH, 1916.] [*Mr. Setalvad.*]

" My Hon'ble friend wishes that the Bombay model should be followed. I suppose, Sir, in each case it is the distance that lends enchantment, for I can tell my Hon'ble friend really and truly that there have been occasions in the history of the Bombay University when we have wished that we had less of provincial control over us ; and I will illustrate what I mean.

" In the year 1910-11, we were surprised in the University one day to find several letters addressed to us by the Bombay Government, suggesting to us that the University should undertake various changes in its courses of study and various other matters. That was the first occasion in the history of the Bombay University when we had such direct interference in its affairs by the Bombay Government. One of the suggestions made by the Bombay Government was that English History, which till then formed a compulsory subject in the B. A. course, ought to be abolished. The matter was discussed at great length and debated in the University, and the overwhelming opinion was in favour of the retention of English History in the B. A course. After long debates, a conclusion was arrived at, in which the Director of Public Instruction concurred, that English History should be retained in the B. A. course. I may say that the resolution was arrived at with only one dissentient in the whole Senate. But when that resolution went up to the Local Government for confirmation under the Regulations, what happened ? The Bombay Government were quite prepared to set aside the unanimous vote of the Senate, and, not satisfied with the reasons which prompted the Senate to retain English History in the B A. course, they absolutely ordered the Director of Public Instruction to bring forward a resolution in the Senate reversing that unanimous decision of the Senate and to abolish English History from the B. A. course and the poor Director of Public Instruction, whatever his personal views were about the matter, was obliged to obey that mandate. The resolution was moved by the Director of Public Instruction in pursuance of that mandate, and furthermore all Government officials who were members of the Senate were officially told—a written whip was sent round to them—to go to the Senate meeting that day when that resolution came up, and to vote in favour of the motion of the Director of Public Instruction. This was openly mentioned at the meeting of the Senate on that occasion and could not be denied. With all this whipping, with all this interference, the result was no doubt that they gained their proposition and the resolution was passed ; but even then they were able to pass it with a majority of 4. I am saying this for the purpose of showing how the sentiments and the feelings of the Senate must have been against that proposition which was forced on them by Government in that manner. However, the Local Government's view prevailed against the almost unanimous opinion of the Senate in the matter, and so in Bombay English History is still eliminated from the B A. course although the whole Senate is still of the same opinion. I hope and expect, however, that very soon the matter will come up again for discussion.

" I am putting this as an illustration before my Hon'ble friend so that he may consider whether, in advocating the transfer of control from the Government of India to the Bengal Government, he may not be jumping from the frying pan into the fire. Because, with provincial control you will get local official prejudice, and it is local official prejudice that would come into play more than local public opinion if you have the Local Government controlling the Calcutta University; whereas, the Government of India, being isolated and detached from local prejudices, are very often, to my mind, able to take a larger view of things than Local Governments can. Therefore, I beseech my Hon'ble friend to consider whether it is really wise to ask for this change in which he may go further and fare worse.

" To my mind, Sir, the real remedy for the evils of the present University system lies entirely in another direction, and that remedy is one, I venture to submit, that ought in course of time—I think very soon—to be applied to all Indian Universities What is really needed is, that the Universities should be put more under popular control than they are now ; that the

[*Mr. Setalvad; The Vice-President; Mr. Arbuthnot.*] [22ND MARCH, 1916.]

control of Government, either the Provincial Government or the Government of India, should be removed as far as possible, and that the Senate should be really made a popular body. When I speak of a popular body, I do not mean that it should be popular in the sense of other assemblies. No doubt you have to secure on the Senate the presence of educationists, professors, teachers, and people of that class; but just consider what the present constitution of the Senates is. You have the Senate composed of 100 members, of whom 80 are nominated by Government, a further 10 are allowed to be co-opted by the 80 people so nominated by Government, and only 10 are left for election by graduates. When the University was first established in 1857, it was all right in those days when education had not progressed in the country and there was nothing else possible but that Government should nominate all the members of the Senate: but what a confession it is that even after 58 years, although rapid strides have been made in education, you still allow 10 people out of a Senate of 100 to be elected by the graduates of the Universities whom you have turned out by this time in thousands. To my mind, Sir, the time has now arrived when a larger proportion of elected members—"

The Hon'ble the Vice-President:—"The Hon'ble Member is wandering a good deal from the point. We are discussing the eventual control of the Calcutta University."

The Hon'ble Mr. Setalvad:—"I am pointing out that the remedy for the present unsatisfactory state of the Calcutta University does not lie in the change the Hon'ble Mr. Surendra Nath Banerjee is advocating, but in the direction which I am trying to show."

The Hon'ble the Vice-President:—"The Hon'ble Member is wandering from the point."

The Hon'ble Mr. Setalvad.—"I won't elaborate it, but what I wish to point out is that the real remedy lies in the direction that I have indicated and not in asking for one control to be substituted for another. The real remedy is to free the Universities from Government control, whether Provincial or Imperial, make them more amenable to popular control, popular in the sense I have indicated. Therefore, Sir, one is not quite sure of the wisdom of the change which my Hon'ble friend is advocating. However, as he has said, all that he is asking for is consideration of the matter by the Government of India. Of course there cannot be any objection to the consideration of any matter at all; but, as I have indicated, it is a matter which is beset by many difficulties; it is a matter which requires to be very carefully considered before any conclusion can be arrived at; and if the matter is to be considered by the Government of India, I do hope and trust that all the objections raised by Burma and Assam, and the various objections that I have pointed out, will be carefully considered."

The Hon'ble Mr. Arbuthnot.—"Sir, it is a matter of some regret to me that in this matter I find myself compelled to oppose to some extent my Hon'ble friend Mr. Banerjee in a matter which he evidently has so very much at heart. Not, indeed, that I desire to oppose the Resolution itself. The Resolution is couched in terms which are most persuasively moderate. All he asks is that the Council should recommend to Government the consideration of the advisability of taking certain action in regard to the administration and control of the Calcutta University.

"It is difficult to object to a Resolution couched in such studiously moderate language and of such strictly limited scope. But it was clear from the speech of my Hon'ble friend that he hopes that the very small seed he is planting now will at no distant date bear fruit, and with that unfailing enthusiasm which is

[22ND MARCH, 1916.] [*Mr. Arbuthnot; Maharaja Ranajit Sinha of Nashipur.*]

so characteristic of him, he hopes that the mere consideration of the question will lead to action being taken at once in the direction which he desires. He hopes that the Council having recommended Government of India will at once proceed to consider, and having considered, they will immediately be convinced, that being convinced, they will without delay, with all the zeal of fresh converts, proceed to take action on their newly formed conviction. But, Sir, it is just in regard to this that I desire to enter a caveat, or perhaps to phrase it more correctly, invoke a moratorium. Sir, as Mr. Banerjee has already pointed out to this Council, the Province of Burma, in spite of her size and her importance as one of the major Provinces of the Indian Empire, has no University of her own, and is in all matters connected with University education, under the control of the Calcutta University. We are in hopes that this anomaly will, at no distant date, be rectified. The matter has for some time been under consideration, and I am instructed to say that detailed proposals for the establishment of a University at Rangoon will shortly be submitted to the Government of India. The Government of Burma, and the Educational Syndicate, which is a representative body consisting of officials and non-officials, of which I myself have the honour to be a member, and which advises the Local Government on all matters connected with higher education, and also public opinion in Burma attach supreme importance to the establishment of a University for Burma at Rangoon at the earliest possible opportunity. Detailed proposals, which have been drawn up by the Director of Public Instruction, in consultation with the Educational Syndicate and also, I understand, in communication with my Hon'ble friend Mr. Sharp, will, as I have already said, very shortly be submitted for the sanction of the Government of India and the Secretary of State, and Sir Harcourt Butler hopes, and I hope (and I trust that on this matter we shall not be found to be unduly optimistic) that it will be found possible to introduce the necessary legislation in this Council in the Autumn Session of the current year, and that thereafter the necessary Bill which will of course be entirely non-contentious will be passed into law at the earliest possible opportunity. If this is done, we are in hopes that we may have our University in working order in about two years from the present date. But, Sir, I submit that it would cause very great embarrassment and confusion if, while our University were in the making and before it was in thorough working order, any change were made in the existing arrangements.

"I must further add that public opinion in Burma would be extremely hostile to the submission of matters connected with University education in Burma to any Government except the Government of Burma or the Government of India. I trust that in this matter my remarks will not be misconstrued, and that I shall not be taken to imply anything in any way derogatory to the Government of Bengal or its present distinguished head. But I think this Council will readily sympathise with our view that the interests of Burma, and that the point of view of Burma are more likely to receive sympathetic treatment and careful consideration from the Government of India whose angle of vision must necessarily be wider than that of any Local Government, and which is also untrammelled by local and occasionally selfish interests.

"For these reasons, Sir, I would express the hope that, if this Resolution is accepted, it will be found possible to give an assurance that no change will be made in existing arrangements until Burma has a University of her own and ceases to be dependent in matters connected with University education on the Calcutta University."

The Hon'ble Maharaja Ranajit Sinha of Nashipur:— "Sir, I beg to associate myself with the Resolution moved by my Hon'ble friend on the right. Undoubtedly it is a great honour for the Calcutta University to be associated with the Government of India with the Viceroy as her Chancellor, but, Sir, at the same time it is desirable that the Chancellor should be in touch with the University and the people interested or connected

[*Maharaja Ranajit Sinha of Nashipur; Rai Sitanath Ray Bahadur; Maharaja Sir Manindra Chandra Nandy of Kasimbazar.*] [22ND MARCH, 1916.]

with it. At present we have the privilege of having a Chancellor who spent two winters in Calcutta and who came in contact with all the persons interested in the University, and had been able to discuss with them as to her needs and aspirations, but, in future, the Government of India being situated at a long distance from Calcutta, I am afraid the Chancellors will have but little opportunity of coming in contact with the people of the Calcutta University and discussing with them any matters educational. But at the same time I recognise the objection raised by the people of different Provinces that whereas the Calcutta University exercises jurisdiction to places beyond Bengal, this should not be placed under the Local Government, so I endorse the suggestion made by my Hon'ble friend that certain duties of the Chancellor may be delegated to the Rector, I mean His Excellency the Governor of Bengal, subject to general control which may be exercised by the Government of India from time to time I think there is no harm in accepting that view of the question. Further, it appears that the Allahabad University is still exercising jurisdiction over such parts where the Local Government has no jurisdiction, and such is the case in Madras also. So I hope the suggestion made by me will commend itself to the Council. For the present, my friend has only asked that the matter may be considered by the Government of India, whether it is desirable to do so, and as such I think there can be no objection to the Resolution being accepted by the Council. "

The Hon'ble Rai Sitanath Ray Bahadur:—"Sir, in my opinion, the Resolution is an exceedingly modest one. If my Hon'ble friend Mr. Banerjee had asked that immediate action should be taken to transfer the Chancellorship of the Calcutta University to the Governor of Bengal, then I would have opposed it. All he has asked for, is that public opinion the opinion of the Bengal educated community and different public bodies should be invited to see whether it is desirable or not that the head of the Bengal Government should be the Chancellor of the Calcutta University. I welcome the friendly remarks of my Hon'ble friend Mr. Setalvad, but I could not understand the captious criticism which was made by my Hon'ble friend from the Central Provinces. He does not feel uncomfortable on account of his Province having been placed under the University of Allahabad, but he is very sorry that Burma and Assam should be absolutely placed under the control of the Calcutta University. To that my reply is that Burma is going to have a University of its own, so that my friend need not be disconsolate on that account. The only province which will have a grievance is Assam, but that I may say is a minor province, and there cannot be any conflict of interests between Assam and Bengal However, the Hon'ble Mover does not ask that immediate action should be taken ; all that he asks for is that the opinion of the educated public, of the different public bodies and of the Calcutta University should be invited in order to see whether the change is desirable or not from the point of view of Bengal. I, therefore, beg to support the Resolution of my Hon'ble friend."

The Hon'ble Maharaja Sir Manindra Chandra Nandi of Kasimbazar:—" Sir, I beg to support this Resolution. So long as the seat of the Government of India remained in Calcutta, it was eminently desirable that the University of Calcutta should remain under the direct control of the Supreme Government. After however the transfer of the Capital from Calcutta to Delhi, the Presidency of Bengal has been placed on the same footing as the sister Presidencies of Madras and Bombay, and it stands to reason that the University of Calcutta should be placed on the same level as the Universities of Madras and Bombay as regards control and administration. The affairs of all Indian Universities are subject to the supervision of the Government of India, and the University of Calcutta should be placed in the same position."

[22ND MARCH, 1916.] [*Maung Bah Too; Rai Ghanasyam Barua Bahadur.*]

The Hon'ble Maung Bah Too :—"Sir, on behalf of the people of Burma I desire to oppose this motion. We are in hopes that we will in the course of two or three years have the fulfilment of one of our earnest desires and have a University of our own at Rangoon. But meanwhile Burma, in matters of University education, is dependent on the Calcutta University, and so long as Burma is in any way connected with the Calcutta University, the Burman people would very strongly resent any change, which would place the control of that University under the Government of Bengal, instead of under the Government of India. If the Resolution is accepted, I trust that an assurance will be given to us in Burma that no change will be made, until Burma has a University of her own."

The Hon'ble Rai Ghanasyam Barua Bahadur :—"Sir, it may easily be conceded that the privilege aimed at by the Resolution may be looked upon as only a legitimate aspiration of the Presidency of Bengal, as it desires nothing more than what her sister Presidencies have already been enjoying. My Hon'ble friend the Mover, however, no doubt sees the distinctive feature of the Calcutta University in the fact that by the Act of Incorporation it was made the University for the Presidency of Fort William in Bengal and other parts of India, and that it still continues to be the University for four different Provinces including Bengal Its position in this respect is superior to the other Universities and its responsibilities greater. I should think its dignity is also higher though the Hon'ble Mover does not seem to think much of it; but it is strange that my Hon'ble friend's views are at entire variance with the views which have been just read out by the Hon'ble Mr. Dadabhoy, of the distinguished Bengali Vice-Chancellor, one of the greatest educationists of the day, Sir Asutosh Mukerjee on this point. My Hon'ble friend is anxious to have the whole thing governed by his own Province. This is only in keeping with the principle of Provincial autonomy which he so much advocates; and as a sentiment of Provincial patriotism, if I may so call it, nobody should have reason to find fault with his desire. He has brought in the example of the Central Provinces and its relation to the Allahabad University in support of his claim, and he thinks that Bengal, in connection with the other Provinces which are dependent upon the Calcutta University, will not be in any other position than what the University of Allahabad already is in connection with the Central Provinces. I do not know what the relations between the Allahabad University and the Central Provinces have been in the past, but I have no doubt conflicts must have arisen, and if I am rightly informed, I have reason to believe that the Government had at times to take vigorous steps to mitigate occasional misunderstandings and to adjust the relations between the two Provinces in the matter of University education. I do not at all mean to suggest that the Government of Bengal will lack in the power of efficiently governing the University or equitably adjusting its relations with the other Provinces. Nor do I mean to suggest that the august body, known as the Calcutta University, will ever be consciously unjust or unfair in any matter whatsoever. But who is to act as the arbiter when there are honest differences of opinion between the Government of Bengal and any of the other Provincial Governments concerned? Provincial Governments are at their best; only Provincial Governments and their own interests as disclosed by local public opinion, on which my Hon'ble friend rightly lays so much stress, and often greatly swayed by it, will always be and are bound to be their first concern; besides, local opinion as to any matter in difference is not unlikely to carry conviction. From our past experience I hope I shall be excused if I say that Bengal public opinion and the measures adopted by the Bengal Government are sometimes found to be at variance with the opinion and interests of her less favoured neighbours. Let me cite an instance in the case of my own Province in a matter closely connected with education, *viz.*, the recognition of the Assamese language as a separate language and the advancement of

[*Rai Ghanasyam Barua Bahadur.*] [22ND MARCH, 1916.]

education in Assam with the aid of its own vernacular. As Hon'ble Members are aware Assam was under the Government of Bengal for a long time after its annexation to the British Raj For administrative convenience of its own the Government of Bengal imported a large number of Bengali clerks and subordinate officers into the Province At the beginning of the administration Assamese was recognised as the language of the Courts; but Bengali soon succeeded in driving it out and taking its place in the Courts and schools Bengali clerks and officers then began to pour in to fill more and more posts in the administration, and the Assamese became ousted from all important positions. Education found its progress impossible, and the second grade college which was established at Gauhati had ultimately to be abolished instead of being raised to a higher status. The Assamese leaders of the day and some benevolent American missionaries who had studied the people and the language for 20 years made a protest as clear and strong as possible from the beginning and formally moved the Bengal Government in 1854 saying that incalculable mischief was and would be done to the people of Assam, and that their educational and material progress would greatly suffer by this unnatural process. But the Government of Bengal instead of yielding to popular clamour thought rather of putting themselves on their defence, and it was after a long struggle of close on 20 years that in 1871 they were convinced of their mistake, and Sir George Campbell, the then Lieutenant-Governor of Bengal, ordered the Assamese language to be reinstated in the Courts and primary schools Bengali, however, continued in the middle and high schools down to the time of Sir Henry Cotton, when Assamese began to be taught in the Dibrugarh middle school in 1898. From that time it has been gradually introduced into all the schools of the Assam Valley, with the exception of certain schools of the Goalpara district. At last recognition was granted by the University of Calcutta which allowed its inclusion in its list of vernaculars both for Matriculation and degree examinations.

"Bengali has thus had the advantage of being for nearly half a century the only officially recognised language in the Assam Valley, and for nearly three-quarters of a century the only medium of instruction in all but village schools That this state of things must have had a disastrous effect upon the language and its literature is evident. Assamese had to fight for its very existence. It would have been lamentable had the fight ended otherwise A people who had developed themselves on lines of their own, whose literature had characteristics distinct as their own individuality, would have been generally crushed down into 'hewers of wood and drawers of water.' There was therefore much more at stake than the mere recognition or non-recognition in official circles of a particular language. The future of a whole race was in question. Now of course the language has been fairly and finally settled, though the disastrous effects of the mistaken policy pursued for so long a time are still visible on every side we turn our eyes in Assam, and will continue to do so for a long time yet. I have dwelt at some length on the point only to show how a single mistake or difference of opinion may have far-reaching effects on the destinies of a whole race.

"Now, Sir, one word about public opinion in Bengal. It has a great respect for its own cherished views whatever the world may have to say against them. Even on this Assamese language question which was set at rest after thorough discussion extending over half a century and more, a leading Bengali journal had in its columns the following so late as the 20th December last:—

'Unfortunately, however, there is a tendency on the part of our bureaucratic Government to create new languages where there are none, and to raise each petty dialect to the dignity of a language. Thus, Assamese, which is undoubtedly a dialectic variation of Bengali, has been made into a separate language, chiefly, we believe, under the advice and influence of some Christian Missionaries There are some foolish and misguided people whose local vanity is gratified by this kind of thing; but still it must be said that the tendency to multiply dialectic differences and to raise dialects to the rank of languages is against the true interests of civilisation and progress.'

[22ND MARCH, 1916.] [*Rai Ghanasyam Barua Bahadur; Dr. M. N. Banerjee; Mr. Cumming.*]

"Comment on this effusion is needless. The writer may, however, profit by reading the opinion of at least a better authority than himself. I will read out a passage from a book entitled A Bengali Grammar, also an Assamese Grammar by Professor G. F. Nicholl, M.A., a great oriental scholar, who was Lord Almoner's Professor and Reader in Arabic in the University of Oxford, Oriental Lecturer of Balliol College, Oxford, Professor of Sanskrit and Persian in King's College, London. He says—

'Assamese is not, as many suppose, a corrupt dialect of Bengali, but a distinct and co-ordinate tongue, having with Bengali a common source of current vocabulary. Its Sanskrit did not come to it from Bengal, but from the Upper Provinces of India, this all who carefully examine the matter will readily admit.'

"That being the case, Sir, it is not at all unnatural that, when a proposal comes up for giving full control to Bengal in any matter in which other Provinces are commonly interested with Bengal, they should feel disposed to look upon the situation with some apprehension and uneasiness. Bihar and Burma, I understand, are going to have their Universities in a few years. If the Government of India thinks of divesting itself of the powers it now has over the University of Calcutta, I humbly suggest that similar provision should be made for a separate University for Assam also, and ask Bengal to wait till all these dependent Provinces have been provided with their own Universities. But till then, the Government of India should, in my humble opinion, retain its present control over the Calcutta University. The Resolution of course asks the Government only to consider the advisability of taking a certain step. If it should mean nothing more than a consideration of the pros and cons of such a step, there can be no serious objection to the Resolution being accepted, and discussions opened with the Local Governments concerned in the matter. If it should, however, mean anything more than that, I feel it my duty to oppose the Resolution."

The Hon'ble Dr. M. N. Banerjee:—"Sir, I give my hearty support to the Resolution moved by the Hon'ble Mr. Surendranath Banerjee. I should like to add to the arguments that have been put forward in favour of the proposed change that the Chancellor of the University nominates 80 per cent. of the Fellows, and that the Governor of a Province is more likely to know the persons who are best fitted for the purpose.

"I further submit that, if this Resolution is accepted, it will remove many of the difficulties and much of the delay which educational institutions have to suffer from in the matter of affiliation to the University, and which will continue so long as the existing state of things remains.

"As to the expressions of Sir Asutosh Mukherjee which my Hon'ble friend Mr. Dadabhoy has quoted, I think they are not so argumentative as giving utterance to the sentiments which Sir Asutosh felt at the time.

"As regards the suggestion which the Hon'ble Mr. Setalvad has made of undue interference on the part of Local Governments in University affairs, I think such cases are very rare and exceptional, and they may happen in any form of University control.

"As regards the objections raised by the Provinces concerned, I will leave my Hon'ble friend the Mover to reply to them.

"I again give my hearty support to the Resolution moved by my Hon'ble friend."

The Hon'ble Mr. Cumming:—"Sir, I trust I shall not weary the Council at this stage by offering a few observations on the Resolution from the point of view of the Local Government concerned. The Hon'ble Mr. Banerjee has given his reasons, regarding some of which there is difference of opinion; but, regarding his narrative of facts, in the main, I think the Council may take it as correct. I am in a position to say that the Government of Bengal

[*Mr. Cumming.*] [22ND MARCH, 1916.]

would welcome a change of the nature indicated in the Resolution, but with certain reservations.

"It seems to me, Sir, that there is a general principle involved; and that principle is a well-known one in administration. Where there is responsibility, there should be authority; and in fact power or authority cannot be divorced from responsibility without serious consequences. In the present circumstances of Bengal, since the Government of India have moved from their former headquarters in Calcutta, the position of the Government of Bengal is such that it has a responsibility of which it cannot divest itself. Now, in the application of that principle, there are two points to be considered. First of all, as regards the position of the Rector, under the existing law the Lieutenant-Governor was the Rector; and to that position the Governor has succeeded by the tacit consent of all concerned. At the same time, in the Act no special duties are assigned to the Rector, and I believe I am correct in saying the Act does not countenance the delegation of any powers or functions of what is known in the Act as 'the government' to the Rector I consider, Sir, that this position offends against the proposition which I stated, namely, that where there is responsibility, as there is now, there should be authority.

"Next as regards the Government of Bengal, in the same manner, circumstances have changed since 1904. In that year, as has already been stated to the Council, the 'government' was placed in the hands of the Governor General in Council.

"But it is well known that in the cases of Madras and Bombay, under the same Act the authority of the 'government' was given to the respective Governors of those presidencies. In fact, the Local Government of Bengal is not mentioned at all in the Act of 1904. I am, therefore, to say that the Government of Bengal would welcome any change whereby ultimately, as regards its own territory, it would not be in a worse position than the sister Governments of Madras and Bombay.

"I said that there were certain reservations. These reservations have been the subject of comment in the course of the debate, and very properly so. There are undoubtedly real difficulties on account of the fact that at present the jurisdictions of the Presidency of Bengal and of the University of Calcutta are not conterminous. There would be a great advantage in making the jurisdictions conterminous. It is true, as has already been explained in the course of the debate, that, in the case of the United Provinces and in the case of Madras, the Governments in those areas do control colleges which are affiliated outside their areas. But, at the same time, I consider that, as long as there is official control of the Universities, that control should, as far as possible, be concentric with the jurisdiction of Government. It should be recognised in this connection to what a great extent Bengal proper is involved. In Bengal, there are 41 colleges affiliated; in Bihar, there are 7; in Assam, there are only 2, and possibly in the future 3; and in Burma, there are only 2. It is obvious then to what a great extent the existing Government of Bengal is interested in the large number of colleges which are under its territorial jurisdiction. Of course, if, as is probable, the two Universities of Bihar and Burma materialise, as I understand they will, and as I personally hope they will, the position will become altered, and then there will remain only the Administration of Assam. I think it should not be impossible that, when that state of things has been reached, an equitable arrangement may be made so that the ruler of Bengal and the Government of Bengal should be in a position to control the University affairs within the areas of existing Bengal and Assam. I quite agree with those Members who have spoken who say that under existing circumstances, without casting any reflection, they feel that it is proper that the authority should remain as an outside impartial controlling authority; but if these changes should come about, I can say, on behalf of the Government which I have the honour to represent, that they would be welcome. With these reservations and remarks, I support the Resolution."

[22ND MARCH, 1916.] [*Mr. Oldham; Mr. Walker; Mr. Surendra Nath Banerjee; Pandit Madan Mohan Malaviya.*]

The Hon'ble Mr. Oldham :—"Sir, I had not intended to say anything on this Resolution this morning, more especially as I have no instructions. In view of the fact that the Right Hon'ble the Secretary of State has already decided that a separate University for Bihar and Orissa (the scheme for which is cut and dry) should be established at Patna, and of the fact that, as I understand, the necessary short legislation to give practical effect to that decision will be brought forward at the earliest possible date, it may seem that the Province of Bihar and Orissa is not so vitally concerned with this Resolution as certain other provinces or administrations, who may not be so far advanced in the matter of their University schemes. Furthermore, objection does not seem called for at this stage in view of the very broad terms of the Resolution, *viz*, that this Council recommends to the Governor General in Council 'to consider the advisability of' placing the University of Calcutta on the same footing with the Universities of Madras and Bombay, etc. I realise the misapprehension which frequently attaches to the meaning of the words 'consider' and 'consideration,' especially on the part of applicants for boons or favours! But I have little doubt that the Government of India will not misapprehend the terms; and I have no doubt that the Government of India will come to no final decision, one way or the other, in this matter—will do nothing that might prejudice the interests of any individual Local Government or Administration, without formally consulting those Governments or Administrations, and without giving the fullest consideration to any arguments which they may have to bring forward, or difficulties which they may think necessary to raise. It seems hardly necessary to request that a formal assurance be given to this effect."

The Hon'ble Mr. Walker :—"Sir, I had not anticipated addressing the Council on this Resolution, but the Hon'ble Mover and also some other Hon'ble Members have referred to the concrete instance of the relations of the Central Provinces to the Allahabad University as an argument, which is likely to remove the apprehensions that may be felt by Governments, other than the Government of Bengal, at the prospect of the change contemplated in the Resolution. The Hon'ble Mover has stated that the existing arrangements with the Central Provinces and also in Ceylon have not resulted in any catastrophe—"

The Hon'ble Mr. Surendra Nath Banerjee :—"I did not say that with reference to the Central Provinces; I said it with reference to Ceylon."

The Hon'ble Mr. Walker :—"Very good; at the same time that is not much of an assurance. The Hon'ble Mover did not say that the existing arrangements have proved satisfactory, and I can assure the Council that the existing system, under which education in the Central Provinces is subordinated to an institution essentially connected with another province, has no friends in that province, official or non-official. It is the prospect of obtaining a University of our own that is looked forward to as the only satisfactory solution of several problems.

The Hon'ble Pandit Madan Mohan Malaviya :—"Sir, the Resolution has given rise to a very curious discussion in which, on the one side, is expressed a rather strong opinion on behalf of Bengal that it should be freed from the control of an authority which is not present in Bengal, and, on the other side, an equal apprehension that, if that control is removed, the interests of provinces other than Bengal will suffer. But, if I may say so, the very intense earnestness of the arguments, put forward by the representatives of Burma, Assam and other provinces, that the present state of things should continue, furnish a strong support to the Resolution which has been moved by the Hon'ble Mr. Banerjee; for that shows, Sir, that they are naturally

[*Pandit Madan Mohan Malaviya.*] [22ND MARCH, 1916]

anxious that the interests of their provinces should not suffer by the control which the Governor General exercises over the affairs of the Calcutta University being removed. Sir, in the absence of the control of the heads of their respective provinces, over a University which governs them, they find most satisfaction in the control which is exercised by the Governor General over it. On the other hand, Bengal has risen to urge that its University should be placed on the same footing with the Universities of Madras and Bombay. I think, Sir, there is much to be said on both sides of the question. A great deal can be said in favour of the view that the head of the Government of Bengal should be the head of the University of Bengal. In ancient days when the Calcutta University was started, things were different, the Governor General of India being the supreme head of the Government, was naturally made ex-officio Chancellor of the University. But, since that time much water has flowed down the Hooghly; the Punjab and the United Provinces have had separate Universities established in them. The Governor General no longer has his head-quarters in Calcutta, and Bengal has been raised to the status of being under a Council government ; it has been placed on the same footing as Madras and Bombay; and it is somewhat anomalous that the Governor of Bengal should not be the head of the University of Calcutta which is primarily the University for Bengal, as the Governors of Madras and Bombay are the heads of the Universities of Madras and Bombay. I do not think that the real reason for the change which is advocated is that the exercise of the control, of the nominal control, it can only be nominal, by the Viceroy is resented ; the object is that the guidance and control of the head of the Government of Bengal who is ever present in Bengal,—which is direct and immediate, should be available to the University in the fullest measure for the benefit of the University of Calcutta It should be remembered that Bengal is the largest province which is interested in the existing arrangements and in the present proposal. As the Hon'ble Mr. Cumming has pointed out, Bengal has the largest number of colleges which are under the control of the University of Calcutta, and it should not be made to suffer, because it has extended its hospitality to other provinces which are less favoured than it is, by admitting students from colleges existing in those provinces—from Burma, Assam, and Bihar and Orissa to its own examinations. There is much force in the contention that Bengal should not be placed under the disadvantage of not being allowed to have the head of its Government as the Chancellor of its University. At the same time, there is much to be said in favour of the view urged by Burma and Assam that their interests should be safeguarded. If the recommendation contained in the Resolution is accepted even before Universities come into existence at Patna and in Burma and in Assam, it should still be possible to safeguard their interests both in the matter of the vernaculars that prevail in those provinces and in other respects so far as the interests of the students of those Provinces are concerned. But the true solution lies in another direction ; the root of trouble lies in the fact that the provision for University education is so unsatisfactory, is so poor in India. That for the whole area which is even now under the jurisdiction of the Calcutta University, and which comprises a population more than twice as large as the population of the United Kingdom, there should be only one University is a matter on which neither the people nor the Government can be congratulated. Leaving alone Burma, Bihar and Orissa and Assam, Bengal alone has a population of nearly 50 millions, a population larger than that of the United Kingdom, and yet there is only one University in it, whereas in the United Kingdom there are 18 to 21 Universities. The real solution therefore lies in expediting the establishment of Universities in Burma, in Bihar and Orissa and also in Assam. One speaker has said that Assam is not a sufficiently large province to have a separate University of its own. I do not agree with him. I submit that having a population of over seven millions, nearly equal to that of Belgium, it is a sufficiently large province to have a University of its own. And I hope that one result of this Resolution, if it leads to no other result, will

[22ND MARCH, 1916.] [*Pandit Madan Mohan Malaviya; Raja Sir Muhammad Ali Muhammad Khan of Mahmudabad.*]

be to expedite the efforts which are being made for the establishment of a University in Burma, and for the establishment of a University for Bihar and Orissa at Patna, and I hope also that the result of the discussion will be to suggest to the Government of India the desirability of seriously considering whether Assam should not have a University of its own. No doubt Burma, Bihar and Orissa and Assam are under a debt of gratitude to Bengal for the advantages of higher education which the students of these provinces have received during half a century from their connection with the University of Calcutta. But it is undeniable that if Universities had been established in Burma, Bihar and Orissa and Assam when their separate administrations were established, the progress of higher education in those provinces would have been immensely greater, and the condition of the people would have been immensely better. Therefore, I hope, Sir, that, while the Government of India will be pleased to accept the Resolution as it is worded, that it will expedite the establishment of a University in Burma, and of a University in Bihar and Orissa, and also take into its serious consideration the question of a University being given to Assam."

The Hon'ble Raja Sir Muhammad Ali Muhammad Khan, of Mahmudabad:—"The present system governing the management of the Calcutta University stands self-condemned. It is avowedly a system of double control, and, as such, is open to obvious objections. No man can serve two masters. In this case, too, the system prevents either master from taking an adequate interest in the University. The Government of India are now absent from Calcutta for 12 months in the year, and cannot possibly have that first-hand acquaintance with the local problems which they possessed of old, and which is essential for dealing with the affairs of a large University such as the University of Calcutta. On the other hand, the Local Government who can never be quite sure of the attitude of the Government of India in any particular matter cannot but adopt a non-committal and unattached attitude, in fact an attitude of irresponsibility. The result is delay, and, what is worse, there is apt to be friction, or at least the opportunity for friction, not only between the University and Government, but between the two Governments. The present debate has amply shown that what I am saying is not only true on paper, but that the present system has given rise to great practical difficulties which have neither enhanced the reputation of the Government of India nor tended to the advancement of education. It might of course be objected that so long as there are no separate Universities in Burma and Bihar and Orissa, it may be undesirable to transfer the control of the Government of India over the Calcutta University to the Government of Bengal. But we have yet to know wherein this undesirability lies. We have precisely the same system prevailing in the case of the University of Allahabad which, though under the control of the United Provinces Government, exercises jurisdiction over the Central Provinces and certain Indian States. The same is the case with the Lahore University. Why the Calcutta University should be unnecessarily harsh or severe in its attitude towards the Colleges that exist in Burma, Assam and Bihar and Orissa, is difficult to understand though, if such suspicion was reasonable, the transfer to the Local Government might be made subject to a proviso reserving the control of the Government of India so far as colleges outside Bengal were concerned. I am, however, opposed to shelving the present question till there are separate Universities in Bihar, Burma and Assam. For this will mean that we shall have to wait for a very long time, and the present system, as I have said before, with its inevitable delay and friction, will continue to the detriment of education not only in but outside Bengal.

"Lastly, it is clear that the proposal of my Hon'ble friend, the advantages of which outweigh its disadvantages has the support of public opinion generally in Bengal. This fact, of itself, merits serious consideration.

[*Raja Sir Muhammad Ali Muhammad Khan of Mahmudabad; Khan Bahadur Mian Muhammad Shafi*] [22ND MARCH, 1916.]

"In conclusion, I submit that I support the Resolution to strengthen the hands of their Honours the Lieutenant Governors of Burma and Bihar to have Universities for Burma and Bihar."

The Hon'ble Khan Bahadur Mian Muhammad Shafi:— "Sir, I rise to give my cordial support to the Resolution moved by my friend the Hon'ble Mr. Surendranath Banerjee, because of the hope which I entertain that a careful consideration of the advisability mentioned in his Resolution will lead to the realisation not only of thé object which Bengal has in view, but also of the ultimate object which both Burma and Assam have at heart. The apparent antagonism in the speeches delivered to-day by the Hon'ble Mr Surendranath Banerjee, the Hon'ble Colonel Gurdon and the official Member for Burma, is, when closely examined, no antagonism at all. It seems to me that just as outside control is irksome to Bengal, so, from the point of view of Assam and Burma, if the change contemplated by the Hon'ble Mr. Surendranath Banerjee were to be brought into existence, would the resulting outside control be equally irksome to Assam and Burma. I am sure that our friends from Bengal will fully realise that the Assamese and the Burmese people are perfectly within their rights when they say that, if the Bengal people desire that the control of their provincial educational affairs should be vested in the hands of their own Government, the Assamese and the Burmese people are perfectly justified in adopting the same attitude with regard to their own provincial educational affairs.

"My Hon'ble friend Mr. Setalvad has mentioned a certain incident which occurred in Bombay in order to caution the Hon'ble Mr. Surendranath Banerjee lest in the change which our Bengal friends advocate they might be—I do not know whether that expression was quite justified—'jumping out of the frying pan into the fire.' Well, Sir, so long as the control of educational institutions rests in the hands of individuals who entertain strong opinions with regard to given questions, so long must these incidents occasionally happen, whether that control is in the hands of Provincial Governments or in those of the Imperial Government. I will give one illustration. The Hon'ble Mr. Setalvad is fully aware of the controversy raging round the question of the alternatives of the Matriculation examination and the School Final examination, with reference to which we have had a very heated and very interesting discussion recently in the Senate of the Bombay University. Well, the same question is already under discussion in the Punjab University, with which I have been closely connected for the last twenty years. Perhaps the Hon'ble Mr. Setalvad will be surprised to hear that the suggestion of the substitution of a School Final in place of the Matriculation examination, so far as our province is concerned, emanated from the Imperial Government, and not from the Provincial Government. For a long number of years the Provincial Government resisted the suggestion of the Imperial Government that a School Final examination should take the place of the Matriculation examination, but, in spite of that resistance, finally it had to give way and the question was brought up for discussion at a meeting of the Senate of the Punjab University. Certain members of the Senate took objection to the course that had been adopted in this connection, in that the proposal had come up for discussion before the Senate over the heads of the Oriental Faculty which was vitally interested in the final determination of this question. The matter was referred to the Oriental Faculty, with the result that 29 members of that Faculty voted against the proposal and only 4 in its favour. We shall see what will be the final result of the discussion of this question in the Senate. But, as against the instance given by my Hon'ble friend Mr. Setalvad, I have ventured to give this instance that has occurred in the Punjab, to show that so long as the control, not only of educational problems but of other problems as well, rests in the hands of strong men, whether those men belong to Provincial Governments or Imperial Governments, these little incidents must occasionally happen.

[22ND MARCH, 1916.] [*Khan Bahadur Mian Muhammad Shafi; Sir C. Sankaran Nair.*]

"It seems to me, Sir, that there is a great deal to be said in favour of the Resolution which has been moved by my friend Mr. Surendranath Banerjee. All that the Resolution asks for is a consideration of the advisability of the change advocated, and I hope that the consideration which is requested will result in what seems to me to be the only solution of the educational problem involved in the existing situation, and that is, the grant of at least one University to every province, whether it be a major province or a minor province, and possibly of a larger number of Universities than one to some of the provinces of India."

The Hon'ble Sir C. Sankaran Nair:—"Sir, if the educated men of Bengal desire that the higher education of the Bengalis should be in the hands of their own Government and of their own University, it would only be a natural wish on their part. They have the sympathy of the Government of India. The general observations which my friend made with reference to the desirability of such a transfer are of great weight. And if the Council had been asked now finally to decide the question, it might be necessary to examine them in some detail, but he has only asked that the Government of India should take the matter into consideration, not that the Council should finally decide upon the question of transfer. The Government are prepared to accede to this request. But while conceding so much, I should not be understood to accept the special reasons which have been put forward by some gentlemen for transfer of the control from the Government of India to the Government of Bengal. It was stated by one of the Hon'ble Members that, so far as the appointment of Fellows is concerned, it is eminently desirable that the Government of Bengal should be the final authority instead of the Government of India, as the Government of Bengal is more in touch with the men available for appointment as Fellows than the Governor General here is likely to be. That may be so, but my Hon'ble friend has also noticed the objection, that the Governor of Bengal may not be able to pay the same attention to the claims of Provinces outside Bengal like Bihar and Orissa and Burma. He would ordinarily be guided in his choice by the Vice-Chancellor, a local gentleman, and by the Director of Public Instruction who has control only over the Province of Bengal. It was further said by one of the Hon'ble Members, Dr. Banerjee I think, that so far as affiliation is concerned, they would like the Governor of Bengal to be the final authority and not the Government of India. In view of certain events that have taken place, I can quite understand the reason why that objection was put forward, but it is permissible to doubt whether, in the conditions that now exist in Bengal, it is not desirable that an outside authority should have the final say in the matter. These are the only two special reasons that have been put forward. The transfer of the control from the Government of India to the Government of Bengal has been opposed by certain speakers who are of opinion, for certain general reasons, that it is not advisable My friend the Hon'ble Mr. Setalvad opposes it also from the experience that he has gained of what he considers to be the undue interference of the Government of Bombay with the University of Bombay, while my Hon'ble friend Mr. Shafi's experience is the other way, and he would rather have the Local Government itself to control the University. It is not necessary now, for the reason that I have already stated, for the Council to come to any final conclusion, because we are not asked to make the transfer now.

"My friends from Assam are strongly against any transfer because they think that Assam literature and the interests of education in Assam would not be properly attended to by the University and Government of Bengal. That too is a matter which would require consideration when the final decision has to be made. But at present I do not think it necessary for the Council even to consider it because the Government of India have finally resolved to give effect to the objection that has been advanced by the representatives from Burma and from Bihar that no transfer should be effected, unless their claims are settled in the way they wish them to be settled, that is until the Universities of Rangoon

[*Sir C. Sankaran Nair; Mr. Surendra Nath Banerjee.*] [22ND MARCH, 1916.]

and Patna have been constituted, or until those schemes have approached completion. We think that, as those schemes are now under consideration and as those Universities are likely soon to come into being, it is not advisable that the transfer should be effected at present.

"My friend, the Hon'ble Mr. Surendra Nath Banerjee referred to certain instances such as the Central Provinces and Ceylon to justify his contention that it cannot be said that, because the Government of Bengal have no jurisdiction over the Provinces of Burma and Bihar, the University of Calcutta too should not be allowed jurisdiction there. So far as the Central Provinces are concerned, they apparently are not satisfied with their position, and they want a University for themselves. So far as Ceylon is concerned, they have come under the jurisdiction of Madras of their own accord, and they do not seem to wish to leave it. It will be time enough to consider their case when they want a University of their own. For these reasons, the Government of India consider that if the transfer of the University of Calcutta to the control of the Government of Bengal is to be carried out, it should not certainly be carried out till these two Universities have come into being, and when the question has to be taken up for final settlement, I have no doubt whatever that the arguments which have been urged by the representatives from Assam will be given their due weight. Subject to these reservations, the Government of India would accept my Hon'ble friend's Resolution."

The Hon'ble Mr. Surendra Nath Banerjee:—"Sir, I thank the Hon'ble Member in charge of the Department for accepting the Resolution. Bengal opinion would have been more pleased if he could have seen his way to accept the Resolution without the reservations to which he has referred. There has been an animated debate over this matter, but really, if we look to the bottom of the whole thing, there is perfect agreement and unanimity in regard to it.

"I do not think my Hon'ble friends, the official members—and I congratulate them on having broken their golden silence on this occasion—really object to our Governor being the Chancellor of our University. What they are apprehensive of, and what they object to, is that their University affairs would come under the direction of the Government of Bengal and would pass away from the control of the Viceroy of India. They do not object to our being autonomous in this matter, but they want to safeguard their own interests. I think they are quite right. I confess that if I were in their position, I would take precisely the same view. I have no quarrel with them, but I have a quarrel with the Government in regard to this matter. I desire to call the attention of my Hon'ble friend Sir Sankaran Nair, to section 28, clause 2. Of course he was an eminent Judge, an ex-Chief Justice, and my reading of the law must be subordinated to his interpretation of it. But this is, so far as I can make out, a matter of common sense. This is what section 28 clause 2, says—"

A Voice:—"What Act?'

The Hon'ble Mr. Surendra Nath Banerjee:—"It is the Universities Act of 1904.

"This is what section 28, clause 2, says—

'The Chancellor may delegate any power conferred upon him by the Act of Incorporation or this Act to the Rector.'

"Since, therefore, the Chancellor is at liberty to delegate any or all his powers, my submission is this. Let the Chancellor delegate his powers in respect of colleges within the territorial limits of Bengal to the Governor, and let him retain control over the other Provinces. I think that section justifies that. So far as Bengal is concerned, let the Chancellor delegate the powers that are vested in him—and the section gives him the authority—in respect of the affiliated institutions in Bengal—and they are 41 in

[22ND MARCH, 1916.] [*Mr. Surendra Nath Banerjee.*]

number, Sir, out of 48 —retaining his power in respect of the institutions outside the territorial jurisdiction of Bengal. That seems to me the obvious solution of the problem. These institutions, in the outlying areas of Burma, of Assam and of the new Province, will continue, as now, under the authority of the Governor General. There will be a change so far as we are concerned, and our Governor will be *de facto* Chancellor, though not in name. The Viceroy will continue to be the Chancellor in name, but by this delegation, the Governor of Bengal will become the *de facto* Chancellor for the affiliated institutions in Bengal. This, Sir, seems to me to be a solution of the question that will reconcile conflicting interests, and divergent views, conciliate Bengal opinions and the opinions which have been expressed in this Council Chamber to-day I think that is the solution, and I really do not know why the Government should not see its way to accept it. But, if, for reasons with which I am unacquainted, Government is not able to adopt it, then my submission is that it should expedite the creation of these different Universities. I am entirely in favour of the creation of a University in Assam. Why should not Assam have a University of its own and work out its educational destinies in its own way, according to its lights and according to its requirements? I do not at all share the cynicism—if I may be permitted to express myself in that way—of the Hon'ble Colonel Gurdon who asks 'What do the Calcutta lawyers know about the educational requirements of Assam?' The Calcutta lawyers are not the masters of the University 80 per cent. of the Fellows are officials or non-officials nominated by the Government. If I am excused for using strong language, I will say this, that they are the creatures of the Government And what have the Calcutta lawyers to do with the matter? Over and above the Calcutta lawyers there is the Government of Bengal and the Government of India. Assam has done wonderfully in the matter of educational development And let those who malign the Calcutta lawyers bear in mind that these lawyers have had a large hand in helping forward the educational development of Assam My Hon'ble friend Mr. Dadabhoy quoted the opinion of the Hon'ble Sir Ashutosh Mukerji That opinion is a matter of antiquarian history to-day. The opinion is as old as the year 1912. I am not permitted to disclose the secrets of conversations which I have had with Sir Ashutosh Mukerji, who is a high educational authority, but I imagine that the spirit of his dreams has undergone a change and that the opinions which were paraded before us in that ostentatious fashion, so peculiar to my Hon'ble friend over there are not admitted by him at the present moment. They may be relegated to a museum of things ancient and when the biographer of Sir Ashutosh Mukerji attempts to write his life he may refer to it and may draw the lesson that even the greatest amongst us are sometimes apt to be versatile

"I say, Sir, once again, with all the emphasis that I can command, that we in Bengal—and I represent the public sense and the public conscience of Bengal in this matter—do not in the smallest degree desire to stand in the way of the creation of the Universities in Assam, in Burma and in Bihar and Orissa. We shall welcome them with enthusiasm because we shall recognise them as the products, the children, the progeny of the Calcutta University. We shall have the satisfaction of knowing that we have helped forward the educational development of these Provinces. No jealousy, no malice, no feeling of antagonism will mar the beautiful prospect that will open out to them and to us We are anxious that they should have Universities of their own, but we are also anxious that justice should be done to us, and that the head of our Government should also be the Chancellor of our University. There is no mistake as to what official opinion in Bengal is. My Hon'ble friend to my right, Mr. Cumming, in that quiet, dignified but firm way which is characteristic of him, stated plainly what the views of the Government of Bengal are. And then there are the representatives of public opinion in Bengal. Official and non-official opinion is united in the demand which I have ventured to put forward to-day before this Council And that demand affects 41 of the colleges and schools of the Calcutta

[*Mr. Surendra Nath Banerjee.*] [22ND MARCH, 1916.]

University, as against seven in the other Provinces. We do not want to stand in their way: give them their Universities, but do not bar the way against us. Do not flout public opinion in Bengal by refusing to us the reform which we are entitled to have because we are a Presidency Government. My Hon'ble friend Mr. Setalvad, has asked: 'Why have you not brought forward cases to justify your motion?' My friend is a lawyer; I am not, but I understand the tricks of lawyers. And I will tell him this, that I did not want to prejudice this controversy or handicap it by creating irritation and bad feeling at the commencement. I had a bundle of cases in my pocket, and I could produce them just now, of mandates issued by the Government of India, being carried out in defiance of the wishes of the Senate. I do not want to refer to them because I deem it inexpedient to injure my case or handicap it by creating irritation. Therefore, my friend will pardon me if he thought there was a flaw in the arguments that I ventured to bring forward. I am grateful to my friend the Hon'ble Sir Sankaran Nair for accepting the Resolution, but I hope he will give effect to the section to which I have referred And if, for legal reasons with which I am unacquainted, he is not able to do so, I earnestly appeal to him to expedite the creation of those Universities which may enable us to place the Governor of our Province at the head of our University. That would be the first step towards freeing the University from that official control to which my Hon'ble friend Mr. Setalvad referred; and as popular opinion in Bengal is a growing power, we shall soon bring the Chancellor of our University under our own control."

The Resolution was put and agreed to.

The Council adjourned to Friday, the 24th March, 1916.

A. P. MUDDIMAN,
Secretary to the Government of India,
Legislative Department.

DELHI;

The 30th March, 1916.

while, when surpluses are found, on only a very few occasions decrease of taxation has been allowed. In 1909-10, the estimated surplus was £230,000, the actual surplus was £606,000; in 1910-11, the estimated surplus was £400,000 and the actual surplus was £4 millions. I am giving round figures. In 1911-12, the estimated surplus was £800,000, the actual surplus was £4 millions; in 1912-13, the estimated surplus was £1,500,000, the actual surplus was £3,100,000; in 1913-14, the surplus estimated was £1,400,000 and the actual surplus was £2,400,000; in 1914-15, which represented 8 months of war, the estimated surplus was £1,256,000 and the deficit was £2,785,000 That was because war supervened and converted the surplus into a deficit. In the current year, which is the year when Budget estimates were framed at a time when war was on, and in anticipation of the war lasting throughout the year, the deficit estimated was £2,900,000 and the actual deficit was £2,100,000, showing a difference to the good of over £800,000. If you take even the year in which the conditions of war were present, and estimates were framed in consideration of that contingency, the results are over £800,000 better than anticipated. Surely, Sir, if that is so, we may reasonably expect, now that the present Budget has been framed with even greater caution and in full view of the present circumstances of the war, that that caution will lead to better results than those provided for in the Budget. If they prove to be better only to the extent of £500,000, then there will be an equilibrium, and I beg to submit that there is no case for additional taxation, either income-tax or salt tax.

"Let us consider another aspect of the question. What has been the net result of the financial policy adopted by the Government of India during the last 11 years for which figures are available in the Statistical Abstract relating to British India published in England The figures given are from 1903-04."

The Hon'ble Mr. Brunyate:—"Page?"

The Hon'ble Sir Ibrahim Rahimtoola:—"'Page 47.' In the year 1903-04, the surplus is nearly £3 millions In the next year the surplus is £3,500,000; in 1905-06, £2,100,000; in 1906-07, £1,500,000, in the next year, £306,000; in 1908-09, in which, as I have already stated, there was a deficit of £3,737,000. In 1909-10, there was a surplus of £600,000; in 1910-11 of £4 millions; in the next year £4 millions again; in the following year £3,100,000, and in 1913-14, for which figures are available in this statement, it was £2,300,000.

"Sir, taking the total of all these figures during the last 11 years, the Government of India have taken from the tax-payers £20,000,000 in the form of taxation more than what was required for the purposes of the administration. Taking the total of these 11 years, the net result is, that you have taken from the tax-payers £24 millions surplus *minus* £4 millions deficit, leaving a net balance of £20 millions in excess of the revenue requirements of the Government of India. Where has this money gone? This money has been utilised for the purpose of capital expenditure.

"Sir, I understand that the policy which has been followed, and to which I have referred on previous occasions in this Council, has been that these surpluses should be lent to—I will not say used for—capital expenditure. I maintain that these surpluses of revenue were lent to capital and utilised as capital expenditure. I contended before, and if my contention had been allowed, we would have had a separate statement showing the total amount of money obtained from revenue in excess of our revenue requirements and lent to capital, and the sum drawn from capital to meet revenue deficits. There is nothing unreasonable in expecting that a portion of these loans should be repaid when necessary. Such a system would ensure a state of uniformity in taxation and thus avoid being obliged to increase or decrease taxation unless there were recurring surpluses or deficits.

"Sir, if this system had been adopted, and if the present had not been a time of war, I would have contended that the whole deficit should be obtained

[*Sir Ibrahim Rahimtoola.*] [7TH MARCH, 1916.]

as a refund from capital to which our surpluses to the extent of 20 millions have been devoted during the last 11 years. As it is war-time, I have supported Government in their proposals for additional taxation to the tune of £2,600,000, which fully covers the deficit which they estimate I submit, however, that in view of the fact that during the last 11 years we have lent as much as twenty million pounds out of our surpluses to capital, no further increased taxation should be levied. My case, therefore, Sir, becomes overwhelmingly strong when I stand up here and contend that no increased taxation should be allowed in the shape of income-tax and salt tax, but that Government should be content with the money they have obtained under the Tariff Act.

"Sir, there is one more point in connection with this which I should like to make. There was one year of deficit during the 11 years I have quoted. Immediately thereupon, the Government of India resorted to increased taxation. Extra taxation was levied, and it was proved afterwards that there had been no justification for that extra taxation. Our subsequent revenue and expenditure showed that Government could well have done without extra taxation. But even then, that taxation was not remitted but kept on. As I have already stated under ordinary circumstances, I would have contended that Government should obtain a refund from reproductive capital works to which we have lent at least twenty million pounds during the last 11 years out of our surplus revenues, and that no recourse to additional taxation should be made I beg to repeat that in view of these facts the case against increasing taxation to obtain a surplus is overwhelmingly strong.

"Then, Sir, I may be asked whether, even if the position I have taken up is accepted, it is possible to borrow the required sum of money. I recognise the difficulties that face Government in the matter of borrowing; but if the lucid statement which the Hon'ble the Finance Member has given us is carefully studied, we have reasonable grounds for believing that the appeal to the Indian money-market for the requirements of Government will be met. I say so because I think that the Hon'ble Member has very carefully decided upon a line of procedure which appears to me very wise. I am referring to his proposal of offering to convert an amount of $3\frac{1}{2}$ per cent. promissory loan notes equal to the amount of tender which an investor may make. I understand from this statement that terms will be offered which will be reasonably inviting; and if that is so, there are reasonable prospects of his succeeding in getting not only the minimum of four millions which he estimates, but also a substantial part, if not the whole, of another four millions which he wants.

"Now, Sir, I appeal to the Government of India—after all we Non-official Members can only plead and appeal—I appeal to the Government of India that, in view of the financial strength of the Government of India which I am going to refer to briefly later on, recourse to additional taxation for the purposes of what I will call a small deficit, if the salt tax is also disallowed, and obtaining a surplus should not be persisted in. In dealing with the financial strength of the Government of India, I will try to point out what are the alternatives which may be relied upon to meet the contingencies—the probable contingencies for which this additional taxation is proposed. Now, Sir, with due deference, I will venture to submit that the principle of levying additional taxation for the purpose of getting a surplus is wrong. Assuming that the actuals turn out as anticipated, both in regard to revenue and expenditure, and that at the end of the year there is a deficit, the Council will then be in a better position to know whether further additional taxation is necessary. If it proves necessary, I will willingly give my support to it. You will observe, Sir, that in submitting this point I am not raising any question as regards the amount of expenditure which Government have thought proper to provide for. At a time like this I do not wish to raise any question as regards the items of expenditure that have been provided for in the Budget. We want to support the Government, and not indulge in any adverse criticism in regard to the requirements which they regard, so far as expenditure is concerned, to be necessary. At the same time you will note that we reserve to ourselves the

[7TH MARCH, 1916.] [*Sir Ibrahim Rahimtoola.*]

power of criticism, and that is after all the only power we have of examining the adjustments which are taking place at present between Great Britain and India in the matter of military expenditure. At present we wish to give *carte blanche* to the Government of India to do what they may deem proper, but we should not be construed to have consented to waive our right to offer helpful criticism, when the appropriate opportunity arises, in examining the basis and the principles on which these adjustments may have taken place. Sir, referring to the financial position again and the strength of the Government of India, I will deal firstly with the closing balance. According to the Budget we have a closing balance of over 17 millions I understand from the Financial Statement that a balance of 16 millions is required for working expenses. The excess over the 16 millions is 1,400,000, sufficient to meet the decrease in taxation which I am advocating, 1 million for surplus and £500,000 for deficit It makes a difference of £100,000, but I do not wish to take up the time of the Council in dealing with that. When we consider in public bodies the question of Ways and Means we have in each public body a suitable amount of working balance, closing and opening balances as they are called in the Budget, but in reality they are working balances; and every public body, including Government, requires for the purposes of unforeseen contingencies and for liquidating the expenditure during the time revenue is coming in to have a suitable working balance Our surplus balance would be 16 millions if my proposal was accepted; and I venture to ask the Hon'ble Finance Member whether that is not a sufficient shield against unforeseen contingencies Surely, Sir, when you have a balance of 16 million pounds to fall back upon, when you have the probability of floating a rupee loan for 8 million pounds, against an estimated deficit of only £500,000, may I ask whether there is any reason to apprehend that, in spite of unforeseen contingencies against which a provision of a million pounds is now being made, the closing balance in itself is not sufficient to reassure Government of not having to face any financial embarrassment whatsoever. Let us examine in another way the strength of the finances. The financial condition of this country is also proved by another factor. We have our capital debt at about 280 millions, out of which only £12,800,000 is unproductive, and the rest of our debt is productive debt. We had in 1888 an unproductive debt of 73 millions. We have worked it off to 12 millions and odd, that is to say, in about 25 or 26 years, we have worked off our unproductive debt by nearly 60 million pounds. Surely that is also a source of great additional strength to the financial position of Government, not justifying, I venture to submit, the taxation of the people at times like these, when every one has suffered in one way or another for the purposes of providing a surplus. Then, Sir, there is the fourth safeguard, which would also protect in case of emergency. We have the Gold Standard Reserve. This reserve was started in the year 1904, and we have worked it up recently to 26 millions At a time of emergency the Government of India themselves withdrew 7 millions for the purposes of Government, and in the interests of the public I gratefully acknowledge that this was done in the best interests of the public, but that they have been able to withdraw as much as 7 millions out of the Gold Standard Reserve shows that it is possible, without embarrassment, to go to that extent of withdrawals from the same. Out of these 7 million pounds withdrawn, 3 million pounds have been repaid, and the present over-draft amounts to 4 million pounds. If we succeed in floating a loan of an additional 4 million pounds that money is ear-marked to be repaid to the Gold Standard Reserve. Even assuming that every item I have placed before the Council goes wrong and fails to fulfil expectations, even then you have a margin of 3 million pounds in the Gold Standard Reserve which you once withdrew and repaid to meet any unforeseen contingencies of the kind for which you propose to impose this additional taxation. Looking at all these points put together, am I wrong in appealing to the good sense of the Government of India not to impose upon the people additional taxation for obtaining a surplus and meeting a small deficit. Sir, I appeal again as I said against any further increased taxation. Not that I am against the principle of increasing income-tax or salt-tax, but that the

[*Sir Ibrahim Rahimtoola.*] [7TH MARCH, 1916.]

circumstances of the case warrant caution and care, and additional burdens on the people should be imposed only to the extent which is imperatively necessary. I beg to submit that no case can be made out for additional taxation for the purposes of a surplus as imperatively necessary. Unless such a case is made out, which I beg to submit has not yet been made out, there is no case for additional taxation in these two directions.

"Sir, I have shown that in making Budget estimates care is usually taken to work out by past experience the various sources of revenue and the various items of expenditure At the same time, when unforeseen contingencies have to be provided for, other factors are examined to ascertain whether they can be relied upon to meet them.

"Sir, I have tried to show that we have (1) in the Gold Standard Reserve, (2) in the insignificant amount of our unproductive debt, (3) in our surplus cash balances, and (4) in the cautious estimates of our revenue and expenditure, a sufficient margin for any unforeseen charges which may have to be met. I submit that there is clearly no case for additional taxation for such a purpose. There is one point to which I will briefly refer, and that is, the view that has been expressed that India is lightly taxed; that in view of the increased burdens which Great Britain is bearing, India ought also to bear additional burdens. As a wise financier, my Hon'ble Friend, Sir William Meyer, is utilising that sentiment, and he has seen that the Council has supported him in the Tariff Bill practically unanimously In this connection, it is necessary to examine what is the economic condition of England as compared with that of India, and what is the estimated income per head of population per annum in England as against that of India; what, again, is the proportion of taxation per head of population in England in relation to the total income as against the same conditions in India? If I were allowed, I would have gone exhaustively into this question. I will briefly state to the Council what is the result of working out the figures from the available statistics, and I will mention them for what they may be worth. The British population is 45 millions in 1913-14, the total revenue was 200 millions. This works out per head of population at £4-8 or Rs. 66. The income per unit of population in England is calculated at from £47 to £66; if we work it on the maximum of Rs. 1,000 per annum, it gives a percentage of taxation of 6⅗ per cent. Assuming that, in consequence of the war, it is recently increased by 25 per cent, it would work out to a little over 8 per cent. of their total income. In India, our revenue is 80 millions, excluding an estimate of 6 millions possibly drawn from Native States. This works out to Rs. 5 per head on 240 millions of the population of British India. Now, putting it in that way, it does appear that in England the people pay per head as much as Rs. 80 in the shape of taxation, whereas we, in India, pay only Rs. 5; there is a world of difference between Rs. 5 and Rs. 80. But let me put it in another way. We have an income estimated at Rs. 30 per head and Rs. 5 is one-sixth, or over 16 per cent, so that we, in India, are paying nearly double the rate of taxation in relation to our income than is paid by the people in Great Britain in spite of the war. Assuming that the national income in Great Britain is only the minimum estimate of £47 or Rs. 700 per annum, the rate of taxation works out at about 11 per cent. against India's over 16 per cent. Let me put the case in another way. Out of a minimum income of Rs. 700 per head, each individual pays on average Rs. 80 in the shape of taxation. This leaves a balance of Rs. 620 per head of population per annum for all other purposes. In India, out of the national income estimated at Rs. 30, Rs. 5 go towards meeting taxation, while only Rs. 25 per head of population per annum are left for all other purposes. It cannot for a moment be contended that India is lightly taxed. No comparison between taxation in England and India can be made, unless the relative economic condition of each country is taken into consideration. We are prepared to meet additional taxation to provide the revenue needed for the purpose of meeting such expenditure as the Government have themselves estimated. It appears to me that our attitude in regard to these matters ought to satisfy Government that we wish to co-operate with and meet them in this crisis to the utmost of our power, but

OFFICIAL PAPERS.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Rainfall Summary for the seven days ending at 8 hrs. on Thursday, the 30th March 1916, based on the Indian Daily Weather Reports of the period.

1. A slight disturbance gave light falls of rain and snow in Kashmir and the adjacent districts. In the plains duststorms and thunderstorms were reported on several days, but there was no rainfall of importance except in northeast India, Burma and the extreme south of the Peninsula.

2. *Burma.*—Local thundershowers occurred in the north and on the south coast.

Northeast India, including Orissa.—Rainfall occurred daily in Assam, and was nearly general from the 26th to the 28th. There was also some rain in east Bengal and at Chaibasa.

The United Provinces, Central India and the Central Provinces.—Weather was dry.

Northwest India.—Precipitation occurred in Kashmir on most days, being nearly general on the 28th. There were a few falls in the North-West Frontier Province and the Punjab.

The Peninsula.—Thundershowers occured at Cochin, Trivandrum and Kodaikanal on the 25th.

3. The chief amounts of precipitation were as follows :—

March 23rd. Jessore 1·25″.

„ 24th. Mergui 2·38″, Tavoy 1·41″ and Silchar 0·95″.

„ 25th. Kodaikanal 0·71″.

„ 26th. Tezpur 1·04″, Gauhati 1·50″, Silchar and Cherrapunji each 1·58″ and Peshawar 0·43″.

„ 27th Cherrapunji 1·56″, Sonamarg 0·72″ and Drosh 0·66″.

„ 28th. Tezpur 0·98″, Silchar 1·36″, Cherrapunji 5·56″, and Dras 0·65″.

„ 29th. Dibrugarh 1·78″, Silchar 0·94″ and Cherrapunji 2·74″.

4. The rainfall of the week occurred only in Kashmir, the North-West Frontier Province, the Punjab East and North, Chota Nagpur, Bengal, Assam, Burma and Malabar : it was in excess by more than 20 per cent in Assam and Lower Burma, normal in Chota Nagpur and Upper Burma, and in defect by more than 20 per cent in the remaining divisions. The absence of rainfall is a normal feature at this time of year in Sind, Rajputana, Gujarat, Central India, the United Provinces East, the Konkan, Mysore and the Madras Deccan.

The rainfall from the 3rd December to date remains 20 per cent or more in defect over nearly the whole country, the only exceptions being the Bay Islands, Burma, the Bombay Deccan and Central India West where it is 20 per cent or more in excess, and Assam where it is within 20 per cent of the normal. No rain usually falls during this period in the Konkan.

Division.	Rainfall data for week ending on 30th March 1916.			Rainfall data from 3rd December 1915 to 30th March 1916.				
	Actual rainfall in inches	Normal rainfall in inches.	Excess or defect in inches.	Actual rainfall to date in inches.	Normal rainfall in inches.	Excess or defect in inches.	Percentage departure from normal. This week.	Percentage departure from normal. Last week.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Season and Crop Prospects for the week ending Saturday, 25th March 1916.

Burma.—Tavoy reports 1·32 inches of rain. Cultivation of spring and summer rice and harvesting of island and miscellaneous crops are progressing normally. The condition of standing crops is satisfactory. Cattle are healthy. The price of unhusked rice at Rangoon has risen to Rs. 109 per hundred baskets and is above normal. The market for white rice is steady.

Assam.—The weather is hot and dry. Light rain has fallen in most districts but more rain is wanted in most for agricultural operations. Harvesting of mustard has been practically finished. Pressing of sugarcane and hoeing of land for tea still continue. Ploughing of land for and sowing of autumn rice and jute have been retarded in most districts for want of rain. Prospects of tea are fair. The price of common rice has risen somewhat. Cattle disease is reported from four and scarcity of fodder and water from two districts.

Bengal.—During the week light and scattered showers fell in a few places of the Province. More rain is very urgently wanted everywhere for facilitating the ploughing for and sowing of autumn crops. Summer rice and other standing spring crops and also the mango crops are badly in need of an early rainfall as their prospects are being seriously affected by continued drought. Sowing of jute and autumn paddy continues in the low lands of eastern Bengal. Harvesting of wheat and tobacco has commenced. Pressing of sugarcane is still proceeding in places. Cattle disease is reported from eleven districts. Scarcity of fodder continues in parts of the Noakhali and Bankura districts. Water scarcity is reported from Burdwan, Bankura and Murshidabad. The average price of common rice for the Province has risen by about 0·2 per cent as compared with that of the preceding week.

The weekly report on scarcity is as follows :—In the Bankura district distress is gradually increasing and people are freely resorting to works. Scarcity of fodder and water continues. Steps are being taken to advance agricultural loans for the purchase of fodder and wells are being sunk to mitigate the scarcity of water. Private charitable funds are giving assistance. The price of rice is 9¼ seers per rupee. The number of persons on relief works was 17,739 and on gratuitous relief 20,679; total 38,418. The number of persons relieved on private works was 6,250. In the Tippera district some rain in parts of the Brahmanbaria subdivision rendered agricultural operations possible and improved prospects of the standing *boro* paddy. Rain is wanted in badly affected areas in the north of the subdivision where distress is increasing and with it the number of people on works. *Namasudra* women are resorting to works. The public health is generally good. Loans continue to be distributed. The price of rice is 7¼ seers per rupee. The number of persons on relief works was 4,388 and on gratuitous relief 5,392; total 9,780.

Bihar and Orissa.—There was practically no rain during the week. Harvesting of spring crops is in progress. Pressing of sugarcane continues and planting for the next season's crop has commenced. Preparation of lands for autumn crops is going on. Standing crops are doing well. The average price of common rice has remained almost stationary as compared with that of the preceding week. The supply of fodder and water is sufficient except in parts of Hazaribagh where the water supply is reported to be poor. Cattle disease is reported from several districts. The attendance of persons on test works in Manbhum was 1,220 and in Singhbhum 2,291. Gratuitous relief was given to 736 persons in Manbhum. The condition of standing crops in the Feudatory States of Orissa is good.

United Provinces.--No rain fell during the week. It is still urgently needed in the hill districts where crops are suffering from drought Harvesting and threshing of spring crops, sowing and pressing of sugarcane, sowing of extra crops, irrigation of poppy and extraction of opium continue. Standing crops are generally doing well. Agricultural stock is in good condition and very little cattle disease is reported. Fodder and water are generally sufficient though the former still continues dear and scarce in a few western districts. Markets are well supplied. There has been further fall in prices during the week.

Punjab.—Except for slight showers in parts of some central and western districts the weather was generally dry. The condition of standing wheat and other crops on irrigated

areas is generally average and on unirrigated areas bad in the south-east and poor elsewhere. Reaping of spring crops has commenced in the south-east and in a few districts in other tracts. The yield is expected to be generally below normal on irrigated and bad on unirrigated areas. Sowings of extra spring crops and of sugarcane continue and are generally below normal to normal. Germination of extra spring crops is good. Cattle are generally healthy but are weak in some districts owing to general scarcity of fodder. Water for drinking and canal irrigation is generally sufficient. Prices are falling gradually. In the case of wheat they range between normal and warning rates and in other cases between warning and scarcity rates. Price of wheat:—Ambala 10¼, Rawalpindi 10¾, Ferozepore and Lahore 11¼ and Lyallpur 12 seers per rupee.

North-West Frontier Province.—Rain fell throughout the Province except in Dera Ismail Khan where it is badly required. The weather is temperate. Standing crops are average in Peshawar, Bannu and on irrigated areas of Dera Ismail Khan but poor on unirrigated areas of the last mentioned district. Slight hailstorm occurred in Peshawar and Bannu, damaging crops in some parts of the latter district. Harvesting of sugarcane is proceeding in the Bannu tahsil with outturn below average. Sowings of sugarcane in the Bannu tahsil and of sugarcane, tobacco, melons and vegetables in Peshawar continue. The condition of cattle is good except in unirrigated tracts of the Lakki tahsil of the Bannu district where it is bad. Fodder is sufficient except in unirrigated areas of the Lakki tahsil and dear in Dera Ismail Khan. The public health is good. Prices are high but are falling except in the case of barley and gram in Peshawar and of *bajra* in Bannu and Dera Ismail Khan which are stationary.

Jammu.—Slight rain fell during the week. Prices are fluctuating. Wheat sells from 8 to 10 and maize from 12 to 18 seers per rupee. The condition of standing crops is average. There is no cattle disease. Fodder is sufficient except in a few places.

Kashmir.—During the week no rain fell in Anantnag but good rain was received elsewhere. The condition of standing crops is fair. Cattle are generally healthy. Fodder is insufficient in Baramula. Water is inadequate. Prices of food staples are moderate.

Rajputana.—The weather is hot and clear. Harvesting of spring crops is progressing and the late sown crops on wet areas are in fair to good condition. Fodder is generally scarce. Cattle are generally losing condition owing to deficiency of fodder in affected areas Cattle disease is reported from Banswara and Kotah. The water supply is generally sufficient except in Marwar, Kotah and Tonk. Prices are falling in Marwar, Mewar, Shahpura, Dungarpur, Jaipur and Ajmer, rising in Kishengarh and stationary elsewhere. The number of persons on test works in Merwara was 2,912.

Central India.—No rain fell during the week. Rain has been insufficient in the northern districts of the Gwalior State, in portions of the Mehidpur and Rampura-Bhanpura districts of the Indore State and in the Beri State of the Bundelkhand Agency and sufficient elsewhere. Sugarcane is being sown in Gwalior. Harvesting of spring crops is in progress almost everywhere. Standing crops are generally in good condition except in dry tracts and in the Kachrod tahsil of the Gwalior State. The probable outturn is fair in Indore and in Baghelkhand except the Rewah, Nagod and Maihar States where it is good. The probable outturn is generally good elsewhere except in dry tracts of the Gwalior State where it is estimated to be between eight and twelve annas. Damage to crops by frost is reported from the Paldeo Jagir in the Baghelkhand Agency. Agricultural stock is generally in good condition except for cattle disease in the Rampura, Barwaha and Sendhwa parganas of the Indore State, the Unchehra tahsil in the Baghelkhand Agency and the Orchha State in the Bundelkhand Agency and in parts of Dhar and Jhabua of the Southern States. The fodder supply is generally good except in parts of the Ujjain, Mandasor, Shajapur, Tonwarghar and Sheopur districts of the Gwalior State where there is scarcity of both fodder and water. Prices are high in Baghelkhand, normal in Bhopal, slightly falling in Bundelkhand and Gwalior, slightly fluctuating in Indore and steady elsewhere.

Central Provinces.—The weather has been hot with occasional clouds but the nights and the mornings are still cool. Harvesting of spring crops is approaching completion and threshing is in progress. Preparation of land for the ensuing season continues. The supply of fodder and water is sufficient and cattle are in good condition. Wheat continues to fall in price and this week it is nearly a seer cheaper in most districts. Prices of other food grains also show a downward tendency.

Feudatory States:—Harvesting of spring crops has nearly been completed and threshing continues.

Bombay.—Standing crops are generally in good condition. Cotton picking continues in Gujarat, Bijapur, Dharwar, Baroda, Kolhapur, Kathiawar and Rewa Kantha. Harvesting of spring crops is generally progressing. The fodder supply is deficient in parts of Sind, Cutch,

Kathiawar and Baroda. Agricultural stock is sufficient. Cattle are in good condition except in Larkana, Thar and Parkar; Ahmedabad and Palanpur. Drinking water is generally adequate. Water for irrigation is deficient in Kaira, Ahmedabad, Broach, Dharwar, Kathiawar, Baroda and Kolhapur. Prices of food grains have fallen slightly in the Karnatak and the Deccan and are generally steady elsewhere. Gratuitous relief was given to 203 persons in Kathiawar.

Hyderabad.—No rain fell during the week. Spring crops are in fair to good condition and are being harvested. Late rice crops are in fair to good condition but they are suffering from the scarcity of water in parts of Karimnagar. They are being weeded. The health of cattle is good. Cattle disease prevails in six talukas. Prices of grains are almost constant. The highest price of *juar* in districts is 10 seers per rupee in Medak, Nalgonda and Warangal and the lowest 24 seers per rupee in Adilabad.

Mysore.—No rain fell during the week. Prices of food grains are steady. Markets are well supplied. Standing crops are in good condition. The outturn of the harvested sugarcane, paddy, *ragi,* wheat and cotton is fair to good. Ploughing operations are in progress in parts. Paddy and sugarcane are being sown in parts. Prospects of the season are good. Cattle are generally healthy. Water and fodder are available.

Coorg.—Prices of food grains are high. The public health is fair. Water and fodder for cattle are sufficient.

Madras.—The rainfall during the week was light in Cochin and *nil* elsewhere. Standing crops are in fair to good condition generally but are withering or have withered in parts of Chingleput, South Arcot, North Arcot, Tanjore, Ramnad and Tinnevelly and require rain in parts of Nellore. Harvesting of paddy, sugarcane and dry crops is proceeding with outturn fair to normal generally. Sowing of paddy, sugarcane and dry crops is proceeding or is nearing completion. The condition of cattle is generally good. The water supply is sufficient except in parts of Bellary, Anantapur and the Carnatic and the central and southern parts. Pasture is generally sufficient but it is scanty in Kurnool, Bellary and Malabar and in parts of eleven other districts. Fodder is generally available but it is scarce in parts of five districts. Prices are steady.

R. A. MANT,

Secretary to the Government of India.

No. 1260-C.—The Right Honourable Sir Frederic John Napier Thesiger, P.C., G.C.S.I., G.C.M.G., G.C.I.E., Baron Chelmsford, appointed by the King, Emperor of India, to be His Imperial Majesty's Viceroy and Governor General of India, arrived by Peninsular and Oriental steamship "Kaisar-i-Hind" at Bombay on the morning of this day, attended by his personal staff. Lord Chelmsford was received at the Apollo Bandar by His Excellency the Governor of Bombay, the Ordinary Members of the Council of the Governor General, His Excellency the Commander-in-Chief of His Majesty's Ships and Vessels, East Indies Station, the Chief Justice of Bombay, the Lord Bishop, the Ordinary Members of the Council of the Governor of Bombay, the Judges of the High Court, the Additional Members of the Council of the Governor General for making Laws and Regulations (resident in the Bombay Presidency), the Secretary to the Government of India, Home Department, the Secretary to the Government of India, Foreign and Political Department, the General Officer Commanding, 6th (Poona) Divisional Area, the Surgeon General with the Government of Bombay, the Commissioners of Revenue and Customs, the Additional Members of the Council of the Governor of Bombay for making Laws and Regulations, the Vice-Chancellor of the University of Bombay, the Archdeacon of Bombay, the General Officer Commanding Bombay Brigade, the Secretaries to the Government of Bombay, the Heads of Departments, Civil and Military, the Collector of Bombay, the President of the Municipal Corporation of the City of Bombay, the Municipal Commissioner of Bombay, the Officers Commanding His Majesty's Ships in harbour, the Officers Commanding Royal Indian Marine Ships in Port, the Officers Commanding Regiments, the Commissioner of Police, Bombay, and the Sheriff of Bombay, and by other high officials present in the Presidency Town. His Lordship then proceeded to Government House, Malabar Point.

2. On the afternoon of this day Lord Chelmsford, after bidding farewell to His Excellency Lord Hardinge, proceeded to the Secretariat where his Warrant from His Majesty the King, Emperor of India, was read by the Secretary to the Government of India in the Home Department in the Council Chamber in the presence of His Excellency the Governor of Bombay, the Ordinary Members of the Governor General's Council and the principal officials of the Bombay Government. His Excellency thereupon took his seat in Council.

3. A Royal Salute was fired from the Saluting Battery in honour of Lord Chelmsford on his assumption of the office of Viceroy and Governor Genral of India. His Excellency then drove to Government House, Malabar Point.

PART VI.

Proceedings of the Indian Legislative Council.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

PROCEEDINGS OF THE INDIAN LEGISLATIVE COUNCIL ASSEMBLED UNDER THE PROVISIONS OF THE GOVERNMENT OF INDIA ACT, 1915 (5 & 6 Geo. V, Ch. 61).

The Council met at the Council Chamber, Imperial Secretariat, Delhi, on Friday, the 24th March, 1916.

PRESENT:

His Excellency BARON HARDINGE OF PENSHURST, K.G., P.C., G.C.B., G.C.M.G., G.C.V.O., G.M.S.I., G.M.I.E., I.S.O., Viceroy and Governor General, *presiding*, and 61 Members, of whom 53 were Additional Members.

QUESTIONS AND ANSWERS.

The Hon'ble Sir Fazulbhoy Currimbhoy asked:—

Steps taken to secure trade monopolised by Germany and Austria-Hungary.

1. "(*a*) Is it a fact that trade in India in certain commodities has, until the outbreak of the present war, been monopolised by Germany and Austria-Hungary, and that such trade has now stopped in consequence of the war?

(*b*) If so, will Government be pleased to state what measures, if any, they have taken to secure such trade for India?"

The Hon'ble Sir William Clark replied:—

"The answer to the first part of the question is in the affirmative. If the Hon'ble Member will refer to the Memorandum and Statistical Tables relating to the trade of India with Germany and Austria-Hungary published by the

[*Sir William Clark; Sir Fazulbhoy Currimbhoy; Khan Bahadur Mir Asad Ali Khan.*] [24TH MARCH, 1916.]

Department of Statistics, he will find that the share of Germany and Austria-Hungary in the import trade of India before the war was in the case of :—

	Per cent.
Alizarine dyes	68
Aniline „	79
Synthetic Indigo	88
Glass bangles	93
Funnels, globes and glass parts for lamps	69
Enamelled ironware	89
Yarn and knitting wool	82
Woollen shawls	81

and there are numerous other commodities in which enemy countries did a considerable proportion of the trade. There are also several items in our export trade, notably raw hides, in which enemy countries had the lion's share.

Trade with these countries has ceased in consequence of the war.

With regard to the second part of the question, I would refer the Hon'ble Member to the remarks I made in this Council last year on the Hon'ble Raja Kushalpal Singh's Resolution with regard to the promotion of industries in which I explained the policy of Government. I would also refer the Hon'ble Member to my speech on Sir Ibrahim Rahimtoola's recent Resolution."

The Hon'ble Sir Fazulbhoy Currimbhoy asked :—

Development of the manufacturing industry in India.

2. " (*a*) Is it a fact that the Imperial Government have adopted a scheme for participation in, and financial support to, the manufacturing industry in the United Kingdom ?"

(*b*) If so, have the Government of India formulated any such scheme on the same lines for India ?

The Hon'ble Sir William Clark replied :—

" With the exception of the dyeing industry in regard to which I would refer the Hon'ble Member to my speech on the Hon'ble Raja Kushalpal Singh's Resolution last year, the Government of India know of no industry in which the Imperial Government have in any way participated or to which they have afforded financial support.

With regard to the second part of the question, I would refer the Hon'ble Member to the debate in this Council on the Hon'ble Sir Ibrahim Rahimtoola's Resolution regarding the promotion of industries."

The Hon'ble Khan Bahadur Mir Asad Ali Khan asked :—

Steps taken to stimulate indigenous trade and cottage industries.

3. " Will Government be pleased to state what practical steps (if any) have been taken since the outbreak of the war to stimulate indigenous trade and cottage industries in India ? "

The Hon'ble Sir William Clark replied :—

" I would refer the Hon'ble Member to the speeches made by the Hon'ble Mr. Carr and myself last year in reply to the Resolution of the Hon'ble Raja Kushalpal Singh, and also to my recent remarks on the Hon'ble Sir Ibrahim Rahimtoola's Resolution on the subject of the promotion of Indian trade and industries generally."

The Hon'ble Khan Bahadur Mir Asad Ali Khan asked :—

Liquor, country spirit and toddy.

4. " Will the Government be pleased to lay on the table a statement for the last ten years for each province, showing—

(*a*) the amount of liquor manufactured in each of the distilleries, breweries and other places of manufacture;

(*b*) the number of liquor shops, as well as the quantity of foreign liquor, country spirit, and toddy consumed;

(*c*) the names of districts importing the largest quantity of foreign liquor, as well as the quantity so imported ? "

[24TH MARCH, 1916.] [*Sir William Clark; Khan Bahadur Mir Asad Ali Khan.*]

The Hon'ble Sir William Clark replied :—

" Complete statistics in respect of part (*a*) of the question are not available. As regards part (*b*), the attention of the Hon'ble Member is invited to Volume II of the papers relating to the Excise Administration in India published in the Supplement to the Gazette of India of the 13th March 1915, which give figures in regard to (1) number of liquor shops, (2) consumption of country spirit in distillery areas, and (3) consumption of potable spirits manufactured in India and taxed at the tariff rate, for the 8 years ending 1912-13. Statements* are now laid on the table which furnish information regarding (1) and (2) for the 2 years 1913-14 and 1914-15, and also statistics of the consumption of toddy for the 10 years ending 1914-15 in Madras, Bombay, and Ajmer-Merwara, for which provinces alone figures in this respect are available. The statements also show the sales of foreign liquors in 1913-14 and 1914-15 (1) in each province, and (2) in those districts in which the sales were comparatively high. The figures for the earlier years are not available for all provinces. There is no information regarding the *import* of foreign liquors into the different districts of each province."

The Hon'ble Khan Bahadur Mir Asad Ali Khan asked :—

Fixed fee system.

5. " (*a*) Is it a fact that the introduction of the fixed fee system in Bombay has given successful results? If so, do Government propose to extend the system to the other provinces?

(*b*) Do Government propose to appoint Licensing Boards in other provincial capitals similar to those in Bengal? "

The Hon'ble Sir William Clark replied :—

" (*a*) The fixed fee system for the disposal of licenses for the retail vend of country spirit in the Bombay Presidency has been in operation for too short a period to enable the Government of India to make a definite pronouncement on its results. In their opinion, however, the experiment is valuable, and they have left it to other Local Governments and Administrations to take action on similar lines if they consider it warranted by local conditions.

(*b*) The Government of India do not consider that they would be justified at the present stage in requiring the extension to other provincial capitals of the experiment initiated by the Government of Bengal. They have, however, authorised other Local Governments and Administrations to take such steps in this direction as they may consider suited to local conditions."

The Hon'ble Khan Bahadur Mir Asad Ali Khan asked :—

Increase in consumption of intoxicating liquors.

6. " (*a*) Is it a fact that the consumption of intoxicating liquors is steadily increasing in India?

(*b*) If so, do Government propose to—

(*i*) restrict the import of foreign liquor into India;

(*ii*) reduce gradually the strength of country spirit throughout the country;

(*iii*) reduce year by year the amount of liquor manufactured in the distilleries and breweries in the country; and

(*iv*) remove altogether all liquor shops situated beyond municipal limits in all large towns? "

The Hon'ble Sir William Clark replied :—

" The answer to the first part of the question is in the negative. The second part of the question does not therefore arise."

* Not included in these Proceedings.

[*Khan Bahadur Mir Asad Ali Khan; Sir C. Sankaran Nair; Sir Gangadhar Chitnavis; Sir Reginald Craddock; Mr. Rama Rayaningar; Mr. C. H. A. Hill.*] [24TH MARCH, 1916.]

The Hon'ble Khan Bahadur Mir Asad Ali Khan asked:—

Return ticket system for

7. "Will Government be pleased to state briefly the present working of the return ticket system for Hajis, and lay on the table a statement for the last two years, showing—

(*a*) the total number of pilgrims to the Hedjas,
(*b*) the number of returned pilgrims,
(*c*) the number of return tickets purchased, and
(*d*) the number, as well as the amount of prices, of tickets refunded?"

The Hon'ble Sir C. Sankaran Nair replied:—

"During 1915 return tickets were obligatory for such pilgrims as travelled by Messrs. Turner Morrison's ships. The return tickets were available for 2 years, with a proviso that a refund would be made after 3 months from the date of the Haj in the year of issue to any pilgrim *boná fide* not returning by sea. Single tickets were also arranged for on these ships to *boná fide* non-Indian residents of Mecca and Medina whom the Commissioner of Police certified to be not likely to return

The statement * asked for by the Hon'ble Member is laid on the table."

The Hon'ble Sir Gangadhar Chitnavis asked:—

Indian Subordinate Medical Department.

8. "(*a*) Is it a fact that Military Assistant Surgeons are entitled to extra furlough for the purpose of study, both in India and out of India, with special allowances?

(*b*) Is it a fact that Civil Assistant Surgeons are not entitled to similar privileges?

(*c*) If the answers to (*a*) and (*b*) are in the affirmative, do the Government propose to state the reasons for this difference and to consider the advisability of granting to Civil Assistant Surgeons privileges similar to those of Military Assistant Surgeons as regards study leave and allowances?"

The Hon'ble Sir Reginald Craddock replied:—

"It is correct that Military Assistant Surgeons have concessions in the matter of study leave which are not open to Civil Assistant Surgeons generally. The matter will probably be gone into after the publication of the report of the Public Services Commission."

The Hon'ble Mr. Rama Rayaningar asked:—

Date of payment of instalments of land revenue.

9. "(*a*) Is it a fact that in some parts of the country the time for the payment of the instalments of land revenue due to Government happens to be before the saleable produce is ready for sale; and that the land-holders are therefore obliged to borrow money at a high rate of interest, or raise money by entering into forward agreements to undersell the produce, for the payment of Government dues?

(*b*) Do Government propose to consider the desirability of altering the dates for the payment of the instalments of land revenue in such a manner that the land-holders may not be put to the necessity of borrowing money or underselling their produce prematurely?"

The Hon'ble Mr. C. H. A. Hill replied:—

"In their Resolution No. 15, dated May 3rd, 1882, a copy† of which is placed on the table, the Government of India issued instructions that the annual assessment should be distributed under such arrangements as are most

---

* *Vide* Appendix A.
† *Vide* Appendix B.

[24TH MARCH, 1916.] [Mr. C. H. A. Hill; Mr. Surendra Nath Banerjee; Sir C. Sankaran Nair.]

convenient to the revenue and rent payers of the country with reference to the character and value of the crops which are cultivated in varying tracts of every district, and that the requirements not only of each district but of each village in it should receive full consideration. They have every reason to believe that the principles laid down in the Resolution have been carefully followed by Local Governments and Administrations who have full discretion in regard to fixing and altering dates of *kists*, but in view of the importance of the subject, the Government of India will again call the attention of Local Governments to it."

The Hon'ble Mr. Surendra Nath Banerjee asked :—

Primary Education.

10. "(*a*) Is it a fact that at a meeting of Council held on the 25th February, 1913, the Hon'ble Sir Harcourt Butler said in the course of a debate on primary education —

'I hope before very long—in the course of the next year or so—to be able to publish definite proposals from Local Governments for a course of expansion in primary education over the next three years'?

(*b*) Will the Government be pleased to state whether they have received any such proposals?

(*c*) If the answer to (*b*) is in the affirmative, will the Government be pleased to lay the proposals on the table?

(*d*) Will the Government be pleased to state what progress has been made in the spread of primary education in India since February 1913, and what facilities have been afforded since then for its spread."

The Hon'ble Sir C. Sankaran Nair replied :—

"(*a* and *b*) The answers are in the affirmative.

(*c*) I lay an abstract* of the proposals on the table, and, if the Hon'ble Member wishes to see the full correspondence, it will be shown to him.

(*d*) In 1913-14, 84 lakhs non-recurring and 20 lakhs recurring were allotted from Imperial revenues specifically for primary education. Other Imperial grants were made, portions of which would naturally be applied to this object, namely, 5 lakhs recurring for girls' education, and 3 lakhs recurrring for colleges and training of teachers. A further Imperial grant of 9 lakhs recurring was made in 1914-15, of which 8 lakhs was allotted to provinces without specific instructions as to the kind of education for which it should be used. The Hon'ble Member's attention is also invited to the reply given by the Hon'ble Sir Harcourt Butler to a question put on the 12th January 1915 by the Hon'ble Khan Bahadur Mir Asad Ali Khan. A comparison of the figures for the last three years is rendered difficult by the fact that the figures for certain Native States which had previously been included have been for the first time excluded in 1915. If the figures for Native States are similarly excluded for March 1913 and 1914, the totals of those receiving primary education in British India are approximately as follows :—

March 1913	6,037,000
March 1914	6,332,000
March 1915	6,557,938

These figures include those for unaided and private schools which impart elementary instruction as well as elementary pupils in secondary schools.

The figures for primary schools maintained or aided by Government or by District and Municipal Boards are as follows :—

	Schools.	Pupils.
March 1913	107,792	4,629,187
March 1914	111,920	4,882,635
March 1915	116,455	5,053,161"

* *Vide* Appendix C.

[*Mr. C. H. Setalvad; His Excellency the Commander-in-Chief; Raja Sir Muhammad Ali Muhammad Khan of Mahmudabad; Sir Reginald Craddock.*] [24TH MARCH, 1916.]

The Hon'ble Mr. C. H. Setalvad asked :—

Purchase of coal in Bombay without inviting tenders.

11. "(*a*) Has the attention of Government been drawn to the various allegations made in the issue of the 'Bombay Chronicle' of the 23rd December, 1915, under the heading 'Government and Economy. Astounding story of Coal Contracts'?

(*b*) If so, have Government made any inquiries regarding the said allegations? If so, will Government be pleased to state the result of those inquiries?

(*c*) Is it a fact that the Transport Department of the Indian Marine, in 1914 and 1915, purchased large quantities of coal from local dealers in Bombay, without inviting tenders?

(*d*) If so, what was the total quantity of coal so purchased and the rate per ton paid?

(*e*) Do Government still purchase coal and other materials without inviting tenders?

(*f*) Is it a fact that from September, 1914, to the end of January, 1915, one dealer in Bombay supplied 47,715 tons of coal or thereabouts?

(*g*) If so, what was the rate per ton paid to the said dealer?

(*h*) Is it a fact that certain owners of large collieries had offered to supply coal on more advantageous terms than the said dealer, and that their offer was refused?

(*i*) Is it a fact that the said dealer had agreed to pay by way of brokerage or commission R2-4-0 per ton to another person, and that he did actually pay R85,000 by way of such brokerage or commission?"

His Excellency the Commander-in-Chief replied :—

"(*a*) The answer is in the affirmative.

(*b*) The answer to the first part is in the affirmative. The result shows that coal was obtained at a reasonable rate, and of good quality, and that due precautions were taken to ensure that the right amounts were delivered.

(*c*) Yes this is a fact: it has frequently occurred that the urgent necessity of coaling an unexpected number of transports in the shortest time possible would have rendered it quite impossible to meet war requirements had tenders been called for.

(*d*) 253,673 tons at rates ranging from R17-8 to R22-8 per ton.

(*e*) Not unless some unforeseen demand does not admit of time taken up in calling for and receiving tenders

(*f and g*) From September 1914 to end of January 1915, one contractor supplied 44,209 tons of coal, 32,159 tons of which was supplied at R19 per ton and 12,050 tons at R20 per ton.

(*h*) The reply is in the negative.

(*i*) The Government have no information on the point."

The Hon'ble Raja Sir Muhammad Ali Muhammad Khan of Mahmudabad asked :—

Appointment of private medical practitioners to the Indian Medical Service.

12. "(*a*) Will the Government be pleased to state the number of private medical practitioners who have been appointed since the beginning of the war to posts ordinarily reserved for members of the Indian Medical Service?

(*b*) Is it the intention of the Government to retain and utilise their services after the war? If so, in what manner?"

The Hon'ble Sir Reginald Craddock replied :—

"(*a*) The number is 28.

(*b*) Each case will be considered on its merits and will be suitably dealt with at the end of the war."

[24TH MARCH, 1916.] [*Mr. Qumrul Huda; Sir Reginald Craddock; Maung Bah Too.*]

The Hon'ble Mr. Qu mrul Huda asked :—

Employment of private Medical practitioners on civil and military duties since the outbreak of war.

13. "(*a*) Have the Government employed private medical practitioners temporarily on civil and military duties since the outbreak of the present war?

(*b*) If so, will the Government be pleased to state the number of private practitioners so employed, and to lay on the table a list specifying the posts they hold and the duties attaching to them?

(*c*) Is it a fact that these practitioners volunteered their services at a sacrifice and that they will have to remain away from their place of private practice for some length of time?

(*d*) If the answer to (*c*) is in the affirmative, do the Government contemplate rewarding the voluntary self-sacrifice of these practitioners in any suitable manner? If so, in what manner?"

The Hon'ble Sir Reginald Craddock replied :—

"A list* of the private medical practitioners employed temporarily on civil and military duties since the outbreak of the war, together with the posts held by them, is laid on the table.

Government has no information as to the private circumstances of the gentlemen employed, but they have undertaken a voluntary engagement on definite terms, and there is no reason to suppose that the latter are inadequate."

BUDGET, 1916-17.

The Hon'ble Maung Bah Too :—"My Lord, it is with the greatest pleasure that I seek this opportunity of thanking our Finance Member for the great ability shown by him in the administration of the finances of India, inasmuch as he has been able to allot to each province of India (including Burma from where I hail) its reasonable share in spite of the deplorable state of affairs caused by the war. Every province, I venture to submit, has suffered in consequence of the war, and such sufferings have been productive of needs and requirements—the needs and requirements of my province are greater, owing to its being comparatively a young province. In spite of the great needs of money being apparent to my province, yet at the present crisis I dare not venture, under any circumstances, to appeal to you, my Lord, to see to the financial requirements of my province. Although my province has not sought for financial assistance. as we could not seek at present owing to the war, yet your Excellency's gracious message which was read the other day at the meeting of our Burma Legislative Council, fills us with hope that, when the finances of India are once more in a favourable condition, our claims for the additional funds needed for the development of the province will receive sympathetic treatment. Meanwhile, we are grateful for the revision of the Burma Provincial Settlement which has been referred to by the Hon'ble Finance Member in his Financial Statement which has removed the inequity under which Burma was suffering in regard to her income under the Provincial Settlement, as compared with other provinces.

"My Lord, on behalf of the people of Burma and the Burmese, permit us to thank you from the bottom of our hearts for having bestowed upon my province a ruler—a Lieutenant-Governor—who, besides being a very efficient and a sympathetic ruler, has, within a very short space of time, become immensely popular with the people under him, who with the greatest of zeal and energy, has taken the greatest personal interest in all matters for the welfare of Burma and its people, who at the very commencement of his administration has become thoroughly acquainted with the manners and customs of the people of Burma in their various walks of life, who has already studied the peoples of Burma and its requirements, who has conferred upon the Burmese people 'a blessing' by raising a Burman to the judgeship of the highest judicial tribunal of the

* *Vide* Appendix D.

[*Maung Bah Too; Maharaja Sir Manindra Chandra Nandi of Kasimbazar.*] [24TH MARCH, 1916.]

province (by bestowing upon the Burmese an honour of their having the first Burman judge on the Bench of the Chief Court of my province)—a selection made by our Lieutenant-Governor which I may be permitted to describe as 'the most exquisite selection from the flower of the Burmese Bar'—by the Burmese Bar, I mean from amongst the Burman legal luminaries—a Lieutenant-Governor, who is always in earnest to improve the province of Burma and the Burmese in all its possible details—a Lieutenant-Governor, who I and my Burmese people pray would be our ruler for at least a full term. We earnestly hope that he will always be with us as our benefactor, well-wisher, and a sympathetic ruler as he has already proved himself to be, and that he will not be taken away from Burma at any earlier period of time than his full term. We shall be sorry to lose such a beneficent ruler even if he were to be promoted to a higher sphere of official life. Permit me, my Lord, to thank you again on behalf of the people of Burma for having bestowed upon them a very zealous, energetic, efficient, and a sympathetic ruler in the person of Sir Harcourt Butler as the Lieutenant-Governor of Burma.

"My Lord, some five years back I had the honour of addressing this Council in connection with the paucity of Burmans in the Imperial Branch of the Telegraphs and Posts, and solicited that Burmans may be given a trial. I am glad to be able to announce to-day that my request has been granted, as I find to-day that there are a number of young educated Burmans holding the appointments of Superintendent of Post Offices, and there are a number of young Burman graduates working up their way in this service from the bottom of the ladder. I may say from personal knowledge that this service has become rather popular of late with the Burmese people, and I will not be wrong if I were to say that this Department in the near future will be crowded with educated and intelligent Burmans. The thanks of my province are due to the Director-General of Posts and Telegraphs, India, for having admitted young Burmans to this service, and to the Postmasters-General of Burma for the greatest interest they have taken in persuading, collecting and nominating young Burmans to the higher posts in this service.

"In conclusion, I desire, on behalf of the people of Burma, to express our heart-felt disappointment that it has been impossible for your Excellency to visit Burma and to give us an opportunity of welcoming you there. We are very grateful to your Excellency for your interest in the province and for the gracious and encouraging message which you have sent to our Burma Legislative Council. We hope that your Excellency's successor will find it possible to pay an early visit to Burma, and I would ask your Excellency to assure him, on behalf of the Burmese people, that, when he does come, he will receive a very hearty welcome."

The Hon'ble Maharaja Sir Manindra Chandra Nandi of Kasimbazar :—"My Lord, I shall be very brief in my remarks on the Financial Statement which the Council will be called upon to adopt to-day. The outstanding feature of the statement is the imposition of additional taxation made necessary by the terrible war which has been going on for a year and eight months, and of which the end is not yet in sight. Last year, the Government did not announce any increase of taxation, but we all felt that India could not long be exempt from sharing the burden which the war imposes on the Empire. At the same time, my Lord, I hope due note will be taken of the fact that India did not wait to be called to its duty by any Act of the Legislature or any other measure of the Government. Directly after the outbreak of the war, eager and spontaneous offers of help in every direction were made from every part of India, and the princes and the people vied with one another in placing all their resources at the disposal of the Government. Your Excellency took the initiative—an initiative for which India will never cease to be grateful—in offering Indian troops for active service in Europe and elsewhere, and the Government of India have throughout borne the charges of the Indian Army in the field. Several of the princes and noblemen of India have been serving their King and country in the field, while contribu-

[24TH MARCH, 1916.] [*Maharaja Sir Manindra Chandra Nandi of Kasimbazar; Raja Sir Muhammad Ali Muhammad Khan of Mahmudabad.*]

tions of money have come in from all quarters, In view of these admitted facts, I may be permitted to express the hope that the increase in taxation is only temporary, and will be done away with after the war.

"My Lord, the announcement made by your Excellency the other day in this Council that the Government have decided to prohibit the system of indentured labour has been received with sincere gratitude throughout the country. Indian public opinion, as your Excellency pointed out, has long taken exception to this form of labour, and it is due to your Excellency's endeavours that it will be abolished in the near future. I may be also permitted to refer to the Commission that has been appointed to inquire into, and report upon, the possibilities of the development of Indian industries, and for which the grateful thanks of the country are due to your Excellency.

"My Lord, my heart is heavy at the thought that this is the last meeting of the Council over which your Excellency will preside, and in a few days you will leave the shores of India. May I take this opportunity of thanking your Excellency for the unfailing courtesy we have always received at your hands in this Council and out of it. I will not attempt a review of your Excellency's administration, or of the measures that have endeared your name to the people of India, but I shall conclude with the hope that your Excellency will have a safe voyage home, and that you will continue to take an interest in the affairs of India and her people"

The Hon'ble Raja Sir Muhammad Ali Muhammad Khan of Mahmudabad:—"My Lord, in congratulating my friend the Hon'ble the Finance Member for his masterly presentation of the Budget for 1916-17, I assure him that the measures which he has found it necessary to propose, will, under the exceptional circumstances governing our lives and activities at the present juncture, receive full acquiescence in this Council and the country, though it would be the barest statement of fact to say that but for these special circumstances the circumstances, that is of the war and the resultant economic and political conditions—the country would have very audibly groaned under the heavy burden which it has been asked to bear. The struggle in which the Empire, and therefore India, a component part of it, is engaged, is infinitely greater than our *Mahabharat* The stupendous task requires stupendous exertions and sacrifices; and, my Lord, you have been the first to recognise that the people of India were not the people to brook the reproach that they were shirkers. Voluntarily and eagerly the prince and peasant of India have rallied round the British flag; the peasant, when he knew that the Padishah wanted his services, came forward to go wherever he might be required and fight as all the world now knows how he can fight; the prince came forward with an equal spontaneity and laid at the feet of his liege Lord, his personal services and the means at his disposal—contributions in men and money. We have very recently been told that India's contribution has so far been 6 millions; but the war demands further sacrifices, and for these, the people of India are fully and cheerfully prepared.

"But, though the huge sum that my friend the Hon'ble Finance Member's Budget finds it necessary to provide for the needs of this Dependency and the Empire at the present juncture may not have been calculated in a pessimistic frame of mind, so far as expenditure is concerned, surely a good deal of sanguine estimating has been at work, on the revenue side of the accounts. What I mean to say is, that the immediate demands on the Indian tax-payers, in my humble opinion, are considerably more than they need have been. The successful floatation by the Government of India of the War Loan of the last year warrants the belief that a very large portion of the amount required by the Hon'ble Finance Member for the adjustment of his Budget could be, and should have been, raised by the same expedient, namely, by another loan by Government. In the last resort, even this would have pressed on the Indian tax-payer, but this pressure would not be so immediate nor so insistent, and therefore less irksome than the method of wholesale

[*Raja Sir Muhammad Ali Muhammad Khan of Mahmudabad.*] [24TH MARCH, 1916.]

additional and immediate taxation. Increased taxation could not perhaps be altogether avoided under the circumstances which are at present operative; it is only the extent to which this weapon of raising revenue should have been used which is open to discussion or determination.

"One thing, my Lord, I will commend with all earnestness to your acceptance and that of the Council; and that is, that the increased taxation or at least a portion of it to which the country is being subjected, should have as short a lease of life as possible, and that this should now be explicitly stated. My Lord, as I have said, but for this war, to the successful prosecution of which every one of us is prepared to make any sacrifice that may be demanded, the country would have very audibly groaned under the proposed heavy burden; the burden is not less heavy because, in full appreciation of the needs of the Empire, the country is willing to shoulder it; it will, however, make the bearing of it more tolerable if the tax-payer knew that it would be taken off at the end of a period, not unduly prolonged. On this point, unfortunately, the statement of my friend the Hon'ble Finance Member is silent; I would therefore propose that it should be announced by your Excellency that the large increase in taxation which the Government of India have found it necessary to impose as an exceptional measure will be temporary in duration, and that it will have effect only for such brief period after the conclusion of the war as is absolutely necessary. Such an announcement will greatly assuage the concern of the people of this country, and it will be fitting that it should come from the lips of one from whom the millions of India have always expected, and invariably received messages of good-will, sympathy and help.

"My Lord, the question which the Hon'ble Finance Minister has anticipated in connection with the retention of that anomaly of anomalies, the Cotton Excise duties, without any enhancement of the import duties is still, I submit, exercising the minds of many of us, my Hon'ble friend's assurances notwithstanding. The anxiety of His Majesty's Government not to raise this question at the present time is not comprehensible, for this question has left that stage far behind when it could be described as contentious or controversial. And, surely, if Lancashire or Manchester cannot even now lift themselves out of the narrow groove of parochial interests, the evil forebodings of the pessimistic with regard to the futility of the hope of ultimate settlement of larger issues in a liberal spirit in favour of India will present themselves with greater force. The blood of the Indian Sepoy in the cause of the Empire has, one would hope, now flowed freely enough to have washed away such iniquities, as the question of the countervailing cotton duties, even if for the solution of the larger and more comprehensive issues, one had to wait 'till after the war.'

"My Lord, one expected that the Budget would reveal a real effort at saving, conserving and husbanding of the present revenue, before imposing further burdens on the tax-payer. Has that been sufficiently done? When British Ministers are impressing the need of national and individual economy in view of the demands of the war, and reduction in the salaries of public servants are the order of the day, certain branches of the public service in India are receiving compensation allowance for the block in their promotion owing to the war.

"My Lord, this does not seem right. At a time such as this, it is imperative that the most rigid economy should prevail in the public services. To effect this, all expenditure should be scrutinized and restricted as closely as possible, and an extended employment of Indians insisted on. I would go even further than this. Although I should never grudge a single pie spent on Education, yet if the choice lay between a considerable increase in taxation and the temporary curtailment of the grant to Education, I would, though with a heavy heart, vote for the latter. If the worst came to the worst, before taxing the people, I would take away from the Civilian and the Schoolmaster, so that the soldier may fight the better.

[24TH MARCH, 1916.] [*Raja Sir Muhammad Ali Muhammad Khan of Mahmudabad; Sir Gangadhar Chitnavis.*]

"The concern that the last Budget, to be presented under your Excellency's auspices, should be marked by the necessity of a large increase in taxation, is shared by all of us; but, my Lord, the beneficence and the real sympathy, which have been the transparent characteristic of every public action of your Excellency, have so captured the heart of India that these blemishes on the serene surface of your administration only remind us that they are not your creations, but of circumstances which an inscrutable Destiny has brought into being.

"I cannot conclude, my Lord, without a reference to the sad fact that this will be the last occasion when this Council will have the honour of being presided over by you. But the impress of your great personality will always remain on it, and I can assert that this Council will have a loftier sense of its duties and responsibilities by having been guided during six eventful years by you.

"I am, my Lord, one of the few Members who have had the good fortune of having sat on your Legislative Council during the whole period of your office. It has indeed been a period of pleasant, though strenuous, work. You have infused into the Council a spirit of liberal toleration and mutual understanding, and each one of us has personally felt that the head of the Government was not only anxious to know, but to appreciate, and, if possible, to sympathise with, our respective points of view. Outside this Council, the country has felt the same. To very few of your distinguished predecessors, the gift was vouchsafed of such deep understanding of the workings of the Indian heart, that responsive heart of this country of emotions and not of cold calculating reasonings, the tenderest chords of which you have touched. My Lord, whether it was the vindication of the right of the Indian in the self-governing Colonies, or his hope of greater confidence in him in times of crises, or his appeal to you where his religious principles or usages were, as he fancied, being interferred with, you have championed his cause in a spirit of true statesmanship. In a word, you have placed yourself at the head of Indian aspiration and not lagged behind.

"And in leaving India, at this time of supreme crisis in the affairs of the world, contented and more attached to the British connection than when you found it, you have effected a consummation of which only one man in this vast Empire was capable. That man was Baron Hardinge of Penshurst."

The Hon'ble Sir Gangadhar Chitnavis:—"My Lord, the Budget, as has been very rightly remarked by my friends the Hon'ble Maharaja of Kasimbazar and the Hon'ble Raja of Mahmudabad, has been well received in the country. The people have cheerfully responded to the call for sacrifices in view of the war; both the extraordinary expenses incurred and the extra taxation imposed have met with public approval, though, as we all hope, these extra burdens will be temporary only. The Hon'ble Sir William Meyer's clear exposition of the financial situation, for which he deserves all credit, has undoubtedly gone some way to popularise the Budget, but it should be frankly recognised that the welcome it has received has a far stronger basis in the loyal attitude of the whole community. Were it not for their genuine enthusiasm in the righteous cause of the Allies and their determination to help them to the utmost in the successful prosecution of the war, it would have been difficult to reconcile the people to the extra burdens at a time when most of them have suffered pecuniarily in a variety of ways. My Lord, in the absence of a periodical comparative statement regarding the economic condition of the people, it is difficult to substantiate the proposition by authorities, but it admits of little doubt that, though the resources of certain classes have increased, the resources of large numbers of men are still inadequate, compared to the cost of living which has reached a high level. In the interests of both Government and the people, therefore, one would like to have a periodical inquiry about the average income per head of population. On the results of such inquiry alone, a fairer conclusion about the incidence of taxation could be

[*Sir Gangadhar Chitnavis.*] [24TH MARCH, 1916.]

drawn. The absence of the suggested data places us at a disadvantage in the discussion of the oft-repeated question as to the share India has taken in the financial burdens of the war. While India's brilliant response to the call of the Empire is generously acknowledged by both the Imperial Government and the Colonies, there is noticeable in some quarters an unfortunate suspicion that our contribution has been negligible, not only absolutely, but relatively to our capacity. It is invidious to have to refer to our own action, but we would remind these critics that, financially at any rate, we have done for the Empire equal to the Colonies. For years we have maintained, at a huge annual cost, the splendid army which has rendered inestimable service in the present war at the various fronts. We have borne, and we still bear, the whole cost of the Indian army that is now on the field. The Hon'ble Sir William Meyer, I thankfully acknowledge, has, in paragraph 81 of his speech of the 1st March given a summary of the services rendered by India at this crisis, and has demonstrated by figures the heavy burdens undertaken by us. Add to this the various War Funds and Ambulance Funds and Motor Funds to which the people have subscribed liberally. When stock is taken of all this, it will be seen that the total of our contribution is not small. And from my knowledge of our condition, I beg to add that we have not spared ourselves Neither is there any desire among any of us to spare ourselves. I do not say all this in a boastful spirit, nor with a view to claim special credit for acts which have been done under a sense of duty. We are all fully cognisant of the incalculable advantage to India of forming a part of the British Empire The people have realised this at this great crisis more than ever before, and have felt what India owes for the security she enjoys even in these troublesome times, to the mighty protection offered by His Majesty's invincible Navy. If we at all refer to our services and our sacrifices, we do that only to meet a charge of indifference which seems to be unjust. It should also be borne in mind that many respectable Indians have volunteered their services at the front, and have been mentioned in despatches; among these we are glad and proud to find the names of two of our Members of this Council, one of whom Malik Umar Hayat Khan is present among us for the present, but who will shortly go back to the scene of his labours from where we all hope along with His Majesty's other soldiers he will come back with the laurels of victory.

"My Lord, the time has not come for putting forward our claims to political advancement, and we have no desire to press them now ; but since the commencement of hostilities, there have been numerous references to the question of India's position in the Empire on the restoration of peace It is permissible, therefore, to express the hope that that position would be one of honour and trust and sound economic strength, and that, in the event of the lessons of this war necessitating heavy military charges over and above the former standard, the apportionment of India's share will be made carefully, and equitably, in consultation with Indian representatives, on the principles laid down by the Welby Commission. The Hon'ble Sir William Meyer, in the course of his speech on the 1st instant, referred to the determination at the end of the war of India's fiscal relationship with the rest of the Empire. We all sincerely hope there will be a fair settlement with an eye to India's economic interests. We also hope that, as a corollary to the more dignified position India will then occupy in the Empire, she will be represented adequately and directly in the Councils of the Empire.

"But, my Lord, the time is unfortunately not yet when these questions can be profitably discussed. The war is still on, and for the time being the one point of vital interest is the condition of our finances. The Hon'ble Sir William Meyer has shown how sound it is. He has also, with judgment and forethought, endeavoured to improve the Indian market for Rupee Paper It seems clear for long years to come we shall have to depend upon that market for our periodical loans ; and it is right that we should do so. It is most illogical and inequitable that we should borrow money elsewhere for our productive works. Whatever amount can be raised within the country should be raised. But the present state of the market for the 3½ per cent. stock is discouraging. The Hon'ble Sir William Meyer's action for the support of the present stock is,

[24TH MARCH, 1916.] [*Sir Gangadhar Chitnavis; Mr. Stewart*]

therefore, right, and will meet with general approval The idea of conversion is good, but its success in practical working will depend upon the terms and other details. There is, however, one feature of the scheme outlined in the Hon'ble Sir William Meyer's speech, the full import of which should be realised by us. It is not its influence upon the market alone that recommends it Its moral effect upon the people far outweighs that It will encourage thrift among the general population The offer of conversion being open for three years, the holders of stock will do their utmost to save money to enable them to avail of it That is a real gain The Council and the rest of India have learned with the deepest interest notification of the intention of your Excellency's Government to appoint a commission to consider the possibilities of State aid to our industries We trust that, though it has been found necessary to exclude from the scope of the Commission's inquiries the question of fiscal protection to our industries, this important subject will receive full consideration at the proper time

"My Lord, if I may be permitted to allude to a local question of deep interest and importance, I should like to take this opportunity of expressing the hope that the claims of the Central Provinces and Berar to be elevated to the rank of a Lieutenant-Governorship may receive early consideration.

"My Lord the impending retirements are distressing to us The Hon'ble Sir William Clark, has by his ability and courtesy, made such a deep impression that we part with him with genuine regret We only wish success will attend him all through his after-life. Your Excellency's retirement has filled the whole country with sorrow. We all realise how, throughout your Viceroyalty during most troublous times, peace has been maintained, and you have always stood up for India's honour. We had fully expected your Excellency would continue to be at the head of the administration until the restoration of normal conditions. That hope we have now lost. But let us hope your Excellency will not fail to watch over our interests even in your retirement. May your Excellency enjoy your well earned rest for many a long year to come!"

The Hon'ble Mr. Stewart :—"My Lord, I have not spoken as yet on the Budget, because, when one has failed to make any impression on the Hon'ble Finance Member in Select Committee and elsewhere, it is really a waste of time to assail him further after he has donned his armour to meet all comers in open Council attacks, always provided that one's case is registered for record and future consideration—and still more because, though it is my duty to those whom I represent and to myself to state that case, I am most anxious not to appear in any way opposed to considered Government legislation in this time of war I do wish indeed that the Hon'ble Finance Member could simply have said to the Council—'These are abnormal and exceptional times, and I must therefore take exceptional measures to raise what I consider the requisite amount of money, and I look to the whole Council to support me.' For, in normal circumstances, I should strongly have opposed the idea of budgetting for any considerable surplus by means of increased taxation, especially looking to the very conservative basis on which the financial estimates are framed. But the circumstances are not normal, and I do not think that a surplus can be regarded as any certainty. I take only one fact, that the net military expenditure for the year now closing is nearly £1,900,000 in excess of the 20 millions pounds sterling which were budgetted for last March; and I remember that history has a habit of repeating itself

"One further general item to which I wish to refer is the railway allotment. I cannot, for the reasons given, disagree with its reduction to 3 millions sterling for the coming year, but I do hope that Government will state definitely that, as soon as possible, they will inaugurate a much more generous railway policy than has sometimes prevailed in the past I regard this as vital to the industrial and economic development of the country about which we heard something three days ago I should also like a statement that neither this necessary limitation of railway expenditure, nor their laudable desire to increase the output of munitions will be allowed, in any way, to interfere with the

[*Mr. Stewart.*] [24TH MARCH, 1916.]

due upkeep of railways and their rolling stock and with proper repairs. This would be very false economy, and I have to raise the point, as it has already aroused some attention.

"Then I turn to the export taxes. The strong opinion of the commercial community which I represent is that the desirability of these export taxes remains to be proved. We dislike them on principle, and we have doubts as to even their expediency, and we believe Government to share those doubts. Our position is, in short, that we consent cheerfully to their temporary imposition as a means by which Government, in the present difficult circumstances, will raise a very considerable amount of money, but we do expect them to be withdrawn as soon as possible. As regards the jute and gunny tax, I would mention that this, calculated roughly at 5 per cent. *ad valorem* on current high prices, is already heavy, and may prove a considerable handicap to two of India's staple industries when prices fall again as they inevitably will. I dismiss as lightly as did the Hon'ble the Finance Member, the airy and irresponsible suggestion that was made that this new and untried tax should be doubled *ab initio*.

"Turning to the new tea tax, I must develop the position a little more fully. The tea industry has admittedly been prosperous for two or three years past, but, as has been pointed out to the Hon'ble Member for Commerce and Industry, the large dividends paid by certain gardens which are privately owned and capitalised are apt to be somewhat misleading, and the prosperity of the industry, to a certain extent at least, has recently been fictitious, as it has been due largely to freight difficulties, to the trouble about getting teas home, and to consequent speculation there as to a possible shortage of supplies. And then the tax is bound, I think, to handicap Indian-grown teas to an appreciable extent in contrast with those exported from Java and China. Java is a particularly formidable rival, as will be seen from the fact that her annual exports of tea for the last six years have risen steadily, year by year, from 40 million pounds to 100 million pounds, and are increasing, especially rapidly, to Russia, our own best and most promising customer, and to Australia. The tea tax amounts to a farthing a pound, in addition to which, it must be remembered, that there is already an import duty at home of one shilling a pound. I must own that I could not quite follow the Hon'ble the Finance Member when he seemed to argue that this extra 49th farthing, as he put it, not to be paid by China or Java, should not prove an appreciable burden to the Indian industry, for I have by me a statement showing that 69 Indian Tea Companies with a capital of $2\frac{1}{4}$ crores of rupees in 1914, a good year for tea, made a profit on the cost of their production of 1·72 annas per pound. This would bring the tax out at about $14\frac{1}{2}$ per cent.; and it must be remembered too that the cost of production does not fall with a falling market, and that it will be increased, I think, to a rather considerable extent by the new import taxes on packing materials, etc. Therefore, I think, the tea industry are justified in claiming that this tax should be withdrawn as soon as it really is possible, and also that, if there is a surplus, part of it should be spent in the tea districts, where there is urgent need of money for improved communications and so forth. I think I am also in order in asking that the tax should not be levied on last season's teas, as I do not think that it was meant to have retrospective effect. Lastly, with regard to exports, I would say that a good deal of surprise has been occasioned by the omission to levy any export duty on cotton.

"Turning to the import duties, I have less to say, for I think most people recognised that these had to be raised, and I thank the Hon'ble the Finance Member for his clear statement that tariff values will continue to be fixed from year to year as at present. But some of these import taxes do seem likely to retard the industrial development of the country, and I trust that, in such instances, exemption will be granted on the merits of each case. I allude particularly to the case of branch and light railways, and to new industrial, electrical and chemical enterprises—I have an important group of such in my mind as I speak— and, I think, in the case of railways it is particularly clear, where Government fix the amount of capital which may be raised for them, fix the rates which they may charge, and guarantee a certain interest. I hope,

[24TH MARCH, 1916.] [*Mr. Stewart.*]

therefore, that they may be exempted from the increased tax, or that, at any rate, as Government has very rightly decided in the case of forward gunny and jute commitments and of teas sold up to the end of February, it will not be levied on contracts entered into prior to the 1st of March.

" With regard to the tax on jewels, pearls have been exempted from its operation at the instance of Bombay, and Calcutta, with whom Delhi will probably join, has asked that precious stones should be exempted also. With regard to dye-stuffs, it has caused some surprise, in view of the great demand for them, that these are subjected to such a heavy penalty as 7½ per cent.

" Then I come to the income-tax. An income-tax is generally regarded as a very fair one, and I entirely agree with the principle of graduation ; but, with all due deference to my Hon'ble friend Pandit Madan Mohan Malaviya, I would say that the Indian income-tax is eminently and widely unpopular for the reason given by the Hon'ble the Finance Member himself in his almost cynically frank explanation of its incidence. Does he really mean that only 332,000 people in India are liable to pay this tax, and still more, that only 13,000 individuals are liable to pay it on the highest scale? How does he propose to remedy matters? Does he mean to remodel the entire Income-tax Collection Department? The Hon'ble the Finance Member also pointed out the marked difference even now in amount between the English and the Indian income-tax, but he did not make any reference to the grave injustice by which many people have to pay both. Can he do anything to help here? Personally —I speak entirely for myself on this question—I would rather have seen the £900,000 which this increased income-tax is expected to bring in levied by means of a small war surcharge on railway passenger fares or on railway freight rates, excluding from the operation of the former a radius of, say, 20 miles round our principal centres of population. Or again, by a very rough computation of figures kindly furnished to me by the Hon'ble Mr. Harrison, I reckon that nearly half a million sterling could have been raised by a small war tax of, say, one anna on inland telegrams, and of 3 pies on letters. I deliberately excluded post-cards from my calculations—on these a tax of 3 pies again would have brought in nearly £500,000 more—because post-cards in India are the means of communication of the poor—and I am absolutely and whole-heartedly with all who desire to minimise their burdens.

" The Hon'ble the Finance Member has not yet developed his borrowing programme for the coming year, and I therefore confine myself to saying that his references to it in the Financial Statement caused perhaps a little uneasiness and a slight decline in Government paper. But I am sure that he will find plenty of money for his purposes in this country, if he is willing to pay for it. I am sure, too, that he will be guided by what is done at Home, and by consultation with representative financial bodies in India. And I would congratulate him heartily on the success of his policy to promote our currency circulation.

" I have now, my Lord, concluded the detailed remarks which I have thought it my duty to make with reference to the Budget. The Hon'ble Finance Member cannot of course consult us in advance, but it is not presumptuous to hope that our views will receive his consideration when budgetting time comes round again. I have, therefore, ventured to develop them at some length. Over the Budget, as a whole, I cannot rhapsodise ; I do not think I am expected to do so, but I do honestly think that, looking to the difficult circumstances, it is, on the whole, a fair one with the exception perhaps of the tea taxation, and such as has retrospective effect, and I take leave to congratulate the Hon'ble Finance Member on the skill with which he has explained, and where necessary, defended it. And, while it is true that the Hon'ble the Finance Member has appeared to argue that it is not a War Budget, with the idea presumably of avoiding having to promise that its imposts shall be removed after the war, he admits that this taxation is directly due to circumstances arising out of the war. I, therefore, do consider it a ' War Budget ' and, looking at it from that point of view, I should simply hate

[*Mr. Stewart; Raja Syed Abu Jafar of Pirpur.*] [24TH MARCH, 1916.]

it—and so I am certain would all whom I represent—if one word that I have said could be construed as opposed to measures necessary for the administration of the country during these times We in Bengal and Assam, with their great interests centering in Calcutta, are perfectly well aware what proportion of the new imposts we have to pay, and we note with appropriate feelings the Hon'ble Finance Member's recognition of the greatness of Calcutta. But, when one thinks of the drastic legislation which has been found necessary at Home, in Canada and in the Dominions generally, and far above and beyond this of the glorious fact that millions from India and all over the world are giving their lives and the lives of those nearest and dearest to them for the Empire, one realises that ours is no great burden, and we are proud and glad to bear it, such as it is If there is not very much that we can do ourselves, we who cannot go and fight, we can pay.

"My Lord, in this sequence I may conclude my remarks fittingly by saying, with your permission, that it must be a source of real and legitimate satisfaction to you that this, the last Budget of your Excellency's Administration, will fall so lightly on the really poor of this great land, to which you have devoted yourself so unsparingly and so courageously during the past five and a half eventful years."

The Hon'ble Raja Syed Abu Jafar of Pirpur :—" My Lord, it affords me genuine pleasure to welcome the Budget presented by the Hon'ble the Finance Member, and to express my gratification at the excellent and wise manner in which he has prepared it. Unfortunately, we are confronted with an extraordinary situation of a world-wide conflict which has affected the financial and economic position throughout the civilized world. We were agreeably surprised at finding the financial situation of our country last year so satisfactory as to enable the Hon'ble the Finance Member to avoid proposing any new taxation in his last Budget. But what could be avoided last year, has had to be faced this year, and we have noticed increased taxation in several directions. But, although fresh taxes have been imposed owing to the estimated deficit in the Budget, I cannot help admitting that these taxes have been carefully thought out. The increase in tariff rates levied on imported foreign goods will not only provide additional revenue to the Government, but will also help, in my opinion, to give a kind of protection to some of our indigenous industries. The only item of taxation, with which I am unable to reconcile myself, is the increased tax on salt, because it is a necessary ingredient of the food of the people. The burden of such a tax will be felt especially by the poorer classes, a fact which the Hon'ble the Finance Member has himself recognised in his Financial Statement. I earnestly hope that, as soon as the necessity for the taxes levied this year disappears, they will be abolished, and that the salt tax will be the first to go.

" We have heard, with great satisfaction, the news that the Government have appointed a representative Commission to survey the economic resources and industrial possibilities of India with a view to promote business enterprise after the war. I trust that the investigations and suggestions of this Commission will be extremely beneficial to our commerce and industry, and will open up fresh fields for industrial development. Coming from the United Provinces, I should like to draw the attention of the Government to the vast scope for industrial enterprise in those provinces. The large amount of agricultural produce which the United Provinces grow can, with great advantage, be turned into manufactured articles. It has to be regretfully admitted that my Province is still very backward in this matter as compared with other major provinces. From the steps taken by the Local Government in recent years, it appears that it is also alive to this drawback, and is anxious to make serious efforts in this direction. I hope that the Commission will pay its special attention to the resources and possibilities of industrial development of the United Provinces, and that guided by its suggestions, we shall be in a position to manufacture a large portion of the agricultural produce which we are exporting at present as raw material and a part of which comes back to us, as manufactured goods.

[24TH MARCH, 1916.] [*Raja Syed Abu Jafar of Pirpur; Rai Ghanasyam Barua Bahadur.*]

"The establishment of a technological institution has been a great want of the United Provinces, and I earnestly trust that, in view of the great awakening in industrial matters, Government will be pleased to take the question into their favourable consideration, and help to provide it in the immediate future.

"There is only one more point to which I should like to refer, and it is in connection with Sarda Canal project. The scheme is at present under the consideration of the Government, and, if carried out, will prove of great advantage and benefit to my Province. It will tend to the fertility and prosperity of a considerable part of it. I trust that this project will receive sympathetic consideration at the hands of the Government, and that it will soon be sanctioned to promote our agricultural interests.

"My Lord, before I conclude my remarks, I may be allowed to refer to the impending retirement of your Excellency from your exalted office in India. The people of India part with you with feelings of gratitude and sorrow. Your Excellency's beneficent and illustrious *regime* will remain as a glorious monument in the history of British rule in India The people of this country will gratefully remember the many and varied services which you have rendered to the cause of India, and earnestly trust that you will give the benefit of your great gifts in promoting the best interests of this country in England."

The Hon'ble Rai Ghanasyam Barua Bahadur:—"My Lord, a year of deficit budget is no happy time for a Finance Minister, and this unfortunately is such a year. The people were, however, prepared for it, and it was only the details that they were in anxious suspense to hear on the day the Financial Statement was introduced. The careful and painstaking way in which the Budget was prepared, and the judicious manner in which the new taxes were distributed, combined with the explanations that were lucidly given and the indications made as to how our discussions were to be guarded, should have left not much room for a lengthy or lively debate on it. We should, however, thank some of our Hon'ble colleagues in not letting the Budget go as dull a business as it appeared to be; and the Hon'ble Sir William Meyer has only to be pleased for the life that the debate gave to the otherwise dull affair. It may be doubted whether the debate was suited to the occasion, or should be expected to have had that educative effect on the people, which the voice that goes forth from this Council is expected to have; but as having given the Finance Minister an opportunity of further explaining himself, they served quite a good purpose. He should be gratified to find that the bulk of opinion was in his favour, and that many of us feel that, even if the Finance Member were an Indian, he could not have made out a better Budget without commiting a mistake. I doubt not that Sir William Meyer's feeling for India and her people is as real as himself, and we shall be only doing him justice by appreciating it. It would be too much to expect that the dreadful war will come to an end so soon as to afford sufficient years of peace to enable him before he lays down his office to relieve us of the taxation which it has necessitated; but I hope the Government will remember that the taxes imposed this year are emergency taxes, that the people treat them as such, and that as soon as possible after the war they will admit of reconsideration.

"I take this opportunity of speaking a few words about the tea tax, and some remarks that the Hon'ble the Finance Member has made about it. The single ground of the example of Ceylon having been followed should have sufficed for convincing the planters of their duty on the occasion, and the planters of Assam will, I have no doubt, loyally accept the burden put on their trade in view of the situation explained by him; but I venture to think that some of the other grounds set forth may well be treated as open to comment. It has been said that tea should be taxed, because the tea business has an industrial character, and has enjoyed exemption from income-tax for 30 years.

[*Rai Ghanasyam Barua Bahadur.*] [24TH MARCH, 1916.]

"I submit that tea is essentially an agricultural produce, as much as rice or wheat, with the only difference that it requires a good deal more of extra expense than those staples to make it marketable. It has not even the transformation which sugar-cane, which is treated as an agricultural produce, undergoes in producing coarse sugar. The exemption of tea from income-tax as an agricultural produce is, therefore, only its due, and ought not, in justice, to be made a ground for taxation. The tea business has paid more in land-revenue than it would have paid in income-tax on profits, and the tea planters will perhaps be prepared to make an exchange with Government for paying the income-tax in lieu of land-revenue.

"The temporary prosperity of the business should also hardly be taken into account to put a permanent tax on it. It had its days of severe trial from time to time, and perhaps such days are in store for it in future too. Even in these prosperous days, I do not think the average planter may aspire for much above 2 annas a pound for his net profit. The tax imposed is thus double the highest income-tax now proposed, and about five times the highest rates before. Here also an exchange of the taxes will be to their advantage. Tea is already taxed heavily at Home. And here, in addition to the land-revenue it directly contributes, it indirectly supplies a fruitful source of income-tax in the salaries and commissions paid to its employés. Over and above all these, the tea planter is creating a permanent and ever expanding source of income to Government in the shape of land-revenue from the emigrants settling down in the tea districts as permanent tenants of Government. I submit, therefore, that the tea business deserves very lenient treatment in the matter of taxation, and no excuse should be made of its lawful share in the exemption from income-tax to put an extra tax on it. It requires no protective duty here, as it must seek a market abroad. I hope the tax will be treated only as a war tax, and removed as soon as normal conditions return, or even earlier, should any reverse occur to the extra prosperity it is having for these two years.

"It is, my Lord, very sad indeed to reflect that this is the last day on which this Council has the proud privilege of being under your wise and sympathetic guidance. From the beginning to the end of the term of your exalted office, even the most cursory observer will notice an unceasing effort on your Excellency's part, not in the slightest degree weakened or abated by the most trying of human calamities, to uplift India and elevate her people intellectually, morally and politically. Your Excellency remarked in referring to your august predecessor in connection with the reformed councils that it was as brave a step as it was wise. I have little doubt from what I have seen during the small period I have had the privilege of being associated with this Council, that India will be able to prove that wisdom was the greater part of it. Equally brave and wise, if not more, will prove many a step your Excellency has taken to work out the future of India. By the territorial readjustments announced by His Gracious Majesty at the Coronation Durbar, your Excellency conceived a readjustment of the political forces of India in a way that is calculated to immensely improve the political tone of India, and conduce to her healthy political development. Your Excellency's Viceroyalty will form one of the most brilliant chapters in the history of India, and God willing, all posterity will have reason to gratefully remember this epoch-making period in India, and cheerfully taste of the fruits of the tree, the seed whereof has been truly sown by you Even in this dismal war, I see the hand of Providence aiding your Excellency's benevolent efforts by giving you a great and grand chance of serving India's cause. You have given, my Lord, a practical shape and form to the policy announced in the Royal Proclamations of our successive Sovereigns, and to the message of hope brought to us by our present gracious King-Emperor that his Indian subjects are to be treated equally with the rest of their fellow-subjects. I hope your Excellency's efforts will be rewarded by a loyal response in India both by the Europeans and Indians. I hope they will not only be inspired by the many personal examples of virtues of the highest order, which it will profit anybody to imitate, but will also remember the advices conveyed in your utterances, public and private, and by the general policy pursued, and consent on the one side, to

[24TH MARCH, 1916.] [*Rai Ghanasyam Barua Bahadur; Malik Umar Hyat Khan.*]

relax and gradually part with powers wielded, and on the other, learn to use the privileges, and prove their worth for more; to realise that the true interests both of England and of India lie in real, sincere and intelligent co-operation on both sides. My Lord, you have done for India all that you could in the time at your disposal and that to the very last From the day you set your foot on this fallen land to the eve of your departure, from the memorable incognito visit to students' messes in Calcutta, to the announcements on the questions of indentured labour and Indian industries the other day, your labours show an uninterrupted zeal and continuity.

"It is sad to reflect, my Lord, what sufferings and privations to your august self will be inevitably associated with your recollections of India. But India has seen, and the world has seen, that your soul soars much higher than adversities of this mortal world can reach. May God, the Eternal Father of all, shower his choicest rewards on you both here and hereafter. India cannot sufficiently repay your Excellency for all you have done for her. Her humble tribute is a tribute of deep love and gratitude to your Excellency, and a message of devoted loyalty and dutiful homage to her most gracious Sovereign. We shall remember your Lordship with gratitude, and we are confident your Excellency will always remember India and her cause, though bodily removed from her soil."

The Hon'ble Malik Umar Hyat Khan:—"My Lord, I have keenly followed this session's debates which have revived again in my mind the memories of Indian politics, and that is why I am going to touch on some points connected with the Budget. I have, on previous occasions this session, avoided entering into debate on the principle that complete unanimity and concord should at this juncture exist between the Government and the people of India. I think it would have been wise if some of the controversial questions brought forward by some of the Members had been avoided.

"Thus during the debates, I did not agree with the attitude adopted by some of them when they tried to prove that the Government of India were unmindful of their duty, that their neglect in providing sanitary arrangements and sufficient medical aid had resulted in the death of hundreds and thousands of poor people. Such impressions, when embodied in public speeches during the war, are undesirable especially when they are mostly misleading to the ignorant How would the masses feel if strict sanitary discipline was to be enforced; surely, they would consider it harsh treatment and would resent it. Take, for example, the troublesome time when it was sought to enforce plague inoculation on the people. Then as to medical aid, there are still places where the people resort to the old traditional custom of curing malaria by the device of putting up dummies in the shape of a blanket on a spinning wheel, or tying cord round a 'Jand' tree to cheat the fever to catch either the wheel, or the tree instead of the patient. Even now a large number of people go to local quacks, when the dispensary is also within their easy reach. Then, if people suffer for their own mistakes and ignorance, it is unjust to accuse Government of it.

"I think perhaps the cause of some controversies is due to the fact that the tenure of the Un-official Members of the Legislative Council is about to terminate. For that cause, I must express regret that it was not found possible to extend, till the end of the war, the term of the Non-official Members of the Viceroy's Council like that of the Members of the Parliament. Though this question does not affect me personally, for I am not going to stand for election, but I do think that some of my Hon'ble colleagues have had one eye on the electors when making their speeches.

"As to the Budget, I can safely say that the Government of India have imposed duties and taxes on the right articles when viewed from the Imperial point of view. If the Government had not taxed salt at such an abnormal time, I would have not only urged for taxation, but rather would have strongly criticised the omission. I think it is a mere show if one leads the poor to think that duty on salt touches their pockets, and that those who oppose the Govern-

[*Malik Umar Hyat Khan.*] [24TH MARCH, 1916.]

ment and urge its abolition, are championing their cause. The poor in India are relatively much better off and more affluent than those of another Empire, which I have recently seen. The latter have no funds at all to buy salt with, and there are countries where salt is not considered even a vital necessity of life. I am convinced that there could not have been a better Budget, and I must congratulate the Finance Minister thereon. I am amazed to see such a striking and rapid progress made by the Government of India towards meeting the peoples' wishes, and it would not be going too far to say that it has now proved itself to be the peoples' own Government and so practically a *Swaraj*.

"I may remind the Council that, ever since I became one of its Members, I have taken every possible opportunity prominently to put before it matters relating to the Army, and have always opposed those who have advocated a reduction in it. In and out of the Council, I have been urging the Government for the past six years to raise Yeomanry and Volunteers, and to build warships and aircrafts, etc., and have since submitted schemes dwelling upon the necessity of increasing the strength and efficiency of the Indian Army. I have also asked for increase of pensions and grant of lands to soldiers with or without service conditions, etc. Now, owing to the necessities of the present war most of what I have been asking has been provided for as a sheer necessity to meet the situation.

"But all this I had asked long before the hostilities broke out. I cannot say now anything publicly on the subject, because all that I have thought fit I have put before the authorities privately; and if any further suggestion occurs to me, it would go through the same channel as that seems to be the best way possible at present. There is one matter, however, which I want to put before my country, and not so much before the Government, and before doing so, I want every one to clearly understand that India has done her part marvellously well under the government of Lord Hardinge the Great, which has helped the Army in every possible way. It is not only his government which has done so well at the time of the present crisis, but the people too have nobly responded to the call of duty, and have not lagged behind in respect of money or coming forward as recruits. But things cannot rest here, and we ought to consider ahead for the future well-being of the country. And this is the point I now want to emphasise. It is common knowledge that experiences of the war have proved to the Supreme Government the vital necessity of introducing compulsory service in the United Kingdom. When we know that we are one of its component parts, we should not lag behind, but make progress along with the whole. And now that conscription has been decided upon, we Indians, if not adopting the same principle, should at least go to the extent of registration not in order to send all the able-bodied men to fight, but with a view to know what we possess in the way of resources in men. If registration may not be desirable in every province of India, it may be tried only among certain classes and in certain areas as a tentative measure, and then gradually extended. The resources of India in men are so great that, even if this system is not enforced, the requirements of the present war may be served, but it is for two reasons based on future precautions that I put this before the country; firstly, that only the best of men, who know their duty and come forward, may not bear all the brunt of this struggle while the shirkers enjoy immunity at their expense. Secondly, by putting this forward, I contemplate future eventualities and safeguards. The reason of putting this now before the Council is, that the people who realise their responsibility should enforce the advisability of registration on the Government, and I appeal to all the leading associations and committees and the press in India to pass resolutions, or make representations in order to move the Government in this direction. By this, I should not be misunderstood to mean that I at once want a big standing army for aggression or armed volunteers for defence; I want the people to rise to the need whenever wanted, and thus take a step in the right direction. When this is done, many other schemes, regarding various problems from local safeguards against robberies and dacoities up to the future defence of the Empire by the aid of overwhelming numbers—the greatest asset to the present-day-warfare—could be formulated, and thus the Empire could emerge out of

[24TH MARCH, 1916.] [*Malik Umar Hyat Khan.*]

the present struggle stronger and more united than ever to be able to face any unforeseen peril. Why I put this scheme now and want its adoption during the war, is that the people will be more anxious to do things in this direction, whereas when the war successfully ends and the enemy is beaten, they will get slack, and may then never hear a suggestion to this effect.

"Another cause, which has actuated me to take such a course, is the desire expressed in the press or on the platform, as also in this Council Chamber from leaders of various shades of opinions, of Hindu and Muhammadan communities, that India should be treated on a par with other self-governing Colonies. To ask is one thing and to achieve another. To reach this goal, hard exertion is of supreme necessity. It is an admitted fact that, as the matter stands, we are considered far more backward than the self-governing Colonies. Thus to attain the objective, it will not only be necessary for us to take an equal part with other Colonies in helping the Empire, but we would have to be easy first so as to make our case stronger in order to be able to put forward our claims on the Imperial Government when the time for so doing offers itself. I would have put before the Government the advisability of granting land to families on military tenure, and training the people on Militia basis during that portion of the year when they have least work to do But I feel that in this matter the people themselves should take the initiative and do the needful, as suggested above. Any Government action to induce people by financial attraction would entail heavy expenditure.

"While thanking the Government of India and the Punjab Government for granting land to soldiers, I may point out that the area decided to be given was allotted before the war broke out. I hope that during such a colossal conflict, the allotted area may be very much increased; if not, all the available land in the colonies be placed at the disposal of His Excellency the Commander-in-Chief The soldiers who have served the Empire deserve more consideration at the hands of Government than ordinary agriculturists who have no claims whatever unless they help the administration by producing recruits, or assisting in the suppression of crimes. I thank the Imperial Government, on behalf of Indian soldiors, for having increased their status and honour during the present historic Viceroyalty, as well as for the liberal treatment accorded to them in matters of pay and rations while on service during the period of war, and the great consideration shown to them and to their families by Government and public alike. I am confident that, when the time comes to reward their services, their claims will receive foremost consideration by the Government, because they are fighting for loyalty to the Crown, and are true to the salt of the rulers. The portion of the population which has done nothing but talk and ask for all sorts of things based on visions should not be allowed to benefit at their expense. After the soldiers have been satisfied, then if India is going to be raised to a higher status in the Empire for the glorious deeds not of her soldiers alone, but also for various other acts of loyalty by her civil population, every change for the better will be welcome.

"My Lord, there is one point to which I draw your Excellency's attention, and that is the rumours so mischievously set afloat throughout the country by a set of irresponsible people. I believe the Government is in full knowledge of it, but I beg to submit that the rumours are more numerous and far in excess than, I believe, is known to the Government. It requires not only drastic measures already adopted by the Government to check the evil, but also an organisation, based on a systematic propaganda, composed of efficient and loyal Indians who should be going about touring and lecturing or speaking in order to convince ignorant people

"And then a further addition to the existing Criminal Intelligence Department would be a wise policy. The Criminal Intelligence Department men should not only detect and bring the people to book, but they should also assist the said propaganda by speaking and arguing with the ignorant. The ill-treatment accorded by the enemy to those ill-fated portions of small kingdoms recently overrun by him, should be emphasised and communicated to illiterate people who have no means to learn facts except through ordinary bazar rumours. The papers to them are of no avail, and so, the only

course open is, that some intelligent men possessing sound information should go round and verbally speak to them on the subject.

"The terrible outrages and cruelties of our enemies should be verbally impressed upon the uneducated, as it is they who form the masses, to enable them to comprehend the sacredness of our cause.

"My Lord, as I have been representing the Punjab Muhammadans on this Council during the current term of my office, I will not be doing my duty if I do not put in a word for them. They have not only been loyal during such a critical juncture, but have voluntarily come forward to fight the battles of the Empire in such huge numbers as to be able to easily top the list of recruitment, even if we ignore Army Service Corps or Cooly Corps in which they have also enlisted. For their exceptional loyalty and zeal, exceptional treatment should be meted out to them, and I hope that their academic institutions at the seat of Government or elsewhere where they educate their sons, may be supplemented by grants from the Provincial, as well as from the Imperial, funds. I also hope that, when money has been collected from a poor and a backward class like the Muhammadan community for the purpose of founding the Muhammadan University, the Government will bestow special consideration and special concessions upon the Muhammadan minority, so that the latter should make progress and not only be more useful members of the Indian Empire, but be equal comrades of their advanced sister communities, and not be a clog in the wheel of their progress.

"In conclusion, I hope, I may be allowed to express my great regret at the decision already come to, namely,—that there should have been a change in the highest office of India at this time; but one has to submit to it as there is no other alternative. A specialist was wanted at a special time, and the greatest of the Viceroys was badly needed at this time of the most dreadful need in the biggest of the wars the world has ever seen. I do not see it through my own glasses, when I say that your Lordship has so captivated the hearts of Indians that it will take time before they can bear separation. Indians are grateful people, and they will ever pray for your Lordship's long life, and will follow your future career with the greatest keenness."

The Hon'ble Mr. Dadabhoy:—"My Lord, a deficit Budget with fresh taxation does not ordinarily elicit encomiums upon the Minister, but the present extraordinary situation and the skilful management of our finances to which the Budget before us bears testimony, have secured for the Hon'ble Sir William Meyer felicitations practically from all quarters. Notwithstanding heavy expenditure of an unexpected nature during the year nearing its end, the revised deficit is less than the Budget Estimate by a trifle over 128½ lakhs of rupees. Several unforeseen causes have undoubtedly contributed to the result, but the Hon'ble Finance Member's skilful handling of a difficult situation accounts for much of it. The only item of expenditure open to comment is perhaps the fairly heavy capital outlay on unproductive works. The question of extra taxation to make up a comparatively small deficit in the coming year has already been debated in this Council. The only point, which I should like to press upon the attention of Government in that connection, is that any surplus that may accrue should be applied towards the prevention of ignorance and disease. As Lord Curzon pointed out, the surplus revenue from taxation must, on principle, go back to the people. If reduction in taxation is found immediately impracticable, the best use to which the money could be put to would be to support education and sanitation. The Hon'ble Sir William Meyer has himself justified additional taxation by a reference to the claims, among others, of education and sanitation, and I doubt not the principle will be adhered to in practice.

"My Lord, the admonition and rebuke just administered to us by my gallant friend the Hon'ble Malik Umar Hyat Khan will not prevent me from doing my duty, and placing before your Excellency what I have to say on this occasion.

[24TH MARCH, 1916.] [*Mr. Dadabhoy.*]

"My Lord, the Hon'ble Finance Member's vaticination that—

'the experiences and lessons of the war must also add in some directions to our permanent military charges,'

has given rise to some apprehension which his reply to my question on the subject has not helped to dispel. A fuller statement would have been welcome. As it is, we can only hope that the imposition of these additional burdens will be in strict conformity with the principle enunciated in your Excellency's notable speech in Simla in September, 1914, that—

'we should accept such portion of the cost of the expeditionary force as would have fallen upon India, had our troops continued to be employed in this country under normal circumstances'

"My Lord, in speaking in this Council on the 7th instant, I pointed out how a productive and expanding source of revenue had been unnecessarily abandoned by this Government. I feel, and feel strongly, that our opium revenue has been wantonly sacrificed to sentiment. But whatever justification there may have been for the discontinuance of our opium trade with China, it is difficult to imagine any for the present policy of placing on the market the Indian product at an upset price very much below the average retail price in the consuming country The price per chest realised by this Government before January was Rs. 1,800, but the information to hand is that the retail price realised by the Hongkong Government worked to Rs. 32,000 per chest, which meant a clear profit to that Government of Rs. 30,000 per chest, or over 1,600 per cent. upon the cost price. I do not see why we should not share in this large profit. The upset price at auction sales can be easily fixed at Rs 3,000 per chest, which will bring us over a crore of rupees of additional revenue. The abandonment of this easily realisable revenue would require some explanation.

"My Lord, the revised as also the budgetted railway expenditure is perhaps the lowest in recent history. Adventitious circumstances have prevented the Budget provision being worked up to during the current year. But among the restraining causes by far the more important is the 'pressure from the Treasury at Home against undertaking new works' The connection of the Imperial Treasury with our railway expenditure is, however, not clear; but the enforced railway policy coincides with Indian public opinion. At the same time, I would request Government attention to the urgent need for a larger outlay upon improvements on open lines. We must be prepared beforehand for handling quickly and efficiently the enormous trade that is sure to follow the present spell of restricted movement. Efforts should be made to maintain in tip-top condition our railways as regards locomotives, rolling stock and permanent way.

"My Lord, the war, among other things, has produced a complete change in the Government loan policy. Even in the pre-war period, the Hon'ble Sir William Meyer adopted the bold and more equitable plan of raising in India bigger loans for capital outlay upon our railways and irrigation works. What was then an experiment must now form, from the necessities of the situation, the settled policy of Government. Henceforward, we must have more and more of the rupee loans, reducing to that extent our annual programme of sterling borrowings. This is certainly a sound policy, but every effort should be made to support the Indian market for the existing 3½ per cent. stock. With a view to have an opportunity of discussing the whole question, I gave notice of a Resolution on the subject in December last, but for reasons that appeared to me cogent, it was put off till after the presentation of the Financial Statement. In view, however, of the conversion scheme of Government, I decided to delay the discussion sometime longer. We should await developments, and watch the loan operations next autumn. Meanwhile, I shall satisfy myself with throwing out the suggestion that the conditions and the terms of conversion should be as liberal and attractive as possible, and, further, that the details should be settled in consultation, not only with bankers, but with reliable brokers and large dealers in Government Paper of the different centres.

"My Lord, it is somewhat regrettable that the educational policy of Government should be stereotyped, and the suggestions of a necessary departure do not

[*Mr. Dadabhoy; Mr. Birkett.*] [24TH MARCH, 1916.]

receive prompt consideration. I will deal only with one point by way of illustration. Admittedly, India is an agricultural country; admittedly, about three-quarters of the total population derive their sustenance from land. The supreme importance of agriculture to economic India is recognised in the maintenance of a combined portfolio of agriculture and revenue. But what about the spread of agricultural education? There is no attempt at a general spread of agricultural education. We have begun, perhaps, at the wrong end. The Institute at Pusa and the Provincial Colleges are excellent institutions in their way, but we require, more than anything else, an adequate number of special schools of an elementary and secondary nature. The better and more economical course would be to include agriculture as a subject of study in the general elementary schools and to convert a large percentage of the existing secondary schools into, what in Germany are called, 'real' schools in contradistinction to the gymnasia or the grammar schools, with agriculture occupying a position of some importance in the curriculun. When we have got in this country some such system of widespread agricultural education, the colleges will become far more useful. I hope the Hon'ble Mr. Claude Hill, whose association with the department has given public satisfaction, will take up the matter soon with his usual energy, tact and thoroughness.

"My Lord, the recrudescence of violent crime all over the country in spite of the most comprehensive repressive legislation, forces into prominence once more the question of Police reorganisation. Making every allowance for difficulties, it must be admitted that the force is wanting in efficiency and trained detective ability. The need for reform is very great indeed Government is certainly alive to this, and is making efforts to improve the Department. But, in my humble opinion, something more radical and comprehensive is necessary. The supervising and inspecting staff should be thoroughly reorganised, and the graduates of our Universities must be appointed in larger and larger numbers. And the staff must be trained in detective work under first-rate men from England This means a very much larger expense, but it should be incurred in the interests of good government.

"One other suggestion. Opinion in India is gravitating towards the ideal of her direct representation in the House of Commons by her trusted leaders. The European war will perhaps introduce important changes in the political relations of the outlying units of the Empire to the United Kingdom, and there is more than a possibility of the bonds of union between them being drawn closer. May we Indians not hope to be bound more firmly to England by this great concession also?

"My Lord, I share the general regret at the Hon'ble Sir William Clark's approaching departure from India, but we are buoyed up with the hope that, in the distinguished career that, for a certainty, awaits him in England, he will translate his sympathy for India into action with greater effect.

"My Lord, the termination of your Excellency's Viceroyalty is viewed by the people with poignant grief. I also associate myself with all the previous speakers on the subject. But may God spare you long, and give you strength and opportunity to employ your talent and power and authority in the great cause of Indian regeneration which has been uppermost in your mind through trial and tribulation during your illustrious Indian career!"

The Hon'ble Mr. Birkett:—"My Lord, I rise to congratulate the Finance Minister on his Budget, and to say a few words thereon. The approval which has been accorded to it by all communities throughout India must be a source of great satisfaction to the Hon'ble Sir William Meyer. For myself, I can only hope that the surplus he has budgetted for will be realised, as in these days of war when large payments may suddenly have to be made, it is most important that the balances of the Government of India should be maintained at a substantial figure.

"With regard to pearls, I think we are all sorry that the duty on these luxuries could not be maintained. As it is, I thank the Hon'ble Sir William Meyer for so promptly exempting them from duty, as otherwise a large and valuable trade would, I think, have been lost to India.

[24TH MARCH, 1916] [*Mr. Birkett.*]

"With regard to the new rupee loan, it should be possible, I think, to raise all the amount budgetted for, but until the terms of conversion and the rate of currency of the new loan are known, it is impossible to say what measure of support these proposals will obtain. I am confident, however, that our able Finance Minister will be able to satisfy investors, and that the loan will be a success If, however, the public are going to be placed in a position to take full advantage of the conversion scheme, the utmost consideration will have to be given to intending investors by the Banks, and to the Banks, by Government.

"The Hon'ble Finance Minister has allowed an allotment of only 3 millions to railways, which will be almost entirely spent on open lines Taking into consideration all present circumstances, this figure must be taken as a reasonable one, but particularly so as, owing to the difficulty of obtaining material from Home, more could not be spent, and, even if material could be obtained, the very high cost would prove a too prohibitive tax on permanent capital. In this connection, I would, however, like to say this It is of supreme importance that the trade in this country is carried on, not only the internal trade, but also the foreign trade, which at present is of such consequence to Great Britain and her Allies. We in Bombay are faced at present with a coal famine, and are finding great difficulty in getting down sufficient supplies, not only of coal, but of manganese ore, the latter of which is so badly needed at Home. One of the reasons for the difficulty is that the doubling of the Great Indian Peninsular Railway has only been completed to Badnera. The Badnera-Nagpur section still remains to be done. There is no doubt this very necessary work would greatly facilitate the carriage of coal and manganese to Bombay, the former of which is so urgently required, if the mills are to be kept going, and steamers are allowed to sail, and the latter is no less required, as I have said in England. I would, therefore, venture to suggest the advisability of completing the doubling of the existing line, even if the cost is high, and it is found necessary to turn out the necessary rails at the expense of munitions.

"With regard to the raising of the income-tax, I have not met any one who is not willing to shoulder the burden There is, however, a widespread belief that it falls on the shoulders of a very few, and that many, who should pay, escape. This, my Lord, is one of the main reasons of the unpopularity of this tax. I hope, therefore, the Government of India will readily sanction any increase in expenditure asked for by Provincial Governments to improve or extend the personnel required for the collection. It is only by these means that the tax can be more efficiently collected.

"I was very glad to hear from the speech of the Hon'ble Mr. Claude Hill that Government were conducting, despite the war, a special investigation in agricultural research, and that the research work at Pusa had resulted in the selection of a new variety of wheat known as Pusa No. 12, which promises to give better results than any of the local varieties, and that Government were trying not only to arrange that the farmer who went in for this variety secured a higher price, but that the buyers also got the benefit by having a special quotation for this variety secured in the Home markets It is only by means such as these that we can expect the *raiyat* to venture into new varieties of seeds.

"I congratulate the Finance Minister on his policy, since the war started, of arranging for the encashment of universal notes whenever and wherever possible. The result of this assurance of encashment is seen in the figures of note circulation supplied in the Financial Statement. I also congratulate the Finance Minister for amending the Paper Currency Act, whereby the large sums of gold the Government of India would otherwise be compelled to hold in London, can now be invested in Treasury Bills, an easily realisable and safe security, our Indian trade requirements thereby being adequately met without prejudice to the interests of the Empire.

"In conclusion, I desire to express, on behalf of the mercantile community that I have the honour to represent, our grateful thanks for the measures your Lordship has promoted throughout your tenure of office to bring the relations of Government into close touch with commercial interests. Bombay

[*Mr. Birkett; Sir Fazulbhoy Currimbhoy.*] [24TH MARCH, 1916.]

particularly, owes a great debt of gratitude to your Excellency, and you will see, when your Excellency comes to us on the 4th of next month, how all classes and communities of the City to which I have the honour to belong appreciate your great services."

The Hon'ble Sir Fazulbhoy Currimbhoy:—"My Lord, the most important point in the Budget has been discussed in Council in connection with the two Bills providing additional taxation, and I have already supported the financial arrangements of which that taxation is the principal feature. I may add that the present Budget has increased our confidence in the Hon'ble Sir William Meyer. It is not to be expected that it would satisfy all, but it ought to be, and it has been, welcome to Indians who, Government will be pleased to note, take a broad and sober view of the responsibilities and the difficulties of the present situation. We have trusted Government, and we are glad to find our trust has been justified. The people are with Government on this grave occasion; they are anxious the hands of Government should be strengthened. The Budget, accordingly, has been received by them with satisfaction. I would, however, submit for the consideration of Government, that the annual expenditure for fodder concessions under the special head of 'Famine Relief' might be considerably reduced, if not altogether avoided, by encouraging a proper system of fodder storage throughout areas which are affected periodically with famine. The difficulties of storage are not great, and there is hardly any reason why a scheme of ensilage should not work well. Silos are not unknown in India. The Department of Agriculture and Revenue might well take up the subject, and the Provincial Registrars of Co-operative Credit Societies might, with advantage, devote a part of their time to it. The economic gain to the country will be great, and Government would be able to employ the amount saved in consequence on other useful works of a permanent nature. The importance of the subject will appear from the fact that, in the current year, the actual expenditure for fodder concessions has come up to £40,000, or 6 lakhs of rupees, and the same standard is followed in the Budget provision for the ensuing year under this head; and all this at a period when famine is limited both as regards dimensions and intensity.

"My Lord, any remarks at this stage on the conversion scheme might embarrass Government, but Bombay financial opinion is that the rate at which the conversion of 3½ per cent. Government Promissory Notes into four per cents. is allowed, and the currency of the new loan must be so attractive as to create a brisk demand for Government paper. Since the announcement by the Hon'ble Finance Member, a weak feeling is noticeable in the market. In my humble opinion, an early decision followed by an early announcement about the terms and conditions of conversion and the budgetted loan is essentially necessary. I am glad the Hon'ble Sir William Meyer proposes to consult shortly the Secretaries of the Presidency Banks at Bombay.

"My Lord, a good deal of interest attaches to the reference in the Hon'ble Sir William Meyer's speech on the 1st instant to the determination of large fiscal issues relating to India at the close of the war. The matter is of paramount importance to the future of this country. A number of questions are outstanding for long years. For instance, the question of fiscal autonomy for India. The question of favoured-nation treatment for India in foreign countries is equally important. It is imperatively necessary for our best interests, therefore, that we should have in them, what is known as the most favoured-nation treatment. This point should be considered and determined after the war, along with the question of fiscal autonomy. We feel reassured the Secretary of State for India has promised consideration of fiscal issues after the war. The Government of India has been with us all along, and I have no doubt all outstanding fiscal questions will be satisfactorily settled in consultation with the representatives of that Government.

"My Lord, your Excellency has done a great act of justice to India by recommending to the Secretary of State for India the abolition of the indenture system of emigration. But there is another point. We still want

[24TH MARCH, 1916.] [*Sir Fazulbhoy Currimbhoy.*]

facilities for free emigration oversea. The whole of this important question will have to be settled with due regard to Indian interests after the war, in consultation and cordial co-operation with the Imperial Government and the Colonies It would perhaps satisfy all interests better if, while regulating Indian emigration to the self-governing Colonies on the basis of 'complete reciprocity', sufficiently large areas oversea with advantages of climate, soil, proximity and facilities of communication are reserved for our emigrants. And these large questions can only be satisfactorily discussed at a post-war Conference of representatives from all the units of the British Empire, inclusive of India.

"My Lord, the Hon'ble Sir William Meyer's observations about the excise duty upon Indian cotton goods have been welcome to the people. The Government of India have never approved of this duty, but it was reserved for your Excellency's Government to make a determined effort for its repeal. The public announcement of the action taken by Government in this matter is of itself an agreeable and significant departure in policy which we are not slow to appreciate. The incident gives us an insight into the great services your Excellency has rendered to India as her most devoted advocate, much of which must be hidden from the public eye.

"My Lord, we are indebted to your Excellency for the promptitude with which Government, in response to the public appeal, has exempted pearls from the new 7½ per cent. import duty. The industry has now been saved, and it is just that we should acknowledge also the Hon'ble Finance Minister's and the Hon'ble Sir William Clark's share in the exemption. Indeed, the Hon'ble Sir William Clark has, during his tenure of office, ever been ready to help in the industrial development of India. We in Bombay feel how closely he has been in touch with us, and how uniformly we have received encouragement and guidance at his hands. It is a matter of sincere regret to us that in a few days he will retire from an office which he has held with conspicuous success at an important period of Indian history. My Lord, our good wishes will follow him in his retirement, and we hope India will still share his sympathy and attention.

"My Lord, I beg to invite, with all the earnestness I can command, the attention of Government to the need for a thorough inquiry into the present extraordinary rate of mortality among infants in India. In reply to my recent question on the subject, Government disputed the correctness of the statement that the mortality was 48 per cent, but admitted that in 1913 it was 38·9 per cent. among infants under one year. If the percentage of mortality among infants between the ages of one year and five years is taken into account, the total of the infantile mortality would not be very much below the figure suggested by me. Even as it is, 38·9 per cent. is extraordinarily heavy in all conscience, and the position requires careful examination. We should not rest satisfied until the causes have been thoroughly investigated, and proper remedial measures adopted. May we expect that Government will undertake a sifting inquiry at an early date?

"My Lord, the great war is still on. It would have been well for us if peace had been concluded before your Excellency retired from this country. From the very commencement, your Excellency has striven to use the occasion as a lever to raise India to a dignified position in the British Empire, and your far-sighted policy has succeeded beyond the dreams of the most ardent enthusiast. The employment of Indian troops in the war has vindicated our honour before the world; has solved many a difficult political problem for us, and has produced such a wholesome change in the temper of the rest of the Empire towards India as provides the best augury for our future. It is your Excellency who has broken through the standing prejudice against Indian troops, and who, with the vision of genius, has caught the right moment to advance India's cause. Your Excellency's advocacy at the end of the war would have been a great gain to us.

"My Lord, the brilliant record of your Excellency's Viceroyalty and our deep appreciation of your great services to the country, would naturally make

[*Sir Fazulbhoy Currimbhoy; Maharaja Ranajit Sinha of Nashipur.*] [24TH MARCH, 1916.]

us desire that your Excellency should continue in office until at least the termination of hostilities But we are disappointed. Your Excellency's approaching retirement has filled us with profound sorrow. We only hope the noble policy initiated by your Excellency will continue to animate British Indian Administration, and will receive further development at the hands of your successors My Lord, we wish your Excellency most sincerely all happiness in your future life, and we hope your Excellency will never forget India."

The Hon'ble Maharaja Ranajit Sinha of Nashipur:—
"My Lord, this year's Budget may in one sense be called a 'War Budget,' not because we are making any very large contribution to His Majesty's Government for the successful termination of the war, but for the decrease in our income under certain heads of receipts, and the increase in expenditure under other heads. Notwithstanding the general retrenchment in all heads of expenditure, there has been an Imperial deficit which has to be met by taxation. My Lord, since the last two years there has been a deficit, and your Excellency's Government avoided to impose any fresh taxation as long as it was possible to do so; but when there was no other alternative, the Finance Minister was obliged to impose new imposts. The people of India have implicit confidence in your Excellency, and so the Budget, in spite of the new taxation, has generally been well received, and we congratulate the Finance Minister for the same.

"My Lord, as regards the new taxation, I must say that there has been a keen disappointment in some quarters, because no duty has been imposed upon cotton We understand from the speech of the Finance Minister that the Government of India recommended a material increase of the import duties on 'cotton,' but the Secretary of State thought that it was not desirable to raise a controversial matter on this occasion, and so we bow to his decision and hope that, when the entire fiscal policy of India is considered, it will be considered to her advantage.

"My Lord, in India, I think the indirect taxation is more suitable. I quite agree with my friend the Hon'ble Mr. Stewart that, if there would have been little increase in the railway freight, we might have, to a certain extent, avoided this taxation. I mean the income-tax. But, my Lord, the difficulty is that, with the approval and sanction of the Secretary of State, the tax has been imposed; and though we are privileged to move Resolutions, it is of no use as even if we could satisfy your Excellency's Government as to the alternate proposal, I am afraid the Finance Minister could not accept the Resolution without the consent of the Secretary of State. My Lord, as regards income-tax, I find that, in the case of 13,000 persons only, it has been more than doubled, and the majority of them are our European fellow-subjects, who either belong to some mercantile firms, or are high officials, and these classes of His Majesty's subjects are in more ways than one contributing to the success of the war. At the same time, we find that the salt tax falls upon the shoulders of the majority of Indian population, the greater number of which are poor. So, in fact from the highest to the lowest, and from the richest to the poorest, everyone has to bear the burden of the war.

"My Lord, I have noticed in some papers that there is jealousy in certain quarters that the lands have been exempted from this taxation. Perhaps my friends do not know that the land has already been assessed in some places in the form of roads and public works cesses, and in others in the form of land-cess. And we can assure your Excellency's Government that, if such an emergency arises, the landholders will not lack behind in contributing their quota to uphold the prestige and honour of the Empire and for the triumph of the British arms. My Lord, I am disappointed to find that there is no assurance in the speech of the Hon'ble the Finance Minister that this taxation will last only till the war lasts or sometime after it. In the latter portion of his speech, one is led to think that it will last till the war; but if

[24TH MARCH, 1916.] [*Maharaja Ranajit Sinha of Nashipur.*]

one reads another passage in his speech—paragraph 32—one is constrained to think otherwise. There is a general impression in our country that, if a tax is once imposed, it is going to last for ever; and I hope the Hon'ble the Finance Minister will allay this impression by giving an assurance in the matter.

"Then, my Lord, with regard to military expenditure, in some quarters an attack is levelled against the Finance Member that India's proper share of contribution is not budgetted towards the expenses of the war. Undoubtedly, we are not contributing directly anything to His Majesty's Government, but we find from the Budget that India is meeting all the normal expenses of the troops who are fighting side by side with the troops of the Allies and Colonies, and that India is preparing the munitions and helping the cause of the war in some other ways also. But I think that if it is necessary, India, which forms an integral part of the British Empire, should not hesitate to contribute her mite towards the expenses of the war, however insignificant and small it may be. Though we know full well that, where millions and millions are daily spent, India's contribution, whatever it may be, will be a drop in the ocean.

"My Lord, I find also that there has been an increase of expenditure under the head 'Military.' I would not grudge this at this time of crisis, because it is essentially necessary to increase the efficiency of our Army, to strengthen our naval force and to spend more money generally for the proper defences of the Empire. But I hope that, when normal conditions return, the expenditure under this head will be cut down.

"Then, my Lord, as regards sanitation, I think it is not prudent on my part to ask the Government to set aside any large sum for this purpose at a time when there is retrenchment in every direction owing to war, and so we are specially thankful to your Excellency's Government for the provision made in the improvement of the sanitation of the pilgrimage route to Badrinath and Kedarnath.

"My Lord, I have one suggestion to make that sanitation is the more important subject, and there a good deal of interest is taken by the people at large in it. So, instead of putting it under the head 'Medical', I suggest to the Hon'ble Finance Member to put it under a separate head altogether, so that the people may, at one glance, find out what amount has been provided, and what is being spent for this important purpose.

"Now, as regards education, my Lord, during your Excellency's Viceroyalty education has expanded by leaps and bounds; and, though it may not have reached its goal, no one could deny that since the last five years the expenditure for education has enormously increased. But, my Lord, I regret to find that female education has not made as material progress notwithstanding the earnestness of Government in this matter. The reason is obvious. Owing to the *purdah* custom and early marriage of girls in some provinces the girls are taken away from the schools at a very early age. I would suggest, therefore, to your Excellency's Government that the *zenana* system of education should be encouraged, and unless that system is placed on a sound footing, female education cannot make a rapid advance as one could expect.

"My Lord, then as regards police, we find that for the last five years there is a gradual increase under this head. The Government of India in 1903 appointed a Commission under Sir Andrew Fraser to inquire into, and report on, the matter. The recommendations were received and acted upon; but it is a fact that there has been no material improvement in that direction. The people look on the police with suspicion, and have no confidence in them; at the same time, the police do not get help from the people. I do not say that either the police or the people are in fault; but I think it is desirable that there should be a co-operation and help between the police and the public. This is the most important matter, and I should like to invite the attention of Government in this respect, and I hope that, when the normal time comes, Government will give its careful consideration to the matter.

"My Lord, I cannot conclude without expressing my deep regret for the approaching retirement of your Excellency. This is the last occasion when we

[*Maharaja Ranajit Sinha of Nashipur; Khan Bahadur Mir Asad Ali Khan.*] [24TH MARCH, 1916.]

would see your Excellency adorning the presidential chair in this Council. My Lord, by your sympathetic and statesmanlike policy, you have endeared yourself to the people of the country, and your name has been enshrined in the heart and hearts of the people. Your Excellency has captured the loyalty of India, and by various acts have placed the whole country under a deep debt of gratitude. I do not think it is necessary for me to dwell at any great length on the various boons you have conferred upon the people of India during your Viceroyalty. In one word, my Lord, I can say that in you, India will lose her great friend and benefactor. But we are confident that in whatever position your Excellency may be placed, India will always find a place in your heart. May the Providence grant unto your Excellency long life, health and strength to continue to be useful to the Empire and to the country which you are so fond of! I take this opportunity, my Lord, to offer my most respectful and humble congratulations to your Excellency for your services being appreciated by His Majesty, the King-Emperor, by appointing you to a Knight of the Garter."

The Hon'ble Khan Bahadur Mir Asad Ali Khan :—" My Lord, if ever a Financial Statement called for little criticism, it is the one presented to the Council by the Hon'ble Sir William Meyer, one of our ablest financiers. The presentation, under exceptional circumstances, of a Budget so satisfactory, could not have been done without considerable labour, circumspection, and forethought. I join, therefore, my Hon'ble colleagues in heartily congratulating the Hon'ble Finance Member upon his statesmanly and successful Budget When the fluctuations of opium revenue filled us with apprehensions during the closing period of the last Finance Member, it was suggested that our import tariff should be revised with a view to enhancement of customs duties. I am glad to find that, in this year of difficulties created by war conditions, he has seen fit to tap this source of revenue without finding it necessary to impose any burdensome taxation upon the people. Not only does he provide thereby, and by an increase under income-tax, for making up an estimated Imperial deficit of £2·6 millions, but by an increase under income-tax and an enhancement of the duty on salt, one of the bare necessaries of life, he has created a surplus of over £1 million against what he calls possible contingencies. While I do not take exception to the provision of a surplus, I venture to think that the same might have been done in any other way than raising salt duty by twenty-five per cent While the raising of salt duty may not really affect the poorer classes as the increase would amount to 3 pies per lb, I hold, as a matter of principle, that little or no taxation should be imposed upon the bare necessaries of life, such as salt However, I am willing to allow that Indian peoples, at this crisis, will gladly bear all such taxation.

" In view of the probable continuation of the war for yet another year, and its after-effects, it is highly desirable to maintain the soundness of our financial position by adopting a policy of strict economy in the administration of the country, and providing even against the failures of our whimsical monsoons. It cannot, perhaps, be denied that our public expenditure, both civil and military, has even in peaceful times, gone on increasing yearly in a greater proportion than that of our public revenue. While there may be justification at present for an increase in public expenditure, there could be no justification for such increase during normal times. For instance, expenditure under 'Salaries and other Expenses of Civil Departments,' has increased by about 14 crores of rupees within the last fifteen years. 'Miscellaneous charges,' too, have increased by about 1½ crores during the same period There has altogether been a total increase of expenditure by about 15½ crores. If ever there is urgent need for strict economy in public expenditure, the present is an opportune moment. That there has been a little economy here and there I do not deny. But that is not the kind of economy one would expect to see. What is really wanted is retrenchment in the administrative machinery Going through the statement of expenditure charged to the revenues of India, I find that there has been, except in a few cases, a tendency favouring increase of expenditure, notwithstanding instructions towards

[24TH MARCH, 1916.]   [*Khan Bahadur Mir Asad Ali Khan*]

practising economy. Especially is this the case under 'Salaries and Expenses of Civil Departments,' and 'Miscellaneous Charges' Several items under these heads badly need pruning.

"For instance, police expenditure budgetted for 1916-17 shows a large increase of about 18 lakhs of rupees, as compared with Revised Estimate for 1915-16, while educational expenditure shows an increase of about 13½ lakhs, and medical expenditure unfortunately shows a decrease of about 5½ lakhs. It is also interesting to note that police expenditure has grown from about 698 lakhs in 1912-13 to about 829 lakhs budgetted for 1916-17, thereby showing an increase of about 131 lakhs or 16 per cent. within the short period of four years. Apart from a small increase of about 6 lakhs due to the better equipment of the police force in the North-West Frontier Province, the increase under other Imperial and Provincial heads seems not only general, but considerable part of this general increase, more than a fair proportion, I suppose, is due to a rise in the charges of the Criminal Investigation Department, a department the justification of whose existence I fully admit. If an increased expenditure means increased efficiency, I have no quarrel with that growing item. But if increased expenditure means mere numbers with fancied efficiency, then it is high time that that item should be subject to close scrutiny, lest public money be wasted on an enterprise of doubtful utility. In this, as in other items of civil expenditure, much stricter economy has yet to be shown It need hardly be said, my Lord, that the Indian administration is one of the costliest administrations in the world. In no other part of the world, except perhaps in the United Kingdom, are the salaries of high administrative posts so high as in India Commission after Commission has been appointed to scrutinise our public expenditure, and suggest improvements. And yet our public expenditure has acquired a capacity to grow unabated. The war has taught us all to practise strict economy. Economy is as good for the individual as for the State. Instead of falling back upon salt reserve, the Finance Minister might very well have reduced the civil expenditure by 1½ per cent., or the civil expenditure (excluding Railways and Irrigation) by about 2½ per cent.

"During your Excellency's *regime*, my Lord, education and sanitation have claimed foremost attention, and their present progress is chiefly and largely due to your Excellency's sympathetic administration Muhammadan education too has considerably progressed, as is evident from the fact that there were in 1914-15 as many as 1,725,000 pupils. In Madras, a recurring Imperial grant of Rs. 30,000 was made towards the expansion of Muhammadan education, and the proportion of Mussalmans at school to those of a school-going age is 42 4 per cent. While the general educational progress was so far satisfactory, it must be admitted that Mussalman youths in Madras have not yet made sufficient progress in higher education, as in Bengal or the United Provinces or the Punjab While there are 9 scholarships exclusively reserved for Muhammadan boys in Bombay, and 15 scholarships in connection with the Matriculation of the Punjab University, there is practically none whatever in Madras. I submit, therefore, that provision should be made sooner or later to found a few scholarships in the Madras University for the benefit of those Moslem youths, who, for want of pecuniary help, are obliged to give up the pursuit of higher education. It is also satisfactory to note that local bodies in Madras expended about Rs. 10½ lakhs on Muhammadan schools during the quinquennium ending 31st March 1914. As there is not even a single Muhammadan Inspector of Schools in Madras, it is to be hoped that one or more Inspectors will be appointed there, so that Muhammadan education will be taken special care of. Education among Muhammadan girls too is slowly but steadily progressing, there being at present over two lakhs of girls under education Three of them are in the Arts Colleges, one each in Madras, Bombay and Bengal, respectively, and one in a Medical College, besides 40 in Medical Schools, 92 in Training Schools, and 186 in Technical and Industrial Schools. In this connection, I should like to suggest the appointment, as an experimental measure, of an Inspectress of Schools for Madras either for *zenana* class supervision or for the supervision of girls' schools, similar to the experiment successfully tried in Bombay. We await with pleasure the

[*Khan Bahadur Mir Asad Ali Khan; Sir William Clark.*] [24TH MARCH, 1916.]

answers of Local Governments to the recent Circular of the Government of India *re* women's education in India.

"Closely connected with the progress of the Moslem community is the great question of separate representation for Muhammadans in Municipalities and District and Taluk Boards. Though I do not favour communal representation merely as such, I advocate it as a temporary measure which is calculated to rouse the community from its long slumber. Each community must work out its own salvation. When each of the great communities has reached a fairly high level of progress, it is then easy for all of them to come together on a common platform, and co-operate with one another for the common good of the country. Until then, communal representation is necessary. Hence, Muhammadans should be given representation in local bodies, just in the same way as it is done in the Imperial and Provincial Legislative Councils In answer to my repeated questions on the subject, I was given to understand that the question was under consideration. I trust, therefore, that our benevolent Government will not fail to accede to the Moslem request in the matter.

"My Lord, it will not be out of place, I believe, if, in passing, I make a brief reference to our work in the Council during the last three years. The relations between the Official and Non-official Members have, on the whole, been satisfactory, and the progress of work individually or collectively done, necessarily slow under the present rigid constitution of the Council, only emphasises the need for more than one Indian on the Executive Council, further expansion of Legislative Councils with increased functions, introduction of a larger elective element, greater freedom of discussion, wider angle of vision, and greater mutual understanding and sympathy.

"My Lord, the expiry of our term of membership curiously coincides, and happily too, with the termination of your Lordship's Viceroyalty. You will pardon me, my Lord, for a few personal references. Since the days of Lord Ripon, no Viceroy has endeared himself so much, and stood by the people so well, as your Excellency. Among the many notable incidents during your Excellency's successful *regime* may be mentioned the restoration of Delhi to her wonted pre-eminence as the historic capital of the Indian Empire to the rebuilding of which your Excellency spared no pains whatever, a fact of supreme satisfaction to both Hindus and Mussalmans whose respective Sovereigns in olden days reigned there in great pomp and splendour, the settlement of the Indian question in South Africa as well as the Cawnpore mosque affair, the despatch of the Indian Expeditionary Force to the theatre of war, Indians participating in a European war for the first time in the history of this Empire, and above all, the strengthening of the bond of good-will between England and India by systematically pursuing, amidst trials and dangers, a liberal and sympathetic policy of administration. I desire to take this opportunity, my Lord, of expressing, both on my behalf and on behalf of the community I have the honour to represent, our grateful thanks to your Excellency and your Excellency's Government for steadily promoting the well-being of the people, and trust that, even after retirement, your Excellency will long continue to take a deep and abiding interest in Indian affairs, and that, when the war terminates, as it will by the grace of God, in a brilliant victory to England, and when the question of readjustment of the relations between the different members of the Empire comes to be discussed, your Lordship's weight and influence will be thrown on the side of India, and that through your statesmanly intervention, India would be privileged to share the joys as well as the burdens of the Empire, as a self-respecting partner in the great Imperial Federation.

"My Lord, I beg to be permitted to bid your Excellency a hearty farewell on the eve of your departure from India, and wish Your Excellency *bon voyage* home and a happy sojourn in the Motherland."

The Council here adjourned for Lunch.

The Hon'ble Sir William Clark:—"My Lord, before we resume the business of the day, may I, as *Vice*-President of your Excellency's Legisla-

[24TH MARCH, 1916.] [*Sir William Clark ; The President ; Rai Sita Nath Ray Bahadur.*]

tive Council, offer to you, in a very few words, the respectful congratulations of the Council on the conspicuous honour which His Majesty, the King-Emperor, has been pleased to confer upon you in appointing you a Knight of the Most Noble Order of the Garter ? That your Excellency should have received the most distinguished Order, which it is in the power of the Crown to confer, will be a source of intense satisfaction throughout India, but by none will the news be received with a keener sense of gratification than by us, the Members of your Legislative Council, who have had the special privilege of close association with your Excellency. We feel ourselves peculiarly fortunate that this announcement should have been made to-day, when your Excellency, is presiding over a full meeting of your Council, thus enabling us, as a body, to offer to you our heartfelt congratulations on this happy event."

His Excellency the President :—" I thank you all very warmly for your very kind congratulations and appreciation of what, I may say, is a most unexpected honour that I have received from His Majesty, the King-Emperor."

The Hon'ble Rai Sita Nath Ray Bahadur :—" My Lord, on the occasion of the discussion of the Budget, it has become, so to say, one of the conventional duties, on the part of every Non-official Member to begin his speech by offering felicitations to the Hon'ble Member in charge of the finance, as if the imposition or remission of taxation, or its increase or decrease were wholly dependent on his good-will and pleasure, irrespective of all outside circumstances and considerations. Is it really conventional in the present case? No, my Lord, our congratulations, on the contrary, are more heartfelt and more sincere as we realise how the extraordinary situation, created by the war, has been met. It cannot be denied that the Hon'ble Finance Member has been able to meet a very difficult situation by wise and statesmanlike schemes of taxation, by distributing the burden, which is not very heavy in any case, not on any particular class, but upon all classes of people, and what strikes one most, and what differentiates them from the ordinary schemes of taxation, is the graduated scale of additional income-tax, which, while not touching or hurting the people of slender means has imposed the additional burden of taxation on a graduated scale upon the well-to-do classes, the higher the income, the greater is the incidence of taxation until it culminates in imposing a burden of one anna in the rupee on the highest classes of assessees, who are, therefore, not likely to feel it keenly. I have no doubt in saying that your Excellency's Government has displayed great judgment in formulating these schemes of taxation which are indeed characterised by wisdom and moderation, and as such, the whole country will, I am sure, readily and cheerfully submit to the new schemes of taxation without any murmur or grumble.

" For more than a year and a half, the British Empire has been involved in the greatest and most sanguinary war ever known to history in which all the mighty powers of the world are ranged on one side or the other. This is a war which has entailed untold sufferings, unprecedented sacrifice of life and money. But what is most sickening in this great war, is the barbarous and inhuman conduct of a nation which once prided itself on its culture and civilisation, but which has not now shrunk in the slightest degree from committing unheard-of atrocities, barbarities and outrages on humanity. Realising how severely the resources of England have been taxed, we should gratefully acknowledge that protected by her powerful Navy and Army, we are comparatively enjoying here the security of life and property, and that our sacrifices are not heavier and our burden of taxation is not more onerous, it is therefore all the more incumbent upon us that we should cheerfully accept the new schemes of taxation, and offer our sincere congratulations to the Government, more particularly, to the Hon'ble Finance Member, for shaping them in a way generally acceptable to the public and the country. But it must, at the same time, be said to the lasting credit of India that her princes, ruling chiefs and all other classes and conditions of people down to the meanest peasants, have cheerfully placed

[*Rai Sita Nath Ray Bahadur.*] [24TH MARCH, 1916.]

their humble services, their life and property at the disposal of the British Government, that her princes and ruling chiefs and other classes of people, besides offering their services and taking an active part in this titanic warfare, have been cheerfully contributing in different ways to the war funds, and to the funds started for the relief and comforts of the wounded; it is a source of great pride and satisfaction to India that her manhood have not shrunk from shedding their life blood on the battle-fields of Europe and Asia, fighting side by side, shoulder to shoulder, with their British comrades in arms. While we desire to share in the responsibilities, rights and privileges of British citizenship, it is no wonder that our youths should volunteer their services and sacrifice their lives in the cause of the Empire, in the cause of liberty and righteousness, and we are confident that a righteous cause will ultimately triumph.

"While the Empire is involved in this mighty struggle, which is taxing her resources to the utmost, when every rupee saved might be profitably utilised in the prosecution of this great war, there is no room for murmur, and this is hardly the time to ask for the customary doles of charity for the Local Governments. Now, with your Excellency's permission, I beg to offer a few remarks regarding the scheme of raising a new loan for the next year, with the conditions attached, of converting the 3½ per cent and 3 per cent. Government stocks into the same. This is, indeed, a novel idea based on the Home model. If liberal terms are offered, that is, if the conversion is allowed not on the basis of arithmetical proportion, but on terms sufficiently attractive, and the rate of interest be somewhat higher, I believe the proposed loan may be sufficiently subscribed. I may add that, in the present state of the money-market and of financial stringency, it is not possible to rehabilitate the present 3½ per cent. and 3 per cent. Government stocks in the confidence of the investing public, unless attractive terms are offered for their conversion. My Lord, I may remark, in passing, that several causes have combined to produce deterioration in the Government papers, which it is needless to dilate upon. Now, whatever causes might have operated to bring on this deterioration in Government papers, there is this outstanding fact that, with 3½ per cent. papers now selling at Rs. 80, and this coupled with the fact that the English sterling war-loans give much better returns, it is doubtful whether the proposed rupee loan at par, even with the scheme of conversion attached to it, will be sufficiently attractive, if the rate of interest be fixed at 4 per cent. I may add that a purchaser of 3½ per cent. paper at Rs. 80 will be a greater gainer than a subscriber to the 4 per cent. loan at par even with the attached tempting condition of being able to get his 3½ per cent. paper converted into a 4 per cent. paper. The question is beset with difficulties, and requires careful handling and deliberation specially in a country like India, where it is so difficult to raise money; another question which requires careful consideration is how to appreciate the present stocks, as otherwise, on the announcement of the new loan, they would go further down. The amount of 3½ per cent. loan is nearly 92 million pounds, and the conversion scheme can only touch a fringe of it; what becomes of the great majority? Would your Excellency's Government allow it to go further down? The two principal questions which require deliberate consideration and solution are these:—The first is at what rate the proposed new rupee loan should be raised, that is, should the rate of interest here be less than the interest offered by the Home Government? Second, what measures should be taken to arrest the further decline of 3½ per cent. papers, and what should be the terms of conversion, that is, on what terms should Government allow 3½ per cent. papers to be converted into the new loan arrangement? My Lord, my submission is that, in coming to a satisfactory solution of these difficult questions, your Excellency's Government will be pleased to convene, as on the last occasion, an informal Committee but on a somewhat wider basis, to which the representatives of the commercial and banking interests should be invited.

"With these few words, I would have concluded my speech, but, my Lord, considering that this is the last occasion on which we shall have the pleasure and the proud privilege of speaking in this Council Chamber, under your Excellency's presidency, I must say, as a result of my four years'

[24TH MARCH, 1916.] [*Rai Sita Nath Ray Bahadur; Mr. Surendra Nath Banerjee.*]

experience of this august assembly, that during this long period, we have had nothing but very kind and courteous treatment at your Excellency's hands. My Lord, this is not the time or place for dilating upon the details of your Excellency's administration, but I cannot altogether abstain from referring to one or two outstanding features of it, which will leave permanent foot-prints in the sands of time. The noble and magnanimous, but at the same time, firm and bold attitude your Excellency was pleased to display in the matter of the treatment of the Indian emigrants to South Africa, and that in the face of such strong opposition from the semi-independent colonists there, we cannot too sufficiently admire and be sufficiently thankful to your Lordship for the same. It would not be saying too much, when I say that we Indians owe a deep debt of gratitude to your Excellency for your persistent efforts and whole-hearted sympathy in the cause of the Indian emigrants, and it is due to your Excellency's recommendation and powerful advocacy that we shall at last have the abolition of the Indentured labour, which, I assure you, my Lord, will enshrine your name in the grateful hearts of a grateful nation.

"My Lord, sanitation and education have been the watch-words of your administration, not by words of sympathy alone, but by liberal and substantial grants, they have received an unprecedented impetus unknown before. Hostels, that is, well organised sanitary residences for students under the direct supervision of responsible authorities, have received such encouragements accompanied by liberal grants, that it may be said that there is now no college or madrassa in Bengal without a hostel being attached to it. Amidst the several noble deeds of your administration, the place of honour would certainly be assigned to the Act passed by your Excellency's Government creating the Hindu University, which will go to combine the honoured and ancient culture of India with the culture of the Western world—the crowning act of glory which will perpetuate your Excellency's name for ever.

"Before concluding, I must say a few words about the novel and noble, wise and thrilling experiment of organising and sending a very large expeditionary force from this country to fight on the battle-fields of Europe, side by side and shoulder to shoulder, with their British and French comrades-in-arms in a foreign land amid new environments and surroundings The whole credit of this experiment, which aroused a keen sense of pride, a glow of enthusiasm in every Indian breast, which has been, on the whole, so successful, belongs to your Excellency. I need not dilate on its immediate effect, but I must say that its prospective effect would be very great.

"Lastly, I must say that your Excellency deserves our humble thanks, our special gratitude, for having sanctioned the formation of the Bengal Ambulance Corps who have covered themselves with lasting glory, have elicited high praise from the Commanding Officer, and thereby more than justified your Excellency's bold experiment. In this connection, I may say that, in spite of isolated acts of wickedness, the heart of the race is sound and beholden in ties of deep-seated loyalty, devotion and gratitude to the throne and person of His Imperial Majesty, our King-Emperor.

"With these few words, I most respectfully beg leave to bid a respectful farewell to your Excellency."

The Hon'ble Mr. Surendra Nath Banerjee:—"My Lord, I feel that I should not be doing justice to myself or to this Council if I did not say that the Budget has been received with mixed feelings—feelings of thankfulness that the poor man's interests have been largely conserved, feelings of regret that the poor man has been hurt in the matter of the salt tax. My Lord, the debates in this Council, the utterances which have appeared in the columns of our newspapers, have made it abundantly clear that the trend of public opinion is practically unanimous in the condemnation of the enhanced duty on salt. My Lord, I ventured to suggest from my place in this Council that perhaps the crisis might have been tided over and taxation avoided by a loan. My friend the Hon'ble the Finance Minister ridiculed the suggestion, and appealed for illustration to a character in a well-known work of fiction. My Lord, in this Council we

[*Mr. Surendra Nath Banerjee.*] [24TH MARCH, 1916.]

tread upon the sure ground of fact and not of fiction, and when I found my Hon'ble friend leaving this sure ground and wandering into the regions of romance, I felt within myself that he must have been convinced that his cause was hopeless, and that he had no arguments but an appeal to fiction to meet the difficulty.

"My Lord, regret has been expressed and universally expressed in the Indian Press that while the customs duties have been raised all round, the duties on imported cotton goods have remained unaltered. The Government of India have done their best in the matter, but the fact points to the conclusion that it is essentially necessary that India should speedily possess fiscal autonomy. It is a matter of regret that this question has not been referred to the Industrial Committee that has recently been appointed. But, my Lord, it seems to me that it will be impossible for that Committee to avoid facing this question, for it would be open to them in connection with any industry to say that for the purposes of that industry protection would be necessary. An accumulation of instances of that kind would surely strengthen the hands of the protectionists.

"My Lord, closely associated with the question of fiscal autonomy is the problem of the financial independence of the Provinces. Upon the financial independence of the Provinces rests the superstructure of provincial autonomy. We have been promised that boon by the great Despatch of 25th August, 1911, and, my Lord, I hope and trust that before long—at any rate, in the train of the readjustments that are inevitable after the war—this boon will be conferred upon us. My Lord, in this connection, I may point to a statement made in the 88th paragraph of the Financial Statement in which my Hon'ble friend the Finance Member says that a scheme of devolution in respect of Provincial finance is now under the consideration of the Government. My Hon'ble friend has not given us the details Possibly he will be in a position to announce them next year, but I do hope and trust that it is not merely a measure of administrative convenience, but that it will be attended with a large accession of popular control. Decentralisation as such is more or less the devolution of power from officials to the officials. What we are anxious about is not so much administrative convenience as an increase of popular authority over Provincial finance.

"My Lord, some of my friends in this Council and around this table have said that our Budget is a War Budget, and that the taxes we have to pay are due to the war. I thoroughly associate myself with the observations that have been made by Hon'ble Members that the taxes which have been levied ought to be declared as war taxes, and I hope that my Hon'ble friend, when he rises from his place and takes the Council into his confidence, will be in a position to give us that assurance. They have been levied for war purposes, and as soon as those purposes have been satisfied and the wants have been met, these taxes should be discontinued. My Lord, every now and then we read articles in the newspapers and utterances made by our public men, to the effect that India has not made an adequate contribution to the war, or that her sacrifices have not been commensurate to the needs of the Empire or to her position in the Imperial system. The Hon'ble the Finance Minister traverses that position. He points out that our Armies are even now playing a very conspicuous part in the theatre of war; and he also adds that very considerable sums have been paid by India as war contributions. For instance, for the years 1914-15—the first year of the war—the services and the supplies amounted to ten million sterling; in 1915-16, the services and the supplies were estimated at 18 million sterling; and in 1916-17, the estimates rose to 20 millions. This is independent of the contributions of the Native States.

"My Lord, my friend the Hon'ble Rai Sitanath Ray Bahadur has referred to the Ambulance Corps in Bengal. I think we people of Bengal and of India, ought to be proud of the work of that Corps and the gallantry they showed under fire. The fact demonstrates the stuff that is in the people of Bengal and in the people of India. India presents a vast storehouse of military material which I appeal to the military authorities and His Excellency the

[24TH MARCH, 1916.] [*Mr. Surendra Nath Banerjee.*]

Commander-in-Chief to make the fullest use of. We have got men—men with splendid stuff in them; utilise them at the present moment in the service of the Empire by forming a National Militia, by enlisting them as volunteers, by enrolling them as members of Ambulance Corps. The needs of the Empire call for more men. Our people are as countless as the stars of heaven. Why not utilise them for a purpose which will be beneficial to the Empire and add to their sense of self-respect? I desire to make an earnest appeal to Your Excellency, and also to His Excellency the Commander-in-Chief, for the formation of a National Militia and the enlistment of Indians as volunteers. I hope and trust that this appeal will not have been made in vain. Do not for a moment distrust our loyalty. There may be fanatics and fools among us. Are there not fanatics and fools among all classes of the community in all parts of the world? But the heart of India is sound and loyal to the core. Of that we have afforded abundant evidence. Trust India; trust her fidelity and loyalty; trust her honour and devotion to the Empire, and you will obtain a force before which even the great power of Germany will quail. I speak with some little emotion on this matter, because I re-echo the sentiments of my countrymen.

"My Lord, to pass from this somewhat exciting subject to a matter nearer home, I desire to appeal to my Hon'ble friend the Finance Member to consider the case of the large number of poor holders of Government stock who are made to pay income-tax which afterwards is refunded to them. I have in view the case of widows and poor holders of Government stock ranging from Rs. 100 to Rs. 500. What happens, my Lord, is this. When a Rs. 500 Government security is presented at a public debt office for interest, the interest is paid after 10 or 12 days, but a deduction is made for income-tax. Income-tax is not due upon that security, but the public debt office assumes that it is, and the burden of proof is thrown upon the individual to show that he or she is not liable to exemption from income-tax. I do not think this is fair. In many cases no application is made for refund. To get back the money requires time and necessitates a lot of expense. I have mentioned this matter to my Hon'ble friend the Finance Minister, and I hope and trust he will give a sympathetic hearing.

"My Lord, I come back to that question which is very near to my heart, and I am sure it must be very near to the heart of all Bengalis. I am sure my two friends on my right and on my left, the Maharaja of Kasimbazar and the Maharaja of Nashipur, must feel very strongly about it, because they and their families are the greatest sufferers. I refer to the question of malaria. My Lord, I moved a Resolution in this Council which was accepted, directing the Local Governments to take vigorous measures for the prevention of malaria. My Lord, I then moved another Resolution for the grant of 6 lakhs of rupees to Bengal for the prevention of malaria. My Hon'ble friend the Member in charge did not see his way to accept the Resolution, but gave me the assurance that, if the Government of Bengal applied, the matter would be considered. My Lord, money is not our only difficulty. Our difficulty lies in the hopeless disagreement between doctors. We have got theories on the one side and theories on the other—a conflict of views between Dr. Bentley on the one hand and other doctors on the other; and the result is that little or nothing is done. My Lord, let not our energies be paralysed by this disagreement among experts. Something has to be done, and I hope and trust that something will be done. The prevention of malaria is intimately connected with the improvement of rural sanitation, and surely, as regards rural sanitation, there can be no difference of opinion as to the methods that should be employed. In Italy, they tried the system of Bonifacazione. It is a double system of irrigation and sanitation. The central idea is to deepen the water-channels and to elevate the soil. It is a system of agriculture and of sanitation combined with results that are extremely satisfactory. Why should not something of the same kind be tried here?

"My Lord, it is getting late, and I have no desire to take up more of your Excellency's time. I thoroughly associate myself with the observations that have fallen from Hon'ble Members in regard to your approaching departure

[*Mr. Surendra Nath Banerjee; Mr. Ghuznavi.*] [24TH MARCH, 1916.]

from this country. My Lord, this is the last meeting of this Council when you will preside over our deliberations. To-day's business over and this Council will know you no more. Your Excellency's administration has been rich in measures that will place you in the forefront among Indian Viceroys, by the side of a Bentinck, a Canning and a Ripon. My Lord, this is not the place nor is it the time, nor is it for us to review the events of your administration. That must be reserved for the future historian of India. But, my Lord, contemporary opinion furnishes the raw material upon which history bases its judgment, and contemporary opinion has pronounced its verdict with unerring emphasis. Contemporary opinion declares that you are one of the greatest of Indian Viceroys, and that in the muster-roll of Viceroys you will always continue to be one of the greatest. The modification of the partition of Bengal, the settlement of the Cawnpore Mosque controversy, the abolition of indentured labour, the vindication of our rights as equal subjects of the Crown of which no more striking illustration can be found than the despatch of Indian troops to fight on European battle-fields, are measures which have strengthened and deepened the foundations of British rule in India, and have broad-based it upon the gratitude, the affection and the happiness of the people. My Lord, if to-day India is loyal and peaceful, resolved as one man to fight and die, if need be, for the Empire, it is largely due to your Excellency's wise and beneficent statesmanship, to your fulfilling in the every-day policy of your administration, the gracious message of hope and faith delivered to your Excellency and to the people of India by our august Sovereign.

"My Lord, we bid you farewell. We know that India will occupy a place, a very large place, in your affections, and that you will continue to feel an ever-living and an abiding interest in the welfare of that land whose peoples you have loved so well. My Lord, the greatest honour which a subject of the Crown can have has just been bestowed upon you by our august Sovereign. But, my Lord, what are crowns, what are diadems, what are earthly honours and possessions, comparable to the profuse and spontaneous love of a great people. That love is yours as the reward, the precious reward of your devoted service to the people of India, services rendered under trials and tribulations which have deepened their value and have enhanced the love of my countrymen for the great Viceroy who is now about to retire from his exalted office."

The Hon'ble Mr. Ghuznavi:—"My Lord, apart from the few observations which, with your Excellency's permission, I desire to make with regard to the Budget, the thought which is uppermost in my mind to-day is, that this is the last occasion on which your Excellency will preside over the deliberations of this Council in this historic city of Delhi, which fortune has again raised to Imperial importance. It would, therefore, have been unpardonable on my part if I had missed this opportunity of giving public expression to our gratitude for the manifold benefits which my community has derived during your Excellency's *regime*.

"For a long time past the Mussulman employés of Government had been suffering the greatest inconvenience, if not actual hindrance, in the performance of their Juma prayers. The leave to say their prayers between the hours of 12-30 and 2 P.M. on Fridays depended in all Government offices on the sweet will and pleasure of the officers in charge. Your Excellency, however, has shewn the utmost consideration for the religious feelings and obligations of all the different communities committed to your charge, and when I had the honour of bringing this matter to the notice of your Excellency's Government, no time was lost in redressing this just grievance.

"The list of public holidays under the Negotiable Instruments Act was conspicuous in certain provinces, notably in Bengal, for the absence of any Moslem holidays, such as 'Idul-ul-Fitr, Idul-uz-Zuha, Moharrum and Bar-i-Wafat.' This question affected not only the Mussulman merchants, but millions of Mussulmans who are employed in merchants' offices, banks, mills, factories, docks and all such business centres. Furthermore, the very fact of the

[24TH MARCH, 1916.] [*Mr. Ghuznavi.*]

total omission of Moslem days of religious festivals from the list of public holidays in certain provinces, affected the prestige and status of the Mussulman community.

"It has been during your Excellency's *regime* that the first three days have now been included in the list of public holidays of Bengal, and I trust our prayer for the inclusion of the 4th, *viz.*, 'Bar-i-Wafat' will yet be heard.

"Since the establishment of British Raj in this country religious instruction suitable to Mussulman boys has been divorced from all educational institutions patronised by Government. When I approached the late Member for Education on this subject, it was under your Excellency's guidance that Sir Harcourt Butler issued the circular letter dated April 3rd, 1913, to all Provincial Governments, on the subject of education in general and religious instruction in particular which will now bear fruit inasmuch as facilities for religious instruction will 'ere long be provided in all schools receiving Government grants.

"Your Excellency has bestowed no less sympathetic thought on the question of the removal so far as possible of the hardships which pilgrims to the Hedjaz have to undergo in the performance of their sacred Haj, and had there not been this unfortunate war, I am quite sure this question too would have been solved to a great extent under your Excellency's care.

"During the commencement of the war when solicitude for the welfare of Indian pilgrims, generally, prompted His Majesty's Government, on hearing that there was a shortage of foodstuffs at Jeddah and Mecca, to arrange for the supply of 30,000 sacks of barley destined for the pilgrims, the Turkish authorities in spite of the protest seized the same for military purpose. Yet such has been the magnanimity of the British Indian Government that on learning that the Indian pilgrims have been recently reduced to great straits on account of scarcity of foodstuffs at Mecca, that permission has again been given for the shipment of 60,000 bags of rice, 8,000 bags of dhâl and 2,000 bags of sugar from Calcutta for which the entire Mussulman community have reason to be deeply grateful.

"When Moslem feeling ran high over the regrettable Cawnpore mosque incident, it was your Excellency who at great personal inconvenience himself went down to Cawnpore and brought about a happy solution, which otherwise would have stirred Moslem passion to a dangerous degree from the Himalayas to Cape Comorin.

"These instances, my Lord, are but a few amongst the numerous benefits that the Mussulman community in particular have derived at your Excellency's hands. I am sure, I am only voicing the general opinion of the people of India as a whole when I say how greatly we appreciate, and how deeply we are grateful for your Excellency's liberal instincts, and how responsive Indians are to good work done and a generous policy adopted. It is only men of strong individuality and liberal instincts such as your Excellency, who can overcome narrow obstructions to progress and advance the real and permanent well-being of the people. Your name will be enshrined in our hearts and will go down to posterity as one of the greatest Viceroys of India.

"Before going on with my observations on the Budget, I should just like to say one word more with regard to the leave for Juma prayers. Although this privilege has now been extended to all the provinces of India and Burma, yet in some places, such as Calcutta, the litigant public in some of the highest offices are withheld from exercising this privilege and discharging their religious obligation simply on account of the idiosyncrasies of some of the presiding officers. I trust, however, Government will take steps to see that this privilege may not thus be withheld.

"My Lord, I desire to congratulate my friend the Hon'ble Sir William Meyer on his cautious financial policy and the Budget which he has prepared. The situation brought about by this unparalleled war is beyond doubt, most distressing and quite unprecedented. India under the circumstances could not

[*Mr. Ghuznavi.*] [24TH MARCH, 1916.]

possibly escape extra taxation. Last year when a similar deficit was budgetted, the Hon'ble the Finance Minister resorted to the temporary expedient of borrowing and did not rush to extra taxation as many outside this Council were clamouring for. The circumstances occasioning this deficit were peculiar and temporary. It was expected then that the war would not last so long, and therefore temporary ways and means were preferred to additional taxation. The situation to-day has completely altered, hence temporary borrowing to cover the deficit cannot solve the difficulty. Borrowing therefore is out of the question Hence additional taxation is thus indispensable. India has to provide for her own requirements without external assistance, and it is indeed a great relief that my Hon'ble friend in devising his ways and means has just cast his net where it ought to have been thrown. The only extra taxation to which the country can take exception, is the new salt tax which is likely to bring in £600,000. As the estimated Budget is calculated to produce a surplus of a million, the increased salt tax would scarcely seem necessary; particularly as taxation for the mere sake of obtaining a surplus is hardly fair. But we must bear in mind that the situation brought about by the war is really extraordinary, and there is no knowing that an unusually heavy demand will not fall all on a sudden on the shoulders of the State. I am, therefore, disposed to agree with my Hon'ble friend that, in the present condition of things, a reasonable surplus must be provided for. I would however ask my Hon'ble friend to give us an assurance that, as soon as the extraordinary condition ceases to exist, this extra tax on salt would be repealed.

"My Lord, in the course of my Budget speech last year, I ventured to say that we all hoped that no contingency would arise that would make fresh taxation necessary. Should it arise at any time, I trusted my Hon'ble friend would allow me to make some suggestion as to the direction such additional taxation might take, and I added that the only additional taxation that might be imposed without affecting very much the teeming millions of this country would be an additional tax on income. I am, therefore, very glad to find that my friend has after all adopted my suggestion.

"Last year after the Budget meeting was over, my Hon'ble friend came in for a round of abuse from certain quarters for his lack of patriotism and so forth in not imposing additional taxation. It is not therefore a little humourous to find that missiles have been thrown at my unfortunate friend from the same quarters this year for imposing additional tax on income, tea and jute. But I am sure my friend has provided himself with a coat of mail so that these missiles will do him no harm. The additional income-tax will only affect 37,000 assessees out of a total of 332,000. Of these, 24,000 will pay only one extra pie in the rupee, and the 13,000 extra six pies Surely those who occupy positions of comparative ease and affluence have no right to grumble if they have to pay a few rupees in the interest of an Empire which assures them peace, comfort, internal tranquillity and freedom from external aggression.

"My Lord, I would again urge this year as I did last year the claims of my community for a preferential treatment in matters of education. For, although considerable progress has of late years been made, my community is still hopelessly and woefully backward. It is impossible to exaggerate the extent to which education of the right sort is needed for the development of the moral and material prosperity of India. It is pre-eminently the chief work to be done by the State. Education was indeed the starting point of each and every enterprise to be taken in India. The late Mr. Gokhale made it a cardinal point in his public life to urge for the adoption of free and compulsory education in India, and if, as a result of the new awakening after the war to which we all look forward, a policy of free and compulsory education was gradually adopted by Government, Government would be laying a very solid foundation for future progress in all directions and would win our lasting gratitude.

"My Lord, I would once more draw the attention of this Council to the alarming spread of the drug and drink habit in India. This evil has been steadily growing during the last few years, and has now reached an enormous

[24TH MARCH, 1916.] [*Mr. Ghuznavi; Sir Ibrahim Rahimtoola.*]

magnitude. During recent times the excise revenue has gone up by leaps and bounds. During the last decade excise revenue has more than doubled itself. Roughly speaking, it has risen from 5 and odd crores to nearly 13 crores. In Bengal, although there are signs of a slight falling off in the excise revenue since the outbreak of the war, yet it is scarcely to be expected that this falling off would continue So long as the licensing function remains with the revenue authority and the principle of local option is not largely given to the people, no tangible result can be expected.

"My Lord, it is a genuine pleasure to me to find present amongst us to-day our gallant Colleague the Hon'ble Captain Malik Umar Hyat Khan, the premier Moslem soldier who, in conjunction with another Colleague of ours, has maintained our reputation on the battlefields of Europe. The spontaneous outburst of Indian loyalty during this unparalelled crisis has been no less a source of gratification to us as surprise to our enemies. The great withdrawal of troops from India was proof of the general trust and confidence which could safely be reposed in the loyalty of the Indian people France is striving might and main to rouse the enthusiasm of her Indian citizens by offering to enrol them in the Volunteers Corps on equal terms with Frenchmen in Paris. Her efforts in this direction are also believed to have proved fruitful and stimulated the enthusiasm of classes hitherto regarded as timid and non-martial. Hence we all fervently look forward to the time when such disability as we suffer under the Arms Act would no longer exist. That at least no preferential treatment in matter of gun licenses would be meted out to European aliens; if the Arms Act were still to remain on our Statute-books, then it should be made alike applicable to Europeans and Indians.

"My Lord, one word more and I have done. When your Excellency is away from these shores—the shores you have loved so well and to the people of which you have endeared yourself so much—I trust we shall still occupy a large portion of your Excellency's thoughts, and that you will still interest yourself in our welfare, and that it will not be a case of '*Loin des yeux loin du coeur*' but '*Loin des yeux mais pres du coeur.*'"

The Hon'ble Sir Ibrahim Rahimtoola:—"Your Excellency, I agree with those speakers who have stated that the Budget for the ensuing year is a War Budget. Anyone who glances at the military expenditure during the last ten to fifteen years will find that the increase in the military expenditure in consequence of the war has been one of the principal factors in producing a deficit in the Budget. In 1902-03, the net military expenditure was well under £18,000,000; in 1903-04, it was a little more than that figure. In 1904-05, it rose to £20,500,000; it was still within £20,000,000 from 1905-06 to 1913-14; in 1914-15, it was £20,500.000. Since the outbreak of the war, it has risen to £22.500,000. If I mistake not in the Financial Statement the figure was £22,000,000. but it has since been increased in the Revised Estimates to £22,500,000; so that there has been an increase of from £2,000,000 to £2,500,000 in the net military expenditure in consequence of the war. In drawing your Lordship's attention to these figures, it is not my intention to offer any criticism against this increased expenditure. As I stated on previous occasions when the Budget was under the consideration of this Council, I wish to give the Government *carte blanche* in the matter of the expenditure which they consider necessary to carry on the administration of this country. The reason why I have referred to the subject is to express the hope that, when the war has been carried to a successful conclusion and peace is restored, the increased military expenditure will not form a permanent addition to our expenditure. My Lord, in connection with this I should like to point out that the manner in which India has behaved during the war furnishes us with a strong reason why our permanent military expenditure should not be increased to any higher standard than what existed before the war. The Government of India's administration of this country has proved that, while a large part of our permanent Army is fighting the battles of the Empire in various parts of the world, and the number of soldiers in India has

[*Sir Ibrahim Rahimtoola; Khan Bahadur Mian Muhammad Shafi.*] [24TH MARCH, 1916.]

been considerably reduced, peace and order have been well maintained. My Lord, I think that it is one of the highest compliments that can be paid to your Excellency's administration, that at a time like this, India has shown unswerving loyalty to the British Crown. I earnestly trust, therefore, my Lord, that when peace is restored, this question will be carefully considered and no additional burdens will be imposed upon the revenues of the country in the direction of military expenditure.

"My Lord, it is the fashion now-a-days to suggest to the Hon'ble the Finance Member—some of my Colleagues have taken the opportunity of doing so—various directions in which additional taxation should be imposed. I will only say that when the Hon'ble the Finance Member is considering next year the various suggestions which have been made by the Hon'ble Mr. Stewart, he will not forget, what curiously the Hon'ble Member himself has forgotten, the huge war profits which the jute manufacturing industry has made. In England, my Lord—and we are always preached to follow the English example—they have imposed a duty of 50 per cent. on war profits. The jute manufacturing industry has made huge profits, some of their R100 shares are now quoted at over R500. If any industry has prospered enormously in consequence of the war, and from which a portion should be taken as war profits, it is the jute industry My Lord, I am correcting the omission which my Hon'ble friend Mr. Stewart made in indicating a source of revenue which may well be tapped instead of raising rates on passengers or goods carried by our railways. In spite of what has been said about trade profits, I remain unconvinced and still hold that railway revenue is indirect taxation. The additional charge of even one anna, which appears very insignificant in the eyes of some people, is a heavy burden on the poor third-class passengers. If more revenue is needed, surely there can be no justification for not imitating the policy adopted in England of taking a share of the huge profits which have been made in consequence of the war

"My Lord, in conclusion, I will only say that this country parts with regret with your Excellency. I do not wish on the present occasion to add anything beyond saying that I entirely associate myself with the sentiments of appreciation to which my Hon'ble Colleagues have given expression."

The Hon'ble Khan Bahadur Mian Muhammad Shafi:— "My Lord, with the unparalleled world-conflagration still ablaze and its disastrous effects still continuing to cripple international trade and internal development, it was inevitable that this year's Indian Budget should bear the impress of abnormal financial conditions. In fact, it speaks well of our country's resources and of the care and vigilance with which they have been husbanded that the total Imperial and Provincial deficit, in itself not very large in view of the extraordinary circumstances, is, according to the revised figures for the current year, much less than it was originally apprehended. Your Excellency's Government have decided to make up this deficit by the imposition of an enhanced income-tax on the wealthier classes, European and Indian, and by the introduction of certain fiscal changes consisting mainly of substantial modifications in our import and export duties. This scheme of additional taxation, though by no means entirely free from objection, is, on the whole, so discriminately conceived and its incidence is so well and equitably distributed as to have won, more or less, general satisfaction. And in the adoption of these extraordinary measures your Excellency's Government have been loyally supported by the Non-official Members of this Council who have, in no grudging spirit, fully recognized that in this grave world-crisis with which we are face to face, it is the paramount duty of our countrymen not only to share, in every possible manner, the burdens of the Empire, the citizenship of which we regard as our proudest possession, but also to contribute all that lies in their power towards bringing this terrible war to a successful conclusion.

"My Lord, right royally has loyal India responded to the trumpet-call of duty at this most critical juncture in the Empire's history by incurring

[24TH MARCH, 1916.] [*Khan Bahadur Mian Muhammad Shafi.*]

willing sacrifices of blood and money—sacrifices which are bound to leave their indelible mark on the future history of the British Empire, and are calculated to vastly strengthen the bonds of union which link its various parts together, removing misunderstandings, dispersing clouds of distrust, and creating a new spirit of fellow citizenship which will, in the end, redound to the glory of the Empire and prove, in the highest degree, beneficial to mankind in general. We in the Punjab feel what cannot but be regarded as a perfectly legitimate pride that our martial races, as well as the other classes of our people, have borne the lion's share of Indian efforts in upholding the honour and glory of the Empire, and in vindicating the sacred cause of righteousness and civilization. Our province has provided more than one-half of the Indian heroes who have written their country's name in letters of blood on the battle-fields of three Continents. More than 50 per cent. of the entire numbers of recruits who have enlisted in our Indian Armies since the outbreak of this unparalleled war have been drawn from the land of Five Rivers. It was, indeed, in the fitness of things that the province one district of which, *i.e.*, Jhelum alone, has given to the Indian Army a larger number of brave and heroic soldiers than the entire Presidency either of Madras or Bombay, should, on this critical occasion, have come forward, cheerfully and loyally, to bear the brunt of the Empire's battles and to add to the undying fame of its martial races under novel conditions of modern warfare. And our civil population have not lagged behind in proving to an astonished world how deep is the love and attachment which binds them for all time to their King-Emperor. They have freely given of their best to the various Relief Funds, Imperial and Provincial, started since the outbreak of the war, and have set a noble example to the rest of India by presenting to the military authorities a fleet of aeroplanes, the fund for which already exceeds in amount the whole of the Over-seas Aeroplane Fund.

"My Lord, even as the darkest cloud has its own silver-lining, this terrible world war has demonstrated beyond a shadow of doubt, the wonderful solidarity of the British Empire, to the utter astonishment of our foes and the profound delight of our friends. A new spirit of comradeship born on the European, African and Asiatic battlefields, a new feeling of partnership arising out of common efforts and common sufferings has begun to pervade throughout the different parts of Greater Britain, which will prove a source of increased strength and abiding vitality to itself. And in India, it has heralded the dawn of a new era of official and non-official co-operation which has filled the hearts of all sincere well-wishers of the country with bright hopes for her future. I see above the distant horizon signs of the complete break up of those dark clouds of distrust and misunderstanding which have hitherto often kept the two classes at arm's length from each other, and presently the glorious rays of mutual understanding and good-will shall break through the dark clouds, flooding the high peaks of the Himalayan range and the broad valleys of the Indus and the Ganges with the bright effulgence of a common Imperial patriotism which will raise India to her legitimate and proper position in the greatest Empire the world has ever known.

"My Lord, with the close of the current financial year will terminate the period of your Excellency's high office as the august representative of our King-Emperor in this country. By your far-sighted statesmanship, your fearless championship of India's claim as a partner in the glorious Empire of Greater Britian your noble support of the cause of education and sanitation ; your successful advocacy of the right of our Indian Army to defend the honour and uphold the glory of the Empire along with their British and Colonial comrades on the battlefields of Europe, and your loving solicitude for the welfare of 310 millions of your fellow-beings whom a wise Providence has placed under the fostering care of the British Raj, you have not only won for yourself a unique place in the hearts of our people, but have also greatly strengthened the political connection between England and India. And the prospect of India's representation on the Imperial Conference, the thin end of the wedge driven into the wooden barricade of Free Trade by the Indian Tariff Act, the appointment of the Public Services Commission and now of the Industrial Commission, the noble and

[*Khan Bahadur Mian Muhammad Shafi; Mr. Abbott.*] [24TH MARCH, 1916.]

inspiring ideal, however distant its realization, sketched by your Excellency's Government in the famous Despatch of 25th August 1911, and, above all, the new political atmosphere created by your sympathetic *regimé* have set our heart-strings vibrating with hope and confidence for the future of our country. In my province of the Punjab, we are deeply grateful to your Excellency and to His Honour Sir Michael O'Dwyer for the recent expansion of our Provincial Legislative Council to almost its full statutory limit. And though in spite of its great political importance as the backbone of the British Raj in India and of its phenomenal educational and material progress, the stigma, absolutely undeserved, of being a non-regulation province with an inferior Judicial and Executive machinery still attaches to the Punjab, it is not for want of effort on your Excellency's part to remove this glaring injustice at least in respect of the elevation of our highest judicial tribunal to the status of a High Court.

"My Lord, on your return to England, your Excellency is destined to play a leading part in Imperial affairs Whatever the exalted position in which it may please God to place you, your Excellency will carry with you the prayers of His Imperial Majesty's grateful Indian subjects for a happy and prosperous life. May we express a hope that in the midst of whatever high and responsible duties may occupy your time and energies, your Excellency will continue to take some interest in the future welfare of India and of her peoples, and to plead their cause in the inner Imperial Councils where your opinions are bound to carry weight and your voice listened to with respect and attention."

The Hon'ble Mr. Abbott:—"My Lord, I beg to be allowed to associate myself with my Colleagues in congratulating the Hon'ble Finance Member on the clear and able Budget he has presented to this Council. My Lord, your Lordship's impending departure from India will be a sad blow to us, but we hope your Excellency will find in your retirement that rest and comfort which your heavy duties of office and private cares have denied you. It will also be a source of great satisfaction that under your rule India has made steady and very considerable advance in so many branches of human activity.

"My Lord, the Budget, I am gratified to see, provides for the necessary enhancement of taxation, and neither the public nor the press has expressed any serious complaint against the provisions made. In fact, it is on all hands acclaimed as 'poor man's budget.' Notwithstanding, that, much has been said and written against the enhanced tax on salt, but if the objectors had gone into the question at all, it would have been obvious that the slight enhancement works out to an incidence on the poor of about half a pie or one-sixth of a farthing per mensem Now, my Lord, that will not be an insupportable burden and will be a mere bagatelle compared with the taxation on the poor in the Home Country. Even the very poor welcome the enhancement as enabling them to give their little something towards the needs of the Empire, and my information leads me to believe that even a greater enhancement would have been received cheerfully. My Lord, I regret the taxation on tea is not so free from complaint. The feeling is that the tax will lead to the capture of our markets by foreign teas. It is felt that the larger revenue required, instead of being provided for by the increased taxation on tea, could have been easily secured by a small death-rate levied on the estates of the rich, just as the death rate of Britain provides an important contribution to the Home Exchequer.

"My Lord, turning from a very incomplete survey of the Budget, I beg to avail myself of the time-honoured privilege afforded on this day to Members of this Council, and to speak of the needs and legitimate aspirations of the Domiciled Anglo-Indian community whom I have the honour to represent. To begin with, my Lord, I beg to offer a most sincere expression of the deep sense of gratitude felt by me and the Anglo-Indian community towards your Excellency, His Excellency the Commander-in-Chief and all the Members and Secretaries in charge of the Departments of your Excellency's Government for the many acts of kindness and sympathy extended to the furtherance of the community's needs. My Lord, in the times

[24TH MARCH, 1916.] [*Mr. Abbott; Mr. Setalvad; Mr. Rama Rayaningar.*]

through which we are passing it is not my intention to bring forward all our grievances, but I feel that I would be betraying the trust imposed in me were I to remain silent regarding our most pressing need—that there is no representative of the community in the Presidency and Provincial Councils. In pressing for the early consideration of this question, the Anglo-Indian community feels that it is not asking for anything exaggerated or illusory, but only for that which is granted to all other communities, and for that which the Anglo-Indian community, having its home here, has a natural right to expect for its protection and its advancement I beg therefore that your Excellency's Government will take up the favourable consideration of this question.

"My Lord, when I entered this Council three years ago, I felt that the chief disability under which the Anglo-Indian community laboured was the bar to the enlistment of Anglo-Indians in the British regular army. I felt that, however else the community might progress, this disability was working like a cancer, because the community felt that it was unjustly kept from rendering military service—the heritage of British blood in its veins. My aim was to ask for the removal of this bar sinister. I was told on all sides, even by many Anglo-Indians, that it was impossible, and that my ideas on this subject were doomed to dismal failure. In spite of these forebodings, but with the sympathy of your Excellency's Government, I have worked incessantly towards the realisation of my hopes. Two days ago, my Lord, the Adjutant-General handed me a copy of the pamphlet I have here in my hand which contains the conditions upon which the Anglo-Indian force recently sanctioned may be raised. The bar sinister has been lifted, and we have been given our Magna Charta For this and other favours I have already tendered to your Excellency's Government the most grateful thanks of the community, which is determined to prove further that small quantities of good service are better than tons of profession. As an instance, I may submit the case of my own employés. One of my secretaries has informed me to-day that all my Anglo-Indian managers and assistants, 20 in number, have applied urgently to be allowed to join the new force as privates. This is in addition to the 7 who have already joined the Army or gone to the front, and I shall sanction their request. This will cripple my business and in any case reduce it to a state of chaos for a considerable time. But what does that matter? I am the happiest man in India to-day. Complete success, however, appears to be questionable owing to the inherent difficulty in the scheme that recruits have to await the permission of their superior officers to enlist. This leaves a loophole for shirking by unwilling though able-bodied men, who, I trust, will be in a small minority, and for employers of willing men who may stand in the way of their employés for personal reasons and not in the public interests. In conclusion, I would crave, therefore, that your Excellency's Government will be pleased to issue a circular to all concerned, including railway, police and other administrations, enjoining the necessity for promptly setting free all men serving under them who may desire to join the Anglo-Indian force."

The Hon'ble Mr. Setalvad :—"Your Excellency, on this occasion we are supposed to discuss the Budget, but by some time-hallowed tradition of this Council Hon'ble Members speak on most matters absolutely unconnected with the Budget, not excluding questions like infant mortality and Muhammadan holidays. I could have indulged, your Excellency, in a great many matters unconnected with the Budget, as various Hon'ble Members have done; I could also have dilated on matters more intimately connected with the Budget. But the hour is late, and we are all very anxious to hear the pronouncement of your Excellency. I will not therefore detain the Council beyond associating myself with what has fallen from various Hon'ble Members about your Excellency's approaching departure, and I beg most respectfully to wish your Excellency all prosperity and happiness in your native land."

The Hon'ble Mr. Rama Rayaningar:—"My Lord, the Hon'ble Sir William Meyer has fully maintained in the Budget under discussion that

[*Mr. Rama Rayaningar.*] [24TH MARCH, 1916.]

high standard of finance administration for which he has earned so great a reputation. He is alert to the exigencies of an uncertain and trying situation. His arrangements are dictated by great prudence, and it will be unfair to deny him all praise for their soundness. I am glad that the Hon'ble Finance Member notes with satisfaction the curtailment of expenditure in Madras. I am also glad that special allotment has been made for the revision of village establishment in that province.

"My Lord, provision must have been made for the bifurcation of Ganjam and the Agency tracts of the Madras Presidency into Uriya and Telugu districts. The Uriya-speaking people of the Madras Presidency form a race with distinct language and noble traditions. They are now merged in a Telugu unit where they have no chance of development. They complain they are greatly handicapped by the predominance of the Telugus. The complaint is well founded and long standing. Sooner or later the bifurcation must take place. The sooner it does the better for the Uriya people.

"My Lord, there is one significant note in the Budget which might create some uneasiness in the public mind. The Hon'ble Finance Member states that one of the results of the war will be that our military expenditure will be increased in future. This is a point upon which a clear expression of public opinion is necessary. In connection with the war, there is a perfect unanimity among the people that a reasonable proportion of the cost should be charged to India. The temporary burden we are all willing to bear. But when it comes to the question of a permanent addition to our military charges, the matter is different. The case would require the most careful examination. The military arrangements are certainly to be made by the military authorities, but the people have a right to have their say about the broad features of the situation. As pointed out by Lord Salisbury, military efficiency must be relative. In other words it must be determined according to the military requirements as warranted by the fiscal position of the country.

"The war, my Lord, must have made it clear, that a change in the military policy of this Government is necessary The people have so long been excluded from all association with the defence of the country both internal and external, and the result is that in this hour of trial of the British Empire, in spite of her teeming millions and her earnest desire to share in the heat and the burden of the day, India is unable to put on the field an army in proportion to the magnitude of the operations. We have no militia: the Hindus and Muhammadans cannot serve as volunteers; recruitment is exclusive, and whole classes are left out. The cumulative effect of these causes is that the martial spirit of the general population is dead; it is decaying even among families heretofore connected with the military profession. This is a condition of helplessness which cannot redound to the credit of the Administration. We earnestly hope the lessons of the present war will produce a change of policy. My Lord, some scheme of national militia on the lines suggested by my friend the Hon'ble Malik Sahib should be formulated. Will not Government find it expedient to admit Indians freely into Volunteer Corps, and to organise under proper safeguards a national militia to be called up in the hour of need?

"My Lord, the suggestion of throwing open the commissioned ranks of the army to Indians of proved merit and respectability, claims the sympathetic consideration of Government Cannot Government utilize in the service of the Empire the dormant martial spirit of the great aristocratic houses? The junior members of these families spend their time in idleness. That there is good material in abundance among the landed classes will hardly be disputed. Why then commissions in the army should be withheld from them? These are difficult problems. But it cannot be that the high-minded British statesmanship will be unable to find solutions for them. The defence of the present system of exclusion on the ground of caste and race distinctions is extravagant and unconvincing. Are not armies efficiently maintained by the ruling princes? Are the people of those states free from caste and race distinctions? It is time, my Lord, a departure should be taken in the suggested

[24TH MARCH, 1916.] [*Mr. Rama Rayaningar.*]

direction. Through your Lordship's benevolent policy and noble initiative, a substantial improvement is perceptible in most of the departments of the Administration. Your Lordship has taken throughout your Viceregal career a keen personal interest in the matter of education and sanitation, new schools and colleges, nay new universities are coming into existence. More dispensaries and hospitals are being opened Improvement of the indigenous systems of medicine is receiving Government attention Larger grants have been made for the advancement of education, sanitation and the other local needs. These departments have been made the portfolio of the Indian Member of the Imperial Government. Their financial future finds guarantee in the Hon'ble Finance Member's recent statement in connection with his proposal for revising the rate of income-tax on higher incomes that—

'after the war further funds will have to be provided for such beneficent purposes as the improvement of education and sanitation'

The Agricultural Department is doing excellent work, and with larger employment of qualified Indians in the service its usefulness will appreciably increase. The railway policy of Government has been liberalized and the nationalization of railways is being considered The grants for irrigation works have been maintained. Protection has been afforded to some of our industries by successive amendments of the Indian Tariff Act Through the Finance and Currency Commission, the Public Services Commission, and the recently appointed Industrial Commission your Lordship has sought to place Indian finance on a sound basis, to enlarge the scope for employment of Indian talent and to secure a rapid development of our manufacturing industries To facilitate the supply of labour for the development of indigenous industries, and more than that to save India's honour abroad, your Lordship has set your eye upon the abolition of indentured labour. In the midst of all this many-sided improvement, in the Military Department alone the organisation continues conservative and exclusive. It is necessary that the military policy, too, should be liberalized to bring about an all-round development in the economic progress of the country

"As has been observed by my friend the Hon'ble Sir G. M. Chitnavis, my Lord, it is highly desirable that Government should undertake a thorough inquiry into the present economic condition of the people. The importance of the subject cannot be over-rated. There is a sharp conflict of opinion between Government and the public about that condition. It is far better we know where we really are, and it is time that the question should be set at rest by conclusions based upon the result of an unprejudiced public inquiry.

"My Lord, after the acceptance of the Resolution recommending the appointment of a Jail Commission, we naturally expected Government would take immediate action ; but full two years have passed without any steps being taken to hold the necessary investigation. It can well be believed that, but for the war and the expectation that it would come to an end shortly, Government would not have continued inactive. But since the war promises to last much longer, it would be disappointing to have this very important matter of Jail reform held up indefinitely. The Civil Administration has to go on in spite of the war It is inconvenient to delay reforms of an urgent character. The cost of the Jail Commission will not be large Even if it were, the extra expenditure would have the support of public opinion. We are budgetting for a large surplus A portion of that could certainly be applied to this very useful and necessary purpose. I, therefore, earnestly hope Government will be pleased to appoint the promised commission at an early date It will be a fitting sequel to your Excellency's enlightened administration.

"My Lord, to-day for the last time your Lordship presides over this Council. And what a painful idea that is to us! My Lord, you have really befriended us. You felt with us. You fought for us. You spared no pains to better our interests at Home and abroad, and to secure for us a dignified place in the Empire.

'A Government national in spirit though foreign in personnel"—was the late Hon'ble Gokhale's ideal—a Government which subordinates all other considerations to the welfare of

[*Mr. Rama Rayaningar ; Mr. C. Vijiaraghava-chariar.*] [24TH MARCH, 1916.]

the Indian people, which resents the indignities offered to Indians abroad as though they were offered to Englishmen, and which endeavours by all means in its power to further the moral and material interests of the people in India'

was his dream. My Lord, in your Viceroyalty the dream of the departed patriot was, I venture to think, well nigh realized. You have rendered a great and glorious service to our country, and you have secured for yourself an abiding place in the hearts of our people. It is a source of immense gratification to us to learn that His Imperial Majesty has recognized your Lordship's great and glorious services by conferring upon you the highest honour, the Knighthood of the Most Exalted Order of the Garter, while yet you are in the midst of your labours. We most respectfully congratulate you. May God bless you, my Lord."

The Hon'ble Mr. C. Vijiaraghavachariar :—" My Lord, the Budget has been called a Taxation Budget and also a War Budget. Taxation Budget it certainly is, but I doubt very much whether it is a War Budget, except perhaps for a mysterious formula framed and bestowed upon the Government of India from Whitehall which takes away more treasure from us and gives us none, during this crisis, in return. The Budget itself, I must say, embodies solid principles of justice and impartiality. I do not believe that the new fiscal provisions have been adopted as a temporary measure, and they ought not to be a temporary measure in my opinion, except in so far as they relate to the salt tax.

" Although it is considered a political heresy to take the country and the Non-official Members into confidence in advance in preparing Budgets, a Retrenchment Committee might have been appointed before the present Budget proposals had been formulated. If such a Retrenchment Committee had been appointed, it could have shown in what way public money could be saved now. I can point out three directions in which this could be done.

"One has relation to the expenditure in the Telegraph Department. I believe that part of the expenditure in the Telegraph Department is both illegal and unjustifiable in public interests. Reuter in his own name, and, I have reasons to believe, under an alias, is drawing enormous sums of money from the public treasury, Imperial and Provincial, without being entitled to the same. I venture to submit that a most cursory investigation would disclose that the practice obtaining in this connection is clearly illegal. It is illegal because it violates the International Convention, and it is in defiance of the law and rules existing in the country on the subject. And I could point out that in this connection one important article, growing in volume and circulation, is in the free list needlessly at the expense of the tax-payer. Long speeches are telegraphed by the agency at the tax-payer's expense under the name of ' Press concessions.' I really cannot see any reason why all these speeches should be sent by wire and not by post. Occasionally unspoken speeches are telegraphed too, and the lines are blocked up to the serious injury of the interests of the mercantile world and of the general public. Now the one article which is exempt from taxation, *i.e.*—vanity—ought to be made to pay for this. I venture to think that, if the concessions for the press telegrams relating to speeches are withdrawn being not quite legal always, the vanity of the speech-makers or their admirers would be taxed to the relief of the tax-payer and also of the press. If a Retrenchment Committee had been appointed, it would have shown how improper it is to continue the whole of the expenditure in this department. Throughout the country officials are now receiving subsidized private telegrams, absolutely unnecessary, only a few hours before the public see them in the Press. Unless they are called upon to take immediate action as to which State telegrams would be more suitable, it is of no great use to them except to have their chat in the clubs the previous evening. I see no reason why this practice should be continued. Very often it makes only a difference of a few hours, and for the sake of a few hours, Reuter gets not only money he is entitled to, but he also gets money he is not entitled to, in my opinion. In this way he makes enormous profits at our expense.

[24TH MARCH, 1916.] [*Mr. C. Vijiaraghavachariar.*]

"Then I come to the expenditure in the Postal Department. The Hon'ble Mr. Stewart said it is better to tax third class railway passengers as a war measure. I would rather that you taxed the whole public by means of postal rates. It is needless to give us 10 tolas for one anna for letters. I think it ought to be reduced at once. In England, I believe—I do not know if it has been actually done—but I believe a proposal has been made to raise postal rates recently. I think the allowance of ten tolas for one anna for letters is not called for in public interests, and it ought to be reduced to two tolas as the best.

"Then we have grants for Universities which are needless at present for the proposed Patna University, the Dacca University and the Rangoon University. Why these lakhs of rupees should be allowed to lie idle long before the schemes can be matured I do not understand. If these things had been carefully considered, my humble opinion is that the salt tax would have been unnecessary, and the graduation of the income-tax could have been made gentler and more satisfactory.

"My Lord, it is unnecessary for me to make any suggestions for reform to-day as it is usual on such occasions. I believe most of those suggestions are at this juncture premature; but I do expect and hope that what is freely mentioned now in the papers, namely, that there is to be a Council—by whatever name it is called—for the whole of the Empire, will, so soon after the peace is reached, be constructed. It will be impossible for the House of Commons to add to its present number of members from the other parts of the Empire. In my humble opinion, it is undesirable too having regard to numbers or functions. If the number is over 600 for Great Britain, what should it be for the whole Empire? Not less than 6,000 I should say. Then what about the functions? Will it continue to discuss the health of hops, swine fever and what not all of parochial interest, and are all the members of the Empire to take part in the discussion of such questions? My belief is that there should be an assembly who should be charged with functions relating to the defence of the Empire and with commercial relations and fiscal policy *inter se* and with the rest of the world and to questions connected with international law. If such a Council is constructed by Statute, electing members from all parts of the Empire, with a small Cabinet constructed partly out of it and partly outside, by nomination by His Imperial Majesty, then we can the more satisfactorily consider all other reforms which will be specially necessary for the various limbs of the Empire according as their local conditions and requirements necessitate.

"Then, my Lord, I join in the expression of national gratefulness to your Lordship in person. It would be exceedingly embarrassing to you and to me to dwell on this matter at any length The achievements alluded to by my Hon'ble Colleagues who have spoken before me here to-day, are, I think, tangible and visible, recorded achievements only. There are intangible and unrecorded achievements which have to be placed to your credit. The historian of India, in appraising the value of a Viceroy, should take into account not only what he has done, but also the very special conditions and limitations under which he did it. There are at least two limitations—to which, if I may, I shall allude to just at present, one from above and another from the side. First, as to the limitation from above. I beg pardon of the Hon'ble the Finance Minister when I say that I believe it is wrong to call the Government of India the subordinate of the Secretary of State. The relations subsisting between the Secretary of State in Council and the Government of India are at once complex and delicate, but this Government are not, in the ordinary sense, subordinates of the Secretary of State. But still I admit that in a manner this Government is obliged to take instructions which are in reality mandates from the Secretary of State. Then there is the other limitation—arising from the Executive Council. This Council has inherited very great powers both by law and by tradition. It must be remembered that the Executive Council of Madras (which was then the premier Province before accident made Bengal the Government of India) once upon a

[*Mr. C. Vijiaraghavachariar; Pandit Madan Mohan Malaviya.*] [24TH MARCH, 1916.]

time deposed the Governor, arrested and imprisoned him, and before relief could come to His Excellency from Home, he died. Now, the Executive Councils of India are quite conscious of their powers. My belief is that in achieving what you did, my Lord, you have educated your Hon'ble Colleagues of the Executive Council and inspired them into more solid and higher principles and into loftier ideals, both by precept and by example. I consider this achievement of much more national importance than specific instances of policy and measures connected with education and sanitation.

"For all these reasons, my Lord, and if it is true that—

'Peace hath her victories no less renowned than war'

I venture to think that you will take your place, not in the obscure pages of Indian history, supplemented by the inevitable statue, but in the world's roll of heroes."

The Hon'ble Pandit Madan Mohan Malaviya:—"My Lord, at this late hour I will not take up much time by dwelling on the many aspects of the Budget which has been discussed to-day; but there are some points to which I wish to draw attention. There has been a great deal of opinion expressed that if a more earnest effort had been made to reduce expenditure than has actually been made, we might have avoided some at least of the extra taxation. I submit that that is a perfectly fair and just view, and I join my friends who have pressed this matter upon the attention of Government, in expressing an earnest hope that Government will seriously consider the question of appointing a Committee to go thoroughly into the matter. No doubt, my Lord, the present Budget is an exceptional Budget dealing with exceptional circumstances. As such it has received the loyal support of all sections of the community; but it is due to the general tax-payer that the question of a reduction of expenditure should be more thoroughly gone into. In England, a few months ago, a committee was appointed to inquire into civil expenditure, and I understand that it has recommended retrenchment to the extent of 2 millions. Here, too, some retrenchment has no doubt been brought about, but the public is not satisfied that all the retrenchment that could be brought about has been effected. And that being so, I hope the Government will be pleased to consider the question of appointing a committee of non-officials and officials of this Council to go into the matter. I do not want a large committee, much less do I want a commission which should go all over the country. I only want a committee of Official and Non-official Members of this Council to examine our civil expenditure, and to suggest reductions which the Government may see its way to adopt. The second aspect of the Budget which has been criticised relates to the taxes that have been imposed. We need not repeat all that we have said before on this subject. There need be no fear that it will be regarded that we endorse all that has been done, if we do not repeat all that we have urged before with regard to the increase of the salt tax, or any other matter. But I wish to notice some points which have been urged for the first time to-day by the Hon'ble Mr Stewart. He has urged that the amount required should have been raised by means of taxes other than those that have been imposed. I submit, my Lord, that his suggestions are not at all supported by Indian public opinion. For instance, his proposal to increase railway rates and postal charges would be generally regarded as an unjust addition to the burden of the general tax-payer. On the other hand, the higher income-tax, which he is right perhaps in saying is unpopular to a certain extent with those who have to pay it, is a tax which is regarded by the general public as an equitable tax. Its principle is indisputably sound. Those who are able to pay ought ungrudgingly to pay when they are called upon to do so in the public interest.

"Then, it has been urged by more than one Hon'ble Member that these taxes should be temporary; that they should be taken off after the war. With due deference to these Members, I submit that it is not fair to the general tax-

[24TH MARCH, 1916.] [*Pandit Madan Mohan Malaviya.*]

taken off after the war. When the time comes when the question of a remission of taxation can be taken up, it will be proper to consider which of the taxes ought to be taken off and which should be retained. As I have said once before, I hope that when that times comes, the principle that the burden of taxes should be distributed according to the capacity of those who are called upon to bear it, will be steadily kept in view, and that the general tax-payers' burden will be made lighter than it is at present.

"Then, my Lord, the question has been raised of the use that might be made of the additional revenue derived from these taxes if they are retained. I hold that when peace is restored and Government finds itself in normal conditions, the retention of the present taxes will not be justified unless the Government will commit itself to a programme of compulsory education, and a large programme of sanitation and the promotion of indigenous industries. I hope such a programme will be undertaken If it is not, then certainly there will be very great force in the contention that these taxes should be taken off. My Lord, I leave the Budget with these few observations I had a desire to go into certain constitutional questions, but time does not permit of my doing so. I am certain that your Excellency's experience of the work of this Council during the last five years and more has fully impressed you with the need for a great constitutional change, both as regards the constitution and powers of the Council I hope, my Lord, that when the time comes for considering such a change, your experience of the work of this Council will support our demands that there should be greater powers conceded to the Non-official Members of this Council, and that they should have a substantial voice in the determination of questions, both of policy and of executive administration, with which the Government of India have to deal. But I will leave the matter here for the present.

"There is only one other matter, my Lord, to which I wish to refer, and that is your impending departure from our midst. I will not reiterate the regret that we all feel at it, it is unnecessary to do so. I will address myself, if I may, to a different task. In a few short days your Lordship will be leaving us; you will soon find yourself back again in your home in England. I request your Lordship to kindly carry from the people of India a humble message to His Majesty, the King Emperor, and another to our brethren in England. To His Majesty, the King Emperor, I beg your Excellency to convey our deep and dutiful devotion and unswerving loyalty to his person and throne. To our brethren in England, I request your Excellency to convey our message of deep and admiring sympathy with them in the magnificent effort which they have put forward in the righteous war in which the Empire is engaged. My Lord, English patriotism and the English sense of duty stood high enough before the war; but they have reached their climax in the present mighty struggle. We all know that England was unprepared for the war when she had to enter upon it against one of the deadliest of enemies who had been preparing for a whole quarter of a century for it, and yet we know how, though so unprepared, England has risen to the height of the occasion; how she has baffled her opponents and helped her Allies, and that mainly by the voluntary system of military service. In doing so, she has shown to the world what English patriotism and English sense of duty to one's Country and Crown can accomplish! My Lord, several Hon'ble Members have referred to our humble contributions to the war. I am thankful that those contributions have been generously appreciated and acknowledged both in this country and in England; but when I think of them alongside of the colossal sacrifices which England has made, which our English brethren have made and are making, I really wish we were able to render far greater aid to them. But if we cannot, we yet sincerely admire our fellow-subjects, Englishmen and Englishwomen, for the sacrifices they have been making. We deeply sympathise with them in the loss of kith and kin they have suffered, in the bereavements they have sustained; we admire their determination to spare neither life nor treasure to uphold the honour of the Empire and the cause of righteousness throughout the civilised world. I beg your Excellency to assure our brethren of our deep sympathy with them and of our deep admiration for them; of our readiness to offer them every co-operation which it is in our power to offer, and of our earnest hope and

[*Pandit Madan Mohan Malaviya; Nawab Syed Mohammad Sahib Bahadur.*] [24TH MARCH, 1916.]

prayer that their great sacrifices will soon be rewarded by glorious results. I request you, my Lord, further to tell them that we hope and trust that when the noble principles for which they have been fighting, the principles of liberty, of justice, of the unmolested independent existence of free nations, have been vindicated and re-established, they will see that these principles will be applied equally and impartially to every portion of the British Empire, and that India and her children will be treated and dealt with as equal fellow-subjects wherever the British flag flies. My Lord, I have done. I hope and trust that wherever you may be, you will continue to take an active and sympathetic interest in the affairs of my country and my people."

The Hon'ble Nawab Syed Mohammad Sahib Bahadur :—
"My Lord, I am sure that the Hon'ble the Finance Member has already perceived with gratification that the reception of his clear and well-thought-out Budget has been as sympathetic and favourable as he had a right to expect. I may say that 'the great concern' which he said the Government of India have felt that the last Budget of your Excellency's *regimé* should involve additional taxation, would by this time have been alleviated by the manner in which the country has accepted his Budget proposals, however much in some respects they were open to objection. The country has realised the import of the unanimous resolution of the Government of India last year of the unswerving resolve of Indians to support the honour, dignity and prestige of the Empire regardless of the sacrifices it may entail on them. In Sir William Meyer and in your Excellency they possess, in the realms of Finance, their staunch supporters against any undue demands of the British Treasury or the War Office on the one hand and the clamours and extravagant demands of the critics of India's contribution to the war on the other. It is unnecessary for me to speak of the deeds of our fellow-citizens in the field, or of the voluntary contributions of the prince and peasant alike for the conduct of the war to a successful issue. Nor need we point to the manner in which additional financial burdens are borne by the people, along with the privations and hardships which the war has entailed on this country as much as on other parts of the Empire. If we then say anything about the actions or the policy adopted by the Government it is not with a view to reduce any legitimate sacrifices required of us, but with a view to have a just and equitable distribution of the burdens of the war in which we should equally share with other parts of the Empire. It is in this view that I venture to join my Hon'ble Colleagues in deploring the decision of His Majesty's Government in England to refuse their consent to an increase in the cotton duties accompanied by a repeal of the countervailing excise duties I by no means desire, and I believe my countrymen also do not desire, that your Excellency's Government should be embarrassed at this time by any agitation in this connection, but we all do hope that the moment the pressure of the war ceases, India will get her rights in respect of the removal of this burden, and that no pretext will be found to shelve the matter.

"I have to urge the same plea in respect of a more directly financial matter pertaining to the interests of the Provinces which we, Non-official Members, represent. The enhancement of the Income-tax which has now been made is no doubt levied as a war measure,—though with a view to merely strengthening the financial position of the Government of India But it is to be borne in mind that the taking away of the whole of this extra taxation is a violation of the Permanent Financial Settlement made with the Provinces by which the revenue derived from the Income-tax is to be shared equally between the Provincial and the Imperial Governments. It is no doubt the right of the Government of India, under special and extraordinary circumstances, to call upon the Provincial Governments to contribute to the funds of the Imperial Government, and I presume that this extra taxation is wholly appropriated by the Imperial Government by means of such a call on their part. If, as we all devoutly hope, the increase in the Income-tax is not removed as soon as the war pressure is over, the Government of India, I am confident, will repair and restore the breach in the settlement which they are now making, and give to

[24TH MARCH, 1916.] [*Nawab Syed Mohammad Sahib Bahadur.*]

the Provincial Governments their just share of whatever increases, by way of expansion or additional taxation, may be left in the Income-tax imposed upon this country.

"There is one other matter pertaining to my own Presidency which, perhaps, I may be permitted to call attention to, and that is in connection with the construction of the Branch Railway lines in our Presidency. It is well known that Madras was the first Province which began the policy of having branch and feeder lines constructed by the District Boards out of special cesses levied for the purpose, and it is only recently that the Government of India recommended this enterprise on the part of the Boards in Madras for other Provinces to follow, while the terms of Branch line constructions have also been recently revised. It has, therefore, been a matter of special regret to us that in respect of certain recent proposals for the expansion of District Board enterprise in the Madras Presidency in this direction, the Government of India have accepted the offer of a private firm in supersession of the claims of the District Boards concerned, though neither is in a position immediately to begin work. The Government of India, according to a recent Madras Government order, entirely accept the principle that the District Boards should generally have a preferential right to construct branch lines as against private firms offering to do the same, but in the particular case under discussion, the Government of India, it seems to me for very inconclusive reasons, have decided that the private firm's offer may be accepted. I understand that neither private firms nor the Boards will be in a position to raise money in the open market until the Government's Loan operations are over; and there is no necessity to have this question decided immediately. There is now another Railway project which two District Boards are willing to undertake, namely, Ramnad and Tinnevelley, but, owing to the unfavourable financial situation, the Bank of Madras has expressed its inability to find the finance for them at the present time. I trust that the District Board's offer in this case will be considered to be pending as against that of other private offers by firms, and the principle of preference in favour of a public body will be duly given effect to.

"My Lord, as one of the oldest members of this Council, I hope you will allow me the privilege of giving a feeble expression to the feelings which are now uppermost in our minds. You have guided the destinies of this country during one of the most eventful and critical periods of its history; but more than that you have guided the destinies of this country at a time when a terrible and an unparalleled struggle is going on with all the resources of science, resources which should have been used for the improvement of humanity instead of its destruction. Our Empire has intervened in this struggle for the cause of humanity, and not for the aggrandisement of Monarchies or Empires. England has lighted this torch not for unity of race or of State, but for liberty, and whatever might be the fortunes of the war in particular theatres or at particular points, its final outcome can only be one and that is the victory of right over might and of liberty over bondage. If your Lordship has not fought this war of liberty on the field of battle, you have fought it no less strenuously in India herself not only in organising the assistance which this great country is rendering in the conduct of the war, but also in the far greater work of ameliorating the condition of millions of His Majesty's subjects whose Viceroy you have been during the past five years. Your Lordship came to this country pledged to a course of pacific progress in foreign as in home affairs, as the one best calculated to promote the honour and interests of Great Britain and the welfare and progress of the people of India. But war became a necessity, and you did not flinch from taking necessary steps in associating the Indian people in the great struggle which is going on in Europe. Not less courageously, however, did your Lordship champion the cause of liberty against serfdom when the people of this country were in danger of such a state in South Africa under the British flag itself. The services you have rendered to the country at that time not only led to the peaceful settlement of an acute Imperial problem, but it has also elevated the status and the rights of the Indians in the estimation of their fellow members of the Empire, a position which subsequent events in the war have led so much to

[*Nawab Syed Mohammad Sahib Bahadur; Mr. Madhu Sudan Dass.*] [24TH MARCH, 1916.]

strengthen. It would hardly be necessary on the present occasion to speak of the principles that uniformly guided you in the internal policy of the country. Though there have been occasions when differences arose on specific measures, still I do not think there was any time at which either the people or their representatives in this Council felt that your Excellency, both in your official and in your own personal capacity, has not striven your utmost for helping and pushing forward the Indian cause. Of the many measures by which you demonstrated this attachment to the cause of the people and the placing of their interests above considerations of prestige or other vested interests, it is equally unnecessary for me to speak; but what is a matter of the keenest regret with us now is that it has not been possible for you to stay longer—until after the great occasion which, we hope, will arrive on the conclusion of the war for placing India and her people on their true relationship with the Empire as an equal and integral part thereof, with the same status and rights as are enjoyed by the overseas Dominions. We would only miss you in India at that time, but we hope to have at least the consolation of having you in England, in your place, at the time when the Imperial Settlement may be made, to voice the claims of India, to use your knowledge, your position and influence for the millions that are holding your name in such great love and regard, and that you will eventually succeed in obtaining for this country those measures of political reform and a much larger share in the government which would inaugurate for its peoples, an era of Imperial greatness and national progress. In wishing your Excellency a safe voyage home, I pray that you may be called upon in the near future to fill offices greater than the one you are laying down, and take a larger share in shaping the destinies of the Empire. I have only to mention two of your Excellency's last acts to justify this remark. The announcement made by your Excellency the other day about the decision of your Government to abolish the system of indentured labour has been received with universal gratitude, as it will put an end to a form of helotry, to use your Excellency's own word, which has long been resented by the Indian public opinion. I may also take this opportunity of mentioning with what feelings of gratification we have heard of the announcement of the appointment of a Commission to inquire into the question of Indian industries and consider possibilities of their development."

The Hon'ble Mr. Madhu Sudan Das:—"My Lord, it is very late, but I want to say just a few words I thoroughly associate myself with the words of congratulation that have been offered to the Hon'ble the Finance Member. I should like to add that we have reason to congratulate ourselves that we have such an able Finance Member at the present anxious times. It was our highest aspiration to rise to the same level as the other parts of the British Empire. Your Lordship's Viceroyalty has been distinguished by this that you have tried to raise us. Whatever other Viceroys may have done to improve the condition of one class, or to open appointments to certain classes, you, my Lord, have tried to raise India to the same level as other parts of the British Empire. Fortunate or unfortunate I am inclined to look upon the war as providential. Just at this time war has come, and India has been put to the test. There are many critics who do not believe that India is loyal, but Indian loyalty has been put to the test. We have a Finance Minister who is more anxious to raise and protect the honour of India. He is more valuable to us than a person who is only concerned with the pocket of India. The last time in this Council when one of the Hon'ble Members made some remarks which went to show that India did not do her duty to the Empire at this critical time, Sir William Meyer defended India and added the words 'I love the people of India.' I think we should congratulate ourselves that we have such a lover of India as the Hon'ble the Finance Member at this time. As some remarks have been made with regard to the salt tax, it should be remembered that the Budget is a cast iron, cast in England, a sea-girt island—and it is a matter of no great wonder if it absorbed saline matter there, you may blow as hard as you like you cannot melt it, consequently it remains there.

[24TH MARCH, 1916.] [*Mr. Madhu Sudan Das; Lieut.-Col. Raja Jai Chand.*]

" My Lord, I should not be doing my duty if I did not on an occasion like this express the feelings of the people of Bihar and Orissa to your Excellency. When you landed in India as Viceroy, with the rest of India, Bihar and Orissa welcomed your Lordship as a Viceroy, but your special attention to that baby province, to the needs of the province and all that has tended to give it a proper status with the rest of India, has thrown a tenderness around the feelings of the people which I shall not attempt to describe for fear that I might destroy that tenderness. At the commencement of your Lordship's *regime* the sky of India was overcast, but on account of your Lordship's statesmanlike steerage, India was soon brought to regions of sunshine and brightness. Your Lordship's sufferings and sacrifices have been enormous; you alone know the extent and intensity of them. I shall not attempt to describe them, nor can any man; the gratitude of India is written in tears of sympathy on the scroll of a nation's heart, and it may be some satisfaction to your Excellency to know that the example of your Lordship's sacrifices have not been lost as lessons upon the nation; they have borne fruits, precious and invaluable to the Empire, that fruit is India's resolution, at any sacrifice, to uphold the dignity, the honour and the prestige of the British Empire. It is the unanimous hope of the province from which I come and of the whole of India that God may grant your Lordship robust health, long life and prosperity, and may fortune and fame attend you in your future course in the world to which you are proceeding. When the sun the luminary of the day has done its duty in the east and goes down the horizon to the west to run its glorious course there, it does not leave the east in darkness. Your Lordship's sympathetic tone and progressive policy will be left behind, and we shall share them in the doings and policies of those Members who were associated with your Lordship in bearing the burden of the Empire Just as, when the sun sets, we get the reflected light of the sun in the moon, so we shall have the reflected light of the policy of your Lordship in the Hon'ble Members of your Lordship's Executive Council."

The Hon'ble Lieutenant-Colonel Raja Jai Chand:—"My Lord, while congratulating the Hon'ble Finance Member on his surmounting the difficulties confronting this year's Budget owing to adverse circumstances consequent on drought and the greatest war in the history of the world, I can confidently say that the Budget has been prepared with considerable care and foresight.

" My Lord, representing on this Council the Punjab landholders who constitute the backbone of the country, and are already sufficiently burdened by land-revenue, allow me to thank your Excellency's Government on their behalf for very kindly avoiding the imposition of taxes on them at such a critical time.

" Last year I had put some interpellations regarding the maximum and minimum amount of pensions for disabled Indian soldiers, and I am very glad to say that a great deal has been done in that direction. The Indian soldiers have been making innumerable and heroic sacrifices side by side with Allied forces, in defence of the Empire. It is rather more pleasing and a source of pride as well to recall from papers the vivid and glowing description, given every now and then, of the conspicuous gallantry displayed in Dogra Regiments by some Katoch soldiers also of whose caste I have the honour to be a head. It is hoped that a further help would be extended to them by more grant of land The high class Rajput Dogra soldiers of my part of the country cannot plough for themselves, and have their own ancestral holdings, which are quite inadequate, as I once pointed out, to meet their domestic wants for all the year round. It will, therefore, be only fair if more land were to be reserved for distribution among them.

" I may be allowed to make another suggestion, *viz.*, about 'the Indian Army Bandmaster' who almost all are old soldiers. There exists, of course, a very great 'anomaly' in the Indian Army—that of the non-recognition of

[*Lieut.-Col. Raja Jai Chand; Sir William Meyer.*] [24TH MARCH, 1916.]

the Indian Army Bandmaster by the Government of India. I wish that the Indian Army Bandmaster be placed on the same footing with his brethren of the British Army by giving him honorary warrant rank on the Indian *Unattached* list, when they would come under the same rules for pay, clothing, pension, etc., as other warrant officers. The result would be that on one hand many an Indian Army officer, anxious to be off to the front, could be set free from the monotony of Depôt work, and on the other, there must be lots of work with the field army at the present time, either in or out of India, in which an Indian Army Bandmaster could be usefully employed, according to his position instead of having to live and sit idle at his regimental depôt.

"I hope I will be allowed to put in a word for the Indian soldiers, and that is, that allowances granted to them in one theatre of war should be on a par with those granted in the other so that the soldiers may not feel the difference, and I also trust that the question of increase of pension for the soldiers fighting in the battle-field shall receive the favourable consideration of the Government in due course.

"One word more, my Lord, and I am done. My family owes a deep and an everlasting debt of gratitude to your Excellency's illustrious grandfather, in whose benign Government we first got the Sanad-i-Tamlik of the Jagir followed by the grant of the title of Raja. I warmly thank your Excellency on behalf of the Punjab Chiefs' Association of which I have the honour to be a member, and land-holders of the Punjab in whose economic, social and educational welfare your Excellency has always been evincing keen interest. The idea that your Excellency is leaving India at a time when she badly needed your Lordship's far-sighted guidance and sound counsels, is inexplicably shocking and painful, but there is no other way but to yield implicit submission to the decision arrived at by His Majesty's Government. We wish your Excellency safe journey home, and fervently pray to the Almighty God to grant you long and peaceful life and prosperity—.

The Hon'ble Sir William Meyer :—"My Lord, as my friend Mr. Birkett remarked in the course of a very kindly speech, it is a source of great gratification to me, as Finance Member, that the Budget this year has been so well received. As your Lordship said this morning in unveiling the bust of my distinguished predecessor, the preparation of the Budget is, in any case, a difficult and anxious task in India; infinitely more so, of course, in a year in which ordinary conditions have been dislocated by war, and in which it was necessary to prepare a far-reaching scheme of taxation. My Lord, you, as head of the Government, know with what care those taxation proposals were framed, and how anxious we all were to distribute the burdens we had to impose equitably; and I think we have our reward in the reception that the Budget has received. There has been general appreciation of the fact that additional taxation had become necessary; general appreciation of the fact that we had put the burdens on the right shoulders. I do not, of course, mean that there have not been criticisms on this point or on that; it would show an almost unhealthy state of unanimity if there were none such; but I think we are entitled to congratulate ourselves on the reception that the Budget scheme, as a whole, has met with; and I in turn would like to congratulate my Non-official Colleagues of this Council on the business-like way in which they dealt with the legislation which I had to propose a little time ago.

"Well, time is short and Members are naturally wishing to hear your Lordship I won't go again over ground which has been trodden in previous debates as to whether we should or should not have imposed the salt tax, whether we ought to have budgetted for a surplus and so on. All that has been discussed before. We had various criticisms, and I gave what I thought were adequate answers on the part of Government.

"I will just mention a few new points. Various members have shown themselves laudably solicitous, during the debate, as to when these new taxes

[24TH MARCH, 1916.] [*Sir William Meyer.*]

are coming to an end; will they be purely war taxes, or will they go on? I can only repeat what I said on that subject in a debate here on the 7th March, I will read it out:—

'Then, I have been asked what I shall do later on if peace and prosperity return, and we find ourselves in an era of surpluses. I can give no pledge as to the repeal of any particular tax now imposed; when we are nearer to prosperity we shall have to consider the matter. My own personal view is, that when we come to consider the remission of taxation generally, the taxes to be first considered are those which specially affect the poor, and I say this that when we come nearer to prosperity, if I am still in office—or if I have gone, I can say the same of my successor—Government will take into consideration how far the taxes which have been imposed in times of adversity need to be continued, and if remissions are thought desirable, what particular form those remissions should take.'

"I cannot add anything, my Lord, to what I said then. We have had various remarks about the precise form the conversion proposals in our forthcoming loan will take. I am fully cognisant of the importance of the terms to be offered and with the difficulties of the situation. As I said in my speech introducing the Financial Statement, one has to try and hold the balance even between the general tax-payer and the holders of Government Paper. We want, naturally, to help the holders of Government Paper as far as possible, but we cannot do that unduly at the expense of the tax-payer. I shall be going down to Bombay presently, and shall take the opportunity of discussing these matters with representatives of Presidency Banks and others. My Hon'ble friend Mr. Sitanath Ray, for instance, has spoken to me on the subject. I shall be only too happy if he will give me his views in a Memorandum, and they shall be most carefully considered, as also those of any other Member of Council who feels inclined to write to me on the subject. There has been some suggestion as to a separate sub-head for Sanitation: at present we have a single head, 'Medical' which includes Medical and Sanitary expenditure. I shall be very glad to consider the desirability of that; and it is quite possible that by next year we may have accomplished it. I would remind the Council that we did something analogous last year when we separated agricultural expenditure from that on scientific and miscellaneous departments.

"Turning now to certain individual criticisms, I think the only real jarring note was that struck by the Hon'ble Mr. Stewart. Mr. Stewart, somewhat to my astonishment, accused me of being cynical because I gave correct figures about income-tax. He said it was cynical to tell the truth. Well, I would remind him when he laid stress on the small number of people who pay income-tax, that India is mainly an agricultural country, and that agricultural profits are exempt from income-tax. But if you want cynicism pure and unalloyed, take the Hon'ble Mr. Stewart's own case. He sat quiet in Council when we had the discussion on the Tariff Act and the Income-tax Act; never a word said he: when he comes to this day's debate, he proceeds to make a number of criticisms which, if they were valid at all, he ought to have made either by introducing amendments himself at the legislation stage, or by supporting the amendments of somebody else. He now says the income-tax was quite unnecessary, you could have got the amount by raising railway fares, by raising postal charges. Well, the increased railway fares would be contributed mostly by the poor; the postal charges would be contributed largely by the relatively poor. If Mr. Stewart is cynical enough to suggest that he and his friends should get off income-tax in order that the poor may pay extra in the way of railway charges, etc., I certainly am not going to adopt such a proposal; and as my friend the Hon'ble Sir Ibrahim Rahimtoola took occasion to remind him, if we once begin to consider new sources of taxation, there are other possibilities.

"Then my friend the Hon'ble Pandit Madan Mohan Malaviya proposed a Retrenchment Committee. That is a very usual panacea when times are hard, but having had some considerable practical experience of Retrenchment Committees, I can assure my Hon'ble friend that they generally act in the opposite direction. You have a Committee; you hear a great number of suggestions for the decrease of expenditure; the Departments at once get on their mettle and say that this expenditure is of the most desirable description

[*Sir William Meyer; The President.*] [24TH MARCH, 1916.]

and then to carry the war into the enemy's camp they say that, so far from spending too much, they have not been spending enough, and they propose additional schemes of expenditure. So that, as has been remarked at home, Retrenchment Committees generally eventuate in an increase in expenditure. My friend referred to Lord Midleton's Committee at home. I believe we had Lord Midleton complaining in a pathetic way lately that they had made various suggestions for retrenchment which the Government had declined to accept. Again, even assuming that a Committee would be a good instrument ordinarily it would certainly not be so at present. We are all exceedingly busy during the war, not merely at Budget time, but throughout the year, and it would certainly be a very poor economy to have the time of the Finance Department, the Army Department, the Commerce Department, and practically every Department in the Government taken up, when they ought to be doing urgent work by considerations as to retrenchment. I must ask the Hon'ble Pandit to believe that, as Finance Member, I save money where I can, but I also have come to learn, and I am now a middle-aged man, that sometimes it is bad economy to save money, that you may save money and incur greater loss in the way of friction. However, I am sure that my Hon'ble Colleague, Sir William Clark, will bear in mind the admonitions of my friend Mr. Vijiaraghavachariar as to the expenditure on the Telegraph Department.

"Well, I will not detain the Council any longer, my Lord. There are various points which time does not allow me to glance at, but I may assure my Hon'ble friends that I bear them in mind.

"I would thank the Council once more for the kind references they have made to myself; and anything that is said about myself I venture to pass on to the officers of my Department and to my Colleagues in the Government. I have been helped, if I may say so, in a very special way in the framing of this Budget by the Hon'ble Sir William Clark—whom I am so grieved to have to lose presently—and by his officers. I hope, my Lord, that next year, when we meet again, things will have turned out well, that the monsoon will have behaved properly, and that I shall be able to give the Council a more cheerful Budget than on the present occasion."

His Excellency the President:—"Before I deal with the Budget and other matters, I wish to thank Hon'ble Members for the very kind and appreciative remarks that they have been pleased to make on me and my administration in their speeches to-day, and to assure them how highly I value their words, and how much I shall always treasure the remembrance of the very friendly sympathy of the Members of my Legislative Council at this the last meeting over which I shall preside before I leave India. I am profoundly grateful to you all.

"I have to congratulate my Hon'ble Colleague, Sir William Meyer, upon the reception accorded to his Budget. In the earlier years of my Viceroyalty it was our good fortune to be able in effect to give back money to the taxpayer. But on this occasion we have had to raise additional revenue on a considerable scale; and it is a remarkable circumstance that a Budget in which new taxation is the foremost feature has been received with more general approval than perhaps any Budget of my time. I attribute this to two causes—First, we have done our best to distribute the new burdens fairly, and this has been generally recognised. But chiefly, I think, we owe the easy passage of our fiscal proposals to a very general feeling of public spirit which desires to help the Empire at this time of need. In this respect, the Council has faithfully reflected the general body of public opinion outside, and I am grateful to you and to those you represent for thus strengthening our hands. Any measure which fortifies our general financial position is a real service in the prosecution of the war; and though I am happy to say that, in some respects, our position is stronger than might have been expected, I can assure that small minority which still doubts the full necessity of the new taxation that our Budget dispositions take by no means an exaggerated view of the contingencies for which we ought to be prepared.

[24TH MARCH, 1916.] [*The President.*]

"I do not propose on this occasion, amid the pre-occupations of the war period, to embark on any full review of the financial history of my administration. Our policy before the war was one of development, material and social. Our productive capital expenditure had reached by 1914 a scale previously unattained. For education, sanitation and other special purposes, we had increased the permanent resources of the Provincial Governments by one million a year, and to the extent of £7 million more in non-recurring grants. We had reason to hope for a gradually increasing utilisation of India's available resources through the borrowing policy pursued during Sir William Meyer's incumbency of the Finance Membership. Generally, as I think I may claim, we had succeeded, in matters of banking, currency and the like, in getting into closer working association with the commercial community; and finally, our whole finance and currency system had recently been overhauled, and we had hoped, in some directions, to make a fresh start on more progressive lines.

"These hopes and activities have been disappointed and arrested by the war. India, however, cannot complain if the even tenour of her progress has been checked. Her financial system has well withstood the strain of the last 18 months, and she has not had to suffer the complete upheaval of her trade and the diversion of all her energies to other channels The measures which we have taken this session will, I hope, secure her financially in the 12 months which lie before us, and she may hope to emerge from the war in a strong position. I think I may congratulate this Council and the country that this strength has been obtained with relatively so small an addition to her fiscal burdens.

"Sir William Meyer has explained the attitude of His Majesty's Government towards the proposal made by the Government of India that, in the new taxation proposed in this Budget, the import duty on cotton should be raised, leaving the excise duty on cotton at its present rate, an assurance being given by His Majesty's Government of the future abolition of the excise duty as soon as the financial situation would permit of such a course. He has also explained that His Majesty's Government feel that the raising of this question at the present time would be unfortunate, since it would provoke the revival of old controversies at a moment when it is specially desired to avoid all contentious questions both in England and in India, and that it might prejudice the ultimate settlement of larger issues raised by the war. I need hardly say that the Government of India have no desire to create controversy here, in England, or anywhere else at the present time, by the discussion of questions affecting Indian interests, but they are glad to have had the opportunity of placing on official record their views that the import duties on cotton fabrics should be raised, and that the excise duty should for the present remain at its actual figure, and an assurance given that it would be abolished as soon as financial considerations will permit.

"But His Majesty's Government, in expressing their desire that a conflict should not be raised at the present time over the cotton duties, have made a definite declaration which has already been quoted by the Finance Member in his speech introducing the Financial Statement, but which I now repeat as I regard it as of very great importance to India It is as follows :—

'His Majesty's Government feel that the fiscal relationship of all parts of the Empire and the rest of the world must be reconsidered after the war, and they desire to leave the questions raised by the cotton duties to be considered at the same time in connection with the general fiscal policy of the Empire and with the share, military and financial, taken by India in the struggle. His Majesty's Government are aware of the great interest taken in this question in India and of the impossibility of avoiding all allusion to it when new taxation has to be raised, but they are confident that their decision is in the best interests of India, and that premature discussion of this particular issue could only be harmful.'

"Now I wish to be very careful in not reading into this declaration an interpretation that would not be justified, but I think that I am fully justified in saying that it contains an assurance that the fiscal relations of India in the Empire, towards the Empire and towards the rest of the world will be reconsidered after the war in connection with the general fiscal policy of the Empire, and that the best interests of India are

[*The President.*] [24TH MARCH, 1916.]

being taken into account in postponing a decision about cotton duties which, after all, form only a small fraction of the fiscal system built up in India. We are all unanimous, I think, as to what the best interests of India in connection with the cotton duties may be, and I regard this declaration that I and my Government have been authorised to make in the name of His Majesty's Government as a far-reaching pronouncement of statesmanship and full of hope and promise, implying as it does the possibility or, I may even say, the probability of a broad reconsideration of the fiscal interests of India from a new 'angle of vision.' It seems to me to mark a new departure, that it places the future position of India much higher than would have been done by the simple acceptance of the proposals of the Government of India, and I think that the Government and people of India may, with this declaration before them, await the future with patience and confidence

"In closing the discussion on his Resolution of the 20th instant relating to the abolition of Indian indentured emigration, the Hon'ble Pandit Malaviya asked that Government would, as an interim measure, take steps to mitigate certain abuses and hardships in connection with the recruitment of labour in India and its despatch to the Colonies.

"One at any rate of his proposals referred to a matter which was then under consideration, and I thought it best to take a little time for examining it before I replied. I am happy to say I find myself able to meet him on most of the points he brought forward. With reference to his first request, my Government propose to ask Local Governments to examine carefully the conditions under which recruitment for the Colonies is carried out. In the next place, the Government of India will take an early opportunity of arranging for the insertion in the agreement of all necessary particulars regarding the penal provisions of the contract. With reference to the Hon'ble Pandit's third request, I think the best way of meeting it is by our asking the Secretary of State that the attention of the Colonial Governments should be drawn to the religious objections that are felt by many Hindu castes to such forms of employment as those which he mentioned.

"Another six months have passed since I last addressed you in Simla on the subject of the terrible war now devastating Europe, and we seem to be still a long way from its close.

"In the Western theatre of war the British and French Allies steadfastly maintain their position, and are every day growing stronger in numbers, material and supplies. No very serious attack has been made on the British lines that has not been easily defeated, and the French, with their usual bravery, have most gallantly resisted and driven back, with tremendous losses, immense masses of German troops that had been gradually collected by the German Commanders in order to make a supreme effort for a decisive victory before the moment arrives that they anticipate and dread of a general advance on the part of the Allies. This advance will probably not be long deferred and, you may rest assured, that it is being deferred only in order to make it, when the time comes, the more deadly. On the Austro-Italian front the Austrians are being slowly but surely driven back by our gallant Italian Allies. The theatre of war, in which the most decisive results have recently been achieved, has been in the Caucasus and in Northern Persia, where the Russian Generals have gained some remarkable successes, including the fall of the fortress of Erzerum, regarded in Constantinople as impregnable, and the storming of Bitlis, less than 100 miles from the Tigris, together with the capture of immense quantities of prisoners, guns and material, while in North-Western Persia the rebel gendarmerie and the Turks with them have been repeatedly defeated, so that the brave Russian troops have now, it may be hoped, finally destroyed Germany's hopes of making Persia, as she has already made Turkey, the cat's-paw of her insensate ambition.

"There have been unfortunate developments in the Balkans owing to the treacherous intrusion of Bulgaria into the war against Russia, her liberator in the past, and England and France, her supporters and well-wishers in all

[24TH MARCH, 1916] [*The President.*]

her legitimate aspirations. Servia and Montenegro have, after a glorious struggle against overwhelming forces, temporarily ceased to exist as Kingdoms, but the Allies are confident that the Teuton and Bulgarian forces will be ultimately expelled from the lands they have occupied and ravaged in the Balkans, just as Belgium and Poland will witness at no distant time their deliverance from the cruel yoke that Germany has temporarily imposed upon them. There may be some who question upon what such confidence is based, and to these it may be confidently replied that, while Germany and Austria are slowly but surely bleeding to death and unable to compel by any decisive success the peace which it is known that they now desire, England, France, Russia and Italy are daily growing stronger and by close and active co-operation, both military and economic, are exercising a pressure which will soon become irresistible. As I said before in Council last September, the deciding factor in this struggle will be British sea-power. It is the sea which unites and welds together in a common effort the widely distant territories of the Allies. It is sea-power that is protecting the shores of India and Indian commerce from the ravages of the enemy, and it should not be forgotten that, even if—which God avert—disaster befell the arms of England and her Allies on land, British sea-power would still remain, rendering Great Britain and her possessions invulnerable, and placing England in the position of being able to impose terms upon the Central Powers before a single German or Austrian ship would be allowed to sail the open sea with impunity. Not that there can be any doubt as to the ultimate victory of the Allies upon land, but it is the British Navy that is gradually but surely strangling the enemy with a grip that will never be relaxed until peace has been secured on such terms that the smaller Powers shall regain their full liberty and independence, and that civilisation shall no longer be endangered by the dreams of conquest and the military despotism of a Power which has arrogantly proclaimed Might to be Right. Until absolute and incontestable victory has been achieved, there can be no flinching from our duty, and no peace without being faithless to our ideals of truth and liberty and to our responsibilities to civilisation and the future of the world. The German menace that has weighed so heavily on Europe for the past generation must be reduced to impotence and permanently removed.

"Turning to foreign affairs nearer home it is pleasant to be able to state that in Persia there has been a very distinct improvement in the situation. We are on the most friendly terms with the Persian Government, who have at last realised the danger to which their country was exposed by the machinations of German and Austrian bands and are doing their utmost to suppress them. I need hardly say that, in their efforts to restore order, the Persian Government will continue to have our hearty co-operation and assistance in any way that they may desire.

"Our friend and ally, the Amir of Afghanistan, continues to maintain very friendly relations with the Government of India, and has recently renewed his assurances to observe an attitude of strict neutrality, and we have naturally implicit confidence in his royal word.

"On the frontier perfect tranquillity has for some time prevailed, except for raids by gangs of Mahsuds in the Dera Ismail Khan District. The cup of their misdeeds is already overflowing, and the day of retribution is at hand. As soon as our pre-occupations elsewhere are relieved, and when it suits our convenience it will be necessary for the Government of India to take drastic steps to put an end for ever to the campaign of murder and plunder that has disgraced the Mahsud tribe during the past few years.

"Except in Bengal where, I am sorry to say, there has been a regrettable number of murders and dacoities, which dim the fair fame of that province, and which every effort should be made not only by the Government, but by the people themselves to suppress, the internal situation of India could hardly be more favourable, and it is a source of profound satisfaction for me on the eve of my departure to be able to say so. We do not feel the shock of battle here as the nations feel it in Europe, but we have had ample evidence

[*The President.*] [24TH MARCH, 1916.]

of German designs to create trouble in India which have so far proved abortive, based as they were on the fallacy that India would be disloyal to the Empire. During the past 20 months of war the people of this land have displayed a loyalty and patriotism, deeply appreciated by the Empire at large that have been beyond all praise, and have entirely justified the confidence and trust that I reposed in them. Heads of Governments have told me that never in their experience have the relations between the Government and the people been closer or of greater confidence, and I readily believe it. When I hear pessimistic prophecies or apprehensions as to the future of India, I ask myself who, 20 years ago, would have predicted the magnificent loyalty of the Ruling Princes and the people of India which we have seen since the outbreak of war? None ever doubted the valour of the Indian Army, British and Indian. But who would have said 20 years ago that it would be possible to send out of India to the different theatres of war army after army of brave and experienced soldiers? When it is remembered that the largest expedition that ever left the shores of India before the present war numbered only 18,000 men, and that since the outbreak of war, India has despatched about 300,000 soldiers overseas, and has contributed several millions pounds worth of war material to the Empire, I think we have every reason to be proud of the efforts that India has made, and of the situation on, and inside our, frontiers that have rendered such efforts possible. Many gallant men have, alas! died for their country. Of these, the whole Empire is the tomb.

"As this is the last occasion upon which I shall have the privilege of addressing the Members of my Legislative Council, there are certain subjects of general interest, upon which I would like to say a few words.

"My stay in India is now fast drawing to a close, and as I look back upon the past 5½ years, they seem full of incident, and there is much of which India may well be proud, but I cannot help feeling how much there is also that is still left undone, that I would wish to have seen done, and that I am confident will be done in the not far distant future, to secure that peace, contentment, and progressive development which must be the end in view of every far-sighted British statesman who conscientiously recognises the duty of Great Britain towards this country, who remembers the engagements given to the people of this land by successive Sovereigns, and who realises that it is only by the study of the welfare of the people, and by the reconciliation of the administration with the awakening and legitimate aspirations of the people that the foundations of British rule in India can be broadened and solidified. There can be no finer ambition for my country than that the future historian may be able to describe how a bruised but ancient country of old civilisation and culture, after centuries of invasion and conquest, had been uplifted and gradually strengthened till it could stand upon its feet, and how the child had become a source of strength and gladness to its mother country.

"It is difficult as yet to foresee what the results of the terrible war now in progress will be upon the civilisation of the world, but there can be no doubt that national ideals and common aspirations will be purified by the knowledge of the united effort that has been made to crush a debased system of culture founded on the hypothesis that Might is Right. It is devoutly to be hoped that this sense of unity may prevail long after this war has ceased, and that it may be the prelude to the disappearance of all religious, class and racial discord which, I unhesitatingly say, can be productive only of harm, and which tends to sap all healthy development and impede all real progress. In no country is unity more absolutely necessary than in India, but unfortunately, and I say it regretfully, we are still far from that ideal. It can only be achieved by a real effort on the part of all classes to understand each other better and to inspire one another with mutual sympathy.

"During the past few months I have seen mention made in speeches at meetings in the country and in the press of self-government, Colonial self-government and Home Rule for India. I have often wondered whether those

[24TH MARCH, 1916.] [*The President.*]

speakers and writers fully realise the conditions prevailing in Dominions, such as Canada or Australia which render self-government possible. I wish that some of these could visit the Dominions and see for themselves. A study of the history of these Dominions would show that the development of their present self-governing institutions had been achieved, not by any sudden stroke of statesmanship, but by a process of steady and patient evolution which has gradually united and raised all classes of the community to the level of their enhanced responsibilities. I do not for a moment wish to discountenance self-government for India as a national ideal. It is a perfectly legitimate aspiration, and has the warm sympathy of all moderate men. But in the present position of India it is not idealism that is needed, but practical politics and practical solutions to questions arising out of the social and political conditions in this country. We should look facts squarely in the face and do our utmost to grapple with realities. To lightly raise extravagant hopes and to encourage unrealisable demands can only tend to delay and not to accelerate political progress. I know that this is the sentiment of many wise and thoughtful Indians. In speaking thus frankly it is far from my intention to create a feeling of discouragement, for nobody is more anxious than I am to see the early realisation of the just and legitimate aspirations of India, but I am equally desirous of avoiding all danger of reaction from the birth of institutions which experience might prove to be premature. During the past 5½ years I have steadily kept this aim in view, and, as far as I am able, will do all in my power to help the course of Indian progress in the future.

"Nothing that has occurred during the past 4½ years has made me change by a hairs-breadth my views as to the soundness of the policy defined in that much disputed third paragraph of the Despatch of the Government of India of August 25th, 1911, the responsibility for which rests especially upon myself in conjunction with my late friend Sir John Jenkins. The meaning of that paragraph has been much discussed, but as it is written in plain English, I see no necessity for explaining it. I only wish to emphasise the fact that it was not contemplated that the policy adumbrated should be fulfilled in its entirety in the immediate future, or within a specified period of time, but that the progress towards the foreshadowed goal should be steady and gradual. Speculation as to the rapidity with which progress is to be made or the precise definition of the goal to be achieved would be profitless, but my strong advice is not to go too fast, and to be sure that you can walk firmly before you try to run. This is very clearly expressed in the text of the paragraph, and I claim that, during the 4½ years that have elapsed since that Despatch was published, the Government of India have been true to the policy indicated, although they have not always been able to give full scope to their wishes. During that period Bengal has become a Presidency with a Governor in Council; Bihar and Orissa form a Province with a Lieutenant-Governor in Council, and with a majority of elected Members in the Legislative Council; Legislative Councils, with non-official majorities in each, have been given to the Central Provinces and Assam; Bihar and Orissa has received a High Court; and I have no doubt whatever that in a very short time the recommendation of the Government of India for the creation of an Executive Council for the United Provinces and a High Court for the Punjab will be accepted. Surely this is a good record for the past 4½ years, and surely the pace has not been slow.

"A further change in the same direction that I regard as very desirable is greater decentralisation and less interference from the very top to the lowest rung of the administrative ladder, and the recognition that to endeavour to attain a drab uniformity in this country, where such wide variations in habits and thought exist, can only lead to local discontent and ultimate failure. While the Imperial Government retains, and must retain, the power of initiative in policy and control, it should steadily, and on broad lines, delegate more and more power to Local Governments to dispose of matters of merely local or secondary importance. In pursuance of this view, it has been my policy to give as much freedom as possible to Local Governments, and never to

[*The President.*] [24TH MARCH, 1916.]

override them except under the most urgent necessity, bearing always in mind that it should be the part of the Government of India to control, and theirs to administer.

"The fact that, at the conclusion of this great war, questions of far-reaching importance to India will arise, provoking discussion and requiring sympathetic decision, is patent to all. Many such questions have had my most earnest consideration, and the Home Government are in possession of my views as to how they should be solved in a generous measure, but this is neither the time nor the place for dwelling upon them. I was glad when I read Sir Satyendra Sinha's speech at the National Congress last December in which he strongly deprecated treating the satisfactory solution of such questions as a concession in return for Indian loyalty. Loyalty has no price, it is priceless, it is not an object of exchange and barter. Whatever changes may in due course be made will be owing to the fact that they are justified by the indomitable bravery of our soldiers, by the patriotic attitude of the people of India during a period of difficulty and stress and by their political progress and moral development during the past few years. I will only say this, that the question of the improvement of the status, position and prospects of the Indian officers and men of the Indian Army is one that should have precedence over all others, for it is they who have borne the danger, heat and burden of the day, and have nobly maintained the honour and fair fame of India in the vanguard of the British and Colonial Armies in Flanders and other theatres of war. I would urge further that special provision should be made by Government for those who have suffered permanent injuries, as well as for the education of the orphans of Indian soldiers who have perished during the war, and that the future prospects of such children should always be a matter of concern to the Government and people of India.

"As regards the position of India within the Empire, the announcement which I made in this Council last September to the effect that India's demand to be represented in future on Imperial Conferences would be sympathetically considered by His Majesty's Government is, I think, likely to become historic, for it marks the beginning of a new era, and the growth of more liberal ideas in regard to India not previously entertained. At the same time the reception by the Colonial Press of the resolution relating to the representation of India at the next Imperial Conference, proposed in this Council last September by the Hon'ble Mr. Muhammad Shafi and unanimously accepted, was most encouraging, and was a good indication of the change in the angle of vision of our fellow-subjects in the Dominions towards India, and the place that India should hold in the Councils of the Empire. I feel confident that the statesmen of the self-governing Dominions, recognising the splendid services rendered by India to the Empire during the war, will generously seek a modification of the constitution of the Imperial Conference, so as to admit the properly accredited representatives of India to sit side by side with them at the Imperial Council table on terms of equality. I rejoice in this matter to leave India with high opportunity before her to take her place, a just and proud place, in the Empire.

"You may remember that a year and a half ago, I made suggestions for the consideration of Hon'ble Members for the settlement with Colonial Governments of certain emigration questions which had become acute in connection with the case of the *Komagata Maru*. I have not pressed you for your answer to my suggestions during the course of this war, as I have been anxious to eliminate, as much as possible, all controversial questions from our midst. These questions will, however, inevitably arise when the war is over, and I feel sure that the Dominion Governments, realising more forcefully than ever before that India is a living unit of the Empire, will approach all such questions at issue in a broader and more generous spirit than heretofore. But from what I have, on certain occasions, both heard and read during the past year, I do feel that a word of caution is necessary, and that people in India should remember that however desirable the realisation may be of the proud ideal of equal liberty for all those who can say *Civis britannicus sum*, the Dominions

[24TH MARCH, 1916.]	[*The President.*]

have also their own ideals of self-development, and the Dominion Governments are masters in their own houses. In matters such as these which are largely, but not altogether matters of sentiment, they are amenable only to persuasion and not to compulsion. I feel some anxiety lest the people of India may not fully realise the actual standpoint from which the Dominions should be approached, and lest, in striving to grasp the shadow, they should lose the substance. Where interests are held to clash, the principle of reciprocity often affords a basis for a practical solution which would be vainly sought in the assertion of theoretical rights.

"I wish also to say a few words to-day on the subject of the new Capital. As you all know the building of the new city was ordained by the Royal and Imperial word of our King-Emperor, in the presence of the Princes and representatives of the people of India at the Coronation Durbar of 1911. During the past 3½ years, and in fulfilment of His Majesty's commands, plans have been prepared, ground levelled, roads laid out and much necessary spade work has been done. Had the situation been normal, more could have been done during the past twelve months, but, in consequence of the war, I felt it necessary to curtail expenditure to the lowest possible limit consistent with the avoidance of loss Nevertheless the walls of the Government buildings are steadily rising, and I have no fear that the time that has been lost will not be easily made good later on. I may mention that the King-Emperor takes the greatest interest in the progress of the new Capital, and has often referred to it in the letters with which His Majesty has honoured me. The lay-out of the new city and the designs for the Government buildings are on a noble scale befitting the importance and dignity of an Imperial Capital of India For such an enterprise the estimated expenditure is not excessive, and I see no reason why, with intelligent supervision, it should be exceeded. It may take longer to complete than at present reckoned, but what I would urge upon you and the people of India is that no unworthy considerations and petty ideas of parsimony should ever induce you to consent to any curtailment of the future glory and beauty of the new Capital of India, which I am convinced will some day be a source of pride to you and your children's children, and will stand forth in the future as a monument to the progress and national development of India. Sufficient time has now elapsed, and the test of war has sufficed to prove that the move to Delhi has resulted in no loss of efficiency to the Government of India, while the advantages of having the Capital in a central position equally accessible to all, and in a position of detachment from provincial connections, is beginning to be fully realised by all, and by none more than by the Ruling Princes and Chiefs. It is to my mind an integral and essential part of a great national policy of political self-development which must commend itself above all to those who hope some day to see India hold a position of equality amongst the sister nations, of which the British Empire is composed. At the same time it is a source of pleasure to me to know that Calcutta, the premier city in India, has never been more prosperous than it is to-day.

"It only remains for me now to take leave of my Council, and I do so with a pang of regret at the thought of how little more I can do to help and to serve the people of this land. Still I am full of hope and faith in the future, and it is with a deep sense of confidence that I shall in a few days' time relinquish the helm to my successor Lord Chelmsford, whom I regard as a man of noble ideals and of generous sympathy. India will, I know, trust him as India has trusted me.

"In arriving at the close of this session, we have arrived also at the end of the extended term of this Council. I remember well the occasion when I first presided over this Council in Calcutta on the 3rd January 1911. I then stated my hope and belief that a frank expression of opinion might assist us to understand each other and to appreciate one another's point of view. There have been many changes in my Council since then, but throughout these years my hope and belief have been more than justified, and I think I can say, from experience gained in different parts of the world, that this Council is second to none

[*The President.*] [24TH MARCH, 1916.]

in the dignity of its proceeding and the good feeling that animates its Members. We have been Colleagues in this Council for the past 3½ years, and some of us for 5½ years, and surely if anybody has a right to call you his friends it is I, for you have always treated me with invariable friendliness and courtesy, and I think I may say that, during these past years, although we may not always have been in full agreement, I have never known a discordant note in my Council. Further, you and the people of India, whom you represent, have shared with me my joys and my sorrows, and, although the latter have been heavy, I have also had joy which has helped me to bear them. For I have felt that it has been a great joy and at the same time a priceless privilege that I have been able to dispel many illusions and false impressions, and to display not merely to England, but to the whole world the intense and patriotic loyalty not only of British India, but of all the Ruling Princes and Chiefs to the British Crown and the Person of the King-Emperor, and the sacrifices that Indians of all classes and creeds have been ready to make in defence of the Empire and of Right. Whatever the future may bring forth, this will always be a glorious page in the history of India.

"It would be idle for me to pretend that, in taking official leave of you today, I am not deeply affected by the thought that our days of co-operation have now almost closed, but I wish to express to you, Members of my Council and to the people of India whom you represent, my very warm appreciation of the confidence and trust that you have always displayed in me and my administration, and to thank you again for your ever friendly help. I wish also to acknowledge with gratitude the help that I have received from the Members of my Executive Council, the Heads of Governments, Secretaries, and the officials, who have done so much in India in the past of which they may be justly proud, and who are now shaping themselves to meet the changed circumstances of advancing representative institutions. I am the second of my family to hold the highest office under the Crown, and I leave India with an inherited love increased manifold by personal experience of the sterling qualities, the kindness and the sympathy of the people of India. I can honestly say that I have given up my best for India, and that she will never be absent from my heart and my thoughts. I shall continually pray that the peoples of India may be blessed in all those things that make life brighter and better worth living.

"In wishing this Council steady progress and development on safe and sound lines, I now declare this session closed and bid you all farewell."

The Council adjourned *sine die.*

A. P. MUDDIMAN,
Secretary to the Government of India,
Legislative Department.

DELHI;
The 26th March, 1916.

APPENDIX A.

(Referred to in Answer to Question No. 7.)

Statement showing the number of pilgrims who went to, and returned from, the Hedjaz during the years 1914 and 1915.

Year.	(a) Total number of pilgrims to the Hedjaz.	(b) Number of returned pilgrims.	(c) Number of return tickets purchased.	(d) Number of tickets and amount of price refunded.
1914 . .	13,214	* 13,834	...	...
1915 . .	2,482	* 4,638 (including 1,000 Javanese).	1,768	1,716 tickets were used: R185 was refunded on 8 tickets of deceased pilgrims: and 44 unaccounted for.

* Excess of pilgrims returned in 1914 is due to closing of land routes owing to war, and in 1915 due to scarcity of food and return to India of persons domiciled in the Hedjaz.

RESOLUTION.

IN a recent Resolution No. 6—340 to 350, dated the 8th December 1881, regarding the institution of Agricultural Departments in India, the meaning and scope of the principle, that agricultural operations should be maintained at the highest standard of efficiency possible under existing conditions, have been fully explained. With the view of illustrating and urging the practical application of this principle in one particular branch of revenue business, the Governor General in Council now desires to draw the early attention of Local Governments to the system under which instalments of land-revenue payable by landholders to Government are distributed over the year.

2. In considering this subject, no attempt need be made to deal with the wider and more vexed questions connected with the method of assessment and collection of land-revenue Different proposals have been made from time to time with the view of relieving the strain on the agricultural community caused by vicissitudes of season or otherwise due to fluctuations in yield. Some authorities would, completely or partially, revert to the system of collecting a portion of the produce realised at each harvest; others have advocated divers methods of assessment, involving the variation of cash payments with the character of the season. It is not at present proposed to enter upon any review, or invite any discussion of these important and difficult questions. Reference has been made to them merely for the purpose of stating the conclusion that through all these various projects of reform, suggested or supported in many instances by high and weighty authority, there runs one leading idea, *viz.*, that of aiming at a normal proportion between the amount of revenue collected and the amount of produce gathered at harvest.

3. It appears, therefore, to the Government of India that, whenever it is possible, without any serious alteration of existing administrative arrangements and without any material addition to the difficulties of the revenue staff in the

collection of land-revenue, to make any approach towards maintaining a proportion between the harvest outturn and the cash demand, the opportunity should be taken to establish a closer connection between current liabilities and current assets.

4. An easy step in this direction is to distribute the annual assessment under such arrangements as are most convenient to the revenue and rent-payers of the country, with reference to the character and value of the crops which are cultivated in varying tracts of every district. It is unnecessary to dwell on the well-known circumstance, that the amount and dates of payment arranged for instalments of rent are usually determined by the amount and dates fixed for the payment of revenue. The arrangement of revenue instalments most convenient to a large proportion of the tenantry is therefore that which, by requiring payment when they have most cash in hand, allows them the amplest facilities for escape from the money-lender, and the readiest means of avoiding the payment of heavy interest. Any measures which diminish the pressure upon the tenantry to resort to loans at heavy interest will tend to increase the capital at their disposal for investment in agricultural operations, and thus to maintain a better standard of efficiency in agriculture.

5. This principle has been well expressed in the rules for the collection of land-revenue published by the Board of Revenue in the North-Western Provinces in connection with the Revenue and Rent Acts promulgated for that Province in 1873. The Governor General in Council entirely concurs in the general tenor of these rules, which will be found *in extenso* in Annexure I attached to this Resolution.

Principles similar to those implied in the North-Western Provinces rules have since been enunciated by the Famine Commissioners, who have expressed their opinion in the subjoined passage :—

Report of the Indian Famine Commission, Part II, Chapter III, section 3, paragraph 2.—With regard to the number of the instalments, the amounts payable on each occasion, and the dates when they fall due, it is generally admitted that they should correspond to the number of the main crops raised in each year to the average dates when those crops come to maturity, and to the relative weight and value of the harvests. But though these principles are generally admitted to be correct, we learn from the evidence we have received that there are parts of some Provinces, notably of Bengal and Berar, in which they are not fully carried out, and we think the attention of the Local Governments should be drawn to the subject. Where one crop is mostly reserved for food and another mostly sold, if the circumstances of the people require it, larger instalments should be made payable upon the crop which is raised for the market and smaller instalments upon that which is raised for food The dates of payment also should be so fixed as to allow of the produce of the soil being harvested and sold before the instalment is collected, so as to avoid the losses which the landowner would suffer if he were compelled to raise money on an unripe crop or to sell it hastily in an overstocked market. Where the relation of landlord and tenant exists, this principle should be applied so that the dates of payment of the instalments of the land-revenue, on which the dates of the payment of rents must to a great extent depend, should fall a sufficient time after the period of harvest to enable the tenant to realise on his crop before his rent becomes due, and to enable the landlord to collect his rents before the revenue becomes due.

The attention of Local Governments and Administrations was lately invited to these remarks, and their replies are summarised in Annexure II attached to this Resolution.

6. The Governor General in Council, after carefully examining the information afforded, both by the replies summarised in the Annexure and by the reports of revenue administration which have been received from different Provinces, desires to record his satisfaction that the principles expressed in paragraphs 3 and 4 of this Resolution have been generally taken into consideration throughout India. At the same time, he agrees with the Famine Commission that the subject demands further investigation ; and, without adverting specially to any one Province, finds reason to doubt whether these principles are in all parts of all Provinces, carried out to the fullest extent.

7. It is true that in dealing with large tracts of country general attention appears to have been paid to the character of the crops and harvests which are peculiar to each, and that instalments of revenue have been arranged in accordance with the conclusions drawn from the general data thus afforded. But it is not equally clear that sufficient attention has everywhere been paid

to the fact that agricultural circumstances may be subject to extraordinary variation within each tract. To illustrate the meaning of these remarks, it may be mentioned that attention has lately been drawn to the case of three adjacent villages, in one of which the cash of the agricultural community is principally obtained from rice at the end of the rainy season; in the second, from a sugar harvest in January; and in the third, from cereals in spring. Yet for all three villages the same dates were fixed for the payment of rent and revenue. There is reason to believe that, especially in the north of India, similar cases of variation, though generally unnoticed, are of constant occurrence, and are in a great measure due to the capricious distribution of surface drainage, which, more than anything else, destroys the homogeneity of agricultural land. But, in the opinion of the Government of India, the interests of the tenantry in each of the villages of the above illustration require at the hands of the revenue administration equal consideration. It is unlikely that the same distribution of rental demand would be equally convenient to each of the three cultivating communities; and so long as such cases can occur, there can be no sufficient assurance that the seasons of demand have been properly adjusted to the needs of agriculture and the reasonable convenience of the people. In short, it should be ascertained, not only that the circumstances of each tract, but that the circumstances of each village, have been properly considered.

8. There is, however, another consideration involved in the financial aspect of the question which should not be overlooked. As is remarked, with much truth, by the Judicial Commissioner of the Central Provinces, the money market can be sensibly eased by varying the dates of instalments. Where the collection of rent and revenue is, in any large section of a Province, made on one or two uniform dates, it must, at those periods, necessarily stimulate, amongst the agricultural community, a large and unavoidable demand for cash. Prices will therefore tend to fall in consequence of the withrawal of silver; the rate of interest will rise; grain has to be thrown into a slackened market, and loans must be negotiated on usurious terms. It is thus obvious that by adjusting the demands of the State to the different circumstances of villages or tracts, and by introducing into the distribution of payments on account of revenue and rent as great a variety as is consistent with agricultural welfare, the money-market may be relieved, in an appreciable degree, of the pressure which is now of periodical occurrence.

9. In recording the above observations, the intention has been to indicate the general character of the conclusions of the Government of India, not to lay down any hard-and-fast definition of the principles to be adopted in each Province, or to require that any theoretical rule, however logical in appearance, shall be universally adopted. Thus, in many parts of Bengal, the lightness of permanently-settled demand and the system of the sale law combine to give the question more importance in connection with the payment of rents than of land-revenue The primary object, therefore, would in that Province be to make sufficient allowance for local variety of circumstance in fixing the instalments of rent rather than to consider the question in its relation to the payment of revenue. It may indeed be found elsewhere that landlords and even the tenantry themselves, where they are tolerably solvent, prefer some methodical system of fixed instalments devised without special advertence to the harvest yield; and although in dealing with proprietors and superior tenants it must not be forgotten that their opinion may be prejudiced by the fact that a system inconvenient to the cultivator is profitable to themselves in their capacity as money-lenders, yet full consideration should be paid to the wishes or arguments of the agricultural community in each case.

10. There can be little doubt that in temporarily-settled Provinces the arrangements best suited to the circumstances of individual villages can be studied to most advantage during the currency of settlement operations; and it is desirable to ascertain how far the importance of this question has been recognised. In some cases suitable arrangements appear to have been made village by village, in others district by district, or tract by tract—sometimes with, but oftener without, a regard to the interior variations of each locality; while in many settlement reports the subject of rent and revenue instalments is

not noticed at all. In numerous cases it appears to have been left for the district officials in charge of current administrative duties to deal with the question, and it has, from press of business and other causes, been perfunctorily disposed of by the adoption of uniform arrangements for large tracts of country, which are nevertheless known to exhibit great diversity of agricultural conditions.

11. Under these circumstances, the Government of India considers it necessary to require that an investigation may, as opportunity occurs, be set on foot in each district, which may, as time proceeds, provide a guarantee that the requirements of every village in every district have received full consideration. In dealing with this subject, the Governor General in Council takes the opportunity to declare that he has fully accepted the views of the Famine Commission as to the necessity for adopting in every Province some system (such as exists in the Bombay Presidency) under which revenue officials shall maintain a continuous acquaintance with the circumstances and conditions of every village in their charge; and he hopes that a suitable arrangement of revenue and rent instalments may prove one of the earliest fruits of that study of local circumstances which the Famine Commissioners have urged.

12. It is accordingly desired that, in the annual reports of revenue administration received from each Province, special notice may each year be taken of the measures adopted and of the progress made in the direction of effecting a suitable distribution of revenue instalments in each district in accordance with the principles indicated in this Resolution; and also that the subject shall receive the fullest consideration by all settlement officials, in whose reports the arrangements which have been made should be clearly exhibited.

ORDER.—Ordered, that the above Resolution be forwarded to the Local Governments and Administrations noted in the margin for information and guidance.

(True Extract.)

E. C. BUCK,

Secretary to the Government of India.

ANNEXURE I.

Rules for fixing instalments of Rent and Revenue, North-Western Provinces.

The instructions which guide the Settlement Officer in determining instalments of revenue and rent in the North-Western Provinces are these :—

(*1*) *Revenue.*—The provisions on the subject of *revenue* collection are as follows :—

Where the Settlement Officer has not fixed the number and amount of the instalments of revenue and the dates when they fall due, they shall be fixed by the Collector of the district.

The number of instalments of revenue shall be the same as the number of instalments of rent in each mahal, being ordinarily three, *viz.*, two for the kharif and one for the rabi. But where a special instalment of rent is taken, as for sugarcane, a special instalment of revenue shall also be fixed.

The amount of each instalment of revenue shall bear the same proportion to the whole revenue that the instalment of rent paid by the tenants at each period bears to the total rent paid by them.

The dates of the instalments of revenue shall be so fixed as to fall 21 days later than the dates fixed for the payment of instalments of rent by occupancy cultivators.

(*2*) *Rent.*—The instalments of rent shall ordinarily be three in number - two for the autumn (kharif) and one for the spring (rabi) crops. But where any exceptionally valuable crop is grown, as sugarcane, a special instalment may be fixed to be paid out of that crop.

In determining the amounts of the instalments of rent, the following circumstances should be taken into consideration :—

(1) The average amount and value of the produce at each harvest, according to the ordinary rotation of crops practised by the tenant.

(2) The average amount and value of the produce which the tenant retains for his own consumption at each period.

(3) The average amount and value of the produce of which he disposes in the market at each period.

(4) The average expenditure in cash or grain which he is obliged to incur at or about each period.

And the amount of the instalment shall be proportioned to the sum which the tenant can conveniently pay, that is, to the difference between (3) and (4).

If the circumstances of any holding are so exceptional that the proportion of produce in it at different times of the year varies appreciably from the proportion in ordinary holdings, allowance may be made accordingly, *e.g.*, in the case of alluvial lands in which kharif or autumn crops cannot be grown, the whole of the rental may be taken at the rabi or spring harvest, and in the case of light sandy soil, in which only kharif crops can be grown, the whole rent of the field may be taken in the kharif.

The dates at which the instalments shall be fixed to fall due shall be regulated by the time of harvesting ; (1) the early kharif crops (makka, bajra, early rice, and pulses) ; (2) the late kharif crops (juar and cotton) ; (3) the sugarcane (if any) ; (4) the rabi crop.

The dates shall differ for tenants with occupancy rights and for tenants without occupancy rights.

For the former, the date on which the instalment falls due shall be 15 days after the average time of harvesting the crop out of which it is paid.

For the latter, the date on which the instalment falls due shall be the time when the crop of the year is actually ripe and ready for harvesting.

Provided that in the case of crops of the nature described in section 64 (*d*), Act XVIII of 1873, the date shall be for tenants-at-will 28 days before the time when such crops are fit for reaping or gathering

ANNEXURE II.

Summary of replies received from Local Governments and Administrations by the Government of India on the subject of instalments of revenue.

(*a*) The Government of Bombay states that in that Presidency the instalments in force are those prescribed in revised rules promulgated in 1878 under the Survey and Settlement Act. The chief rules are these :—

"(46) The revenue of the year will be leviable at any time on or after the 1st of August ; but under ordinary circumstances it will be allowed to be paid in two instalments. Government, will however, be prepared, on the recommendation of Collectors, to sanction the payment being made in three instalments where such a change may be considered advisable as a measure of relief.

" In Sind the revenue is ordinarily to be paid in three instalments, as follows, *viz.* :—

Kharif or early crop villages.

1st January—15th February—1st April

Rabi or late crop villages.

15th May—15th June—15th July.

" (47) The dates on which the instalments, in the absence of special orders, are for the future to be paid are as follows :—

Class 1.—Kharif or early crop villages in Ghat districts and others in which special early provision may be necessary—

10th December—10th January.

In villages in Guzerat and others not requiring special early provision—

10th January—10th March.

Class 2.—Rabi or late crop villages—

10th February—10th April.

" (48) In Ratnagiri and Kanara the existing date for payment of instalments are to be retained until further orders. In Tanna and Kolaba (excepting the khoti villages) the revenue is to be collected in two equal instalments on 1st January and 16th February

" (49) Subject to the exceptions mentioned in Rule 48, the Collector shall, with the sanction of the Commissioner, classify the villages in the several talukas under one or other of the three heads under Rule 47 in respect to the dates of instalment.

" (50) In districts or parts of districts where the above dates may be found to be unsuitable, the Collectors may, with the sanction of the Commissioners, fix such other dates as they may deem expedient according to the circumstances of the villages comprised in them and the character of the crops generally sown.

" (51) Whenever it is found necessary to fix different dates from those laid down, the Collectors shall invariably forward to Government, through the Commissioners, not later than the 1st of July, lists showing the dates so fixed and the districts for which they have been fixed. These lists shall be published in the *Bombay Government Gazette*.

" In Sind the said lists shall be forwarded to the Commissioner, and published in the *Sind Official Gazette*."

The Government of Bombay especially notices Rule 50, authorising Collectors of districts to vary the general rates fixed in the above rules whenever they are found to be unsuitable. Collectors of districts may also, with the previous sanction of the Government, postpone the collection of revenue in seasons in which the crops are late in unusually arriving at maturity. The revenue of the Presidency is said to be collected in ordinary seasons without any difficulty.

(*b*) The Government of Madras reports that the dates of instalments were revised in 1876, and that the principles enunciated by the Famine Commission were kept in view. In the instructions then given to Collectors by the Board of Revenue it was said—

" The object of the kistbandi is not to secure the payment of assessment before the crop is removed, nor is it intended to secure that no portion of the assessment shall be collected until the land is actually cultivated and some crop raised thereon. Instalments are only intended to render payment of assessment on the lands under occupation easy to the ryots, and this object can be attained by spreading the instalments over a number of months, the heavy instalments coming after the harvest of the chief crops."

These instructions related only to land held under ryotwari tenures. In regard to the permanently-settled zamindari estates of the Presidency, the dates of the revenue instalments are fixed in the *sanads*, and to these the Government must conform in its collections.

(*c*) In the Lower Provinces of Bengal revised dates for instalments of revenue were fixed in 1875 after full inquiry and consideration. For the purposes of revenue payments the districts of Bengal may be divided into three groups—(1) the Bengali and Amli era districts; (2) the Fasli era districts; (3) the districts of Orissa. The first comprised Bengal Proper

including Chota Nagpur. Here the chief crop in the year is the amun rice crop, which comes into the market in January: this month is therefore a convenient and appropriate time for demanding a large portion of the Government revenue from the zamindar. March is also said to be a favourable month, and after March, September. The Fasli era districts comprise the Province of Behar. Here the cold weather crops are later in maturing and in coming into the market than in Bengal Proper. The heaviest instalment is thus made payable in March, and the next heaviest in June. In Orissa, the revenue is realisable in two nearly equal portions, the latest day for one instalment being the 28th April, and for the other the 8th November. The chief rent-paying crop is rice, which is not generally cut until late in February or in March, and the latest dates of payment at present fixed are said to be the best suited to the seasons and harvests. In reporting these facts, the Lieutenant-Governor of Bengal expresses an opinion that no alteration in the practice of the province is required. In some districts or in some years more convenient dates, he thinks, might possibly be found. But "there is no reason to believe that any serious grievance of the kind indicated by the Famine Commission exists, and it is important to have practical uniformity in working the revenue sale law of Bengal."

(*d*) In British Burma the principal crop is rice, which is harvested from December to February. The revenue on all lands is collected early in March, by which time the cultivators are able to dispose of a good portion of their surplus grain in the market. As regards rice-lands, the mode of colllecting the land-revenue fulfils generally the conditions laid down by the Famine Commission. A limited area, however, is under miscellaneous spring crops locally known as *kaing*, for which the present date for collecting the land-revenue is too early. The Chief Commissioner has accordingly directed that in the case of *kaing* cultivation the demand shall be postponed for a month. As the State in Burma deals directly with the cultivator of the soil, the question of the under-ryots' interest in the dates fixed for revenue payments has not yet acquired any importance.

(*e*) The Government of the North Western Provinces and Oudh reports that, in the former territory, the dates of payment of land-revenue have been fixed with reference to the dates on which rents are payable by the tenants. Such dates have in most cases been fixed for each tahsil, either by the Settlement Officer at the time of settlement, or, in the absence of any special order, by agreement. In the rare cases in which rent instalments are not already fixed in one of these two ways, they are held to fall due at certain specified periods before the dates of the revenue instalments. Throughout the United Provinces the revenue instalments have been so fixed as to fall due a short period after the dates on which the rents are payable, thus allowing landholders time to realise them before revenue is demanded. The working of the rules is said to be carefully watched, and changes are made from time to time as may be necessary. The Government has recently drawn the attention of the Board to the large amount of revenue paid by landholders in advance, and has asked whether this does not indicate that in some districts the dates fixed for the instalments are needlessly late. The fact seems to show that the rents have been realised from the tenants earlier than was thought possible when the revenue instalments were determined. As regards Oudh, it is explained that, as the mass of the cultivators are tenants-at-will, the revenue instalments must be fixed with reference to the time at which the landlord collects his rents, rather than to any period at which he ought in theory to collect them:—

> "As the law stands, the landlord can demand his rent from a tenant-at-will whenever he pleases. As this class of tenants have no security to offer except the crop, the landlord will naturally require at least a part of the rent to be paid before he allows the crop to be removed; and this being the case, there is no hardship in requiring the landlord to pay part of his revenue with the rents as realised. To fix the dates for the revenue instalments later will not lead to the landlord postponing his demand for a part of his rent until the crop is out of his power; and to attempt to restrain the landlord from demanding rent until the crop, which is his security for that rent, has been removed, would be a measure of very doubtful expediency."

(*f*) The Chief Commissioner of the Central Provinces states that throughout the Province there are two instalments; and that while no suggestion is made that the number of instalments should be increased, the Commissioners of Nagpur, the Nerbudda division and Chhattisgarh have proposed some alterations in the dates, which have been accepted by him. He refers to the opinion of the Judicial Commissioner, Mr. Crosthwaite, that the dates of payment should be varied as much as possible in order to ease the money market. This should be done not by multiplying the kists, but by varying the dates for Provinces, and even districts. The Chief Commissioner has further reminded all district officers that the rent of tenants is due, according to custom, one month in advance of the dates fixed for the payment of revenue, and that it should be ascertained that landlords do not collect their rents before they actually are demandable.

(*g*) The Chief Commissioner of Coorg reports that the principle enunciated by the Famine Commission is already fully recognised in the collection of the land-revenue of Coorg. On rice-lands five monthly instalments between January and May are fixed, the crop being reaped in December and fully harvested by the middle of March. Similar dates are fixed for revenue payments on coffee-lands, as the crop comes into the market between December and February. In the case of cardamom jungles the revenue is collected in January, as picking commences in October and is over by the end of November.

APPENDIX C.

(Referred to in Answer to Question No. 10.)

Statements showing the proposals of Local Governments and Administrations for the expansion of elementary education during the three years 1913-14, 1914-15 and 1915-16 referred to in the Hon'ble Sir Harcourt Butler's reply in connection with the Hon'ble Mr. Gokhale's Resolution in the Imperial Legislative Council Meeting held on the 25th February 1913.

Abstract of the measures proposed for adoption in each province for the improvement of elementary education.

Province.	Buildings.	Improvement of existing schools.	Expansion of education.	Extension of the principle of free education.	Training.	Direction and Inspection.	Vernacular Middle schools.
Madras	Buildings proposed for 2,500 existing and 1,250 new schools at R2,000 per school. Equipment for 4,500 new schools at R100 per school. School gardens, 1 lakh. Total 80½ lakhs.	1,500 venture schools to be converted annually into board schools costing R375 each Minimum pay of trained and approved teachers has been raised to R10 and will be raised to R12 and that of other teachers to R10	1,500 new board schools will be opened annually, making a total of 4,500 These will be in addition to 2,680 new board schools opened between 1911 and 1914.	A large number of castes and classes have been recognised as backward and permitted exemption from fees It is proposed to extend the concession to poorer classes of the community by compensating schools for the loss of their fee income.	1,000 additional teachers to be trained annually in a two years' course by temporary arrangements.	To be added:— 12 I. E. S. inspectors. 43 sub-assistant inspectors. 20 supervising headmistresses 73 supervisors.	300 lower elementary schools to be raised annually to the higher elementary (vernacular middle) stage, at a cost of an additional R3,000 a year each. The existing 181 higher elementary schools to be improved at a cost of R2,000 a year each.
Bombay	Buildings required number 2,311, including 166 for new schools The cost varies very much the average being R2,943 Total 68 lakhs.	The average cost of the 6,604 board schools to be raised from R429 to R547 a year.	500 new schools to be opened annually at an average cost of R232½ a year each. Between 1911 and 1914, 1,199 new schools have been opened.	Fees to be remitted in board schools to the extent of R10,600 and free books, slates, etc., given to the extent of R35,000 a year	The average number of teachers annually trained to be increased from to 581.	To be added:— 1 deputy director. 1 divisional inspector. 1 inspector of drawing and 1 of science. 2 inspectresses. 5 deputy inspectors. 35 assistant deputy inspectors.	The higher primary standards, which correspond to the vernacular middle schools elsewhere, are provided for in the preceding columns.
Bengal	3,129 buildings will be constructed for existing vernacular schools of which 159 are for middle vernacular schools at a cost of R1,500 each, and 2,970 for aided lower primary schools at a cost of R250 each of which R50 is to be contributed by local people. Total R8,32,500. 2,477 buildings will be constructed for new lower primary schools of which 2,276 are required for Board lower primary schools and 201 in backward localities. Cost of constructing a school varies from R800 to R1,000. Total R20,90,000.	Existing middle vernacular schools to be equipped at R40 each, upper primary schools at R20 each, and lower primary schools at R10 each. Total R3,00,000. Provision of school gardens, etc., R3,00,000. Pay of all untrained teachers to be raised to R9 each and of all trained teachers to R12 each, including income from fees and from other sources.	2,276 schools to be established in each panchayati union and 201 in backward localities at a recurring cost of R120 a year per school	The stipend of existing primary school teachers will be raised with a view to gradual and ultimate abolition of fees in primary schools, and schools will be established in backward localities where boys will either be charged very small fees or no fees at all.	Construction of *guru*-training schools of improved type sanctioned for Eastern Bengal is being pushed on. It will be possible to start about 30 schools during the triennium. Each school will turn out 40 trained *gurus* a year.	To be added:— 6 I. E. S. and P. E. S. officers 171 Subordinate officers.	It is proposed to improve the staff of 159 middle vernacular schools during the triennium. The proposed cost per school is R840 a year against R470 a year at present.
United Provinces	2,400 schools require new or extended buildings and 1,500 new schools are to be erected. The cost for new buildings is R600 for lower, R2,500 for upper primary, and R10,000 for middle vernacular schools.	Head teachers in upper primary schools to get R14—R20; all others R10—R14 if trained; R8—9 if untrained.	500 new schools to be opened annually. Reorganisation and re-staffing of existing schools, rather than opening of new schools, will permit expansion in near future; 500 schools were opened in 1912.	Recommendations of the Committee will be considered.	3 new normal schools to be opened; 100 new training classes already opened; and yet another 100 to be opened, bringing the total up to 309; and each class will hold 8 instead of 6 teachers.	To be added:— 1 registrar of examinations. 5 I. E. S. inspectors. 88 sub-deputy inspectors.	36 new middle schools to be opened and pay to be raised.
Punjab	400 buildings for existing schools and 1,000 for new schools to be erected, at an average cost of R1,200 each.	The average rate of pay in board schools is now R15. Grading is being improved so as to give prospect of rising by promotion to R30.	500 new schools to be opened annually at an average annual cost of R250 per school. In 1912-13, 342 new schools were opened.	Exclusive of exemptions already allowed, 25 per cent. of pupils have recently been permitted to read free on the score of poverty. Probably 75 per cent of pupils can now read free, and the rest pay nominal fees	3 new normal schools to be opened, each for about 80 students Grants are being made for a large number of training classes	To be added:— 1 assistant director. 5 inspectors. 34 assistant district inspectors (of whom 12 have already been appointed).	50 new schools to be opened at an average cost of R2,000 a year per school.
Burma	29 buildings to be erected for existing and 38 for new schools. Money to be given for aided schools as well	The average pay of a trained teacher is R38·5 a month; but that of all primary teachers (including trained teachers) is only R8 a month. It is desired to see it raised to R15 by means of salary grants to untrained teacher-managers in aided schools But the cost would be so great that this scheme is not included in the table. which shows an increase in the average cost of a school from R146 to R193.	10 Government vernacular schools to be opened during the three years, at an average cost of R193 a year each. In addition about 900 additional and aided vernacular schools, chiefly under monastic or lay management, will be brought under the control of the Education Department at the rate of about 300 a year, and at the average cost mentioned above.	No measures considered necessary, on account of large numbers of aided schools and of fre schools	A number of elementary training classes to be established in connection with Government and district cess schools. Requirement of trained teachers is 528, against 160 now annually turned out.	To be added:— 1 P. E. S. assistant inspector. 5 deputy inspectors. 75 sub-inspectors. Additions may also be required to the superior staff.	In addition to 804 high and middle vernacular schools now existing, costing R519 each, an annual increase of some 52 schools, at a cost of R866 each, is anticipated.
Bihar and Orissa	200 buildings to be erected during the next two years for board schools in addition to 90 already erected, at an average cost of R1,000 each, also, about 1,600 buildings for existing aided schools and 1,600 for new schools at an average cost of R400 each.	The pay of trained *gurus* to be raised to R12 and of untrained to R6 Training will take twenty years, and this reform will cost R25,83,000, or R1,30,000 in each of the next nineteen years. But, with a view to improving the pay of untrained teachers by immediate increments, R10,49,500 is included for the next two years, the cost in future years being proportionately reduced.	The number of schools required is 13,500; these, at the end of the twenty years' programme, should be provided by 2,000 board schools costing R300 each and the rest by aided schools costing R100 each. But for the next three years, owing to teachers being untrained, the cost of the latter may be taken at R65. It is proposed in each of the next three years to open 100 new schools at R300 each, and 575 costing R65 each.	Compulsory levy of fees has been abolished, and each teacher must now permit 10 per cent. of his pupils to read free. As stipends rise, it is expected that fees will fall.	There are 116 *guru*-training schools, each admitting 8 pupils every year. Numbers in each to be increased from 16 to 20 and the course reduced to one year. This will permit of 2,320 teachers being trained annually at a cost of R150 each a year: and the whole staff of primary teachers will have been trained in twenty years.	The proposals are to add an assistant director, to raise all deputy inspectors to the P.E.S. and to replace assistant sub-inspectors and inspecting Pandits by a small staff of sub-inspectors, so that each officer will eventually have 100 schools to supervise.	There are 132 middle vernacular schools. It is proposed to erect new buildings for 60 of these, to increase the number of schools by 10 per cent., annually, and to raise the cost of existing schools from R545 to R1,200 if maintained by Local Bodies and R840 if aided.

Abstract of the measures proposed for adoption in each province for the improvement of elementary education—concluded.

Province.	Buildings.	Improvement of existing schools.	Expansion of education.	Extension of the principle of free education.	Training.	Direction and Inspection.	Vernacular Middle Schools.
Central Provinces	800 buildings to be erected for existing and 200 for new schools, at a rate of R1,200 per school.	The average pay is now R12. It is proposed to make the average pay R20 for trained and R10 for untrained teachers. All trained teachers forthwith to receive at least R11; all teachers on R11 or over to be made pensionable forthwith.	300 is the highest number of schools which can be opened annually. A survey is being carried out.	No boy is refused education on the score of poverty. Fees are utilised by school committees. No further steps are necessary.	A second normal school to be opened in each circle.	7 superior and as many subordinate officers as may be required to provide approximately one deputy inspector for each 70 new schools.	Question under consideration.
Assam	400 semi-permanent buildings to be erected for large existing schools at an average cost of R200.	Minimum pay of assistant teachers raised to R8, of head teachers of lower primary schools to R8 *plus* capitation, bringing up average to between R10 and R11.	1,230 new schools to be opened within the three years at a recurring cost of R100 to being with.	Education has been made free up to the end of the middle vernacular stage.	10 new training institutions to be established. This will give an outturn of 300 trained teachers annually; 4 of these schools to be established during the three years' period.	It is proposed to increase the pay of existing officers, to create a new class of appointments (10 in all) for district deputy inspectors and further to increase the staff by the appointment of 10 additional sub-inspectors.	Wide extension contemplated, obstacles in way of development of primary schools being done away with and all large village schools encouraged to advance to middle vernacular standard.
	1,230 non-permanent buildings to be erected for new schools by means of local aid, savings on recurring grants and a small initial grant of R20.	New scale of R20, R12 and R10 for three teachers introduced into all upper primary schools and into 50 existing lower primary schools which are aiming at development to middle vernacular standard; new scale to be extended to a fresh instalment of 50 such schools annually.	Expansion to proceed concurrently by extension of existing schools and introduction of measures which aim at large increase of enrolment by keeping children longer in school.				
	Existing buildings to be extended at the rate of 100 a year and at a cost of R100 each to provide accommodation for increased staff and enrolment.	Number of teachers to be increased by 100 a year so as to provide one teacher for every 30 to 35 hildren in average attendance					
Coorg	1 building to be erected for an existing school at a cost of R2,[illegible]00. 11 buildings to be erected for new schools, 1 at a cost of R2,000 and 10 at a cost of R450 each. 24 existing buildings to have tiled roofs instead of thatched ones and 4 other buildings to have extensions made to them.	The minimum pay of teachers in Government primary schools to be raised from R10 to R12 per month. Revision of the scale for teachers in Local Fund schools and the raising of the minimum from R8 to R12; additional teachers to be entertained and school buildings extended to remove congestion. More furniture and appliances to be provided and stipends to be granted for Panchama children.	14 elementary schools have already been started and 10 more will be established during the triennium.	The Local Fund schools in Kumbarogadige, Garvale and Surlabi are free institutions. It is proposed to make the schools in the villages of Pulicote, Santalli, Haraga and Galibidu free.	The Mercara Training School with its present staff and stipends is expected to be able to cope with the work of training all the required teachers within the course of the next five or six years.	No additional inspecting staff is required.	7 selected primary schools will be raised to the higher elementary grade.
North-West Frontier Province.	100 buildings to be erected for existing and 105 for new primary schools. The former to cost R1,500 each, the latter R1,000 each. 2 buildings to be erected for existing and 6 for new vernacular middle schools at a cost of R15,000 each. Equipment and (in the case of middle schools) hostels and play-grounds to be provided.	Average pay of trained teachers is now R15, of untrained teachers R8-14. An elementary teachers' service has been formed and the pay of a number of posts will be raised to enable them to be filled with trained men.	100 new schools to be opened in each of the two years 1914-15 and 1915-16 at a cost of R250 a year each. In 1912-13, 100 new schools were opened; in 1913-14, 105 new schools were opened. This forms part of a scheme for opening 445 new schools between 1912 and 1917.	Primary education has been made free in Government and board schools. The example has been followed, with few exceptions, by schools under private management. Contributions are made to cover loss of fees.	The number of stipends at the normal schools has been raised from 60 to 80, and will be raised to 100 and 120. This will allow 114 teachers to be turned out annually and all existing and proposed schools will be staffed by trained teachers in seven years.	No additional inspecting staff is required.	4 new schools to be opened in each of the two years 1914-15 and 1915-16 at a cost of R1,800 a year each. In 1912-13, 3 schools were opened, and in 1913-14, 4 schools.
Delhi	25 buildings to be constructed at a cost of R2,000 each, and equipment supplied. 2 district board vernacular middle schools to be partially rebuilt and enlarged at a cost of R7,500 each. 6 urban elementary schools to be provided with new buildings at a cost of R12,000 each. 3 new district board vernacular middle schools to be built at R12,500 each.	Recognised schools will receive R700 a year, and unrecognised schools will receive R200 a year.	20 new district board and 17 new municipal schools to be opened.	......	No teachers trained at present. It is expected to turn out 10 teachers a year at a cost of R314 per teacher per annum.	To be added:— 1 I. E. S. Superintendent of education.	3 new schools to be opened at an average cost of R2,400 per annum.

Their future is too uncertain to enable any detailed figures to be given. The present grants are close on 5 lakhs and for revision of these an additional [illegible] per annum may be required. This would bring the figure in column 23 to 3[illegible] and the figure in column 25 to 8. For figure in column 5 please see table of capital expenditure. * It has since been reported that the number should be 32.
5 Panjab	120	1,700	170	2,000	3,00,000	6,50,000	9,00,000	..	3,00,000	3,00,000	
6 Burma	804	519	960	806	8,78,600	3,09,000	25,88,500	6,10,300	2,27,000	3,02,400	Figures rounded off to the nearest hundred.
7 Bihar and Orissa	115	545	150	1,000	1,41,000	7,25,500	12,49,000	.	3,83,500	1,82,000	† To Government. The present number of schools is 20,500.
8 Central Provinces	228	1,800	300	2,000	2,00,000	3,60,000	12,30,000		3,50,000	5,30,000	Column 22 is the expenditure already sanctioned from the Government of India's recurring grant. No expenditure has been shown from Provincial Funds proper. ‡ It has since been reported that the number should be 17. § Or as many subordinate officers as may be required to provide approximately one Deputy Inspector for each 70 new schools.
9 Assam	34	955	...	..	1,00,000	4,49,400	3,55,600	..	1,05,700	1,44,200	Figures rounded off to the nearest hundred. *Column 2*.—The average of Rs. 396 will be applicable to only schools during the period of experiment. In other schools a policy of gradual increase will be developed. *Column 15*.—(a) Includes the creation of 10 new posts for District Inspectors. The figures in columns 14, 15 and 16 are the outcome of a rough estimate of a scheme as yet very imperfectly considered. *Columns 19 and 20*.—The policy adopted does not permit of filling in of these columns. *Column 22*.—The figures entered in this column are the additions to the amount of the recurring grants for elementary education (boys) so far as spent in 1913-14 on recurring purposes and full amount of the grants (Rs. 2,00,000) in 1914-15 and 1915-16.
10 Coorg	...	...	7	985	9,600	...	49,600	12,800	3,300	4,600	Figures rounded off to the nearest hundred.
11 North-West Frontier Province	16	1,4.5 1/8	28	1,800	58,600	1,55,300	1,11,600	..	38,200	35,200	Figures rounded off to the nearest hundred.
12 Delhi	2	2,400	5	2,400	18,200	...	27,200	16,000	38,400	2,400	Figures rounded off to the nearest hundred.
Total	2,220	...	3,061	...	80,02,900	81,34,700	3,09,75,600	53,3[illegible],900	46,57,600	56,04,700

CESSATION OF EXCLUSIVE PRIVILEGES.

The public are warned that entries under this heading must not be accepted as final, as under the provisions of Rules 9 and 11 of "The Indian Patents and Designs (Temporary) Rules, 1915," the Controller may extend the time prescribed by the Indian Patents and Designs Act, 1911, and by the Inventions and Designs Act, 1888, for paying the necessary renewal fees.

The Patent Office will supply on request definite information, so far as possible, as to the position of any particular Patent or Exclusive Privilege.

1911.

209, (Schleiffer). 312, (Dormer).

DESIGNS ENTERED ON THE REGISTER.

March 27th to 1st April.

Class 1. No. 3479. Akbar Razzaq Farid, Bhindibazar, Phulgali Corner 9, Bombay, January 7.

Class 13. Nos. 4090 and 4091. Anderson Wright & Co., 22, Strand Road, Calcutta. March 28.

NOTICES.

THE PATENT OFFICE, 1, COUNCIL HOUSE STREET, CALCUTTA.

Public room, open 11 a.m. to 4 p.m.; Saturdays, 11 a.m. to 1 p.m.

1. ***All communications*** **relating to applications for patents and for registration of designs under the Indian Patents and Designs Act (II of 1911), or in continuation of applications under the Inventions and Designs Act (V of 1888) should be addressed to the** Controller of Patents and Designs, 1, Council House Street, Calcutta. Documents sent by post should be carefully packed.

2. *Directions* for the guidance of inventors and others are given in the Patent Office Handbook (price one rupee) which contains the Indian Patents and Designs Act, 1911, the Indian Patents and Designs Rules, 1912, the Indian Patents and Designs (Temporary Rules) Act, 1915, the Indian Patents and Designs (Temporary) Rules, 1915, together with current regulations and instructions. These should be consulted before an application is made to the Controller.

3. *Advice.* The Patent Office cannot undertake (1) to give opinions on the interpretation of Patent Law, or on the advisability of protecting inventions and designs or on their infringement; (2) to make searches in respect of information available in the public room; (3) to recommend any particular agent; or (4) to assist in the disposal of inventions. **Applicants are warned that the Indian Patents and Designs Act, 1911, is in force** in British India only, and patents granted under it do not extend to the United Kingdom **or any of the British possessions. The International Convention for the Protection of** Industrial Property does not include India. For information regarding patents in countries other than India applications should be made to the patent offices in the countries concerned.

4. *Fees* are payable in *cash* and must be received in the Patent Office within the time allowed by the Acts. When cheques are offered in payment of fees, it must be clearly understood that the office cannot hold itself responsible for any delay that may occur in the collection of cash on the cheques; any cheque not payable in Calcutta is subject to commission. In cases where it is not possible to have the fees handed in at the Patent Office, it is preferable to send them by money-order or postal order payable at Calcutta to the Controller of Patents and Designs, and to advise him that they have been so sent. Stamps will not be received in payment of fees.

5. *Trade and property marks and names* are not registered and ***medicines*** **are not** patented under the Indian Patents and Designs Act. There is no provision of Law in British India for their registration. Neither does this Act deal with *pictures, photographs*, etc., for which copyright is obtainable under the Indian Copyright Act, 1914.

6. *Printed Specifications* of applications, which have been accepted, are published within about three weeks after acceptance has been notified in the *Gazette of India*. These specifications can be purchased at the Patent Office at a uniform price of 8 annas

per copy; and may be seen free of charge, together with other publications of the Patent Office, at the following places:—

O. F. JENKINS,

Secretary and Member, Board of Examiners.

SULPHATE OF QUININE, SULPHATE OF CINCHONIDINE, CINCHONA FEBRIFUGE, RESIDUAL ALKALOID AND QUINOIDINE.

Manufactured at the Bengal Government Cinchona Plantation.

These articles are guaranteed to be free from wilful admixture with other Cinchona alkaloids. Quinine can be purchased by Government officers, District and Local Boards for Hospitals and Dispensaries in the Provinces of Bengal, Bihar, Punjab and Assam on indents duly countersigned by the Civil Surgeon of their Districts. It can also be purchased by Missionaries for *bonâ fide* public purposes. It is never sold to private persons or firms. Cinchona Febrifuge both in powder and 3¼ grain tablet forms and Cinchonidine can be purchased by Government officers and the general public. It is also sold by the Principal Druggists in Calcutta. Quinoidine or *Pure amorphous alkaloid* and *Residual Alkaloid* or *Amorphous cinchona alkaloid*, which contains about 40 per cent. of *pure amorphous Alkaloid*, are for sale to Missionaries and Government Institutions only. *These drugs are sold strictly cash and in advance but private purchasers may use the V. P. Post system*, and are obtainable from The Superintendent, Juvenile Jail, Alipore.

The rates for these drugs from 1st April 1916 are as follows:—

SULPHATE OF QUININE.

	R
For quantities 60 lbs. and above in one delivery	21-8 per lb.
For quantities of not less than 6 lbs. but below 60 lbs. in one delivery	22-8 ,,
For any quantity less than 6 lbs.	23 ,,

SULPHATE OF CINCHONIDINE.

	R
For quantities of not less than 6 lbs. in one delivery	11 per lb.
For any quantity less than 6 lbs.	12 ,,

CINCHONA FEBRIFUGE.

	R
For quantities of not less than 6 lbs. in one delivery	5 per lb.
For any quantity less than 6 lbs.	6 ,,

RESIDUAL ALKALOID OR *AMORPHOUS CINCHONA ALKALOID* AND QUINOIDINE OR *PURE AMORPHOUS ALKALOID* AND QUINOIDINE TABLETS.

	R
For any quantity	4 per lb.

Quinine is available in 1-oz., ¼-lb., ½-lb., 1-lb. and 4-lb. tins.
Cinchonidine is available in ¼-lb., ½-lb. and 1-lb. tins.

By order of the Hon'ble the Lieutenant-Governor, United Provinces.

R. BURN,
Chief Secretary to Government, United Provinces.

TREASURE TROVE.

NOTIFICATION.

It is hereby notified under section 5 of the Indian Treasure Trove Act, VI of 1878, that in the beginning of October 1915 an idol of Vigneswaraswami made partly of bronze and chiefly of copper valued at Rs. 70 was found buried underground in S. No. 335 of Mel Bhuvanagiri village in the Chidambaram taluk, South Arcot District, Madras Presidency (held on patta by one Pushpavalli Thayaru), by one Ayyakannu Padayachi, son of Ponnappadayachi, while digging up the roots of prickly pear.

2. All persons claiming the said treasure or any part thereof are hereby required to appear personally or by agent before the Collector of South Arcot at his office at Cuddalore on Monday, the 7th day of August 1916, in view to the matter being enquired into and determined according to law.

M. AZIZUDDIN,
Collector.

NOTICE.

Dated Delhi, the 1st April 1916.

No. 2225-*C. & I*.—In exercise of the powers conferred by section 18 of the Punjab Excise Act I of 1914, as applied to the Delhi Province and in supersession of this Office notification No. 1871-C. & I., dated 22nd March 1915, the Chief Commissioner is pleased to direct that no, exciseable article exceeding the quantity for the time being declared to be the limit of retail sale shall be imported exported or transported except under a pass issued in accordance with the rules for the time being in force in the Delhi Province for such imports, exports and transports and with reference to the first proviso to the said section the Chief Commissioner is pleased further to direct that the foregoing prohibition shall apply to all duty paid foreign liquor manufactured in India.

Delhi, the 3rd April 1916.

No. 2235-*Home*.—In exercise of the powers conferred by section 12, sub-section (1) of the Indian Press Act, 1910 (I of 1910), the Chief Commissioner hereby declares to be forfeited to His Majesty all copies, wherever found of a leaflet printed in English headed " From the Office of the Director-General, Indian Revolution Vigilance Department, Bengal Branch, to the public in General and members of out camp," beginning with the words "whereas it appears that the undermentioned " and ending with the words " will be published later on," and all copies of all other documents containing the matter of the said leaflet, on the ground that the said leaflet contains words which are likely or may have a tendency to induce members of the public by threats to refrain from associating with certain persons named therein, and therefore appears to the Chief Commissioner to contain words of the nature described in section 4, sub-section (1), clause (*d*) of the said Act.

No. 2256-*C. & I*.—In exercise of the powers conferred by sections 17 and 24 of the Punjab Excise Act, I of 1914, as applied to the Delhi Province, and with the previous sanction of the Governor-General in Council, the Chief Commissioner is pleased to make the following amendments in the rules published with this office notification No. 4220-C. & I., dated 24th June 1915 :—

The following shall be substituted for rules 5, 6 and 11 of the said rules :—

(5) Before the drugs covered by the permit referred to in rule 3 are exported from the Bombay Presidency, the permit must be presented by the importer or a recognised agent to the Collector of Customs, Bombay or Karachi, and endorsed by such officer with an export pass.

(6) The pass referred to in rule 5 shall cover the transport to their place of destination of the drugs mentioned therein within the period stated in the pass.

(11) Before the drugs covered by the permit referred to in rule 10 are exported from the Bombay Presidency, the permit must be presented by the importer or a recognised agent to the Collector of the district of the export and endorsed by such officer with an export pass.

No. 2258-*C. & I.*—In exercise of the powers conferred by section 59 of the Punjab Excise Act, I of 1914, as applied to the Delhi Province, the Chief Commissioner is pleased to make the following amendments in the rules for the import and transport of cocaine published with this office Notification No. 4226-C. & I., dated 24th June 1915 :—

(1) At the end of rule 1 (i) omit the fullstop and add "on application which should be submitted in form A annexed".

(2) In rule 1 (ii) *for* "form A" *substitute* "form B".

(3) Substitute the appended forms for forms A and B.

No. 718-*D*.—The Reverend W. L. Clarke assumed charge of his duties as second Chaplain of Mhow on the afternoon of the 17th February 1916.

By order,

A. R. JELF,

First Assistant to the Hon'ble the Agent to the Governor-General in Central India.

ORDERS BY THE HON'BLE THE CHIEF COMMISSIONER, AJMER-MERWARA.

NOTIFICATION.

Mount Abu, the 29th March 1916.

No. 423—8.—Whereas the land designated below is required for a public purpose, this declaration is made accordingly under the provisions of section 6 of the Land Acquisition Act, I of 1894.

District.	Parganah.	Mauza.	Approximate area.	For what purpose.	REMARKS.
Ajmer-Mewrara.	Ajmer .	Ajmer .	Area—14¼ square yards .	Widening street .	The plan can be seen at the office of the Collector of Ajmer-Merwara.
			East—Street . .		
			West— „ . .		
			South— „ . .		
			North— „ . .		

Under section 7 of the Act, the Collector is hereby directed to take order for the acquisition of the land specified above.

Dated Mount Abu, the 1st April 1916.

No. 442—1090.—In exercise of the powers conferred by section 62 (*d*) and (*h*) of the Excise Regulation, I of 1915, the Hon'ble the Chief Commissioner is pleased in supersession of Notifications Nos. 497 and 498, dated the 14th May 1906, and of Notification No. 600, dated the 20th May 1907, to prescribe—

(1) the following rules to regulate the grant of licenses to the 15 Tazimi Istimrardars of the Ajmer-Merwara District permitting them to work their own private distilleries, and

(2) the form of license :—

1. In these rules unless a different intention appears from the subject or context—

(*a*) " Collector " means the Collector of Excise Revenue in Ajmer-Merwara.

(*b*) " Chief Commissioner " means the Chief Commissioner of Ajmer-Merwara.

(*c*) " License " means a license granted for a distillery under section 13 (*e*) of the Excise Regulation in the appended form.

(*d*) " Istimrardar " means a Tazimi Istimrardar of the Ajmer-Merwara District.

2. Licenses may be granted in such number and subject to such conditions as the Chief Commissioner may approve or impose under the provisions of section 62 (*h*) of the Excise Regulation.

3. An Istimrardar desiring to obtain a license for a distillery under section 13(*e*) of the Excise Regulation, I of 1915, may apply to the Collector for such license.

Every application for a license shall be in writing and shall contain the following particulars :—

(*a*) The name and address of the Istimrardar.

(*b*) A description of the site on which and of the buildings in which the distillery is to be constructed and worked under the license applied for.

(*c*) A description of the still to be worked and its size and capacity.

4. No license shall be granted to an Istimrardar unless and until he, or in the case of a minor whose person and property are under the management of the Court of Wards, the General Manager of the Court of Wards, has :—

(*a*) agreed in writing to comply with each and all of the requirements of the Excise Regulation, and of the rules made thereunder, and of the conditions prescribed in the license ;

(*b*) satisfied the Collector that the premises and buildings proposed are suitable.

5. In the case of a minor Istimrardar whose person and property are under the management of the Court of Wards, the license in his favour shall be issued in the name of the General Manager of the Court of Wards.

6. The license shall ordinarily remain in force during the lifetime of the Istimrardar to whom it is granted, but the Collector shall be competent to recall the same at any time if he considers that any of the conditions imposed by the license are not being duly observed.

The concession is permissive, but in the absence of orders of withdrawal, it shall be renewable under similar conditions to the Istimrardar's successor.

7. Every license granted under these rules shall be in duplicate and shall be signed by the Collector on behalf of Government, and also by the Istimrardar concerned. One copy shall be delivered to the Istimrardar or his authorised Agent, and the other shall be retained in the office of the Collector.

License for the distillation of Liquor in Istimrari Estates:—

Whereas Istimrardar of in the district of Ajmer-Merwara has agreed to abide by the following conditions regarding the distillation of liquor by him :

Therefore the Collector of Excise Revenue, Ajmer-Merwara, with the approval of the Honourable the Chief Commissioner, Ajmer-Merwara, hereby grants to the said the privilege of distilling liquor.

Conditions.

1. He is bound by pledge to manufacture liquor only for his own consumption or that of his guests and others who eat at the same table with him, and not to manufacture any greater quantity than that mentioned in the statement annexed to this license on his own premises.

2. He is bound to submit to the Collector in the month of April every year an estimate of the annual quantity of liquor required for his own consumption.

3. He shall not bring any liquor to Ajmer except under a pass which will be granted free of charge by the Collector.

4. He is bound to render all reasonable assistance in his power to Excise Officers in the execution of their duty.

5. All liquor shall be manufactured in some convenient place outside his residence, which shall always be open to inspection by the superior officers of the preventive establishment.

6. All indents for Mhowa flowers and Molasses required by him for the purpose of manufacture of liquor shall be submitted to the Collector for information.

7. The strength of the liquor distilled by him shall not be weaker than 10° nor stronger than 5° under proof.

8. An account of the liquor distilled shall be kept in the following form by the Istimrardar who shall send to the Collector by the 15th October and 15th April in each year an extract therefrom showing the amount of material purchased and liquor distilled by him during the previous six months :—

MATERIAL PURCHASED.

No.	DATE OF MANUFACTURE AND PURCHASE.	QUANTITY PURCHASED.		REMARKS.

SANCTIONED SCALE.

Mhowa . . . . Maunds.

Gur . . . . ,,

9. A copy of this license in English and Hindi shall be hung up in a conspicuous place at the site of the still.

10. The quantity of material allowed for distillation shall in no case be exceeded except under the sanction of the Collector previously obtained.

11. Should the Istimrardar infringe any of the above conditions, his license shall be liable to cancellation, either temporarily or permanently.

By order,

B. J. GLANCY,

First Assistant to the Agent to the Governor-General, Rajputana, and Chief Commissioner, Ajmer-Merwara.

* Agents for the sale of Legislative Department publications only.

NOTICE.—Books and Acts required for private use only can be purchased. Applications should be accompanied by a remittance, unless it is wished that the book should be sent by value-payable post, in which case, besides the ordinary postage, an additional charge is made for registration and commission.

Books and Acts required for the public service should be obtained through the Local Government to whom the applicant is subordinate.

Application for Government publications which are no longer in print should be made to the Agent to the particular Government under whose orders they were originally issued.

[The amounts within parentheses are for packing and postage.]

NOTE.—These statistics are compiled from *fortnightly* returns furnished by Local Governments and Administrations. They relate to the wholesale prices in the markets referred to above which prevailed on the last (or nearest mart) day of each fortnight. The statistics for Karachi, Bombay and Calcutta are compiled from the Chambers of Commerce Market Reports.

(a) Price for the fortnight ending the 31st July 1914 being taken as 100.

India per maund of $82\frac{2}{7}$ lbs.

SIMLA, FRIDAY, APRIL 7, 1916.

FOREIGN AND POLITICAL DEPARTMENT.

NOTIFICATION.

Simla, the 7th April, 1916.

The Governor General in Council announces with deep regret that the Hon'ble Lieutenant-Colonel Sir Alexander Fleetwood Pinhey, K.C.S.I., C.I.E., I.A., Resident Hyderabad, died unexpectedly from enteric fever at Hyderabad on Friday April 7th.

Sir A. Pinhey joined the Government of India, Political Department, in 1886 and he served for 20 years in the Agencies of Rajputana and Central India gaining a reputation as a wise and tactful officer in sympathetic touch with the Darbars of the States to which he was accredited.

In 1908, Colonel Pinhey officiated for some months as Private Secretary to the Viceroy, Lord Minto, in which appointment his wide knowledge of Native States made him especially useful. After a year as Agent to the Governor General in Rajputana he was again recalled to the Private Secretaryship which he held until Lord Minto's departure from India.

In 1911 he was appointed to be Resident Hyderabad from which post he was due to retire in July next.

The Government of India desire to place on record their high appreciation of his long and distinguished service and they deplore the untimely fate which struck him down on the eve of retirement.

The Governor General in Council is pleased to order as a mark of respect that at Fort William, at Hyderabad and at the headquarters of all other Local Governments and Administrations, flags shall be hoisted halfmast high on the day fixed for the funeral and that 13 minute guns shall be fired at the hour when the funeral takes place.

ESTABLISHMENTS.

The 4th March, 1916.

No. 179.—Mr. H. G. Warburton is permitted to resign His Majesty's Indian Civil Service, with effect from the 1st January 1916.

Delhi, the 6th April, 1916.

No. 1268-C.—The Honourable Sir William Henry Clark, K.C.S.I., C.M.G., has resigned his office as an Ordinary Member of the Council of the Governor General of India, with effect from the 5th April 1916.

No. 1269-C.—A vacancy having occurred in the office of an Ordinary Member of the Council of the Governor General of India by the resignation of the Honourable Sir William Henry Clark, K.C.S.I., C.M.G., His Majesty the King, Emperor of India, has been graciously pleased to appoint Sir George Stapylton Barnes, K.C.B., to be an Ordinary Member of the Council of the Governor General of India.

The Honourable Sir George Barnes has, on this day, taken upon himself the execution of his office under the usual salute.

PUBLIC.

Bombay, the 4th April, 1916.

No. 1260-C.—The Right Honourable Sir Frederic John Napier Thesiger, P.C., G.C.S.I. G.C.M.G., G.C.I.E., Baron Chelmsford, appointed by the King, Emperor of India, to be His Imperial Majesty's Viceroy and Governor General of India, arrived by Peninsular and Oriental steamship "Kaisar-i-Hind" at Bombay on the morning of this day, attended by his personal staff. Lord Chelmsford was received at the Apollo Bandar by His Excellency the Governor of Bombay, the Ordinary Members of the Council of the Governor General, His Excellency the Commander-in-Chief of His Majesty's Ships and Vessels, East Indies Station, the Chief Justice of Bombay, the Lord Bishop, the Ordinary Members of the Council of the Governor of Bombay, the Judges of the High Court, the Additional Members of the Council of the Governor General for making Laws and Regulations (resident in the Bombay Presidency), the Secretary to the Government of India, Home Department, the Secretary to the Government of India, Foreign and Political Department, the General Officer Commanding, 6th (Poona) Divisional Area, the Surgeon General with the Government of Bombay, the Commissioners of Revenue and Customs, the Additional Members of the Council of the Governor of Bombay for making Laws and Regulations, the Vice-Chancellor of the University of Bombay, the Archdeacon of Bombay, the General Officer Commanding, Bombay Brigade, the Secretaries to the Government of Bombay, the Heads of Departments, Civil and Military, the Collector of Bombay, the President of the Municipal Corporation of the City of Bombay, the Municipal Commissioners of Bombay, the Officers Commanding His Majesty's Ships in Harbour, the Officers Commanding Royal Indian Marine Ships in Port, the Officers Commanding Regiments, the Commissioner of Police, Bombay, and the Sheriff of Bombay, and by other high officials present in the Presidency Town. His Lordship then proceeded to Government House, Malabar Point.

2. On the afternoon of this day Lord Chelmsford, after bidding farewell to His Excellency Lord Hardinge, proceeded to the Secretariat where his Warrant from His Majesty the King, Emperor of India, was read by the Secretary to the Government of India in the Home Department in the Council Chamber in the presence of His Excellency the Governor of Bombay, the Ordinary Members of the Governor General's Council and the principal officials of the Bombay Government. His Excellency thereupon took his seat in Council.

3. A Royal Salute was fired from the Saluting Battery in honour of Lord Chelmsford on his assumption of the office of Viceroy and Governor General of India. His Excellency then drove to Government House, Malabar Point.

Simla, the 8th April, 1916.

No. 234.—In continuation of the Home Department notification no. 1204-C., dated the 1st April 1916, the Governor General in Council, in exercise of the powers conferred by section 39, sub-section (1), of the Government of India Act, 1915 (5 and 6 Geo. 5, ch. 61), is pleased to direct that the Governor General's Executive Council shall after the 11th April 1916 assemble at Simla in the jurisdiction of the Lieutenant Governor of the Punjab.

PROCLAMATION.

Bombay, the 4th April, 1916.

No. 1261-C.—Whereas the Right Honourable Sir Frederic John Napier Thesiger, P.C., G.C.S.I., G.C.M.G., G.C.I.E., Baron Chelmsford, has been appointed by His Majesty to be his Viceroy and Governor General of India, and has assumed the said office, the said appointment is hereby notified, and it is proclaimed that the said Right Honourable Lord Chelmsford, Viceroy and Governor General of India, has this day taken his seat in His Excellency's Council.

By order of His Excellency the Viceroy and Governor General of India in Council.

H. WHEELER,

Secretary to the Government of India.

(a) From the 20th to the 26th March 1916.
(b) For the week ending 25th March 1916.

E. D. MACLAGAN,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Rainfall summary for the seven days ending at 8 hrs. on Thursday, the 6th April 1916, based on the Indian Daily Weather Reports of the period.

1. Rainfall was of almost daily occurrence in Assam and Upper Burma, and extended into Bengal on the 5th. Conditions were unsettled in northwest India at the beginning of the week, when rainfall occurred in Baluchistan, and again at the end of the week, when rainfall was fairly widespread in Baluchistan, the southwest Punjab, the North-West Frontier Province and south Kashmir. A few isolated thundershowers occurred in the Peninsula.

2. *Burma.*—Local falls of rain occurred, chiefly in the north of the division.

Northeast India, including Orissa.—Rainfall was nearly general in Assam on the 2nd, and in north and east Bengal on the 5th. There were a few falls in Orissa.

The United Provinces, Central India and the Central Provinces.—Nagpur had a light fall.

North-west India.—There was nearly general rain in east Baluchistan and the southwest Punjab on the 5th. Some rainfall also occurred in Kashmir and the North-West Frontier Province.

The Peninsula.—Thunderstorms occurred in the extreme south and at Belgaum, Hyderabad and Aurangabad.

3. The chief amounts of rainfall reported were as follows :—

30th	March	Cherrapunji 4·75″, Dibrugarh 1·03″ and Silchar 1·04″.
31st	,,	Cherrapunji 7·31″, Silchar 1·08″ and Kalat 0·51″.
1st	April	Cherrapunji 5·98″, Sibsagar 1·16″ and Silchar 1·80″.
2nd	,,	Cherrapunji 3·33″, Dibrugarh 1·20″, Silchar 2·08″ and Hyderabad (Deccan) 0·95″.
3rd	,,	Cherrapunji 1·72″, Dibrugarh 0·95″, Sibsagar 1·42″ and Silchar 1·30″.
4th	,,	Lashio 0·61″ and Kodaikanal 0·94″.
5th	,,	Yamethin 0·58″, Shillong 1·66″, Dhubri 1·07″, Darjiling 1·83″, Narayanganj 0·48″, Cuttack 0·45″, Montgomery 0·45″, Multan 0·43″, Quetta 0·85″ and Chaman 0·62″.

4. The rainfall of the week was more than 20 per cent. in excess in Baluchistan, the Punjab South-West, Assam, Upper Burma and Hyderabad South ; and was within 20 per cent. of the normal in Orissa and Hyderabad North. The only other divisions in which rainfall occurred were the North-West Frontier Province, Kashmir, Bengal, Lower Burma, Malabar and Madras Southeast, but the week's aggregate was in defect by more than 20 per cent. in all these areas.

The rainfall from the 3rd December to date is 20 per cent. or more in defect in all divisions with the exception of the Bay Islands, Burma and Central India West, where it is 20 per cent. or more in excess, and Assam and the Bombay Deccan, where it differs from the normal by less than 20 per cent. No rain usually falls during this period in the Konkan. The actual deficiency amounts to 4″ in Kashmir, and between 2″ and 3″ in the North-West Frontier Province, the Punjab East and North, the United Provinces West, Chota Nagpur, Orissa, Bengal, Madras Southeast and the Madras Coast North.

Division.	Rainfall data for week ending on 6th April 1916.			Rainfall data from 3rd December 1915 to 6th April 1916.				
	Actual rainfall in inches.	Normal rainfall in inches.	Excess or defect in inches.	Actual rainfall to date in inches.	Normal rainfall in inches.	Excess or defect in inches.	Percentage departure from normal. This week.	Percentage departure from normal. Last week.

GILBERT T. WALKER,
Director-General of Observatories.

R. A. MANT,
Secretary to the Government of India.

SIMLA;
Dated 6th April 1916.

GOVERNMENT OF INDIA.
DEPARTMENT OF REVENUE AND AGRICULTURE.

Season and Crop Prospects for the week ending Saturday, 1st April 1916.

Burma.—Eleven districts report light to moderate showers of rain. Cultivation of summer rice and reaping of spring rice, tobacco and miscellaneous island crops are progressing normally. Standing crops are generally good. Cattle are healthy. The price of unhusked rice in Rangoon has risen further to rupees 117 per hundred baskets and is now much above normal. The market for white rice is steady.

Assam.—Slight to heavy rain has fallen in all districts except in the Garo Hills and has facilitated agricultural operations. More rain however is wanted in several districts. Harvesting of mustard has been finished. Pressing of sugarcane and preparation of land for *jhum* cultivation and hoeing of land for tea still continue. Ploughing of land for and sowing of autumn rice and jute are in progress. Plucking of tea and ploughing of land for broadcast winter rice have commenced in places. Prospects of tea are fair. Price of common rice has fallen slightly. Cattle disease is reported in five districts. Scarcity of fodder and water continues to exist in Kamrup.

Bengal.—During the week very light to moderate rain fell in a few places only. The preparation of lands for autumn crops is being impeded and sowings are being delayed by the continued absence of rainfall. The mangoe crop is reported to have been damaged to some extent for the same reason. The sowing of autumn paddy and jute is proceeding slowly in the eastern districts and the harvesting of the spring crops is nearing completion. The outturn is not very satisfactory. The standing crops are not faring well and fodder scarcity continues to be felt in Bankura and water scarcity is also still being felt in parts of the Bankura and Burdwan districts. Cattle disease is reported from ten districts. The average price of common rice for the province has risen by about 0·3 per cent as compared with that of the previous week.

The weekly report on scarcity is as follows.—In the Bankura district distress is severe in the greater part of the affected area. The people on relief works are generally in good condition and relief measures are adequate. People are freely resorting to works. Loans are being freely advanced. Scarcity of fodder and water continues and measures are being taken to mitigate it. Private charitable funds are giving assistance. Prices have slightly risen. The price of rice is 9 seers per rupee. The number of persons on relief works was 17,688, and on gratuitous relief 21,120—total 38,808. The number of persons relieved on private works was 6,245. In the Tippera district, some rain throughout the Brahmanbaria sub-division has benefited standing *Boro* crop and rendered sowing possible. The distribution of loan for the purchase of seed in the badly affected areas have been completed. Cases of cholera continue, otherwise the public health is good. The price of rice is 7½ seers per rupee. The number of persons on relief works was 4,683 and on gratuitous relief 6,018—total 10,701. The number of persons relieved by the Sarail Wards Estate works was 106. Gratuitous relief—*nil*.

Bihar and Orissa.—There was no rain during the week; except light showers in parts of Singhbhum. Harvesting of spring crops is going on and pressing of sugarcane continues in parts of Bihar. Preparation of lands for the autumn crops is in progress and standing crops are doing well. The average price of common rice has remained almost stationery as compared with that of the preceding week. The supply of fodder and water is sufficient except in parts of Hazaribagh where water supply is reported to be poor. Cattle disease is reported from twelve districts. The attendance of persons on test works in Manbhum was 1,190 and in Singhbhum 3,478. Gratuitous relief was given to 953 persons in Manbhum. The condition of standing crops in the feudatory states of Orissa is good.

United Provinces.—The week was rainless. Rain is still needed in the hill districts where crops are suffering severely from drought. Harvesting, winnowing and threshing of spring crops, sowing and irrigation of sugar cane and extra crops and extracting of opium are in progress. Standing crops are generally doing well except in hill districts. The condition of agricultural stock is good and very little cattle disease is reported. Fodder and water are generally sufficient though former is still dear and scarce in some of the western districts. Markets are full. Prices are rising in hill districts; elsewhere they are stationary but tend to fall.

Punjab.—Except for slight showers in parts of a few submontane districts the weather was dry. The condition of standing wheat and other crops on irrigated areas is generally average and on unirrigated area is bad in the south-east and poor elsewhere. Reaping of spring crops continues. The yield is generally below normal to normal on irrigated areas and poor on unirrigated area. Sowings of extra spring crops and sugarcane and cotton continue and are generally below normal. Germination of extra spring crops is good. Cattle are generally healthy but are weak in some districts owing to general scarcity of fodder. Water for drinking and canal irrigation is generally sufficient Prices are falling gradually but in the case of wheat they generally range between normal and warning rates and in other cases between warning and scarcity rates. Prices of wheat :—Ferozepore and Rawalpindi 10¼, Ambala 11, Lahore 12¼ and Lyallpur 11¼ seers per rupee.

North-West Frontier Province.—The week was rainless. The weather is moderate Standing crops are average in the Peshawar district, in the Bannu Tahsil, in unirrigated tracts of the Lakki Tahsil of the Bannu district and in irrigated areas of the Dera Ismail Khan district, good in irrigated areas of the Lakki Tahsil and poor in unirrigated areas of the Nowshera Tahsil of the Peshawar district and of the Dera Ismail Khan district. Rain is badly required in Dera Ismail Khan. Harvesting of sugarcane continues in Bannu Tahsil with outturn below average and harvesting of gram has commenced in some villages of Lakki Tahsil. Sarshaf and barley are being harvested in Sawabi Tahsil, Peshawar

district, with an average outturn. Sowings of sugarcane in Bannu, of spring crops in Dera Ismail Khan, and of sugarcane, rice cotton, melons, moth, maize and vegetables in Peshawar continue. The condition of cattle is good except in unirrigated tracts of Bannu district where it is bad. Fodder and water is sufficient except in Dera Ismail Khan district where fodder is dear and water is scarce in some villages. Public health is good. Prices are high but falling in case of all foodgrains in the Lakki Tahsil of wheat and gram in the Peshawar district and of maiz and wheat in the Bannu Tahsil and are rising in the case of wheat gram, and barley in a Bannu Tahsil and of wheat in the Dera Ismail Khan district.

Jammu.—Slight rain fell in some tehsils. Prices re-fluctuating. Wheat sells from 8 to 10 and maize from 12 to 18 seers per rupee. The condition of standing crops is average. Cattle are generally healthy. Fodder is sufficient except in a few places.

Kashmir.—During the week no rain fell in Anantnag but good rain was received elsewhere. The condition of standing crops is fair. Cattle is generally healthy. Fodder is average. Water is inadequate. Prices are high.

Rajputana.—The weather is hot and clear with occasional clouds. Harvesting of spring crops continues. The probable outturn is in fair to poor condition. Late sown crops is fair to good. Cattle is in very poor condition owing to fodder scarcity in most States of Rajputana and in Ajmer-Merwara. Cattle disease is reported from Mewar, Banswara and Kotah. Water is generally sufficient except in Marwar, Kotah and Tonk. Prices are generally high but slightly easier in Ajmer-Merwara and Central Rajputana and have fallen by 2 seers in Kotah. The number of persons on test works in Merwara was 2,051 and in receipt of gratuitous relief 2,778.

Central India.—No rain fell during the week. Extra crops are being sown in places in Gwalior. Harvesting of spring crops is in progress almost everywhere. Standing crops are generally good except in Gwalior where they are below average on unirrigated soils. Probable outturn is fair in Indore and Baghelkhand except in Rewah, Nagod and Maihar where they are good and generally good elsewhere except from unirrigated crops in Gwalior which are estimated between eight and fourteen annas and very poor where frost damaged the crops. Damage to crops by frost is reported from Paldeo in Baghelkhand. Agricultural stock is generally good except for cattle disease in Jawad pergana of Gwalior, Nagod of the Baghelkhand Agency and in parts of Dhar, Barwani, Jhabua and Jobat in the Southern States. Fodder supply is generally good except in parts of Tonwarghar, Narwar, Sheopur, Bajranggarh, Ujjain, Shajapur and Mandasor districts in Gwalior, where there is scarcity of both water and fodder. Prices are high in Baghelkhand, normal in Bhopal, are slightly falling in Gwalior and Bundelkhand and are steady elsewhere.

Central Provinces.—The weather has been hot with occasional clouds but the mornings are still cool. Harvesting of spring crops is being completed and threshing and winnowing are in progress. Preparation of land for next season continues. The supply of fodder and water is adequate and cattle are in good condition. The downward tendency in prices is maintained. Wheat is selling at 2½ and 2 seers per rupee cheaper in Mandla and Balaghat respectively and gram is 3 seers cheaper in Mandla.

Feudatory States.—Threshing and winnowing of spring crops continue and the preparation of land for the ensuing season is in progress.

Bombay.—Slight rain fell during the week in Kanara, Ahmednagar, Poona, Satara and Bijapur. Standing crops are generally good. The picking of cotton continues in Gujarat, Bijapur, Dharwar, Baroda, Kolhapur and Rewa Kantha. Harvesting of spring crops is generally progressing. The fodder supply is deficient in parts of Sind. Cutch, Kathiawar, Baroda and Kolhapur. Agricultural stock is sufficient. Cattle is in good condition except in Larkana, Thar and Parkar, Ahmedabad and Palanpur. Drinking water is generally adequate. Water for irrigation is deficient in Kaira, Ahmedabad, Broach, Dharwar and Baroda. Prices of food grains have slightly fallen in the Deccan and are generally steady elsewhere. Gratuitous relief was given to 250 persons in Kathiawar.

Hyderabad.—Isolated showers were received in parts of the Usmanabad and Bidar Districts, the average being one cent. The harvesting of spring cro p has been nearly completed. Late rice crop is fair to good but is suffering from water scarcity. Parts of Karimnagar and Mahbubnagar districts are being weeded. The health of the cattle is generally good, but disease prevails in four taluqs. Prices of grains are high and stationary. Coarse rice is selling at nine and white juar at fourteen and half seers per rupee in the Hyderabad city. The highest price of juar in districts is ten seers per rupee in Medak and Warangal, the lowest and twenty-four seers per rupee in Adilabad.

Mysore.—No rain fell during the week. The price of rice has slightly fallen in Bangalore and has risen in the Tumkur and Chitaldroog districts. Markets are well supplied. Standing crops are in good condition. Ragi, sugarcane, paddy and cotton are being harvested with outturn fair to good. Ploughing operations are in progress. Cattle are healthy. Water and fodder are generally available.

Coorg.—Rainfall eighteen cents ; the prices of food grains are high. The p ublic health is fair. Water and fodder for cattle are sufficient.

Madras.—The rainfall during the week was light in Ganjam, Tinnevelly, Malabar and Travancore. *Nil* elsewhere. Standing crops are fair to good generally but are withering or have withered in parts of three districts and require more water in parts of another. Harvesting of paddy, sugarcane and dry crops are proceeding with outturn fair to normal generally. Sowings of paddy, sugarcane and dry crops are proceeding normally. The condition of cattle is generally good. Water-supply is sufficient except in parts of Ganjam, Godavari, Bellary, Anantapur, South Canara, Carnatic and the central and south, except in Tanjore. Pasture is generally sufficient but scanty in Kurnool, Bellary, Malabar and in parts of ten other districts. Fodder is generally available. Prices are fairly steady.

R. A. MANT,
Secretary to the Government of India.

☞ Separate paging is given to this Part in order that it may be filed as a separate compilation.

PART II.

Notifications by High Court, Comptroller-General, etc.

GAZETTE OF INDIA.

NOTICE.

The 18th March 1916.

On and after 8th April and until further notice, Parts I, IV, V and VI of the *Gazette of India* and the Weather and Crop Report will be published in Simla. Parts II and III will continue to be published in Calcutta. All notifications and other matter intended for publication in those Parts should be addressed to the Publisher at Simla and Calcutta, respectively.

Attention is invited to the following Circular Memorandum of the Government of India, Home Department, of August 1901:—

"It has been brought to the notice of this Department that matter for the *Gazette of India* is sometimes sent to the Press late on Friday evenings for publication in the next day's *Gazette* and that this involves considerable inconvenience to the Press and expense to Government. In the Circular Memorandum of this Department, No. 777—79, dated 9th February 1870, the Government of India directed that all notifications or other matter intended for insertion in the *Gazette of India* should be delivered at the Press not later than 2 P.M. on Friday, and that any papers sent thereafter must be certified to be extremely urgent in order to ensure their appearance in the next day's *Gazette*. The undersigned is directed to request that these orders may be more strictly observed in future, and that Departments will refrain from sending to the Press as extremely urgent any papers which can without harm or inconvenience be held over for the next *Gazette*.

J. P. HEWETT,
Secretary to the Government of India."

Class 13. No. 3601. Messrs. Anderson, Wright & Co., 22, Strand Road, Calcutta. February 1.

NOTICES.

THE PATENT OFFICE, 1, COUNCIL HOUSE STREET, CALCUTTA.

Public room, open 11 a.m. to 4 p.m.; Saturdays, 11 a.m. to 1 p.m.

1. *All communications* relating to applications for patents and for registration of designs under the Indian Patents and Designs Act (II of 1911), or in continuation of applications under the Inventions and Designs Act (V of 1888) should be addressed to the Controller of Patents and Designs, 1, Council House Street, Calcutta. Documents sent by post should be carefully packed.

2. *Directions* for the guidance of inventors and others are given in the Patent Office Handbook (price one rupee) which contains the Indian Patents and Designs Act, 1911, the Indian Patents and Designs Rules, 1912, the Indian Patents and Designs (Temporary Rules) Act, 1915, the Indian Patents and Designs (Temporary) Rules, 1915, together with current regulations and instructions. These should be consulted before an application is made to the Controller.

3. *Advice.* The Patent Office cannot undertake (1) to give opinions on the interpretation of Patent Law, or on the advisability of protecting inventions and designs or on their infringement; (2) to make searches in respect of information available in the public room; (3) to recommend any particular agent; or (4) to assist in the disposal of inventions. **Applicants are warned that the Indian Patents and Designs Act, 1911, is in force** in British India only, and patents granted under it do not extend to the United Kingdom or any of the British possessions. **The International Convention for the Protection of** Industrial Property does not include India. **For information regarding patents in coun-**tries other than India applications should be made to the patent offices in the countries concerned.

4. ***Fees* are payable in *cash* and must be received in the Patent Office with-**in the time allowed by the Acts. When cheques are offered in payment of fees, it must be clearly understood that the office cannot hold itself responsible for any delay that may occur in the collection of cash on the cheques; any cheque not payable in Calcutta is subject to commission. **In cases where it is not possible to have the fees handed in at the** Patent Office, it is preferable to send them by money-order or postal order payable at **Calcutta to the Controller of Patents and Designs, and to advise him that they have been so sent. Stamps will not be received in payment of fees.**

5. ***Trade and property marks and names* are not registered and *medicines* are not patented under the Indian Patents and Designs Act. There is no provision of Law in British India for their registration. Neither does this Act deal with *pictures, photographs*, etc., for which copyright is obtainable under the Indian Copyright Act, 1914.**

6. ***Printed Specifications*** **of applications, which have been accepted, are published within about three weeks after acceptance has been notified in the *Gazette of India*. These specifications can be purchased at the Patent Office at a uniform price of 8 annas per copy; and may be seen free of charge, together with other publications of the Patent Office, at the following places:—**

O. F. JENKINS,
Secretary and Member, Board of Examiners.

SULPHATE OF QUININE, SULPHATE OF CINCHONIDINE, CINCHONA FEBRIFUGE, RESIDUAL ALKALOID AND QUINOIDINE.

Manufactured at the Bengal Government Cinchona Plantation.

These articles are guaranteed to be free from wilful admixture with other Cinchona alkaloids. Quinine can be purchased by Government officers, District and Local Boards for Hospitals and Dispensaries in the Provinces of Bengal, Bihar, Punjab and Assam on indents duly countersigned by the Civil Surgeon of their Districts. It can also be purchased by Missionaries for *bonâ fide* public purposes. It is never sold to private persons or firms. Cinchona Febrifuge both in powder and 3½ grain tablet forms and Cinchonidine can be purchased by Government officers and the general public. It is also sold by the Principal Druggists in Calcutta. Quinoidine or *Pure amorphous alkaloid* and *Residual Alkaloid* or *Amorphous cinchona alkaloid*, which contains about 40 per cent. of *pure amorphous Alkaloid*, are for sale to Missionaries and Government Institutions only. *These drugs are sold strictly cash and in advance but private purchasers may use the V. P. Post system,* and are obtainable from The Superintendent, Juvenile Jail, Alipore.

The rates for these drugs from 1st April 1916 are as follows:—

SULPHATE OF QUININE.

	R
For quantities 60 lbs. and above in one delivery	21-8 per lb.
For quantities of not less than 6 lbs. but below 60 lbs. in one delivery	22-8 ,,
For any quantity less than 6 lbs.	23 ,,

SULPHATE OF CINCHONIDINE.

	R
For quantities of not less than 6 lbs. in one delivery	11 per lb.
For any quantity less than 6 lbs.	12 ,,

CINCHONA FEBRIFUGE.

	R
For quantities of not less than 6 lbs. in one delivery	5 per lb
For any quantity less than 6 lbs.	6 ,,

RESIDUAL ALKALOID OR *AMORPHOUS CINCHONA ALKALOID* AND QUINOIDINE OR *PURE AMORPHOUS ALKALOID* AND QUINOIDINE TABLETS.

ORDERS BY THE HON'BLE THE CHIEF COMMISSIONER, AJMER-MERWARA.

NOTICE.

Dated Mount Abu, the 6th April 1916.

No. 464.—The following draft of certain rules which it is proposed to issue under the Co-operative Societies Act, 1912 (II of 1912), is published as required by sub-section (4) of section 43 of the said Act, for the information of persons likely to be affected thereby, and notice is given that the draft will be taken into consideration by the Hon'ble the Chief Commissioner on or after the 25th May 1916.

Any objection or suggestion which may be received from any person with respect to the draft before the date fixed as aforesaid will be considered by the Hon'ble the Chief Commissioner.

2. The Chief Commissioner's Notification No. 104-C—878-A of the 18th January 1916 is hereby cancelled.

DRAFT NOTIFICATION.

Dated 1916.

No. —In exercise of the power conferred by section 43 of the Co-operative Societies Act, 1912 (II of 1912), the Chief Commissioner is pleased to make the following rules with a view to carrying out the purposes of the said Act in Ajmer-Merwara :—

1. The maximum portion of the share capital of a society which may be held by a single member other than a registered society shall be one-fifth of such share capital.

2. Every society registered under the Act shall for the purposes of section 15 give notice of its address and of any change therein to the Registrar, who shall register it in the book in which the society has been registered under section 9.

3. A society may make by-laws for the conduct of its business provided that the same are not inconsistent with the provisions of the Act or of any rule made under the Act. Such by-laws as well as any modifications of them which may be made from time to time shall be approved by a majority of the members present at a general meeting for which not less than fifteen days' notice has been given and at which not less than one-half of the members of the society are present.

When such by-laws or modifications thereof have received the approval of the society they shall be forwarded to the Registrar. The Registrar, if he considers that any of the by-laws or modifications are contrary to the interests of the society, shall, before registering the same, inform the society of the amendments which should in his opinion be adopted : in tendering this advice he shall be guided by the Ajmer-Merwara model by-laws in so far as they are applicable to the case in point. Should the society be unwilling to accept the Registrar's advice, he shall report the matter for the orders of the Commissioner.

4. Each society shall keep accounts and books in the form prescribed from time to time by the Registrar.

5. Each society shall submit to the Registrar a copy of the proceedings of its meetings within a week of the date of such meetings and shall submit such other returns in such forms as the Registrar may prescribe.

6. For the purposes of section 22 of the Act a person may be nominated by a member of a society in such manner as may be pescribed by the by-laws of such society.

7. With the previous sanction of the Registrar, any society may invest its funds or a portion thereof in the purchase or leasing of land and in the construction of buildings provided that such land or buildings are necessary for the conduct of its business.

8. (i) Any dispute in respect of the business of a society (a) between any persons who are or have been members of such society or (b) between a member or past member of such society or persons so claiming and the Committee or any officer of such society shall be referred to the Registrar for decision.

(ii) The Registrar on receiving notice of any such dispute shall either decide to dispute himself or refer it for decision to three arbitrators, of whom one shall be nominated by each of the parties to the dispute and the third by the Registrar.

(iii) Where any party to the dispute fails to nominate an arbitrator within fifteen days after receipt of notice from the Registrar, the Registrar shall report the matter to the Commissioner who, if he thinks it desirable, shall himself make the nomination.

(iv) In proceedings conducted under the above rules before the Registrar or arbitrators the statements of the parties who attend and of such witnesses as they may produce shall be reduced to writing and upon the evidence so recorded and after consideration of the documentary evidence produced by either side a decision or award, as the case may be, shall be given in accordance with the merits of the matter at issue.

9. No society may distribute to its share-holders by way of dividend, bonus or otherwise a higher percentage of its net profit than 12½ per cent. in any year.

10. For the purposes of section 26 of the Act a copy of an entry in a book of a society may be certified by a certificate written at the foot of such copy that it is a true copy of such entry, that such entry is contained in one of the ordinary books of the society and was made in the usual and ordinary course of business, and that such book is still in the custody of the society, such certificate being dated and subscribed by the chairman of the society.

11. An appeal against the orders of the Registrar refusing to register a society shall lie to the Commissioner.

NOTIFICATIONS.

Dated Abu, the 7th April 1916.

No. 473—9.—Whereas the land designated below is required for a public purpose, this declaration is made accordingly under the provisions of section 6 of the Land Acquisition Act, I of 1894.

District.	Parganah.	Mauza.	Approximate area.	For what purpose.	REMARKS.
Ajmer-Merwara.	Beawar Tahsil.	Jalia I .	Biswas 5, Biswansis 5 = 4,577·50 Sq. Ft.	For constructing quarters for the Driver and Khalasis employed at the Jalia Water Works of the Beawar Municipality.	The plan can be seen at the Office of the Extra Assistant Commissioner and Collector, Merwara, Beawar.

Under section 7 of the Act, the Collector is hereby directed to take order for the acquisition of the land specified above.

Dated Abu, the 10th April 1916.

No. 496—1093.—In exercise of the powers conferred by section 9 of the Indian Petroleum Act, 1899 (VIII of 1899), and with the previous sanction of the Governor General in Council the Hon'ble the Chief Commissioner is pleased to make the following amendments in the Ajmer-Merwara Petroleum Rules issued in this office Notification No. 1530-1093, dated the 14th October 1909 :—

(1) In rule 6, Chapter IV, Part II, of the said rules for the words "forty gallons" the words "sixty- five gallons" shall be substituted.

(2) In condition 3 of license form B, condition 1 of license form H, condition 1 (for dangerous petroleum in the case of the holder of a license in form H) of license form I, condition 1 of license form K and condition 1 of license form M, appended to the said rules—

(a) for the words "forty gallons" after the words "not more than" the words "sixty-five gallons" shall be substituted ; and

(b) the following shall be added as sub-clause :—

"(7) When the capacity exceeds forty but does not exceed sixty-five gallons......... 10 B. W. G."

By order,

B. J. GLANCY,

First Assistant to the Agent to the Governor-General, Rajputana, and Chief Commissioner, Ajmer-Merwara.

THE HON'BLE THE AGENT TO THE GOVERNOR GENERAL AND CHIEF COMMISSIONER IN BALUCHISTAN.

NOTIFICATION.

Quetta, the 8th April 1916.

No. 860.—The undermentioned candidate is declared to have passed the prescribed tests in the Pashtu language by the Higher Standard at an examination held at Quetta on the 3rd April 1916 :—

L. Dina Nath, Temporary Assistant Engineer, Public Works Department, Irrigation Branch, Baluchistan.

By order,
A. N. L. CATER,
First Assistant.

THE HON'BLE THE CHIEF COMMISSIONER OF BRITISH BALUCHISTAN.

NOTIFICATIONS.

Quetta, the 7th April 1916.

No. 1257-*R*.—In exercise of the powers conferred by section 62, sub-section 2, clause (*c*), of the Excise Regulation, 1915 (I of 1915), the Chief Commissioner is pleased to make the following rules :—

1. An appeal shall lie from an original or appellate order of an Excise Officer as follows, namely :—

(*a*) to the Collector when the order is made by an excise officer below the rank of Collector;

(*b*) to the Excise Commissioner when the order is made by a Collector:

Provided that when an original order is confirmed on first appeal, a further appeal shall not lie.

2. Every memorandum of appeal—

(*a*) must be presented within one month from the date of the order appealed against;

(*b*) shall be accompanied by the order appealed against, in original, or by an authenticated copy of such order unless the omission to produce such order or copy is explained to the satisfaction of the appellate authority.

3. (*a*) The Excise Commissioner may at any time—

(*i*) call for the record of any case pending before, or disposed of by, any excise officer subordinate to him ;

(*ii*) revise any order passed by any excise officer subordinate to him.

(*b*) A Collector may call for the record of any case pending before, or disposed of by, any excise officer subordinate to him, and if he is of opinion that the proceedings taken or order made should be modified or reversed, he shall report the case with his opinion thereon for the orders of the Excise Commissioner:

Provided that the Excise Commissioner shall not under this rule pass an order revising or modifying any proceeding or order of a subordinate excise officer and affecting any person without giving such person an opportunity of being heard.

No. 1282-*R*.—ADDENDUM. The following is added to rule 4 (*a*) of the rules under the Land Improvement Loans Act (XIX of 1883) promulgated with the Hon'ble the Chief Commissioner's Notification No. 542, dated the 1st March 1909 :—

"When a large advance is applied for, a sketch and explanation of the work it is intended to carry out should be submitted with the application."

By order,
A. N. L. CATER,
Secretary.

SUPPLEMENT TO

The Gazette of India.

No. 16. } CALCUTTA, SATURDAY, APRIL 15, 1916.

OFFICIAL PAPERS.

A SUPPLEMENT to the GAZETTE OF INDIA will be published from time to time containing such official papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The debates of the Legislative Council of His Excellency the Governor General will in future be published in PART VI of the GAZETTE.

Non-Subscribers to the Gazette may receive the SUPPLEMENT separately on a payment of Rupees five per annum if delivered in Calcutta, or Rupees eight if sent by Post. The SUPPLEMENT and PART VI of the GAZETTE can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta, or Rupees nine if sent by post.

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA is required by Law, or which it has been customary to publish in the CALCUTTA GAZETTE, will be included in the SUPPLEMENT. For such Orders and Notifications the body of the GAZETTE must be looked to.

* The figures under "Rice, husked" represent the prices of common rice

Note.—These statistics are compiled from the fortnightly returns furnished by District Officers to Local Governments and Administrations, etc. They relate to the wholesale prices in the principal markets (not necessarily district headquarters) in each province on the last (or nearest mart) day of each fortnight.

Government of India Notifications, Appointments, Promotions, &c.

MILITARY SECRETARY'S OFFICE.

NOTIFICATION.

Simla, the 13th April, 1916.

No. 1717-M.—His Excellency the Viceroy and Governor-General will arrive at the Simla Main Station at 12-15 P.M. on Thursday, the 20th April 1916. His Excellency's arrival will be public.

A Viceregal Salute will be fired as the special rail motor arrives at the Station.

The Deputy Commissioner, Simla, and the Superintendent of Police, Simla, will receive His Excellency at the Station.

The route to Viceregal Lodge will be *viâ* the Cart Road, the Commerce and Industry Secretariat and the Mall.

His Excellency is due to arrive at Viceregal Lodge at about 12-30 P.M. and will be received there by His Excellency the Commander-in-Chief and Staff, the Members of the Governor-General's Executive Council, Secretaries and Deputy Secretaries to the Government of India, and all the principal Civil and Military officers in Simla. Ladies and gentlemen on the Government House list, desirous of attending, are also invited to be present at Viceregal Lodge by 12-15 P.M.

A Guard of Honour of the Simla Volunteer Rifles will be drawn up at Viceregal Lodge and a Guard of Honour of the 2nd Battalion, 39th Garhwal Rifles, on the Guard House Maidan.

Levee Dress will be worn by Civil and Review Order, dismounted, by Military officers. Gentlemen not entitled to wear uniform will appear in Morning Dress.

By Command,

R. VERNEY, *Major*,

Military Secretary to the Viceroy.

LEGISLATIVE DEPARTMENT.

NOTIFICATIONS.

Simla, the 11th April, 1916.

No. 19.—In pursuance of the provisions of Regulation XI (*b*) of the Regulations for the nomination and election of Additional Members of the Indian Legislative Council, published in the Notification of the Government of India in the Legislative Department No. 61, dated the 14th November, 1912, as amended by the like Notification No. 46, dated the 20th August, 1915, the Governor General is pleased to call upon the electorates mentioned below to elect, in accordance with the said Regulations, the Members assigned to them, by the first day of June 1916.

Electorates.	Members.
(*i*) The Landholders of the Province of Oudh	One
(*ii*) The Muhammadan community in the United Provinces of Agra and Oudh	One

No. 22.—In pursuance of section 38 of the Government of India Act, 1915, the Governor General is pleased to appoint the Hon'ble Mr. G. R. Lowndes, Bar.-at-Law, being a member of his Council, to be *Vice*-President thereof, in place of Sir William Clark, K.C.S.I., C.M.G., who has vacated that office.

A. P. MUDDIMAN,

Secretary to the Government of India.

ESTABLISHMENTS.

Simla, the 13th April, 1916.

No. 213.—His Excellency the Viceroy and Governor General has been pleased to make the following appointment on His Excellency's personal staff, with effect from the afternoon of the 4th April, 1916 :—

Mr. J. L. Maffey, of the Indian Civil Service, to be Private Secretary.

JUDICIAL.

The 8th April, 1916.

No. 125.—The Hon'ble Mr. Justice C. P. Beachcroft, I.C.S., a Judge of the High Court at Calcutta is granted furlough from the 19th April or such later date as he may avail himself of it to the 3rd September 1916, both days inclusive.

No. 136.—Mr. A. Kinney, Deputy Administrator General and Deputy Official Trustee, Bengal, is granted privilege leave for three months and in continuation furlough for one year, four months and twenty-eight days, with effect from the 10th April 1916, or the subsequent date on which he may avail himself of it.

The 7th April, 1916.

No. 172.—Mr. H. V. Cobb, C.S.I., C.I.E., is appointed to be Judicial Commissioner of Coorg, substantively *pro tempore*.

The 14th April, 1916.

No. 175.—In exercise of the powers conferred by section 4 of the Punjab Courts Act, 1914 (Punjab Act III of 1914), the Governor General in Council is pleased to make the following appointments in the Chief Court, Punjab, during the absence on leave of the Hon'ble Mr. H. A. B. Rattigan, Barrister-at-Law, or until further orders:—

The Hon'ble Rai Bahadur Shadi Lal, Barrister-at-Law, first temporary Additional Judge of the Chief Court, to act as a Judge of that Court.

The Hon'ble Mr. W. A. LeRossignol, I.C.S., second temporary Additional Judge of the Chief Court, to act as first temporary Additional Judge of that Court.

Mr. A. B. Broadway, Barrister-at-Law, to act as second temporary Additional Judge of the Chief Court.

POLICE.

The 6th April, 1916.

No. 246.—In exercise of the powers conferred by section 2 of the Police Act, 1888 (III of 1888), as in force in British India or as locally applied, and in supersession of notifications of the Government of India in the Home Department no. 760-Police, dated the 9th June 1908, and no. 1014-Police, dated the 31st July 1908, the Governor General in Council is pleased :—

(*a*) to create a general police district embracing all the lands occupied for the time being by the undermentioned railway lines and portions of railway lines, including the lands occupied by stations, out-buildings or for the other purposes of the said lines, namely, first those situate within the presidency of Bengal, excluding those specified in schedule A hereto annexed, and secondly those specified in schedule B hereto annexed and situate in provinces and places beyond the limit of the said presidency ;

(*b*) to direct the enrolment under the Police Act, 1861 (V of 1861), of a police force for service therein ; and

(*c*) to appoint the Governor of Bengal in Council to discharge with respect to the general police district and the police force aforesaid the functions of the local Government under the Police Act, 1861 (V of 1861), the Code of Criminal Procedure, 1898 (Act V of 1898), and any other enactments relating to the police for the time being in force in the lands aforesaid or in any part thereof.

Schedule A.

1. So much of the Assam-Bengal Railway as is situate within the presidency of Bengal.

2. So much of the Cooch Behar Railway as is situate within the jurisdiction of the State of Cooch Behar.

3. So much of the Bengal-Nagpur Railway as is situate west of the river Hughli within the presidency of Bengal.

Schedule B.

1. So much of the Eastern Bengal Railway as is situate within the provinces of Bihar and Orissa and Assam or within the jurisdiction of the State of Cooch Behar.

2. So much of the Bengal Dooars Railway as is situate within the jurisdiction of the State of Cooch Behar.

3. The following portions of the East Indian Railway, namely :—

(a) the Loop Line from the boundary between the presidency of Bengal and the province of Bihar and Orissa up to and including the Tinpahar railway station ;

(b) the Tinpahar-Rajmahal branch ;

(c) so much of the Barharwa-Azimganj-Katwa branch as is situate within the province of Bihar and Orissa.

No. 248.—In exercise of the powers conferred by section 2 of the Police Act, 1888, (III of 1888), as in force in British India or as locally applied, the Governor General in Council is pleased :—

(a) to create a general police district embracing all the lands occupied for the time being by the undermentioned railway lines and portions of railway lines, including the lands occupied by stations, out-buildings or for the other purposes of the said lines, namely, first those situate within the province of Bihar and Orissa excluding those specified in schedule A hereto annexed, and secondly those specified in schedule B hereto annexed and situate in provinces and places beyond the limit of the said province of Bihar and Orissa ;

(b) to direct the enrolment under the Police Act, 1861 (V of 1861) of a police force for service therein ; and

(c) to appoint the Lieutenant Governor of Bihar and Orissa in Council to discharge with respect to the general police district and the police force aforesaid the functions of the local Government under the Police Act, 1861 (V of 1861), the Code of Criminal Procedure, 1898 (V of 1898), and any other enactments relating to the police for the time being in force in the lands aforesaid or in any part thereof.

Schedule A.

1. The following portions of the East Indian Railway, namely :—

(a) the Loop Line from the boundary between the presidency of Bengal and the province of Bihar and Orissa up to and including the Tinpahar railway station ;

(b) the Tinpahar-Rajmahal branch ;

(c) so much of the Barharwa-Azimganj-Katwa branch as is situate within the province of Bihar and Orissa.

2. So much of the Eastern Bengal Railway as is situate within the province of Bihar and Orissa.

Schedule B

1. So much of the Bengal-Nagpur Railway as is situate west of the river Hughli within the presidency of Bengal.

No. 250.—In exercise of the powers conferred by section 2 of the Police Act, 1888 (III of 1888), the Governor General in Council is pleased :—

(a) to create a general police district embracing all the lands occupied for the time being by the undermentioned railway lines and portions of railway lines, including the lands occupied by stations, out-buildings or for the other purposes of the said lines, namely, first those situate within the province of Assam excluding those specified in schedule A hereto annexed, and secondly those specified in schedule B hereto annexed and situate in provinces and places beyond the limit of the said province of Assam ;

(b) to direct the enrolment under the Police Act 1861 (V of 1861) of a police force for service therein ; and

(c) to appoint the Chief Commissioner of Assam to discharge with respect to the general police district and the police force aforesaid the functions of the local Government under the Police Act, 1861 (V of 1861), the Code of Criminal Procedure, 1898 (V of 1898), and any other enactments relating to the police for the time being in force in the lands aforesaid or in any part thereof.

Schedule A.

1. So much of the Eastern Bengal Railway as is situate within the province of Assam.

Schedule B.

1. So much of the Assam-Bengal Railway as is situate within the presidency of Bengal.

H. WHEELER,

Secretary to the Government of India.

FOREIGN AND POLITICAL DEPARTMENT.

NOTIFICATIONS.

Simla, the 7th April, 1916.

No. 592½-Est.-A.—The Governor General in Council announces with deep regret that the Hon'ble Lieutenant-Colonel Sir Alexander Fleetwood Pinhey, K.C.S.I., C.I.E., I.A., Resident, Hyderabad, died unexpectedly from enteric fever at Hyderabad on Friday, April 7th.

Sir A. Pinhey joined the Government of India, Political Department, in 1886 and served for 20 years in the Agencies of Rajputana and Central India gaining a reputation as a wise and tactful officer in sympathetic touch with the Darbars of the States to which he was accredited.

In 1908, Colonel Pinhey officiated for some months as Private Secretary to the Viceroy, Lord Minto, in which appointment his wide knowledge of Native States made him especially useful. After a year as Agent to the Governor General in Rajputana he was again recalled to the Private Secretaryship which he held until Lord Minto's departure from India. In 1911, he was appointed to be Resident, Hyderabad, from which post he was due to retire in July next.

The Government of India desire to place on record their high appreciation of his long and distinguished service and they deplore the untimely fate which struck him down on the eve of retirement.

The Governor General in Council is pleased to order as a mark of respect that at Simla, at Hyderabad and at the headquarters of all other Local Governments and Administrations, flags shall be hoisted halfmast high on the day fixed for the funeral and that 13 minute guns shall be fired at the hour when the funeral takes place.

The 11th April, 1916.

No. 615-Est.-B.—The services of Captain I. Grant, Indian Army Reserve of Officers, are placed at the disposal of the Hon'ble the Chief Commissioner and Agent to the Governor General in the North-West Frontier Province for employment with the Frontier Militia, with effect from the 15th April, 1916.

The 12th April, 1916.

No. 622-Est.-A.—Mr. P. B. Warburton, of the Political Department, is granted privilege leave for three months combined with furlough for six months, with effect from the 3rd April, 1916, under Articles 233 and 308 (*b*) of the Civil Service Regulations.

No. 623-Est.-A.—Major T. H. St. G. Tucker, of the Political Department, on return from leave, is posted as First Assistant to the Resident in Mysore, with effect from the 3rd April, 1916.

The 13th April, 1916.

No. 625-Est.-A.—The services of Mr. J. L. Maffey of the Political Department of the Government of India are placed at the disposal of the Home Department, with effect from the afternoon of the 4th April, 1916.

No. 628-Est.-A.—Mr. R. E. Holland, of the Political Department, on return from leave, is appointed to be a Deputy Secretary to the Government of India in the Foreign and Political Department, with effect from the 1st April, 1916.

No. 629-Est.-A.—Major R. H. Chenevix Trench, a Deputy Secretary to the Government of India in the Foreign and Political Department substantive *pro tempore*, is posted as Assistant Secretary, with effect from the 1st April, 1916.

No. 630-Est.-A.—Mr. H. D. G. Law, Assistant Secretary to the Government of India in the Foreign and Political Department is appointed to be Under Secretary, with effect from the 1st April, 1916.

No. 631-Est.-A.—Mr. D. deS. Bray, an officiating Deputy Secretary to the Government of India in the Foreign and Political Department, is appointed to hold that appointment substantively *pro tempore*, with effect from the 5th April, 1916.

J. B. WOOD,

Secretary to the Government of India.

No. 521-G.—The Governor-General in Council is pleased to recognise the appointment of Mr. Ernest Peyton John de Brissac Oakley, to be in charge of the Consulate-General for Denmark at Calcutta, during the absence of Mr. S. G. L. Eustace.

The 14th April, 1916.

No. 538-G.—The Governor-General in Council is pleased to recognise the appointment of Mr. F. Hees, as acting Consul for the Netherlands at Rangoon, during the absence of Mr. W. Massink.

A. H. GRANT,

Secretary to the Government of India.

No. 538-I.B.—In exercise of the powers conferred by section 44 of the Code of Civil Procedure, 1908 (Act V of 1908), the Governor-General in Council is pleased to declare that the decrees of the Courts named in the schedule hereto annexed, situate in the territories of His Highness the Maharaja of Kashmir, which have not been established or continued by the authority of the Governor-General in Council, may be executed in British India as if they had been made by the Courts of British India.

Schedule.

1. Court of His Highness the Maharaja.
2. Court of the Judge, High Court.
3. Courts of the Chief Judges, Jammu and Kashmir.
4. Courts of the Sub-Judges, Jammu, Mirpur, Kotli, Udhampur, Srinagar, and Muzafferabad.
5. Court of the Judge, Small Cause Court, Srinagar.
6. Courts of the Wazir Wazarats, Leh and Gilgit.

No. 539-I-B.—The following further additions shall be made to the list annexed to the notification of the Government of India in the Foreign Department No. 2053-I-B., dated the 22nd September 1911, of Courts in Native States by which the decrees passed by Civil Courts in British India may be executed, namely :—

After the entry relating to the Baroda State, the following shall be added, namely .—

Kashmir.

Courts of the Sub-Judges, Jammu, Mirpur, Kotli, Udhampur, Srinagar and Muzafferabad.	
Court of the Judge, Small Cause Court, Srinagar.	
Courts of the Wazir Wazarats, Leh and Gilgit.	

No. 638-Est.-A.—Mr. H. V. Cobb, C.S.I., C.I.E., a Resident of the 2nd Class, on return from leave, is appointed to be a Resident of the 1st class and Resident in Mysore and Chief Commissioner of Coorg substantively *pro tempore*, with effect from the 7th April 1916.

No. 640-Est.-A.—Dr. S. Gaster, Church Missionary Society, was appointed to officiate temporarily as an Agency Surgeon, 2nd Class, and was posted as Civil Surgeon, Sibi, from the 29th January to the 17th February, 1916.

No. 641-Est.-A.—Dr. A. C. J. Elwin, Church Missionary Society, is appointed to officiate temporarily as an Agency Surgeon, 2nd Class, and is posted as Civil Surgeon, Sibi, with effect from the 18th February 1916, and until further orders.

J. B. WOOD,

Secretary to the Government of India.

FINANCE DEPARTMENT.

NOTIFICATIONS.

PAY, ALLOWANCES AND FINANCE OFFICERS.

No. 301-F.E.

Simla, the 8th April, 1916.

RESOLUTION—By the Government of India, Finance Department.

The following rule is substituted for Rule VIII of the rules prescribed in Resolution No. 1251-F.E., dated the 30th September 1914, for the examination of candidates in India for admission to the General List of the Indian Finance Department :—

VIII.—The age of a candidate on the first day of August of the year in which the examination is held must not be less than twenty-two and not more than twenty-five years. A candidate who has been continuously in Government employ since before the age of 25 may, however, at the discretion of the Government of India, be allowed to compete at the examination up to the age of 30, provided that he is satisfactorily recommended by the Head of his Department.

ORDERED that the Resolution be forwarded to the several Departments of the Government of India; to all Local Governments and Administrations

with the request that it may be communicated to Directors of Public Instruction and all heads of colleges and schools in their respective provinces; to the Comptroller and Auditor General; to the Controller of Currency; to all Accountants General and Comptrollers; to all Chief Examiners and Government Examiners of Railway Accounts; to the Examiner of Press Accounts; to the Examiner of Accounts, Lower Ganges Bridge; to the Audit Officer, Delhi Province; to the Examiner of Accounts, Military Works Services; and to the Superintendent, Government Printing, India, Calcutta.

Ordered also that the Resolution be published in the *Gazette of India.*

LEAVE AND APPOINTMENTS.

The 14th April, 1916.

No. 339-F.E.—Mr. S. V. Ayyar, temporary Chief Superintendent, office of the Controller of Currency, has been granted privilege leave for 2 months and 15 days with effect from the 29th March 1916.

POST OFFICE.

No. 1690-52.

The 15th April, 1916.

RESOLUTION—By the Government of India, Department of Commerce and Industry.

The Government of India have recently considered the amendment of the rules for the guidance of depositors in the Post Office Savings Banks, with the object of simplifying the existing procedure in regard to investments in Government securities and of extending the rules to make them applicable to the purchase and sale of holdings in the 4 per cent. terminable loan of 1915-16 through the Post Office.

2. It has consequently been decided that :—

(a) the limit for investments through the Post Office Savings Banks in Government securities should be advanced to Rs. 10,000, and that this should be a total limit to such investment irrespective of the loan in which the investment is made ;

(b) the distinctive limit of Rs. 4,000 now imposed in the case of a minor should be abolished ;

(c) the issue of investment certificates should be limited to Rs. 100 a month : and

(d) the existing rule which allows two or more investment certificates to be exchanged for a single one of the same aggregate value should be abolished, as this rule is not required now that provision exists for exchanging investment certificates for whole pieces of Government paper.

3. The Governor General in Council is therefore pleased to direct that the following rules shall be substituted for those bearing the same numbers which were published with the Resolution in this Department, No. 1446-1449-29, dated the 5th March 1914, and that they shall come into force with effect from the 15th May 1916.

INVESTMENTS.

Purchase of Government Securities.

46. (1) Any person whether previously a depositor in the Post Office Savings Bank or not may invest through the Post Office in Government Securities, either in one of the 3½ per cent. loans or in the 4 per cent. terminable loan, or in both.

(2) The total amount, after deducting any sum sold through the Post Office, which may be invested through the Post Office by an individual investor is Rs. 10,000.

NOTE.—This limit will be applied with reference to the nominal value of the securities purchased. It does not apply to investments in connection with public accounts, with regimental, police and other conjoint accounts, or with security deposit accounts opened under the Post Office Savings Bank rules.

(3) An investor may apply either for the purchase of Government Promissory Notes under clause (5) or for an investment under the provisions of clause (6). A separate form of application is prescribed for each of these purposes and may be obtained at any Post Office.

(4) If the investor is already a depositor in the Post Office Savings Bank, he should present his pass-book with his application; if he is not already a depositor, a pass-book will be prepared and delivered to him. Investments in Government Securities can be made either from money already deposited in the investor's Savings Bank account, or from money specially deposited for the purpose, or partly from the one and partly from the other.

(5). (*a*) Applications for the purchase of Government Promissory Notes will be for whole pieces of Government paper of Rs. 100, or any multiple of Rs. 100 subject to the maximum limit prescribed by clause (2).

(*b*) The investor should state whether he desires to make the investment in one of the 3½ per cent. loans or in the 4 per cent. terminable loan. He has also the option of taking delivery of the Government Promissory Notes or of leaving them in the custody of the Accountant General, Posts and Telegraphs. In the latter case, a receipt from the Accountant General for the paper will be delivered to the investor. When the paper is to be delivered to the investor, it will be endorsed in his favour, enfaced for payment of interest at the district treasury and forwarded to the post office for delivery to the investor.

(*c*) The purchase will be made by the Accountant General and the investor will be charged for the paper at the current market rate. The entries in connection with the investment will be noted in the pass-book by the head office.

(6). (*a*) Any person may invest sums of Rs. 100 or less in Government Securities in any of the 3½ per cent. loans or in the 4 per cent. loan, and obtain an Investment Certificate therefor, subject to the maximum limit prescribed by clause (2) and to the following special conditions :—

(*i*) The sum to be invested or the nominal value of securities to be purchased shall be in whole rupees and not less than Rs. 10.

(*ii*) The amount invested in this manner in a single calendar month shall not exceed Rs. 100.

(*iii*) The securities represented by Investment Certificates will remain in the custody of the Accountant General.

(*b*) The Accountant General will fix the rate at which Government securities represented by Investment Certificates can be purchased. This rate will be communicated to head and sub-postmasters and will remain in force until it is changed by the Accountant General.

(*c*) When an application under this rule is presented at a head or a sub-post office, an Investment Certificate, signed by the head or sub-postmaster as the case may be, will be handed to the investor *across the counter of the post office*. When the application is presented at a branch office an Investment Certificate will be obtained for the investor from the head office or the sub-office to which the branch office is subordinate.

(*d*) In each case in which an Investment Certificate is issued by a sub-office, the investor will receive a confirmation by post from the head office showing the No., date and nominal value of the Investment Certificate, and the cash balance left at credit of the account after the transaction. If the confirmation does not reach the investor in proper time, or if, when it reaches him, it shows any signs of erasure, or does not agree with the entries in the Investment Certificate or the pass-book, the investor should immediately apply to the postmaster of the head office and renew his application until he receives a satisfactory reply.

(*e*) An investor may exchange one or more Investment Certificates having an aggregate nominal value of not less than Rs. 100 for a whole piece of Government Paper of Rs 100 or any multiple of Rs. 100. If the total nominal value of the Investment Certificates tendered for exchange is not an exact multiple of Rs. 100 the investor may at his option obtain either (*i*) the next higher multiple of Rs. 100, if the balance in his Savings Bank account is sufficient for the purpose, or (*ii*) the next lower multiple of Rs 100, in which case the balance will be handed to him in the form of an Investment Certificate, or, if this is less than Rs. 10, will be sold, the proceeds being credited to his Savings Bank account. The investor has also the option of having the Government paper obtained in this way made over to him or held by the Accountant General, as provided for in rule (5) (*b*).

Sale of Government Securities.

47. (1) Any investor may apply for sale through the post office of the whole or of any portion, of any Government securities which may have been purchased for him through the post office, whether held by himself or held for him by the Accountant General, provided that the securities bear no endorsement other than those made by and in favour of the Accountant General and that, if only a portion of the Government securities is specified for sale, the nominal value of this portion must not be—

(a) less than Rs. 10, or

(b) such a sum as would leave a balance of Securities of the nominal value of less than Rs. 10.

In cases in which a portion only of a whole piece of Government Paper is sold, any broken portion will be made over to the investor in the form of an Investment Certificate.

(2) A separate form of application is prescribed for the sale of (i) Government Securities and (ii) Investment Certificates. An application must be accompanied by—

(a) such of the Government Promissory Notes to be sold as are in the possession of the depositor, these being endorsed by him in favour of the Accountant General,

(b) the receipt referred to in rule 46 (5) (b) above, for such of the Government Promissory Notes to be sold as are in the custody of the Accountant General, or

(c) the Investment Certificates,

as the case may be, and a receipt for them will be granted by the postmaster. The securities in whatever form will be sold by the Accountant General at the current market rate.

(3) The result of sale will be intimated to the investor by the Accountant General through the postmaster concerned, with the least possible delay after the receipt of the application. The proceeds of sale, together with any interest that may be due, will be credited to the investor's Savings Bank account in the first instance, and, if the annual or total cash limit of his account is thereby exceeded, the excess will not bear interest and must be withdrawn by the depositor.

Note.—Securities purchased in the name and on behalf of a minor cannot be sold during the minority, except by the minor's legally constituted guardian, and the definition of guardian in rule 1 of these rules does not apply to the sale of such securities.

Safe Custody of Government Promissory Notes.

48. (1) An investor may tender at a Post Office Savings Bank, for safe custody by the Accountant General, Government Promissory Notes which have been purchased for him through the post office, provided that the securities bear no endorsements other than those made by and in favour of the Accountant General. The tender must be made on the form prescribed for the purpose and the notes tendered must be endorsed to the Accountant General.

(2) An investor may also, at any time, apply through the local post office for the delivery to him of any Government Promissory Notes which have been purchased for him through the post office. The application must be made in the form prescribed for the purpose. The notes will be delivered to the investor on his surrendering the receipt originally granted to him by the Accountant General, duly endorsed in acknowledgment of his having received back the notes.

Interest on Government Securities.

49. So long as Government Securities purchased through the post office remain in the custody of the Accountant General, under rules 46 (5) (b) and 48 (1), interest when due will be drawn and advised to the local Post Office Savings Bank by the Accountant General for credit to the investor's account. If the annual or total cash limit of the account is exceeded, the excess will not bear interest.

Note.—In the case of Government securities of the 3½ per cent. loans represented by Investment Certificates, interest will, for the present, be due on the 1st May and 1st November each year. Interest on the 4 per cent. terminable loan is due on the 31st May and the 30th November.

50. No fee, commission, or brokerage of any kind is charged for the purchase, sale, safe custody or delivery out of custody of Government Securities bought through the post office, or for the realisation and remittance of interest on such securities. So long as Government securities purchased through the Post Office remain in the custody of the Accountant General, under rules 46 (5) (b) and 48 (1), the interest thereon is exempt from income-tax.

ORDER.—Ordered that this Resolution be published in the *Gazette of India* for general information, and that it be communicated to the Finance Department, the Director General of Posts and Telegraphs and to the Accountant General, Posts and Telegraphs.

CUSTOMS ESTABLISHMENTS.

The 15th April, 1916.

No. 1749-1.—Mr. C. W. E. Cotton, I.C.S., a Collector in Class III (officiating in Class II) of the Imperial Customs Service, is granted privilege leave for six weeks with effect from the 26th April 1916, or such subsequent date as he may avail himself of the leave.

War Office,
11th March 1916.

With reference to the announcement of the award of Distinguished Conduct Medals in the Honours Supplement to the London Gazette, dated 14th January 1916, the following are the acts of gallantry for which the decorations have been awarded :—

* * * * * * * *

28091 Serjeant F. Cavill, No. 7 Mountain Battery, Royal Garrison Artillery.

For conspicuous gallantry whilst in charge of a mountain gun. By his skill and bravery he materially assisted the advance and subsequent withdrawal of the gun.

* * * * * * * *

30491 Corporal B. Coleman, No. 7 Mountain Battery, Royal Garrison Artillery.

For conspicuous gallantry as layer of a mountain gun. He not only showed great coolness and skill in getting up to the position and away again on the following night, but in spite of heavy fire he kept his gun accurately laid and maintained a steady rate of fire.

* * * * * * * *

Sub-Conductor P. J. Fitzpatrick, Military Works Services, Indian Army.

For conspicuous gallantry during the past ten months while employed in superintending work both in and behind the front line. He has constantly been under

fire, and has always shown the greatest bravery and coolness in the performance of his work. His devotion to duty and fine example have had a good effect on all with him.

* * * * * * * *

55028 Acting Bombardier J. Foster, Royal Field Artillery (Attached Lahore Divisional Staff).

For conspicuous gallantry in maintaining and constantly repairing the forward observing officer's telephone wires under very heavy shell fire.

* * * * * * * *

Sub-Conductor E. V. Johnson, Indian Ordnance Department.

For conspicuous gallantry; he removed bombs and explosives from the proximity of a burning church. His bravery and devotion to duty were most marked.

* * * * * * * *

16083 Serjeant K. King, No. 2 Mountain Battery, Royal Garrison Artillery.

For conspicuous gallantry in removing the guns and ammunition of his section when a farm had been set on fire by an incendiary shell and was at the time under fire from high-explosive shells. Throughout the campaign Serjeant King has done very good work. On eight occasions he has brought his gun into the front line trench to destroy machine-gun emplacements and sapheads at ranges as low as 80 yards, and his skill and leadership have gone far to save his detachment casualties.

* * * * * * * *

4488 Battery Quartermaster-Serjeant J. R. McCombie, No. 5 Mountain Battery, Royal Garrison Artillery (formerly No. 2 Mountain Battery).

For conspicuous gallantry in bringing his gun into the front line trenches, preparing emplacements, and clearing the line of fire in front of the parapet at night, subsequently demolishing two enemy works at about 150 yards range on the following morning.

* * * * * * * *

23395 Gunner (Acting Bombardier) E. Paine, No. 7 Mountain Battery, Royal Garrison Artillery.

For conspicuous gallantry during operations. He carried messages under fire, accompanied an officer on reconnaissance, and did excellent work all round, practically without any rest during the operations.

* * * * * * * *

Second Supplement dated the 11th March 1916, to the "London Gazette" of the 10th March 1916, pages 2758, 2760, 2761, 2763 and 2764.

War Office,

11th March 1916.

* * * * * * * *

MEMORANDA.

The undermentioned Lieutenant-Colonels, Indian Army, to be Colonels:—

Brevet Colonel (temporary Brigadier-General) Lionel N. Herbert. Dated 14th November 1914.

Henry J. Roche, C.B. Dated 17th February 1915.

Sylvester B. Grimston. Dated 18th February 1915.

Stuart B. Graham. Dated 5th March 1915.

John O. Mennie. Dated 27th August 1915.

* * * * * * * *

INFANTRY.

Service Battalions.

* * * * * * * *

The Oxfordshire and Buckinghamshire Light Infantry.

Lieutenant Archibald W. T. Webb (Indian Army) relinquishes the temporary rank of Captain on ceasing to be employed with a Battalion. Dated 20th January 1916.

* * * * * * * *

TERRITORIAL FORCE.

* * * * * * * *

ROYAL FIELD ARTILLERY.

Lowland Brigade.

The date of appointment of Lieutenant-Colonel Charles E. Baynes, Indian Army, is 6th August 1915, instead of as previously notified.

* * * * * * * *

Third Supplement dated the 13th March 1916, to the "London Gazette" of the 10th March 1916, pages 2767 and 2770.

War Office,

13th March 1916.

* * * * * * * *

MEMORANDA.

Lieutenant-Colonel Pomeroy Holland-Pryor, M.V.O., 1st Duke of York's Own Lancers (Skinner's Horse), Indian Army, to be temporary Brigadier-General whilst employed as a Deputy Adjutant-General in India. Dated 24th February 1916.

Major Ernest F. Orton, 37th Lancers (Baluch Horse), Indian Army, to be temporary Lieutenant-Colonel whilst employed as an Assistant Quartermaster-General in India. Dated 21st February 1916.

* * * * * * * *

Signature of Enrolling Officer ______

Certified that the abovenamed person took the prescribed oath/affirmation before me at ______ this ______ day of ______ 19 .

Signature of Attesting Officer ______

Order under the proviso to Section 5 of Act III of 1916.

No. 405.—In pursuance of the proviso to Section 5 of the Foreigners' (Trial by Court-Martial) Act, 1916 (III of 1916), the Governor General in Council is pleased to direct that for the purposes of trials by Courts-Martial held under the said Act, the following modifications shall be made in the application of the provisions of Sections 48, 122 and 54 of the

Army Act, relating to the convening of General Courts-Martial and to the confirmation of the findings and sentences thereof, namely :—

1. The Governor General may, by order in writing from time to time convene, and authorise the Commander-in-Chief in India to convene, and may empower the Commander-in-Chief in India to delegate to any officer under his command, not under the status of a Divisional General, a general authority to convene, General Courts-Martial for the trial of such persons charged with offences against the Foreigners' (Trial by Court-Martial) Act as are for the time being under or within the territorial limits of his command. The Governor General and any officer deriving authority to confirm the findings and sentences of such Courts-Martial immediately or mediately from the Governor General, shall also have power to confirm the findings and sentences of Courts-Martial so convened.

B. HOLLOWAY, *Major-General,*

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Rainfall summary for the seven days ending at 8 hrs. on Thursday, the 13th April 1916, based on the Indian Daily Weather Reports of the period.

1. There was throughout the week a fairly strong influx of damp air from the Bay into northeast India, and rainfall was of daily occurrence in Assam and east Bengal. Thunderstorms were fairly numerous in Burma and the south of the Peninsula. Weather was unsettled almost uninterruptedly in Persia, and light rainfall occurred locally along the northwest frontier.

2. *Burma.*— Local falls of rain occurred, chiefly in the northern districts.

Northeast India, including Orissa.—Nearly general rain fell in Assam on the 7th, 8th, 11th and 12th, and in Bengal on the 7th and 12th. There were a few falls in Orissa and Bihar.

The United Provinces, Central India and the Central Provinces.—Mussooree, Cawnpore and Seoni had light falls of rain.

Northwest India.—Scattered falls of rain occurred in Baluchistan, the North-West Frontier Province, Kashmir, the west Punjab and north Rajputana.

The Peninsula.—Isolated falls of rain were reported, chiefly from Mysore and Malabar.

3. The chief amounts of rainfall reported were as follows :—

April 6th Victoria Point 0·82", Toungoo 0·68", Yamethin 2·00", Shillong 0·97", Tezpur 1·15", Sonamarg 0·92", Peshawar 0·83", Cherat 0·40" and Parachinar 1·51".

,, 7th Lashio 0·51", Dhubri 1·24", Cox's Bazar 1·91", Chittagong 2·55", Narayanganj 1·49", Bogra 0·78", Cuttack 0·73", Purnea 0·80" Bellary 0·60" and Belgaum 0·52".

,, 8th Toungoo 0·55", Akyab 0·91", Cherrapunji 1·39", Sibsagar 1·11", Dhubri 1·18", Chittagong 2·23", Jessore 1·33", Burdwan 1·07" and Jalpaiguri 0·86".

,, 9th Narayanganj 1·08", Parachinar 0·32", Drosh 0·30" and Cochin 0·87".

,, 10th Gauhati 1·06", Cox's Bazar 2·11", Chittagong 2·86" and Barisal 1·59".

,, 11th Jalpaiguri 1·63" and Cherrapunji 2·75".

,, 12th Dhubri 1·57", Shillong 1·15", Cherrapunji 3·92", Narayanganj 1·85", Barisal 1·16", Jessore 1·05", Burdwan 1·26" and Bogra 0·68".

4. The week's rainfall was 20 per cent. or more in excess in the North-West Frontier Province, Bihar, Bengal, Assam, Burma and the Madras Deccan, and was normal in the Punjab Southwest, Rajputana West, Orissa and the Bombay Deccan. It was 20 per cent. or more in defect in all the remaining divisions except the following where no rain usually falls at this time of year : Gujarat, Central India, Berar and the Konkan.

The rainfall from the 3rd December to date is 20 per cent. or more in defect over by far the greater part of the country, the only exceptions being Central India West, Burma and the Bay Islands where it is 20 per cent. or more in excess, and Assam, Bengal and the Bombay Deccan where it is within 20 per cent. of the normal. The absence of rainfall is a normal feature of the weather in the Konkan. The actual deficiency amounts to over 4" in Kashmir, and over 3" in the Punjab East and North, Chota Nagpur and Madras Southeast.

Director-General of Observatories.

R. A. MANT,
Secretary to the Government of India.

SIMLA;
Dated 13th April 1916.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Season and Crop Prospects for the week ending Saturday, 8th April 1916.

Burma.—The rainfall was fairly general during the week. The fall exceeded one inch in four districts and in the Shan States and Pakokku hill tracts Clearing of hill-sides and harvesting of miscellaneous crops are proceeding. The condition of standing crops is satisfactory. Cattle are healthy. Pasturage is ample. The price of unhusked rice at Rangoon has risen further to Rs. 119 per hundred baskets and is much above normal. Supplies are small The market for white rice is dull.

Assam.—Light to heavy rain has fallen in all districts except in Kamrup and has facilitated agricultural operations. Hailstorms did some damage to spring rice crop in Sylhet. Continuous heavy rain is hampering the cultivation of autumn rice in Sibsagar. Pressing of sugarcane and hoeing of land for tea continue. Ploughing of land for and sowing of autumn rice and of jute, plucking of tea and ploughing of land for broadcast winter rice are in progress. Prospects of tea and spring rice are fair The price of common rice has risen somewhat. Cattle disease is reported in seven districts. Scarcity of fodder and water is still reported from Kamrup.

Bengal.—During the week general rain fell throughout the province. The fall was somewhat heavy in parts of the Dacca and Chittagong divisions but light to moderate elsewhere. In some places the rainfall was attended with hailstorm but the extent of damage was very slight. Ploughing and sowing operations in respect of the autumn crops have now been greatly facilitated. Prospects of the mango and other fruits and of vegetable crops have improved. Water scarcity continues to be reported from parts of the Burdwan and Bankura districts. Insufficiency of fodder is still being felt in the latter district Cattle disease is reported from seven districts. The average price of common rice for the province has risen by about 0.3 per cent as compared with that of the previous week.

The weekly report on famine and scarcity is as follows .—In the Bankura district the state of affairs and the condition of the people in the affected areas are generally unchanged. People are freely resorting to works. Loans are being freely advanced. Scarcity of fodder and water continues and measures are being taken to mitigate it Private charitable funds are giving assistance. Prices are stationary. The price of rice is 9 seers per rupee The number of persons on relief works was 18,147 and in receipt of gratuitous relief 23,005, total 41,152. The number of persons relieved on private works was 6,140. In the Tippera district the rainfall was plentiful. Sowings are in full swing in the Brahmanbaria sub-division. Some local damage was done to *boro* crop by hail Otherwise prospects are good. Cholera is decreasing. The price of rice is 7½ seers per rupee. The number of persons on relief works was 4,331 and in receipt of gratuitous relief 6,735, total 11,066. The decrease in the number on works is due to the resumption of agricultural operations.'

Bihar and Orissa —Light rain was fairly general in Orissa and Chota Nagpur. It was scattered in Bihar Harvesting of spring crops continues and pressing of sugarcane is approaching completion. Planting of the crops for the next season and preparation of lands for the autumn crops are going on. Standing crops are doing well. The average price of common rice has remained almost stationary as compared with that of the preceding week. The supply of fodder and water is sufficient except in parts of Hazaribagh, where the water supply is reported to be poor. Cattle disease is reported from twelve districts. The attendance of persons on test works in Manbhum was 3,124 and in Singhbhum 5,241. Gratuitous relief was given to 1,069 persons in Manbhum. The condition of standing crops in the Feudatory States of Orissa is good.

United Provinces.—Very slight showers were received in many districts but prospects in the hill districts show no improvement. Winnowing and threshing of spring crops and irrigation of sugarcane and extra crops continue. Harvesting of spring crops, sowing of sugarcane and extraction of opium are nearing completion. Opium weighments have commenced. Standing crops are generally doing well except in the hills. Agricultural stock is in good condition and little cattle disease is reported. Fodder continues dear and scarce in a few of the western districts, elsewhere it is generally sufficient. Water is everywhere ample. Market supplies are adequate. Prices are fluctuating.

Punjab.—Slight rain has fallen in parts of all the reporting districts except in the southeast and parts of the central tracts. The condition of standing wheat and other corps on irrigated areas is generally average and on unirrigated areas bad in the southeast and poor elsewhere. Reaping of spring crops continues. The yield is generally below normal to

normal on irrigated and poor on unirrigated areas Sowings of extra spring crops, sugarcane and cotton continue and are generally normal. Germination of extra spring crops is generally good. Cattle are generally healthy but are weak in some districts owing to general scarcity of fodder. Water for drinking and canal irrigation is generally sufficient. Prices are generally stationary. In the case of wheat they range between normal and warning rates and in other cases between warning and scarcity rates. Price of wheat:—Rawalpindi 10½, Ambala 10¾, Ferozepore 11, Lahore 11½, and Lyallpur 12½ seers per rupee.

North-West Frontier Province.—Rain fell throughout the province but more rain is still required in Dera Ismail Khan. The weather is temperate. Standing crops are average in the Peshawar and Bannu districts and in Dera Ismail Khan they are average on irrigated and poor on unirrigated areas. Harvesting of sugarcane continues in Bannu with outturn below average. Harvesting of gram and barley has commenced in Bannu and of *sarshaf* and barley is proceeding in Peshawar with outturn average. Sowings of extra spring crops in Bannu and Dera Ismail Khan and of sugarcane, vegetables and melons in Peshawar continue. The condition of cattle is good except in unirrigated tracts of Bannu where it is bad. Fodder and water are sufficient except in Dera Ismail Khan where fodder is dear and water is scarce in some villages. The public health is good. Prices are high and are rising in Bannu but are stationary in Peshawar.

Jammu.—During the week slight rain fell in some tahsils. Prices are fluctuating. Wheat sells from 8 to 10 and maize from 12 to 18 seers per rupee. The condition of standing crops is average. There is no cattle disease Fodder is sufficient except in a few places.

Kashmir.—The rainfall was good. Standing crops are in fair condition. Cattle is generally healthy. Fodder is average in Baramula and sufficient elsewhere. Water is sufficient.

Rajputana.—The weather is hot and clear. Harvesting continues. The probable outturn is below normal. Cattle are in a very poor condition owing to fodder scarcity in most States and in Ajmer-Merwara. Cattle disease is reported from Mewar, Banswara and Kotah. Water is generally sufficient except in Merwar, Kotah and Tonk. Prices are a little easier. The number of persons on test works in Kishengarh was 1,305 and in Karauli 872.

The weekly report on scarcity in Merwara is as follows:—Cultivators are resorting to relief works as harvesting has been completed The condition of relief workers is good. Relief measures are adequate. The public health is good. Grass takavi and cash advances are being issued to cultivators. Prices are 10 to 11 seers per rupee The number of persons on test works was 2,700 and on gratuitous relief 2,600, total 5,300.

Central India.—A few slight showers fell in the Orchha, Charkhari and Garrauli States in the Bundelkhand Agency. No rain fell elsewhere. Extra crops and sugarcane are being sown in Gwalior. Harvesting of spring crops is in progress almost everywhere. The condition of standing crops is generally good except in Baghelkhand where it is good in the Rewah and Nagod States only and fair elsewhere The probable outturn is fair in Indore, in the Baghelkhand Agency outside the Rewah and Nagod States and in some unirrigated parts of the western districts of the Gwalior State but it is good elsewhere. Agricultural stock is generally in good condition except for cattle disease in the Bhander, Pichhor and Jawad tahsils of the Gwalior State, in the Indore pargana of the Indore State, in the Nagod State and in parts of Barwani, Jhabua, Ali-Rajpur and Jobat of the Southern States The fodder supply is generally good except in parts of the Ujjain, Mandasor and Sheopur districts and in the Shajapur and Sabalgarh tahsils in the Gwalior State where there is scarcity of both fodder and water. Prices are high but falling in Baghelkhand, normal in Bhopal, slightly falling in Gwalior and Bundelkhand, slightly fluctuating in Indore and steady elsewhere.

Central Provinces.—The weather has been hot with occasional clouds but the early mornings are still cool. Light showers were received in a few districts but in no case exceeding 10 cents. Harvesting of spring crops is approaching completion and threshing and winnowing are in progress. Preparation of land for autumn sowings continues Fodder and water are sufficient. Cattle are in good condition. There were no marked variations in prices.

Feudatory States:—Threshing and winnowing of spring crops continue and preparation of land for the next season's crops is in progress.

Bombay.—Rain fell during the week in Ahmednagar, Poona, Sholapur, Satara, the Karnatak, Kanara and Kolhapur. Standing crops are generally in good condition. Cotton picking continues in Gujarat, Baroda, Rewa Kantha, West Khandesh, Bijapur, Dharwal and Kolhapur. Harvesting of spring crops is generally progressing. The fodder supply is deficient in parts of Sind, Cutch and Baroda. Agricultural stock is sufficient. Cattle are in good condition except in Larkana, Hyderabad, Thar and Parkar, Ahmedabad and Palanpur. Drinking water is generally adequate. Water for irrigation is deficient in Kaira,

Ahmedabad, Baroda, Broach, Dharwar and Kolhapur. Prices of food grains have slightly fallen in Gujarat and are generally steady elsewhere. The number of persons in receipt of gratuitous relief in Kathiawar was 243.

Hyderabad.—Slight and isolated showers fell in many parts. The average fall was 9 cents. Spring crops are being harvested. They have been damaged somewhat by rain in a few places. Late rice crop is in fair to good condition but it is suffering from water scarcity in parts of the Karimnagar taluka and is being weeded and irrigated. Cattle disease prevails in four talukas. Prices of grains are almost constant. Coarse rice is selling at 9 and white *juar* at 14 seers per rupee in Hyderabad city. The highest price of *juar* in districts is 10 seers per rupee in Medak and Warangal and the lowest 24 seers per rupee in Adilabad.

Mysore.—Slight rain fell throughout the State The price of rice has risen in the Bangalore and Hassan districts and is steady elsewhere. Markets are well supplied and *ragi*, paddy and sugarcane are being harvested with outturn fair to good. Ploughing and sowing of paddy and sugarcane are in progress. Prospects of the season are generally good. Cattle are healthy in the greater part of the State. Water and fodder are available.

Coorg.—The rainfall during the week was 38 cents. Prices of food grains are high. The public health is fair Water and fodder for cattle are sufficient.

Madras.—The rainfall during the week was light in Ganjam, the Vizagapatam Agency, Godavari, Guntur, West Coast and the Deccan except in Cuddapah and the South except Pudukkattai and *nil* elsewhere. Standing crops are fair to good generally but are withering or have withered in parts of four districts and require more water in parts of another. Harvesting of paddy, sugarcane and dry crops is proceeding. The outturn is fair to normal generally. Sowings of paddy, sugarcane and dry crops are proceeding or are concluding normally. The condition of cattle is generally good. The water supply is sufficient except in parts of Ganjam, Godavari, Bellary, Anantapur, South Canara, the Carnatic, the Central and Southern parts, except Tanjore. Pasture is generally sufficient but is scanty in Kurnool, Bellary and Malabar and in parts of eleven other districts. Fodder is generally available. Prices are fairly steady.

Government of India Notifications, Appointments, Promotions, &c.

LEGISLATIVE DEPARTMENT.

NOTIFICATIONS.

Simla, the 19th April, 1916.

No. 23.—The Governor General is pleased to accept the resignation by the Hon'ble Mr. Reginald Pemberton Russell, C.S.I., of his office of Additional Member of the Legislative Council of the Governor General.

No. 24.—For the purposes of section 63 of the Government of India Act, 1915 (5 and 6 Geo. 5, c. 61), and in pursuance of the provisions of Regulation XI of the Regulations for the nomination and election of Additional Members of the Legislative Council of the Governor General, the Governor General is pleased to nominate Mr. Frederick Campbell Rose, being an official, to be an Additional Member of the said Council, in the said Act referred to as the Indian Legislative Council.

No. 25.—The following note by the Foreign Office, dated 1st March, 1916, is re-published for general information:—

Note by the Foreign Office, London.

In the reports of judgments of the German Prize Court which have reached His Majesty's Government, it is observed that in many cases claims put forward by British subjects have been rejected by the Court on the ground that the claimants had failed to submit a power-of-attorney, as prescribed by section 27, paragraph 2, of the German Prize Court Regulations.

A translation of the section above referred to is accordingly appended for the information of persons who may have occasion to put forward claims before that Court:—

Section 27 of German Prize Court Regulations.

"In the statement of claim shall be indicated the facts and proofs by which the claim is supported; if possible, documents shall be attached to the statement in the original.

"The said statement of claim shall be signed by an advocate provided with a written power-of-attorney and admitted to practise at a German Court, who has obtained the qualification to sit as a Judge.

"If the claimant is not residing at the place of the official seat of the Prize Court, he shall indicate a person there domiciled upon whom service may be effected on his behalf."

No. 26.—The Governor General is pleased to accept the resignation by the Hon'ble Mr. Charles William Maitland Hudson of his office of Additional Member of the Legislative Council of the Governor General.

A. P. MUDDIMAN,

CUSTOMS.

The 22nd April, 1916.

No. 2059-90-W.—The following Order in Council is published for general information :—

AT THE COUNCIL CHAMBER, WHITEHALL.

The 16th day of March, 1916.

By the Lords of His Majesty's Most Honourable Privy Council.

WHEREAS it is provided by Section 2 of the Customs (Exportation Prohibition) Act, 1914, that any Proclamation or Order in Council made under Section 8 of the Customs and Inland Revenue Act, 1879, as amended by the Act now in recital, may, whilst a state of war exists, be varied or added to by an Order made by the Lords of the Council on the recommendation of the Board of Trade :

AND WHEREAS it is provided by Section 2 of the Customs (Exportation Restriction) Act, 1914, that any Proclamation made under Section 1 of the Exportation of Arms Act, 1900, may, whether the Proclamation was made before or after the passing of the Act now in recital, be varied or added to, whilst a state of war exists, by an Order made by the Lords of the Council on the recommendation of the Board of Trade :

AND WHEREAS by a Proclamation, dated the 28th day of July, 1915, and made under Section 8 of the Customs and Inland Revenue Act, 1879, and Section 1 of the Exportation of

Arms Act, 1900, and Section 1 of the Customs (Exportation Prohibition) Act, 1914, the exportation from the United Kingdom of certain articles to certain or all destinations was prohibited :

AND WHEREAS by subsequent Orders of Council the said Proclamation was amended and added to in certain particulars :

AND WHEREAS there was this day read at the Board a recommendation from the Board of Trade to the following effect :—

That the Proclamation, dated the 28th day of July, 1915, as amended and added to by subsequent Orders of Council, should be further amended by making the following amendments in and additions to the same :—

(1) That the headings "Sugar, refined and candy" and "Sugar, unrefined" in the list of goods the exportation of which is prohibited to all destinations should be deleted, and there be substituted therefor the heading "Cane and beet sugar, unrefined or refined including candy."

(2) That the exportation of the following goods should be prohibited to all destinations :—

Acetic acid ;

Cinematograph films ;

Ferro-molybdenum ;

Ferro-silicon ;

Ferro-tungsten ;

Gramophone and other sound records ;

Photographic sensitive films, plates and printing paper whether exposed or not ;

Platinum, salts of ;

Radium ;

Tungsten.

(3) That on and after the 27th day of March, 1916, the exportation of "Manufactured fuel" should be prohibited to all destinations abroad other than British Possessions and Protectorates.

(4) That the exportation of the following goods should be prohibited to all destinations abroad other than British Possessions and Protectorates :—

Clinical thermometers ;

Ramie stockings and ramie fabrics for the manufacture of gas mantles ;

Surgical instruments ;

X-Ray apparatus.

(5) That the exportation of the following goods should be prohibited to all foreign countries in Europe and on the Mediterranean and Black Seas, other than France, Russia (except through Baltic ports), Italy, Spain and Portugal :—

Absinthe ;

Chemicals, the following :—

Barium sulphate ;

Calcium sulphate ;

Iron sulphates ;

Sodium sulphate and bisulphate (including nitre cake);

Strontium sulphate ;

Glucose and malt sugar ;

Salt, rock and white, except table salt.

NOW, THEREFORE, Their Lordships, having taken the said recommendation into consideration, are pleased to order, and it is hereby ordered, that the same be approved.

Whereof the Commissioners of His Majesty's Customs and Excise, the Director of the War Trade Department, and all other persons whom it may concern, are to take notice and govern themselves accordingly.

Almeric Fitzroy.

No. 2103-W.—In exercise of the powers conferred by Section 19 of the Sea Customs Act, 1878 (VIII of 1878), as amended by Act XII of 1914, the Governor General in Council is pleased to direct that the following shall be substituted for the proviso to this Department's Notification (Customs) No. 15127-W., dated the 25th September 1915 :—

" Provided that nothing in this notification shall apply to :—

(*i*) Goods shipped by, or for the use of, the Crown ;

(*ii*) Goods shipped to any Indian port ;

(*iii*) Goods required for use or consumption in—

(*a*) French or Portuguese possessions in India, or

(*b*) Native States in India."

No. 2117.—In exercise of the power conferred by Section 19 of the Sea Customs Act, 1878 (VIII of 1878), as amended by Act XII of 1914, the Governor General in Council is pleased to prohibit the bringing by sea or by land into British India of any copy of the American monthly magazine entitled " The Open Court " for the month of February 1916 and all subsequent issues.

LONDON GAZETTE.

No. 417.—The following extracts are published for general information :—

Second Supplement dated the 15th March 1916, to the "London Gazette" of the 14th March 1916, pages 2875, 2876, 2878, 2879 and 2883.

War Office,
15th March 1916.

His Majesty the King has been graciously pleased to approve of the appointment of the undermentioned Officers to be Companions of the Distinguished Service Order, in recognition of their gallantry and devotion to duty in the field :—

* * * * * * * *

Captain Shirley East Apthorp, 96th Berar Infantry, Indian Army.

For conspicuous gallantry. During a retirement, when it was found that two wounded men had been left behind, he immediately volunteered with a private to return some 300 yards to their rescue in face of a heavy fire from the advancing enemy. A serjeant and private were guarding the wounded men, and between them all they brought them back into safety.

* * * * * * * *

Captain Andrew Henry Jukes, 9th Gurkha Rifles, Indian Army (Staff Captain, 6th Canadian Infantry Brigade).

For conspicuous good service and ability as a Staff Captain, Intelligence Captain Jukes organised on two occasions enterprises against the enemy trenches, with marked success. His enterprise and careful training has resulted in most excellent work on the part of the Scouts.

* * * * * * * *

His Majesty the King has been graciously pleased to confer the Military Cross on the undermentioned Officers and Acting Warrant Officer, in recognition of their gallantry and devotion to duty in the field :—

* * * * * * * *

Captain Harold Wyn Goldfrap, 103rd Mahratta Light Infantry, Indian Army.

For conspicuous gallantry in action. He rallied and led forward men who were without leaders, and set a fine example. Later, he ably assisted in the successful defence of a post which was heavily attacked.

* * * * * * * *

Lieutenant Walter Augustus Gore Hinds, 103rd Mahratta Light Infantry, Indian Army.

For conspicuous gallantry and enterprise. With a small party he led a raid on some advanced enemy trenches. Twenty of the enemy were bayonetted and ten taken prisoners. He set a fine example under heavy shell and rifle fire.

* * * * * * * *

Lieutenant Edmund Cyril Staples, 11th Rajputs, Indian Army.

For conspicuous gallantry and devotion to duty. He was in command of Brigade machine guns, and, although wounded himself and with only one wounded man to help him, he continued to work one of the guns at close range and under heavy fire for about an hour until the action closed. At the end he was working the gun alone as the man helping him was a second time wounded.

* * * * * * * *

Second Lieutenant James Patrick Wood, Indian Army Reserve of Officers (attached 117th Mahrattas).

For conspicuous gallantry and devotion to duty under heavy shell fire. He rescued two men from a heap of *débris*, and was rescuing a third when his arm was shattered by a shell. His conduct during a heavy attack by the enemy was admirable.

* * * * * * * *

Third Supplement dated the 15th March 1916, to the "London Gazette" of the 14th March 1916, pages 2899, 2900, 2901, 2902, 2903 and 2904.

War Office,
15th March 1916.

REGULAR FORCES.

RAILWAY DEPARTMENT.

(RAILWAY BOARD.)

NOTIFICATIONS.

Simla, the 17th April, 1916.

No. 478-E.-16.—The undermentioned Assistant Traffic Superintendents of the North-Western Railway, are promoted from class III, grade 3, to class III, grade 2, of the Superior Revenue Establishment of State Railways, with effect from the 22nd March 1916 :—

Mr. J. W. Ogle.

Mr. F. G. Griffith.

Mr. J. N. Nagel.

The 18th April, 1916.

No. II-T.—In exercise of the powers conferred by the Notification of the Government of India in the Department of Commerce and Industry, No. 801, dated the 24th March 1905, and in pursuance of Section 47, sub-section 3, of the Indian Railways Act, 1890 (IX of 1890), as in force in British India or as locally applied, the Railway Board sanction the following rules, made under sub-section (1), clause (*f*) of the said section, for and to be applicable to the Madras and Southern Mahratta Railway situate in British India or in Native States for regulating the terms and conditions on which the Railway administration will warehouse or retain goods at any station or depôt on behalf of the consignee or owner.

THE MADRAS AND SOUTHERN MAHRATTA RAILWAY COMPANY LIMITED.

Rules for the Warehousing and Retention of Goods.

I.— WHARFAGE.

On goods for despatch waiting to be consigned.

1. For goods of every description brought on to Railway premises for despatch but not consigned, wharfage may be charged at a rate not exceeding one anna per maund or part of a maund per day or part of a day if consignment notes are not received before closing time of the day on which such goods are brought to the station.

2. The Railway administration is not responsible for articles of any description intended to be booked as parcels, luggage, or goods for conveyance by

passenger, mixed, or goods trains, unless they shall have been accepted, booked and a printed receipt in the prescribed form has been granted duly signed by the authorized representative of the railway.

On goods available for delivery.

3. (1) A wharfage charge may be levied in respect of all goods not removed from railway premises before closing time of the day following that on which they are made available for delivery and this charge shall not exceed per day or part of a day, one anna per maund or part of a maund, calculated :—

(a) where freight is levied on weight, upon such weight, and

(b) where freight is levied on the vehicle in or on which the goods are carried, upon the carrying capacity of such vehicle.

(2) The goods shall be warehoused either under cover or in the open as space may be available.

On luggage and parcels available for delivery.

4. (a) For unclaimed booked luggage and parcels a wharfage charge not exceeding two annas per maund or part of a maund per 24 hours or part of 24 hours with a minimum charge as for one maund, may be made if they are not removed from railway premises within 48 hours from midnight of the day of arrival.

On carriages, palanquins and motor cars by passenger train.

(b) For all carriages, palanquins and motor cars carried by passenger trains and awaiting removal by consignee a charge of two annas per maund or part of a maund per 24 hours or part of 24 hours, may be made after expiry of 24 hours from the time they are available for delivery, calculated upon the carrying capacity of the vehicle on or in which they are carried, subject to a minimum of 8 annas per hour.

A similar charge may be levied on all carriages, palanquins and motor cars awaiting despatch after the expiration of 24 hours from the time they are brought to the station.

On birds, poultry and animals.

(c) For birds, poultry and animals charges may be made as follows, after the expiry of 6 hours from the time they are available for delivery :—

Animals—one anna per animal per hour or part of an hour.

Poultry—one anna per head per hour or part of an hour.

Birds in baskets or crates, etc.,—one anna per cubic foot or part of a cubic foot per hour or part of an hour.

These charges to be in addition to any expenses entailed in feeding the birds, animals, etc.

Under any circumstances, live animals should be removed from the railway premises within 24 hours from the time of their arrival at destination, failing which they may be disposed of under Section 56, Clause 2, Railway Act IX of 1890.

Notice of arrival.

5. Subject to the provisions of section 56 of the Indian Railways Act, 1890 (IX of 1890) notice of arrival will be sent when practicable, but the Railway administration will accept no responsibility for non-receipt thereof.

II.—DEMURRAGE.

On vehicles both goods and coaching other than passenger carriages ordered and waiting to be loaded by senders.

6. (a) Demurrage at a rate not exceeding one anna per ton or part of a ton of carrying capacity per hour or part of an hour may be charged on all vehicles ordered and not loaded or loaded and not made available for despatch, after the expiry of nine hours of daylight from the time at which they are placed in position for the purpose, subject to a minimum of 8 annas per hour per coaching vehicle other than passenger carriages.

On loaded vehicles both goods and coaching other than passenger carriages waiting to be discharged by consignees.

(b) Demurrage at a rate not exceeding one anna per ton or part of a ton of carrying capacity per hour or part of an hour may be charged on all loaded vehicles requiring to be discharged by owners which are not discharged after the expiry of nine hours of daylight from the time of being placed in position for unloading subject to a minimum of 8 annas per hour per coaching vehicle other than passenger carriages. The railway may at its option unload the vehicle and charge the consignee for doing so and charge wharfage on the contents under Rule 3.

On reserved carriages and special trains.

7. (a) When a carriage is ordered but not used by the train for which ordered demurrage at a rate not exceeding the following may be charged until attached to a running train at the starting station or until intimation is received that the carriage is not required :—

Description of carriages.	On Broad Gauge.	On Metre Gauge.
Four wheelers ...	8 annas per hour or part of an hour.	6 annas per hour or part of an hour.
Six wheelers ...	12 ,, ,, ,,	9 ,, ,, ,,
Bogies	1 Rupee ,, ,, ,,	12 ,, ,, ,,

subject to a minimum charge of Rs. 5 for both types of vehicles.

(b) When for the convenience of passengers, reserved carriages are detained at intermediate stations or at destination station, demurrage may be charged as shown in sub-clause (a).

(c) Demurrage may be charged for passenger special trains when they do not start at the time ordered, at a rate not exceeding 8 annas per broad gauge vehicle per hour and 6 annas for each metre gauge vehicle per hour and Rs. 10 per hour for the engine. Fractions of an hour are to be reckoned as an hour. Demurrage may also be charged for stoppages *en route* or detention at destination station at the same rates [See Rule 7 (b)].

(d) In the case of a special train being countermanded, the charges notified in sub-clause (c) may be charged.

III.—CALCULATION OF CHARGES.

8. In calculating wharfage and demurrage charges, fractions of one anna less than six pies shall be dropped and six pies and over shall be charged as one anna. Where the total amount of demurrage or wharfage due on any consignment is less than two annas it shall be foregone.

IV.—GENERAL.

9. (a) Demurrage and wharfage charges as herein prescribed may also be charged on part consignments available for delivery, but not removed from Company's premises within the free time prescribed.

(b) In the event of goods requiring to be loaded or unloaded by owners becoming liable to both demurrage and wharfage charges, the Railway Administration may levy both demurrrage and wharfage charges for such periods as the goods would be liable to such charges under these rules.

10. If and for so long as the state of the traffic or any sudden emergency makes it necessary and after advertisement in the local newspapers, the rate of demurrage or wharfage may be increased and the free time may be curtailed.

11. The Railway administration shall have the same lien on goods for demurrage, wharfage and, if incurred, for unloading, as for freight; and these charges must, unless under special arrangements a running account is kept, be paid before the goods are removed.

12. Where the free time allowed in the previous rules includes either Sunday, Christmas Day or Good Friday, such days shall be allowed free in addition.

V.—TREATMENT AND DISPOSAL OF UNCLAIMED GOODS LUGGAGE AND PARCELS AND OF LOST PROPERTY FOUND IN RAILWAY VEHICLES OR ON RAILWAY PREMISES.

13. Subject to the exception mentioned in Rule 18 below, unclaimed goods are kept on hand at the station to which booked for a period of not less than one month during which time the notice prescribed in Section 56, sub-section (1) of the Indian Railways Act, 1890 (IX of 1890) will, if possible, be served upon the person appearing entitled thereto.

14. If not taken delivery of within a period of not less than one month after receipt at the station to which invoiced, unclaimed goods are sent to the unclaimed goods or lost property office and dealt with as laid down in Rule 21 below.

15. Unclaimed articles are liable to the Wharfage and demurrage charges, herein before referred to, as well as to all freight and special expenditure incurred by the railway on account of their custody and disposal.

16. After being on hand for one month unclaimed booked luggage and parcels may be transferred to the Lost Property Office and dealt with in the manner prescribed in Rules 15, 17, 18, 21 and 22.

17. Where articles such as arms, ammunition, explosives, intoxicating liquors, opium and its preparations, and hemp drugs, the sale of which by unlicensed persons is prohibited by law, are left unclaimed in the possession of the railway, they will be made over to the police or excise authorities for disposal under the laws affecting the article. When not of a dangerous, perishable or offensive character, they will, however, be retained in the possession of the railway for the same period as that prescribed for other unclaimed articles.

This rule in so far as it relates to explosives is supplemental to, and not in modification of, the rules made under the Indian Explosives Act.

18. Perishable articles unclaimed or not taken delivery of will be disposed of, by auction at owner's risk and expense, by the Station Master of the station at which they may be left after the expiry of 24 hours or earlier if they are, or are likely to become offensive.

19. Lost Property found in Railway vehicles or on Railway premises may, subject to the exception mentioned in Rule 18, be sent to the nearest Lost Property Office and be similarly dealt with.

20. An account of all unclaimed luggage and of any lost property found on the line or on Railway premises shall be kept by the Station Master.

21. Public sales by auction are held from time to time of all unclaimed or lost property which has remained in the possession of the railway over six months. At least fifteen days' previous notice of each auction will be given by advertisement in a newspaper.

22. Any surplus proceeds arising out of sales of lost property or unclaimed consignments after payment of all charges and expenses due to the railway will be paid to the person or persons thereto entitled.

VI.—CLOAK ROOMS.

23. Passengers may leave small parcels or packages in the cloak rooms at stations where there are such rooms.

24. A charge of 2 annas per maund or part of a maund with a minimum charge per package as for one maund may be levied for each 24 hours, or part of 24 hours, during which the parcel or package remains in a cloak room.

25. Receipts are granted to depositors and re-delivery is made to holders of such receipts; after which the responsibility of the railway ceases.

26. Articles remaining in cloak rooms for a longer period than one month may be treated as unclaimed property.

The 19th April, 1916.

No. 27-P.-16—It is hereby notified for general information that the Railway Board have sanctioned a detailed survey being carried out by Messrs. Grandage & Co., of Calcutta and Mr. N. M. Dutt jointly for a line of railway on the metre gauge between Jamalpur and a point on the Mymensingh-Bhairab Bazar railway under construction, opposite Mymensingh, *via* Naltiabari with extension to Bakshiganj, a distance of about 71 miles.

2. The survey will be known as the Mymensingh-Jamalpur-Bakshiganj railway survey.

The 20th April, 1916.

No. 24-T.—In exercise of the powers conferred by the Notification of the Government of India in the Department of Commerce and Industry, No. 801, dated the 24th March 1905, and in pursuance of section 47, sub-section (3) of the Indian Railways Act, 1890 (IX of 1890), as in force in British India, the Railway Board sanction in supersession of their Notification No. 367, dated the 30th December 1914, the following rules, made under sub-section 1, clause (*f*) of the said section, for and to be applicable to the Bombay Port Trust Railway, situate in British India, for regulating the terms and conditions on which the Railway Administration will warehouse or retain goods at any station or depôt on behalf of the consignee or owner.

BOMBAY PORT TRUST RAILWAY.

Rules for the warehousing and retention of goods.

Demurrage on wagons.

(*a*) Demurrage may be charged at a rate not exceeding one anna per ton or part of a ton of carrying capacity of the wagon per hour or part of an hour.

(*b*) Working hours are 8 to 17 hours (8 A.M. to 5 P.M.)

(*c*) "Private siding" means a Railway line or siding which is itself rented from the Bombay Port Trust Railway or which serves a shed, plinth or place which is so rented.

(*d*) "Public siding" means any Railway line or siding used for the receipt or despatch of goods, other than a "Private" or "Dock" siding and includes certain sidings in the Docks especially designated as "Public sidings."

(*e*) "Dock siding" means a Railway line or siding within any of the Docks but excludes certain sidings specially designated as "Public sidings".

(*f*) Demurrage may be charged on a loaded wagon, consigned to a private siding, after the expiry of six (6) working hours from the time the wagon is placed in the private siding, or in the event of the siding being full of wagons not released by the consignee, from the time it is placed in an adjoining siding, until it is unloaded or rebooked.

(*g*) Demurrage may be charged on a loaded wagon, consigned to a public siding and required to be unloaded by the consignee, after the expiry of nine (9) working hours from the time the wagon is placed in position for unloading until it is unloaded or rebooked.

(*h*) Demurrage may be charged on an empty wagon, which a consignee has asked for in his private siding, after the expiry of six (6) working hours from the time the wagon is placed in the private siding, or in the event of the siding being full of wagons not released by the consignee, from the time it is placed in an adjoining siding, until it is loaded.

(*i*) Demurrage may be charged on an empty wagon, which a consignor has asked for in a public siding and which requires to be loaded by the consignor, after the expiry of six (6) working hours from the time the wagon is placed in position for loading until it is loaded.

(*j*) Demurrage may be charged on an empty wagon, which a consignor has asked for in either a private, public or dock siding, but which he does not load, from the time the wagon is placed in position until the consignor informs the Bombay Port Trust Railway clerk in the goods office that he does not require the wagon.

(*k*) Demurrage may be charged on a loaded wagon consigned to a dock siding, but which the consignee has not requisitioned through the Dock Manager, from the time the wagon is received on the Bombay Port Trust Railway or from the time the wagon is loaded on the Bombay Port Turst Railway until the consignee does requisition it.

(*l*) Demurrage may be charged on a loaded wagon consigned to a dock siding but which cannot be unloaded by the Dock Department owing to the consignee not being present or not having paid the railway charges or owing to any other delay on the part of the consignee, after the expiry of four (4) working hours from the time the wagon is placed in position for unloading until the consignee has rectified matters. This charge is independent of any charge which may be made under sub-paragraph (k).

(*m*) Demurrage may be charged on an empty wagon, which a consignor has asked for in a dock siding after the expiry of four (4) working hours from the time the wagon is placed in the siding until it is loaded.

T. RYAN,
Secretary, Railway Board.

OF INDIA.

EDUCATION.

...the 21st April 1916.

The following preliminary statement of plague seizures and deaths reported in India, during the week ending the 15th April 1916 is published for general information :

Presidency or Province.	Division.	Districts, States, Towns of 50,000 or more inhabitants, and Ports.	Plague seizures	Plague deaths.

E. D. MACLAGAN,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Rainfall summary for the seven days ending at 8 hrs. on Thursday, the 20th April 1916, based on the Indian Daily Weather Reports of the period.

Weather was more or less disturbed in northwest India owing to two depressions from Persia and local rainfall occurred in Baluchistan, the North West Frontier Province, Kashmir, the Punjab, north Rajputana and the northwest of the United Provinces. Rainfall was of daily occurrence in Assam, and there were sporadic thundershowers in the rest of northeast India as well as in the east of the United Provinces and the Peninsula. In Burma rainfall was confined chiefly to the northern districts.

2. *Burma.*—There was nearly general rain in the north of the province on the 13th and 18th.

Northeast India, including Orissa.—Fairly widespread rainfall occurred in Assam on the 17th and 19th, and in Chota Nagpur on the 16th and 17th; elsewhere only isolated falls were recorded.

The United Provinces, Central India and the Central Provinces.—Several falls of rain occurred in the east of the United Provinces on the 16th and in the west on the 19th. Rain was also reported from Jagdalpur and Pachmarhi.

Northwest India.—The week was rainless in Sind, Gujarat and south Rajputana, but elsewhere local falls were reported.

The Peninsula.—Showers due to thunderstorms occurred at nearly every station in south Hyderabad on the 13th, but over the rest of the division there were only isolated falls.

3. The chief amounts of rain reported were as follows :—

April 13th. Victoria Point 0·84", Dibrugarh 0·82", Parachinar 0·81", Chaman 0·51", Pasni 0·90", Gulbarga 1·07" and Hyderabad 0·97".

„ 14th. Cherrapunji 1·45", Mymensingh 1·95" and Drosh 0·71".

„ 15th. Cherrapunji 1·39", Dinajpur 0·90", Jalpaiguri 0·74" and Cochin 1·04".

„ 16th. Mergui 1·08", Burdwan 0·64", Ranchi 0·65", Purnea 1·05" and Trivandrum 2·50".

„ 17th. Darjiling 5·32" and Balasore 0·61".

„ 18th. Lashio 0·96", Bhamo 1·01", Shillong 2·71", Khushab 0·67", Sonamarg 0·60", Bikaner 0·22", Hyderabad (Deccan) 0·98", Mysore 0·80" and Cochin 0·72".

„ 19th. Cherrapunji 1·22", Tezpur 1·04", Dhubri 1·13", Narayanganj 0·70", Mymensingh 0·52", Mukteswar 0·77", Ambala 0·32" and Jagdalpur 0·90".

4. The rainfall of the week was 20 per cent. or more in excess in Baluchistan, the Punjab Southwest, Rajputana West, Central India East, the United Provinces East, Bihar, Chota Nagpur, Upper Burma, Hyderabad South and Malabar; it was normal in the North-West Frontier Province and Bengal, and in defect by 20 per cent. or more in all the remaining divisions, with the exception of the following where no rainfalls at this time of year :—Sind, Gujarat, Rajputana East and Central India West.

The rainfall from the 3rd December to date is within 20 per cent. of the normal in Baluchistan, the Bombay Deccan, Bengal and Assam, more than 20 per cent in excess in Central India West, Burma and the Bay Islands, and in defect by more than 20 per cent. over the rest of the country. The actual deficiency amounts to 5" in Kashmir, 4" in Madras Southeast and 3" in the Punjab East and North, Chota Nagpur, Orissa and the Madras Coast North.

Division.	Rainfall data for week ending on 20th April 1916.			Rainfall data from 3rd December 1915 to 20th April 1916.				
	Actual rainfall in inches.	Normal rainfall in inches.	Excess or defect in inches.	Actual rainfall to date in inches.	Normal rainfall in inches.	Excess or defect in inches.	Percentage departure from normal. This week.	Percentage departure from normal. Last week.

GILBERT T. WALKER,
Director-General of Observatories.

R. A. MANT,
Secretary to the Government of India.

SIMLA;
Dated the 20th April 1916.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Season and Crop Prospects for the week ending Saturday, 15th April 1916.

Burma.—Rain reported from twenty districts. The fall in three districts and in the Chin Hills exceeded one inch. Harvesting of miscellaneous crops and clearing of hillsides for cultivation are progressing. The condition of standing crops is satisfactory. Cattle are healthy. The price of unhusked rice at Rangoon has fallen slightly to rupees 117 per hundred baskets and is much above normal. The supplies are small. The market for white rice is steady.

Assam.—Moderate to heavy rain fell in all districts and facilitated agricultural operations. Pressing of sugarcane is nearing completion. Hoeing and pruning of tea continue. Ploughing of land for and sowing of autumn rice, broadcast winter rice and jute and plucking of tea are in progress. Harvesting of spring rice has commenced in Sylhet. Some damage has been caused by hailstorms Prospects of tea and of spring rice are fair. The price of common rice is practically stationary. Cattle disease is reported from seven districts. Scarcity of water is still reported from Kamrup.

Bengal.—During the week light to moderate rain fell generally throughout the Province. The recent rainfall has greatly helped the agricultural operations and has done good to the standing sugarcane, rice and mango crops. Preparation of lands for jute and autumn paddy and their sowings are going on briskly all over the Province. Water scarcity continues to be reported from parts of the Burdwan and Bankura districts. Fodder is reported to be also insufficient in the latter district. Cattle disease prevails in nine districts. The average price of common rice for the Province has risen slightly as compared with that of the preceding week.

The weekly report on famine and scarcity is as follows:—In the Bankura district distress in affected areas is generally unchanged. People on works are generally in good condition. Relief measures are adequate. People are freely resorting to works. Loans are being advanced. Scarcity of fodder continues. Slight rain fell throughout the district. Private charitable funds are giving assistance. Prices fell slightly. The price of rice is 9½ seers per rupee. The number of persons on relief works was 16,702 and on gratuitous relief 24,237, total 40,939. Decrease in the number on works is due to a local festival. In the Tippera district rain fell in the Brahmanbaria sub-division throughout the week, impeding the progress of sowing and necessitating the cutting of the unripe *boro* paddy in places where standing crops were being submerged. Cholera is decreasing. The price of rice is 7½ seers per rupee. The number of persons on relief works was 3,533 and on gratuitous relief 6,735, total 10,268 The decrease in the number on works is due to occasional stoppage of work owing to bad weather.

Bihar and Orissa.—Light rain was fairly general in the Tirhut and Bhagalpur divisions and was scattered in the rest of the Province. Harvesting of spring crops and pressing of sugarcane are approaching completion. Planting of sugar cane for the next season and preparation of lands for autumn crops are in progress. Standing crops are doing well. The average price of common rice has remained almost stationary as compared with that of the preceding week. The supply of fodder and water is sufficient. Cattle disease is reported from several districts. The attendance of persons on test works in Manbhum was 2,753 and in Singhbhum 4,606. Gratuitous relief was given to 1,131 persons in Manbhum. The condition of standing crops in the Feudatory States of Orissa is good.

United Provinces.—With the exception of slight showers in the Almora and Jalaun districts the week was rainless Rain is still urgently needed in the hills where crops are reported to be withering. Winnowing and threshing of spring crops and irrigation of sugarcane and extra crops are in progress. Opium weighments have commenced in Oudh. Harvesting of spring crops and sowing of sugarcane have been almost completed. Standing crops are generally doing well. The condition of agricultural stock is good but cattle disease is reported from seventeen districts. Fodder though generally sufficient continues dear and scarce in some of the western districts. Water is everywhere ample. Markets are well supplied. Prices are practically stationary.

Punjab.—During the week the weather was generally dry. The condition of standing wheat and other crops on irrigated areas is generally average and on unirrigated areas poor. Reaping of spring crops continues. The yield on irrigated areas is expected to be below normal to normal and on unirrigated areas bad in the southeast and poor elsewhere. Sowings of extra spring crops, sugarcane and cotton are in progress and are generally normal. Germination of extra spring crops and sugarcane is generally good. Cattle are generally healthy but are weak in some districts owing to scarcity of fodder. Water for drinking and canal

irrigation is generally sufficient. Prices are generally stationary. In the case of wheat they range between normal and warning rates and in other cases between warning and scarcity rates. Price of wheat:—Ambala and Rawalpindi 10¾, Ferozepore 11, Lahore 11½ and Lyalpore 12½ seers per rupee.

North-West Frontier Province.—Slight rain fell at some places but more rain is badly required in Dera Ismail Khan. The weather is cloudy and temperate. Standing crops are average in Peshawar and in irrigated areas of Bannu and Dera Ismail Khan, below average in unirrigated tracts of Bannu and poor in unirrigated areas of Dera Ismail Khan. Harvesting of sugarcane is nearly finished in Bannu with outturn below average. Harvesting of spring crops has commenced in Bannu and of barley and spring oilseeds is proceeding in Peshawar with outturn average. Sowings of autumn rice and cotton have commenced in Bannu, of sugarcane, chillies, cotton and vegetables in Peshawar and those of extra spring crops continue in Dera Ismail Khan. The condition of cattle is good except in unirrigated tracts of Bannu where it is bad. Fodder and water are sufficient except in Dera Ismail Khan where fodder is dear and water is very scarce in some southern villages. Prices are high but are falling in the case of barley in Peshawar and of gram and wheat in Dera Ismail Khan. That of gram is rising in Peshawar and those of wheat, gram, barley and maize in Bannu.

Jammu.—Slight rain fell in some tahsils. Prices are fluctuating. Wheat sells from 8 to 12 and maize from 12 to 18 seers per rupee. The condition of standing crops is average on the whole. There is no cattle disease. Fodder is sufficient except in a few places.

Kashmir.—The rainfall during the week was fair. The condition of standing crops is good. Cattle are generally healthy. Fodder and water are sufficient. Prices are average.

Rajputana.—The weather is hot and clear. Harvesting continues in a few places but the area of the spring crop is restricted. Cattle are in very poor condition owing to fodder scarcity in most States and in Ajmer-Merwara. Cattle disease is reported from Banswara, Dungarpur and Kotah. Water is generally sufficient except in Marwar, Kotah and Tonk. Prices are a little easier. The number of persons on test works in Kishengarh was 1,394 and in Karauli 8,686.

The weekly report on scarcity in Merwara is as follows :—Distress is increasing slightly among rural population and most people are resorting to works. There is no influx of foreigners. The physical condition of the people is satisfactory with the exception of a small proportion of children. Relief measures are sufficient. Advances for fodder are being given. The public health is satisfactory. Private relief is not necessary. Prices are 11 seers per rupee.

Central India.—No rain fell during the week. Rain has been insufficient in some portions of the Mehidpur and Rampura-Bhanpura districts of the Indore State and sufficient elsewhere Harvesting and threshing of spring crops are in progress almost everywhere. Standing crops are generally in good condition and the probable outturn is normal on unirrigated lands in Gwalior, fair in Indore and good elsewhere. Agricultural stock is generally in good condition except for cattle disease in the Bhander, Bijapur, Pichhor and Jawad tahsils of the Gwalior State, in the Indore and Rampura parganas of the Indore State and in parts of Dhar, Barwani, Jhabua, Alirajpur and Jobat of the Southern States. The fodder supply is generally good except in a few tahsils of the Gwalior and Malwa divisions where there is scarcity of both fodder and water. Prices are rising slightly in Gwalior and Bundelkhand, normal in Bhopal, slightly fluctuating in Indore and steady elsewhere.

Central Provinces.—The weather has been hot with occasional clouds. A light shower fell in Drug. Harvesting has been practically completed but threshing and winnowing are still in progress. Preparation of land for autumn crops continues. The supply of foodder and water is adequate and cattle are healthy. On the whole the price of wheat shows a downwards tendency while that of gram has a tendency to rise.

Feudatory States.—Threshing and winnowing are still in progress and preparation of land for the next season's crops continues.

Bombay.—Rain fell during the week in Nasik, Ahmednagar, Poona, Satara, the Konkan and the Karnatak. Standing crops are generally in good condition except for slight damage by storms in Larkana. Cotton picking continues in Kaira, Rewa Kantha, Bijapur, Dharwar and Kolhapur. Harvesting of spring crops is generally progressing. The fodder supply is deficient in parts of Sind and Kaira and in Kathiawar, Cutch and Baroda. Agricultural stock is sufficient. Cattle are in good condition except in Larkana, Hyderabad, Thar and Parkar, Ahmedabad and Palanpur. Drinking water is generally adequate. Water for irrigation is deficient in Ahmedabad, Kaira, Broach, Kathiawar, Dharwar and Kolhapur. Prices of food grains have fallen slightly in Gujarat and are generally steady elsewhere. The number of persons in receipt of gratuitous relief in Kathiawar was 240.

Hyderabad.—Isolated showers were received in four districts. The average fall was 8 cents. Harvesting of spring crops is nearing completion. They have been damaged somewhat by rain. Late rice crop is being irrigated and is in fair to good condition but is suffering from scarcity of water in parts of the Karimnagar taluka. Harvesting is in progress. Cattle disease prevails in three talukas. Prices of grains are almost constant. Course rice is selling at 9 and white juar at 14 seers per rupee in Hyderabad city. The highest price in districts is 10 seers per rupee in Nalgonda and Warangal and the lowest 24 seers per rupee in Adilabad.

Mysore.—Slight rain fell in all districts except Tumkur. The price of food grains is steady, and markets are well supplied. Standing crops are generally in good condition. The outturn of the harvested sugarcane, paddy and cotton is fair to good. Ploughing and sowing of paddy and sugarcane are in progress. Prospects of the season are generally good. Cattle are healthy in the greater part of the State. Water and fodder are available.

Coorg.—The rainfall during the week was 64 cents. Coffee is in blossom in parts. Prices of food grains are normal. The public health is fair. Water and fodder for cattle are sufficient.

Madras.—The rainfall during the week was fair in Malabar, Travancore and Cochin and light or *nil* elsewhere. Standing crops are in fair to good condition generally but they are withering or have withered in parts of four districts and require more water in parts of another. Harvesting of paddy, sugarcane and dry crops is proceeding with outturn fair to normal generally. Sowings of paddy, sugarcane and dry crops are proceeding or are nearing completion normally. The condition of cattle is generally good. The water supply is sufficient except in parts of Ganjam, Godavari, Bellary, Anantapur, South Canara and the central and southern parts. Pasture is generally insufficient but fodder is generally available. Prices are stationary.

A. T. STOWELL,
Assistant Secretary, Railway Board.

Simla, the 20th April 1916.

Printed and Published for the Government of India *at the* Government Central Printing Office, *Simla.*

The Gazette of India.

PUBLISHED BY AUTHORITY.

CALCUTTA, SATURDAY, APRIL 22, 1916.

Separate paging is given to this Part in order that it may be filed as a separate compilation.

PART II.

Notifications by High Court, Comptroller-General, etc.

GAZETTE OF INDIA.

NOTICE.

The 18th March 1916.

On and after 8th April and until further notice, Parts I, IV, V and VI of the *Gazette of India* and the Weather and Crop Report will be published in Simla. Parts II and III will continue to be published in Calcutta. All notifications and other matter intended for publication in those Parts should be addressed to the Publisher at Simla and Calcutta, respectively.

Attention is invited to the following Circular Memorandum of the Government of India, Home Department, of August 1901:—

"It has been brought to the notice of this Department that matter for the *Gazette of India* is sometimes sent to the Press late on Friday evenings for publication in the next day's *Gazette* and that this involves considerable inconvenience to the Press and expense to Government. In the Circular Memorandum of this Department, No. 777—79, dated 9th February 1870, the Government of India directed that all notifications or other matter intended for insertion in the *Gazette of India* should be delivered at the Press not later than 2 P.M. on Friday, and that any papers sent thereafter must be certified to be extremely urgent in order to ensure their appearance in the next day's *Gazette*. The undersigned is directed to request that these orders may be more strictly observed in future, and that Departments will refrain from sending to the Press as extremely urgent any papers which can without harm or inconvenience be held over for the next *Gazette*.

J. P. HEWETT,
Secretary to the Government of India."

APPLICATION FOR AMENDMENT UNDER SECTION 17.

Notice is hereby given that all persons interested in opposing the following application to amend may at any time within three months of the date of this *Gazette of India* give notice at the Patent Office in the prescribed form No. 5 of such opposition.

2394 of 1915.—F. L. Milne, Engineer in Charge, of Municipal Electricity Department, Simla, seeks leave to amend the specification of his application for a patent numbered as above. The proposed amendments as shown in the printed specification are as follows:—

On page 2.

Line 1. Substituting "adopted" for "adapted".

Line 4. Inserting "in cases where this is advantageous" after "ribs".

Line 8. Transferring "in the case of an immersion heater, hotplate or the like" after "spirals" in line 7.

Line 12. Inserting "in the case of an immersion heater, hotplate or the like. There is no objection to the conductor being above this level where space permits" after "ribs".

Line 18. Inserting "or on" after "within" and "and cannot get displaced" after "framework".

Line 23. Inserting "in cases where this is advantageous" after "slab".

AMENDMENT ALLOWED UNDER SECTION 17.

No. 1143 of 1913.—In pursuance of leave granted on 17th April 1916, the above numbered specification has been amended in the manner set forth in the *Gazette of India*, dated 15th January 1916.

NOTICES.

THE PATENT OFFICE, 1, COUNCIL HOUSE STREET, CALCUTTA.

Public room, open 11 a.m. to 4 p.m.; Saturdays, 11 a.m. to 1 p.m.

1. *All communications* relating to applications for patents and for registration of designs under the Indian Patents and Designs Act (II of 1911), or in continuation of applications under the Inventions and Designs Act (V of 1888) should be addressed to the Controller of Patents and Designs, 1, Council House Street, Calcutta. Documents sent by post should be carefully packed.

2. *Directions* for the guidance of inventors and others are given in the Patent Office Handbook (price one rupee) which contains the Indian Patents and Designs Act, 1911, the Indian Patents and Designs Rules, 1912, the Indian Patents and Designs (Temporary Rules) Act, 1915, the Indian Patents and Designs (Temporary) Rules, 1915, together with current regulations and instructions. These should be consulted before an application is made to the Controller.

3. *Advice.* The Patent Office cannot undertake (1) to give opinions on the interpretation of Patent Law, or on the advisability of protecting inventions and designs or on their infringement; (2) to make searches in respect of information available in the public room; (3) to recommend any particular agent; or (4) to assist in the disposal of inventions. Applicants are warned that the Indian Patents and Designs Act, 1911, is in force in British India only, and patents granted under it do not extend to the United Kingdom or any of the British possessions. The International Convention for the Protection of Industrial Property does not include India. For information regarding patents in countries other than India applications should be made to the patent offices in the countries concerned.

4. *Fees* are payable in *cash* and must be received in the Patent Office within the time allowed by the Acts. When cheques are offered in payment of fees, it must be clearly understood that the office cannot hold itself responsible for any delay that may occur in the collection of cash on the cheques; any cheque not payable in Calcutta is subject to commission. In cases where it is not possible to have the fees handed in at the Patent Office, it is preferable to send them by money-order or postal order payable at Calcutta to the Controller of Patents and Designs, and to advise him that they have been so sent. Stamps will not be received in payment of fees.

5. *Trade and property marks and names* are not registered and *medicines* are not patented under the Indian Patents and Designs Act. There is no provision of Law in British India for their registration. Neither does this Act deal with *pictures, photographs*, etc., for which copyright is obtainable under the Indian Copyright Act, 1914.

6. *Printed Specifications* of applications, which have been accepted, are published within about three weeks after acceptance has been notified in the *Gazette of India*.

These specifications can be purchased at the Patent Office at a uniform price of 8 annas per copy; and may be seen free of charge, together with other publications of the Patent Office, at the following places:—

SULPHATE OF QUININE, SULPHATE OF CINCHONIDINE, CINCHONA FEBRIFUGE, RESIDUAL ALKALOID AND QUINOIDINE.

Manufactured at the Bengal Government Cinchona Plantation.

These articles are guaranteed to be free from wilful admixture with other Cinchona alkaloids. Quinine can be purchased by Government officers, District and Local Boards for Hospitals and Dispensaries in the Provinces of Bengal, Bihar, Punjab and Assam on indents duly countersigned by the Civil Surgeon of their Districts. It can also be purchased by Missionaries for *bonâ fide* public purposes. It is never sold to private persons or firms. Cinchona Febrifuge both in powder and 3½ grain tablet forms and Cinchonidine can be purchased by Government officers and the general public. It is also sold by the Principal Druggists in Calcutta. Quinoidine or *Pure amorphous alkaloid* and *Residual Alkaloid* or *Amorphous cinchona alkaloid*, which contains about 40 per cent. of *pure amorphous Alkaloid*, are for sale to Missionaries and Government Institutions only. *These drugs are sold strictly cash and in advance but private purchasers may use the V. P. Post system*, and are obtainable from The Superintendent, Juvenile Jail, Alipore.

The rates for these drugs from 1st April 1916 are as follows:—

SULPHATE OF QUININE.

	R
For quantities 60 lbs. and above in one delivery	21-8 per lb.
For quantities of not less than 6 lbs. but below 60 lbs. in one delivery	22-8 ,,
For any quantity less than 6 lbs.	23 ,,

SULPHATE OF CINCHONIDINE.

	R
For quantities of not less than 6 lbs. in one delivery	11 per lb.
For any quantity less than 6 lbs.	12 ,,

CINCHONA FEBRIFUGE.

	R
For quantities of not less than 6 lbs. in one delivery	5 per lb.
For any quantity less than 6 lbs.	6 ,,

RESIDUAL ALKALOID OR *AMORPHOUS CINCHONA ALKALOID* AND QUINOIDINE OR *PURE AMORPHOUS ALKALOID* AND QUINOIDINE TABLETS.

	R
For any quantity	4 per lb.

Quinine is available in 1-oz., ¼-lb., ½-lb., 1-lb. and 4-lb. tins.
Cinchonidine is available in ¼-lb., ½-lb. and 1-lb. tins.
Cinchona Febrifuge is available in ¼-lb., ½-lb. and 1-lb. tins.
Residual Alkaloid is available in 10-lb., 5-lb. and 1-lb. tins.
Quinoidine is available in 10-lb. and 1-lb. tins.
Quinoidine Tablets are available in 1-lb. tins.

Transit charges are in addition to the above prices in every case.

Drugs are sold for cash or by V.P. Post. Price of Postage must accompany the price of the drug (when the drug is required by Post). The name of the Railway and Steamer Station or Post Office must be written distinctly when the parcels are required by Rail, Steamer or by Post. A scale of Postage is given below:—

[For ¼ and ½ lb. 4 As.; 1 lb. 6 As.; 2 lbs. 10 As.; 3 lbs. 12 As.; 4 lbs. 1 Re.; 5 lbs. Re. 1 As. 4; and for 6 lbs. Re. 1 As. 6.]

Quinoidine tab.	1 lb.	Weg.	3 lbs.	Postage Re.	0 10 0
,, ,,	3 ,,	,,	6 ,,	,, Re.	1 0 0
,, ,,	2 ,,	,,	9 ,,	,, Re.	1 8 0

N.B.—Postage stamps will not be accepted as revenue.

CIVIL ENGINEERING COLLEGE, SIBPUR.

Delhi, the 14th April 1916.

No. 2538-*Home*.—Under the provisions of section 224 of the North-Western Provinces and Oudh Land Revenue Act, 1901 (III of 1901), the Chief Commissioner, Delhi, is pleased to direct that M. Khan Alam, Naib Tahsildar, shall exercise, in respect to the area added to the Delhi Province, by the proclamation published in Government of India, Home Department, Notification No. 984-C., dated 22nd February 1915, all the powers and perform all the duties of a Tahsildar laid down in sections 33 (3), 34, 35 and 39 of the said Act.

No. 2549-*Education*.—The following bye-laws framed by the Notified Area Committee of Delhi under the provisions of sections 188 (s) (i) (ii) and (iii) and 199 of Act III of 1911, the Punjab Municipal Act, regarding the proper control of dogs within the limits of the Notified Area of Delhi are approved by the Chief Commissioner, Delhi, and are hereby published for general information.

These bye-laws will come into force six weeks from the date of the publication of this notification :—

Bye-laws to enforce the proper control of dogs in Notified Area, Delhi, under section 188 (s) (i) (ii) (iii) of the Punjab Municipal Act III of 1911.

1. The owner of any dog kept or brought within the limits of the Notified Area of Delhi shall on or before the 7th day of October in each year or within 15 days of its arrival register the dog at the office of the Notified Area Committee.

2. The form for registration shall be provided on application at the office of the Notified Area Committee.

3. On receipt at the office of the Notified Area Committee of the form of registration duly filled in, the owner shall be supplied by the Committee with a metal ticket on payment of a fee of Re. 1. In the case of Zemindars of Dhaka, Malakpur and Rajpur no charge will be made for supplying a metal ticket.

4. The period for which the registration and the metal ticket shall hold good shall be for the 12 months from 1st October to 30th September in the ensuing year.

5. The owner shall cause the dog to wear at all times a collar with the metal ticket supplied for the year firmly secured thereto.

6. Any dog not wearing the metal token of registration in accordance with clause 5 of these bye-laws, if found in any public place, will be removed to and detained in the Notified Area cattle pound, and will be liable to be destroyed or otherwise disposed of under the orders of the Health Officer, Notified Area, Delhi, if not claimed within 14 days.

7. For the purpose of these bye-laws any person in possession or charge of a dog during absence of the owner from Delhi Notified Area shall be held to be the owner of the same.

8. The above bye-laws shall not apply to—
   (1) dogs wearing collars and kept within the Civil Lines and Camp Area of Delhi for a period not exceeding 15 days ;
   (2) all dogs under the age of 6 months ;
   (3) all dogs kept by the Delhi Hunt Club for the purpose of hunting jackal.

9. Any person convicted of a breach of clause 1 or of clause 5 of these bye-laws shall be punishable with a fine not exceeding Rs. 50.

No. 2559-*Railways*.—Whereas it appears to the Chief Commissioner, Delhi, that land is required by Government for a public purpose, namely, for the purposes of a locomotive yard for the Bombay, Baroda and Central India Railway at Delhi Serai Rohilla, it is hereby declared that the undermentioned land is required for the said purpose.

This declaration is made under section 6 of Act I of 1894, and under section 7 of the said Act, the Deputy Commissioner, Delhi, is hereby directed to take order for the acquisition of the said land.

Specification of land.

Delhi, the 18th April 1916.

No. 2655-*Education*.—In exercise of the powers conferred by section 3(1) of the Ancient Monuments Preservation Act, VII of 1904, the Chief Commissioner, Delhi, proposes to declare that the undermentioned monuments are protected monuments within the meaning of the said Act.

Monuments.	*Locality.*
1. The Nila Chattri or Sabaz Burj, once used as a Police Station at Nizamuddin.	East of Nizamuddin.
2. Barapulah Bridge near Nizamuddin.	South of Nizamuddin.

Any objection to the above proposal received in writing within one month from the date of posting by the Deputy Commissioner, Delhi, will be taken into consideration by the Chief Commissioner.

By order,

G. F. DEMONTMORENCY,

Personal Assistant to Chief Commissioner, Delhi.

PUBLIC WORKS DEPARTMENT, DELHI.

NOTIFICATION.

Delhi, the 13th April 1916.

No. 607-*E*.—Lt.-Col. W. H. Ogilvie, I.M.S., was relieved of his duties as Deputy Sanitary Commissioner, New Capital, Delhi, on the afternoon of the 1st April 1916, by L. Dhanpat Rai Varma, Assistant Surgeon, who will hold charge of the Office of Deputy Sanitary Commissioner until further orders.

H. T. KEELING,

Secretary, P. W. D.

ORDERS BY THE HON'BLE THE CHIEF COMMISSIONER, AJMER-MERWARA.

NOTIFICATION.

Dated A. G. G.'s Camp, Rajputana, the 22nd March 1916.

No. 563-*C*.—1032.—In exercise of the powers conferred by section 565, sub-section (3) of the Code of Criminal Procedure, 1898 (Act V of 1898) and with the previous sanction of the Governor General in Council, the Chief Commissioner of Ajmer-Merwara is pleased to make the following additions and alterations in the rules published with his Notifications Nos. 1095 and 101, dated respectively the 6th September 1901 and 1st February 1904:—

Substitute the following rules for rules 4 and 5:—

(4) If the prisoner is released in Ajmer-Merwara he shall at the time of release be produced together with a copy of the order passed under section 565 before the Superintendent or Assistant Superintendent of Police, Ajmer-Merwara, or in their absence before the Inspector of Police, and shall notify to the officer before whom he is produced the local area within which he will reside after release. Such officer shall enter the local area notified by the prisoner on the copy of the order passed under section 565 and shall give to the prisoner a copy of the order entered in a report book to be kept by the convict. The report book shall be in the form attached to these rules and it shall contain a copy of these rules and a translation of them in Hindi or Urdu together with a note that infraction of any of these rules shall be punishable under section 176 of the Indian Penal Code. The officer shall before delivering the report book to the prisoner explain to him the purport of the rules contained in the report book.

(5) If at any time subsequently during the period fixed by the order under section 565 the released convict proposes to change his residence, he shall previously to the change produce

his report book and notify to the officer in charge of the police station within the limits of which he is residing as well as to the police authorities of the place to which he is proceeding the name of the local area to which he intends removing and the date on which he will change his residence. The convict shall also notify his passage through the district at such places as the Superintendent of Police shall direct; and if at any time before the expiry of the period for which he has been ordered to notify his residence he shall return to the district, he shall at once notify his arrival to the officer in charge of the nearest police station.

Add the following form of report book referred to in rule 4 after the form of order under section 565 at the end of the rules :—

Form of report book referred to in rule 4.

Copy of the order passed by the Magistrate under section 565, Criminal Procedure Code.	Date of report to Police Officer.	Name, father's name, caste and age of convict or person reporting on his behalf.	Substance of report or notification.	Signature and rank of Police Officer receiving the report.	REMARKS.

By order,

B. J. GLANCY,

First Assistant to the Agent to the Governor General, Rajputana, and Chief Commissioner, Ajmer-Merwara.

THE HON'BLE THE AGENT TO THE GOVERNOR GENERAL AND CHIEF COMMISSIONER IN BALUCHISTAN.

NOTIFICATION.

* 5% barley, 8% dirt and 30% red.

NOTE.—These statistics are compiled from *fortnightly* returns furnished by Local Governments and Administrations. They relate to the wholesale prices in the markets referred to above which prevailed on the last (or nearest mart) day of each fortnight. The statistics for Karachi, Bombay and Calcutta are compiled from the Chambers of Commerce Market Reports.

(a) Price for the fortnight ending the 31st July 1914 being taken as 100.

India per maund of 82⅐ lbs.

NOTIFICATIONS.

Simla, the 22nd April, 1916.

No. 2132-W.—In exercise of the powers conferred by Section 19 of the Sea Customs Act, 1878 (VIII of 1878), as amended by Act XII of 1914, the Governor General in Council is pleased to prohibit the export of all kinds of spices other than pepper (the export of which is already prohibited to all countries other than the United Kingdom, British Possessions and British Protectorates by the Notification in this Department No. 1086-W., dated the 11th February 1916) but including pimento, to all countries in Europe and on the Mediterranean and Black Seas other than the United Kingdom, France, Russia (except Baltic ports), Italy, Spain and Portugal.

CUSTOMS.

The 22nd April, 1916.

No. 2148-W.—In exercise of the powers conferred by Section 19 of the Sea Customs Act, 1878 (VIII of 1878), as amended by Act XII of 1914, and in partial supersession of the Notification in this Department No. 2561-W., dated the 13th March 1915, as amended by Notification No. 104*0-W., dated the 3rd July 1915, the Governor General in Council is pleased to prohibit :—

(*i*) the export of cocoanut oil, cotton-seed oil, ground-nut oil and linseed oil to all destinations outside the British Empire ; and

(*ii*) the export of copra, linseed and mhowra to all destinations other than the United Kingdom, British Possessions and Protectorates, France, Italy and Russia (except the Baltic ports).

The 29th April, 1916.

No. 2281-W.—1. WHEREAS by paragraph 5 (7) of the Trading with the Enemy Proclamation No. 2, dated the 9th day of September 1914, as amended and extended by the Proclamation dated the 5th day of November 1914 and by the Proclamation dated the 16th day of October 1915, the obtaining of any goods, wares or merchandise from the territories of the German Empire or of the Dual Monarchy of Austria-Hungary, together with all the Colonies and Dependencies thereof, or from the territories of the Sultan of Turkey (other than Egypt or any territory in the occupation of the British Government, or its Allies), or from the territories of the King of the Bulgarians, in this license and in the said Proclamation referred to as "enemy country," is forbidden; and

WHEREAS by paragraph 1 of the Trading with the Enemy (Occupied Territory) Proclamation, 1915, it is provided that the said Proclamations shall apply to the territory of an Allied State in hostile occupation as they apply to an enemy country; and by paragraph 4 of the said Proclamation, it is provided that nothing in that Proclamation shall be taken to prohibit anything which may be expressly permitted by a license granted by or on behalf of the Crown; and

WHEREAS by paragraph 3 of the Proclamation dated the 8th day of October 1914, power to grant such license on behalf of the Crown may be exercised in India by the Governor General;

NOW, THEREFORE, I, Frederic John Napier Thesiger, Baron Chelmsford hereby authorise all persons freely residing, being, or carrying on business in British India, to obtain goods, wares or merchandise from the Territory of Belgium in Hostile occupation without the intervention of a firm in the United Kingdom, on the condition that the person importing such goods, wares or merchandise, shall produce before the customs officer at the port of import—

(*i*) an undertaking that he will pay the purchase money into a special account, in the name of the exporter, in a Bank in British India or United Kingdom and will, when called upon to do so, furnish evidence of such payment within a reasonable period after the importation of the goods, wares or merchandise;

(*ii*) an undertaking by the Bank that, so long as the enemy occupation of Belgium continues, no money will be allowed to be withdrawn from such special account, except under license from the Governor General, and that no charge on the account will be allowed or recognised without such license; and

(*iii*) a certificate from a British Consular Officer to the effect that the goods are in fact of Belgian origin.

Explanation.—Goods manufactured in Holland which owe less than twenty-five per cent of their value to enemy (other than Belgian) labour or material but include also a Belgian element which raises the proportion to more than twenty-five per cent are considered for the purpose of this license as goods of Belgian origin.

2. This license may be cited as the Trading License (Belgium), 1916.

CHELMSFORD,

Viceroy and Governor General of India.

No. 2337-W.—In modification of the Notification in this Department No. 1203-W., dated the 28th November 1914, the following Order in Council is published for general information:—

AT THE COURT AT BUCKINGHAM PALACE.

The 30th day of March, 1916.

PRESENT:

The King's Most Excellent Majesty in Council.

WHEREAS by the Declaration of London Order in Council No. 2, 1914, His Majesty was pleased to direct that during the present hostilities the provisions of the Convention known as the Declaration of London should, subject to certain omissions and modifications therein set out, be adopted and put in force by His Majesty's Government; and

WHEREAS doubts have arisen as to the effect of Article 1 (*iii*) of the said Order in Council on the right to effect the capture of conditional contraband on board a vessel bound for a neutral port; and

WHEREAS it is expedient to put an end to such doubts and otherwise to amend the said Order in Council in the manner hereinafter appearing; and

WHEREAS by Article 19 of the said Declaration it is provided that whatever may be the ulterior destination of a vessel or of her cargo, she cannot be captured for breach of blockade if, at the moment, she is on her way to a non-blockaded port; and

WHEREAS it is no longer expedient to adopt Article 19 of the said Declaration;

NOW, THEREFORE, His Majesty, by and with the advice of His Privy Council, is pleased to order, and it is hereby ordered, as follows:—

1. The provisions of the Declaration of London Order in Council No. 2, 1914, shall not be deemed to limit or to have limited in any way the right of His Majesty, in accordance with the law of nations, to capture goods upon the ground that they are conditional contraband, nor to affect or to have affected the liability of conditional contraband to capture, whether the carriage of the goods to their destination be direct or entail transhipment or a subsequent transport by land.

2. The provisions of Article 1 (ii) and (iii) of the said Order in Council shall apply to absolute contraband as well as to conditional contraband.

3. The destinations referred to in Article 30 and in Article 33 of the said Declaration shall (in addition to any presumptions laid down in the said Order in Council) be presumed to exist, if the goods are consigned to or for a person, who, during the present hostilities, has forwarded imported contraband goods to territory belonging to or occupied by the enemy.

4. In the cases covered by Articles 2 and 3 of this Order, it shall lie upon the owner of the goods to prove that their destination was innocent.

5. From and after the date of this Order, Article 19 of the Declaration of London shall cease to be adopted and put in force. Neither a vessel nor her cargo shall be immune from capture for breach of blockade upon the sole ground that she is at the moment on her way to a non-blockaded port.

6. This Order may be cited as "The Declaration of London Order in Council, 1916."

And the Lords Commissioners of His Majesty's Treasury, the Lords Commissioners of the Admiralty, and each of His Majesty's Principal Secretaries of State, the President of the Probate, Divorce, and Admiralty Division of the High Court of Justice, all other Judges of His Majesty's Prize Courts, and all Governors, Officers, and Authorities whom it may concern, are to give the necessary directions herein as to them may respectively appertain.

Almeric Fitzroy.

2381-W.—In exercise of the powers conferred by Section 19 of the Sea Customs Act, 1878 (VIII of 1878), as amended by Act XII of 1914, and in supersession of the Notification in this Department No 6600-W., dated the 15th May 1915, the Governor General in Council is pleased to direct that the following shall be substituted for the entry regarding Medical and Surgical Stores in column 1 of the Schedule appended to the Notification in this Department No. 25-W., dated the 17th October 1914:—

Medical and surgical stores and equipment of every description, other than (1) nux vomica, (2) castor seed, mustard seed, linseed and oils extracted therefrom, (3) senna, magnesium sulphate, ajowan seed, chirreta roots, euphorbia pilulifera, fennelseed, dillseed, gums, and (4) asafœtida.

No. 2385-78-W.—The following Royal Proclamations are published for general information:—

BY THE KING

A PROCLAMATION

FOR PROHIBITING THE IMPORTATION OF CANNED, BOTTLED, DRIED AND PRESERVED FRUITS INTO THE UNITED KINGDOM.

GEORGE R.I.

WHEREAS by Section forty-three of the Customs Consolidation Act, 1876, it is provided that the importation of arms, ammunition, gunpowder, or any other goods may be prohibited by Proclamation:

AND WHEREAS it is expedient that the importation into the United Kingdom of certain goods of a bulky character should be prohibited as hereinafter provided:

NOW, THEREFORE, We, by and with the advice of Our Privy Council, in pursuance of the said Act and of all other powers enabling Us in that behalf, do hereby proclaim, direct and ordain as follows:—

As from and after the Thirteenth day of March, 1916, subject as hereinafter provided, the importation into the United Kingdom of the following goods is hereby prohibited, *viz*:—

Canned, bottled, dried and preserved fruits, except currants.

Provided always, and it is hereby declared, that this prohibition shall not apply to any canned, bottled, dried or preserved fruits which are the produce of any of Our Dominions, Colonies, Possessions or Protectorates, nor to any fruits which are imported under licence given by, or on behalf of the Board of Trade, and subject to the provisions and conditions of such licence.

This Proclamation may be cited as the Prohibition of Import (Canned, Bottled, Dried and Preserved Fruits) Proclamation, 1916.

Given at Our Court at Buckingham Palace, this Tenth day of March, in the year of Our Lord One thousand nine hundred and sixteen, and in the Sixth year of Our Reign.

GOD SAVE THE KING.

BY THE KING

A PROCLAMATION.

FOR PROHIBITING THE IMPORTATION OF CERTAIN ARTICLES INTO THE UNITED KINGDOM.

GEORGE R.I.

WHEREAS by Section forty-three of the Customs Consolidation Act, 1876, it is provided that the importation of arms, ammunition, gunpowder, or any other goods may be prohibited by Proclamation :

AND WHEREAS it is expedient that the importation into the United Kingdom of certain goods should be prohibited as hereinafter provided :

NOW, THEREFORE, We, by and with the advice of Our Privy Council, in pursuance of the said Act and of all other powers enabling Us in that behalf, do hereby proclaim, direct and ordain as follows :—

As from and after the Thirtieth day of March, 1916, subject as hereinafter provided, the importation into the United Kingdom of the following goods is hereby prohibited, *viz.*:—

Baskets and basket ware (except baskets and basket ware of bamboo).

Cement.

China ware, earthenware and pottery, not including cloisonné wares.

Cotton yarn, cotton piece goods and cotton manufactures of all kinds, except hosiery and lace.

Cutlery.

Fatty acids.

Furniture, manufactured joinery and other wood manufactures, except lacquered wares.

Hardware and hollow-ware.

Oilcloth.

Soap.

Toys, games and playing cards.

Wood and timber of the following kinds, *viz.*:—beech, birch, elm and oak.

Woollen and worsted manufactures of all kinds except yarns.

Provided always, and it is hereby declared, that this prohibition shall not apply to any such goods which are imported under licence given by, or on behalf of the Board of Trade, and subject to the provisions and conditions of such licence.

This Proclamation may be cited as the Prohibition of Import (No. 4) Proclamation, 1916.

Given at Our Court at Buckingham Palace, this Thirtieth day of March, in the year of of our Lord One thousand nine hundred and sixteen, and in the Sixth year of Our Reign.

GOD SAVE THE KING.

BY THE KING

A PROCLAMATION

FOR PROHIBITING THE IMPORTATION OF CERTAIN ARTICLES INTO THE UNITED KINGDOM.

GEORGE R. I.

WHEREAS Section forty-three of the Customs Consolidation Act, 1876, it is provided that the importation of arms, ammunition, gunpowder, or any other goods may be prohibited by Proclamation :

AND WHEREAS it is expedient that the importation into the United Kingdom of certain goods should be prohibited as hereinafter provided :

Now, THEREFORE, We, by and with the advice of Our Privy Council, in pursuance of the said Act and of all other powers enabling Us in that behalf, do hereby proclaim, direct and ordain as follows :—

As from and after the Twenty-seventh day of March, 1916, subject as hereinafter provided, the importation into the United Kingdom of the following goods is hereby prohibited, *viz.* :—

Motor cars, chassis, motor cycles and parts and accessories of motor cars and motor cycles (other than tyres) with the exception of the motor cars, chassis, accessories and parts which are at present exempted from import duty under Section 13 (4) of the Finance No. 2 Act, 1915.

Musical instruments, including gramophones and pianolas and other similar instruments and accessories, component parts and records therefor.

Spirits and strong waters of all kinds except Brandy and Rum.

Provided always, and it is hereby declared, that this prohibition shall not apply to any such goods which are imported under licence given by, or on behalf of the Board of Trade, and subject to the provisions and conditions of such licence.

This Proclamation may be cited as the Prohibition of Import (No. 3) Proclamation, 1916.

Given at Our Court at Buckingham Palace, this Twenty first day of March, in the year of our Lord One thousand nine hundred and sixteen, and in the Sixth year of Our Reign.

GOD SAVE THE KING.

No. 2411-W.—In exercise of the powers conferred by Section 19 of the Sea Customs Act, 1878 (VIII of 1878), as amended by Act XII of 1914, and in supersession of this Department's Notification (Customs) No. 15127-W., dated the 25th September 1915, as amended by Notification (Customs) No. 2103-W., dated the 22nd April 1916, the Governor General in Council is pleased to prohibit the export of coal (other than Welsh coal) and coke from British India except to the United Kingdom, British Possessions and Protectorates :

Provided that nothing in this notification shall apply to—

(*i*) Goods shipped by, or for the use of, the Crown ;

(*ii*) Goods shipped to any Indian port ;

(*iii*) Goods required for use or consumption in—

(*a*) French or Portuguese Possessions in India, or

(*b*) Native States in India ;

(*iv*) Goods shipped for use or consumption during voyage.

EMIGRATION.

The 29th April, 1916.

No. 2257-55.—In pursuance of Section 116-A, sub-section (4) of the Assam Labour and Emigration Act, 1901, as amended by the Assam Labour and Emigration (Amendment) Act, 1915, the Governor General in Council is pleased to approve of the election of Mr. G. Turnbull to be a member of the Assam Labour Board, as representative of the Indian Tea Association, Calcutta, and of the Indian Tea Association, London, *vice* Mr. R. Graham, resigned.

POST AND TELEGRAPH ESTABLISHMENTS.

The 29th April, 1916.

No. 2213-81.—In Parts I and II of the schedule published with the Notification in this Department No. 6907-162, dated the 17th December 1910, as amended by Notification No. 3268-41, dated the 13th May 1911,—

for the entries

Post Office of India. Indian Telegraph Department	... Accountant General, Posts and Telegraphs,

substitute

COMMERCE AND TRADE.

The 29th April, 1916.

No. 2274-W.—WHEREAS, by paragraph 5 of the Trading with the Enemy Proclamation No. 2, dated 9th September 1914, as amended and extended by the Proclamation, dated the 5th November 1914 and by the Proclamation, dated 16th October 1915, trade and financial or commercial transactions between British subjects and persons or bodies of persons resident in the territories of the German Empire or in the Dual Monarchy of Austria-Hungary or in the respective colonies and dependencies thereof, or in the territories of the Sultan of Turkey (other than Egypt, or any territory in the occupation of the British Government or its Allies), or in the territories of the King of the Bulgarians in this license and in the said Proclamations referred to as "enemy country" are prohibited; and

WHEREAS, by paragraph 1 of Trading with the Enemy (China, Siam, Persia and Morocco) Proclamation, 1915, it is provided that the said Proclamations shall apply to persons or bodies of persons of enemy nationality resident or carrying on business in China, Siam, Persia or Morocco, in the same manner as they apply to persons or bodies of persons resident or carrying on business in an enemy country; and, by paragraph 2 of the said Proclamation, it is provided that nothing in the Proclamation shall be taken to prohibit anything which may be specially permitted by license granted by, or on behalf of the Crown; and

WHEREAS, by paragraph 3 of Proclamation, dated 8th October 1914, power to grant such licenses on behalf of the Crown may be exercised in India by the Governor General:

NOW, THEREFORE, I, Frederic John Napier Thesiger, Baron Chelmsford, hereby authorize all British subjects residing, being or carrying on business in British India, to trade or carry on business with the persons or bodies of persons of enemy nationality resident or carrying on business in Persia who are named in the schedule hereto attached, and with such other persons or bodies of persons so resident as may hereafter be declared by a notification of the Governor General in Council in the *Gazette of India* to be well disposed towards the British Government.

2. This license may be cited as the Trading License (Persia), 1916.

3. The Trading License (Persia), 1915, is hereby revoked.

Provided that the revocation of the said license shall not affect the validity of anything, done in pursuance of it, and that references in any document to the said license shall hereafter, unless a contrary intention appears therein, be construed as references to this license.

Dated this 29th day of April 1916.

No. 441.-A.—The following despatch from General Sir John Nixon, K.C.B., relative to the operations in Mesopotamia from the middle of April to the end of September 1915, which appeared in the Second Supplement dated the 5th April 1916 to the London Gazette of the 4th April 1916, is republished for general information.

General Headquarters, I. E. F. "D," 1st January 1916.

From—General SIR JOHN NIXON, K.C.B., A.D.C., General, Commanding Indian Expeditionary Force "D,"

To—The Chief of the General Staff, Army Headquarters, India.

Sir,

I have the honour to forward a report on the operations of the forces under my command for the period from the middle of April 1915 up to the end of September 1915.

1. The floods of last season, which are said to have been the highest for 30 years, formed an inland sea of water and reeds varying from 2 to 6 feet deep, which extended for 40 miles north of Qurnah, down to Basrah, and stretching from Nasiriyah in the west of Hawizeh (50 miles north-east of Qurnah) in the east. Consequently until the subsidence of the floods at the end of July, operations in this area were of an amphibious nature.

2. During the month of April a brigade at Ahwaz, first under Major-General Davison and subsequently under Brigadier-General Lean, had been containing a hostile force consisting of some 8 battalions of Turks with 8 guns and about 10,000 Arab auxiliaries which had advanced from Amarah *viâ* Bisaitin and Khafajiyah (on the Kharkeh river) into Persian Arabistan.

At this time another British detachment was at Qurnah, where it had been opposed since January by a Turkish force of some 6 battalions with 10 guns and the usual following of Arab tribesmen, which had descended the Tigris from Amarah.

By the defeat of the Turks at Barjisiyah (20 miles south-west of Basrah) on 14th April the hostile forces in the vicinity of Basrah had been dispersed and driven to Nasiriyah, enabling me to take active measures against the enemy detachments on the Karun and on the Tigris.

I decided to deal first with the former and placed Major-General Gorringe in command of the operations.

Directly the Turks had been defeated at Barjisiyah the concentration of the 12th Division up the Karun was commenced. The Turkish force near Ahwaz retreated across the Kharkeh river on hearing of the defeat of their army at Barjisiyah.

General Gorringe followed in pursuit. By the 7th May the 12th Division and the Cavalry Brigade had reached Illah on the Kharkeh. This river was 250 yards wide with a rapid and deep stream which presented a formidable obstacle to the passage of troops.

4. General Gorringe overcame the difficulties of passage and skilfully crossed his troops and guns to the other bank. The Turks continued their retreat towards Amarah on discovering that our column had crossed the river.

General Gorringe now found himself under the necessity of dealing with a recalcitrant and pugnacious branch of the Beni Taruf Arabs, who had identified themselves very strongly with the Turkish cause

He advanced down the Kharkeh river operating on both banks, Major-General Melliss commanded the column on the right bank and Brigadier-General Lean that on the left bank.

The occasion of the successful attack on the Arab stronghold Khafajiyah, in extremely hot weather when the temperature in tents was 120 degrees, was a display of dogged gallantry and devotion on the part of the troops engaged.

Among other intrepid deeds was the exploit of Subadar-Major Ajab Khan and 20 men of the 76th Punjabis, who swam the river under heavy fire and brought back a boat in which troops were ferried across until sufficient were collected to assault a stout mud fort which was strongly held.

5. After the defeat and dispersion of the hostile tribesmen who had molested his advance, General Gorringe, in accordance with my instructions, made a series of demonstrations with a portion of his force from Bisaitin against the Turkish force which lay between him and Amarah. This action was in co-operation with the impending advance of our detachment from Qurnah (commanded by Major-General Townshend) on Amarah. It had the desired result of preventing reinforcements from joining the Turkish forces on the Tigris in time to oppose General Townshend's advance. It was largely due to these demonstrations that the enemy's retreat up the Tigris after their defeat on 31st May was so precipitate and that General Townshend was enabled to enter Amarah practically unopposed. The Turkish force opposing General Gorringe was so delayed in its march to Amarah that, when it eventually reached there, it was surprised by General Townshend, who was already in occupation of the town. A part of the advanced guard was captured and the remainder had to seek safety in dispersion, with the loss of 2 guns.

6. General Gorringe's operations extended over a period of 7 weeks. As a result, Persian Arabistan had been cleared of the enemy and the Arab tribes forced to submit, thus enabling the pipe line to be repaired and normal conditions to be resumed at the oil fields, and most effective assistance had been given to General Townshend's advance from Qurnah.

7. I consider that General Gorringe showed marked ability and determination in conducting these operations. The successful result is due to his able leadership and to the zeal and energy displayed by all ranks under his command.

The troops were compelled to undergo severe exertions and overcame many obstacles during very hot and trying weather with undiminished resolution and zeal that was admirable.

8. While the 12th Division was advancing by the Karun and Kharkeh rivers, preparations were in progress for an advance up the Tigris by the 6th Division under the command of Major-General Townshend. Owing to the limited amount of river transport available at that time, the movement and collection of troops was a slow and difficult process, and the flooded country around Qurnah presented many problems which required careful attention before operations could be commenced.

9. *Bellums.*—long narrow boats of the country—were collected and armoured with iron plates, to be used for carrying infantry to the assault of the enemy's positions; troops were trained in punting and boat work; various types of guns were mounted on rafts, barges, tugs and paddlers; floating hospitals had to be improvised, and many other details of construction and equipment had to be thought out and provided for.

By the end of May preparations for the advance were complete.

10. The Turkish force was entrenched north of Qurnah on islands formed where high ground stood out from the inundation which covered all over-lying country.

These fortified localities were in two groups; the most southerly group forming an advanced position some two miles from the British lines, the main position being some three miles further to the north.

The flooded state of the country rendered it a position of some strength, necessitating a carefully organised attack in successive phases by combined naval and military operations.

General Townshend's plan was to capture the advanced position by a frontal attack combined with a turning attack against the enemy's left flank, supported by the Naval Flotilla and the artillery afloat and that on land within the Qurnah entrenchments.

11. In the early morning of the 31st May, after a heavy preparatory bombardment, the infantry advanced to the attack in the flotilla of improvised war-*bellums*, supported by admirably directed gun-fire.

The 17th Infantry Brigade, commanded by Lieutenant-Colonel Climo, 24th Punjabis, made the frontal attack The 22nd Punjabis and the Sirmur Sappers and Miners under Lieutenant-Colonel Blois Johnson, 22nd Punjabis, captured One Three Hill on the enemy's left flank and enfiladed Norfolk Hill—the first objective of the 17th Infantry Brigade—which was carried at the point of the bayonet by the 1st Battalion, Oxfordshire and Buckinghamshire Light Infantry, after poling their boats for over a mile through thick reeds and landing waist deep in water.

12. The bold action of the mine sweepers which preceded the naval sloops and armed tugs enable the latter to keep pace with the troops, and their fire, combined with that of the Royal Artillery ashore and afloat, ensured the capture of the whole of the enemy's advanced position by noon.

It was entirely due to careful preparation and organisation of artillery fire of all kinds that our casualties were very few.

These operations form a good example of the co-operation of the Royal Navy with infantry and artillery.

13. An aeroplane reconnaissance on the morning of the 1st June discovered that the enemy had evacuated his main position and was in full retreat up the Tigris.

The naval flotilla led by H. M. S. "Espiegle" (Captain Nunn, R.N.) pushed in pursuit, followed by the shipping with troops.

On the morning of the 2nd June, when some 10 miles below Qalat Salih, the deeper draught vessels could proceed no further owing to shoal water, and the pursuit was continued by the naval armed tugs. Up to this time the "Espiegle" had engaged and sunk the Turkish gunboat "Marmaris" and had captured two steamers and a number of lighters laden with munitions and stores.

14. Qalat Salih was reached on the afternoon of the 2nd June and, after some hostile troops outside the town had been dispersed, the pursuit was continued.

H. M. S. "Comet" (Captain Nunn, R.N.), with General Townshend on board, and 3 armed tugs occupied Amarah in the afternoon of the 3rd June, capturing there some 700 troops and 40 officers. This is a most excellent instance of courage and pertinacity in pursuit and very creditable to all who took part in it.

The leading infantry (2nd Battalion, Norfolk Regiment) of the 6th Division arrived at Amarah at 6-30 A.M. on the 4th June, not a moment too soon, as the inhabitants were beginning to realise the size of the force which had cowed them into submission on the previous day.

15. The captures resulting from the action at Qurnah, the pursuit and the occupation of Amarah, included 17 guns, 2,718 rifles, 1,773 prisoners, 4 river steamers (exclusive of the gunboat "Marmaris" and another steamer which was sunk), a number of lighters and boats, besides quantities of ammunition and stores.

The weather throughout these operations was intensely hot, a sweltering sun all day followed by still and sultry nights; but in spite of this the spirit and energy of all ranks was excellent.

16. I consider that General Townshend carried out these operations in a highly creditable manner. His prompt and vigorous pursuit is worthy of high praise, and it was largely due to his dash and enterprise that Amarah was entered unopposed.

The part played by General Gorringe's force to help General Townshend's operations has been described in a earlier part of this despatch.

17. Immediately after the capture of Amarah preparations were taken in hand for the capture of Nasiriyah on the Euphrates, the dominant place on this flank. Its importance lies in the facts that it is the base from which a hostile force threatening Basrah must start; it is the centre from which influence can be exercised among the powerful Arab tribes which lie along the Euphrates; standing at one end of the Shatt-al-Hai it closes communication between the Tigris and Euphrates, and is thus of strategic value; and lastly, it was the headquarters of the civil administration of a large part of the Basrah Province.

18. To General Gorringe and his troops was allotted this objective. The route from Qurnah to Nasiriyah is by water, through the low-lying valley of the old Euphrates channel for 30 miles to Chahbaish; across the Hammar lake for 15 miles to its western side, thence by the Haqiqah, a tortuous channel some 50 yards wide and 15 miles long, until the main channel of the Euphrates is reached some 25 miles below Nasiriyah. From Qurnah to Chahbaish, deep draught vessels can go up the old Euphrates—beyond this, at the time the operations commenced, on 27th June, the Hammar lake was passable by all river steamers drawing less than 5 feet, as far as the entrance to the Haqiqah channel. By the middle of July the channel across the lake held little more than 3 feet of water, and only the smallest steamers could cross. In many cases, steamers were aground for days at a time and the small tugs fitted as unboats could only be taken across by removing guns, ammunition, armourplating, fuel and water and using light draught sternwheelers to tow them. Later, troops and stores could only be transported in *bellums*, which for some distances had to be dragged over mud and water by men. The Haqiqah channel was blocked by a solidly constructed *bund* half a mile from its entrance to the lake, which had to be removed before the passage could be used by shipping.

19. Above its junction with the Haqiqah the Euphrates has an average width of 200 yards. Along its banks are numerous gardens, patches of cultivation and several small villages within walled enclosures. On the left bank, belts of date palms, with an occasional fringe of willow trees, are the prevailing features. On the right bank the country is more open. During July, except for a belt of dry ground along the river banks a few hundred yards wide, on either side the country was completely under water. Numerous irrigation channels intersect this belt of dry land at right angles to the river, presenting a series of obstacles to an advance. Such was the nature of the country where the Turks offered their main opposition to our advance on Nasiriyah.

20. On 26th June General Gorringe's force was concentrated at Qurnah and proceeded on the 27th June across the Hammar Lake, preceded by gunboats under command of Captain Nunn, R.N. Hostile armed launches above the Haqiqah *bund* were driven back. The *bund* was occupied and the work of demolition commenced.

During the 28th, a channel 150 feet wide and 4 feet deep was made. The rush of water through the opening created a strong rapid, almost a cataract, up which parties of men were successful in hauling the naval craft on the 29th.

It was not until the 4th July that all vessels and troops were passed over the Haqiqah obstruction and established about 2½ miles from the junction with the Euphrates. Covering this entrance, reconnaissances proved that the enemy had established themselves with guns on the right bank of the Euphrates commanding both banks of the Haqiqah and the minefield which they had prepared about a mile down it.

21. At 4-45 A.M. on 5th July the 30th Infantry Brigade, commanded by Major-General Melliss, advanced to attack the enemy; on the left bank, the 76th Punjabis and the 24th

Punjabis, the latter moving in *bellums* through the inundation, accompanied by the 30th Mountain Battery. The 2-7th Gurkhas, supported by the 1-4th Hants, moved up the right bank. Considerable opposition was encountered, especially on the left bank, and it was not until 1-20 P.M. that our troops forced the enemy on the right bank of the Euphrates to hoist the white flag.

The 24th Punjabis had to carry their *bellums* across some 60 yards of dry land before they could cross the Euphrates to take possession of the enemy's position and battery. After the right bank had been cleared our naval craft were able to sweep for mines, an operation rendered easier for us as a captured Turkish officer assisted to indicate their position.

By 9 P.M. the channel was clear : the ships came up and the troops embarked.

22. The detachment of the enemy which had opposed our advance consisted of 1,000 regular Turkish troops, 2,000 Arabs, 4 guns and two Thorneycroft launches armed with pom-poms. Four guns and 130 prisoners fell into our hands at a cost to us of 26 killed and 85 wounded.

The second phase of these operations was commenced on the morning of 6th July by the occupation of Suk-esh-Sheyukh by Captain Nunn, with two gunboats ; and afterwards the whole flotilla moved up the Euphrates.

23. The Turks had taken up a series of positions astride the river about 5 miles below Nasiriyah with both flanks resting on marshes. In front of their trenches were broad deep channels difficult to turn or assault.

The ground on the right bank was devoid of cover ; that on the left bank fringed by a narrow belt of palms.

24. General Gorringe established his force some two miles below the enemy's advanced positions and occupied entrenchments on both banks. Up to the 13th July continual reconnaissances were made and our entrenchments gradually extended nearer to the enemy.

25. On the night of 13th-14th an attack was made by our troops on both banks. On the right bank we secured an entrenched position within 400 yards of the Turkish trenches. A gallant attempt by the 24th Punjabis under Lieutenant-Colonel Climo, supported by four guns of the 30th Mountain Battery under Captain E. J. Nixon, to capture some sandhills behind the enemy's right flank met with unexpectedly strong opposition, and they were attacked in rear by Arab tribesmen and had to withdraw.

The mountain guns, covering the withdrawal, rendered invaluable support.

26. Until the 23rd, General Gorringe was perfecting arrangements for his decisive attack. Gun positions were moved forward, infantry trenches extended and communications improved. The working parties were subjected to a continual fire, but our snipers established ascendancy over those of the enemy. The heat night and day throughout was intense.

27. At 5 A. M. on 24th July the attack was launched. By 7-30 A. M. the 12th Infantry Brigade, operating on the left bank of the river, had occupied the enemy's advanced trenches at Miyadiyah. The 30th Infantry Brigade then pushed its attack up the right bank covered by well directed artillery fire and by 9-30 A.M. had captured the advanced trenches after forcing the passage of the Mejinineh channel. During this operation the gunboat "Sumana," carrying bridging material, fought her way up to the entrance of the creek under a very heavy fire ; and, supported by the fire from the gunboats, the 17th Company, Sappers and Miners, threw a bridge across.

28. The attack was continued by both banks. The main position was captured by noon, in spite of a stubborn resistance. The enemy clung to their trenches, where some 500 were killed. After reorganising, the troops pushed forward to the Sadanawiyah position—the enemy's final line of defence, which was also captured. During the attack at Sadanawiyah Captain Nunn in the "Shushan," a small sternwheeler, laid his ship alongside hostile trenches on the river bank and engaged them at close range.

29. By 6-30 P.M. the enemy was in full retreat across the marshes and our troops bivouacked on the position they had won.

Severe losses had been inflicted on the enemy, while our casualties were not heavy considering the nature of the fighting, the total number of our killed and wounded being under 600.

Our captures included over 1,000 prisoners, 17 guns, 5 machine guns, 1,586 rifles and quantities of ammunition and stores.

Nasiriyah was occupied on the 25th without further opposition.

30. General Gorringe conducted the task assigned to him with skill and determination, and his troops responded to the strenuous calls that were made upon them in a gallant and devoted manner.

Seldom, if ever, have our troops been called upon to campaign in more trying heat than they have experienced this summer in the marshy plains of Mesopotamia.

But the spirit of the troops never flagged, and in the assault of the entrenchments, which the Turks thought impregnable, British and Indian soldiers displayed a gallantry and devotion to duty worthy of the highest traditions of the service.

31. I have to place on record the excellence of the work performed by the officers and men of the Royal Flying Corps, whose valuable reconnaissances materially assisted in clearing up the situation before the battle of the 24th July.

32. And I have to express my deep appreciation of the valuable and whole-hearted co-operation of the officers and men of the Royal Navy under the command of Captain Nunn, D.S.O., Senior Naval Officer. It was in a great measure due to the excellent work performed by the Royal Navy that these amphibious operations, like those at Qurnah at the end of May, were brought to so successful a conclusion.

33. The capture of Nasiriyah had established British control on the western side of the Basrah *Vilayet*, but the district lying north of the line Amarah-Nasiriyah still remained outside our control, and strong Turkish forces under Nur-ed-Din Bey were reported to be concentrating at Kut-al-Amarah, at the junction of the Shatt-al-Hai with the Tigris, the possession of which strategic centre is necessary for the effective control of the northern part of the Basrah *Vilayet*. Nur-ed-Din had attempted to cause a diversion by pushing strong detachments to within thirty miles of Amarah while my principal attention was concentrated on the Euphrates.

The defeat of Nur-ed-Din and the occupation of Kut-al-Amarah became my next objective as soon as Nasiriyah was secured, and I commenced the transfer of troops towards Amarah on the following day.

34. After the month of June the Shatt-al-Hai ceases to be navigable for some six months and the only line of advance by water on Kut-al-Amarah is by the River Tigris.

On the 1st August a detachment from the 6th Division, accompanied by a naval flotilla occupied Ali al-Gharbi. Covered by this detachment the concentration of the 6th Division under General Townshend for the advance on Kut-al-Amarah was carried out.

35. The transfer of troops from the Euphrates to the Tigris was a slow process owing to the difficulties in crossing the shallow Hammar Lake during the low water season.

By the 12th September the force was concentrated at Ali-al-Gharbi. Thence the advance was continued by route march along the river bank, accompanied by a naval flotilla and shipping until Sannaiyat (some eight miles below the enemy's position covering Kut-al-Amarah) was reached on 15th September. Intense heat prevailed during the period of this march, with temperatures ranging from 110 degrees to 116 degrees in the shade. The column remained halted at Sannaiyat until 25th September, receiving reinforcements during this period.

36. A few skirmishes had taken place between our cavalry and that of the enemy and constant naval and air reconnaissances were made. Accurate information was gained regarding the dispositions of the enemy.

The work performed by the Royal Flying Corps during this period was invaluable.

37. Nur-ed-Din Bey's army lay astride the river some seven miles north-east of Kut and eight miles from General Townshend's force at Sannaiyat. It occupied a line naturally favourable for defence which, during three of four months of preparation, had been converted into a formidable position.

On the right bank the defences extended for five miles southwards along some mounds which commanded an extensive field of fire. The river was blocked by a boom composed of barges and wire cables, commanded at close range by guns and fire trenches. On the left bank the entrenchments extended for seven miles, linking up the gaps between the river and three marshes which stretched away to the north. The defences were well designed and concealed, commanding flat and open approaches. They were elaborately constructed with a thoroughness that missed no detail. In front of the trenches were barbed wire entanglements, military pits and land mines. Behind were miles of communication trenches connecting the various works and providing covered outlets to the river, where ramps and landing stages had been made to facilitate the transfer of troops to or from ships; while pumping engines and water channels carried water from the river to the trenches.

38. Nur-ed-Din's army held this position; one division being on each bank, with some army troops in reserve on the left bank, near a bridge above the main position. A force of Arab horsemen was posted on the Turkish left flank; most of the Turkish regular cavalry were absent during the battle on a raid against our communications at Shaikh Sa'ad.

39. On the 26th September General Townshend advanced to within four miles of the Turkish position. His plan was to make a decisive attack on the left bank by enveloping the Turkish left with his main force, but, in order to deceive the enemy as to the direction of the real attack, preliminary dispositions and preparatory attacks were made with the object of inducing the Turks to expect the principal attack on the right bank.

40. On the morning of the 27th our troops advanced by both banks. The principal force, on the right bank, made a feint attack on the trenches south of the river, while the left bank detachment entrenched itself within 3,000 yards of the enemy. Meanwhile a bridge

had been constructed, and under cover of night the main force crossed from the right bank and deployed opposite the enemy's left flank.

41. On the morning of the 28th September a general attack was made against the enemy on the left bank. The 18th Infantry Brigade under Major-General Fry with its left on the line of the river, made a pinning attack, while Brigadier-General Delamain commanding the 16th and 17th Infantry Brigades advanced in two columns against the enemy's left; one column being directed frontally against the flank entrenchments while the other moved wide round the flank and attacked in rear. General Delamain's right flank was protected by the Cavalry Brigade.

42. The first troops to enter the enemy trenches were the 2nd Battalion, Dorsetshire Regiment, 117th Mahrattas and 22nd Company, Sappers and Miners, who made a brilliant assault, well supported by the artillery, and soon after 10 A. M., captured a redoubt and trenches on the enemy's extreme left, inflicting heavy losses and taking 135 prisoners.

43. A combined attack by the 16th and 17th Infantry Brigades was then made, and after hard fighting, during which the enemy made several unsuccessful counter attacks, the whole of the northern part of the enemy's position was in our hands by 2 P.M.

44. General Delamain reorganised his troops on the captured position and gave them a much needed rest, as they were exhausted by the great heat, the long march and hard fighting. After a brief rest General Delamain moved his column southwards to assist the 18th Infantry Brigade by attacking the enemy opposed to it, in rear. Before this attack could develop, strong hostile reserves appeared from the south-west in the direction of the bridge. General Delamain immediately changed his objective and attacked the new troops, supported by his guns firing at a range of 1,700 yards.

45. The sight of the approaching enemy and the prospect of getting at him in the open with the bayonet put new life into our infantry who were suffering from weariness and exhaustion after their long and trying exertions under the tropical sun. For the time thirst and fatigue were forgotton.

The attack was made in a most gallant manner with great dash. The enemy were routed with one magnificent rush, which captured four guns and inflicted heavy losses on the Turks. The enemy fought stubbornly and were saved from complete destruction by the approach of night.

46. General Delamain's troops bivouacked for the night on the scene of their victory about two miles from the river, both men and horses suffering severely from want of water, as the brackish water of the marshes is undrinkable. In the morning the column reached the river, and the horses got their first water for forty hours.

47. Throughout the battle the Naval Flotilla co-operated with the land attack from positions on the river. Late in the evening of the 28th, led by the "Comet" (Lieutenant-Commander E. C. Cookson, R. N., Acting Senior Naval Officer) the flotilla advanced upstream and endeavoured to force a passage through the boom obstruction. The ships came under a terrific fire from both banks at close range. The "Comet" rammed the boom but it withstood the shock.

Lieutenant-Commander Cookson was shot dead while most gallantly attempting to cut a wire cable securing the barges.

48 The Turks evacuated their remaining trenches during the night and escaped along the bank of the Tigris. On the morning of the 29th a pursuit was organised, troops moving in ships preceded by cavalry on land.

The cavalry, consisting of four weak squadrons, overtook the enemy on October 1st, but had to wait for the support of the river column as the Turks were making an orderly retreat covered by a strong rear guard with infantry and guns.

49. The progress of the river column was so delayed by the difficulties of navigation due to the constantly shifting shallows in the river that it was unable to overtake the retreating enemy.

When the ships reached Aziziyah on 5th October, the enemy had reached their prepared defensive position at Ctesiphon, covering the road to Baghdad, where they were reinforced.

50. The Turks lost some 4,000 men in casualties, of whom 1,153 were prisoners captured by us. In addition we took 14 guns and a quantity of rifles, ammunition and stores. Considering the severity of the fighting our casualties were comparatively small. They amounted to 1,233, including a large proportion of men only slightly wounded.

51. The defeat of Nur-ed-Din Bey completed the expulsion of Turkish troops from the Basrah *Vilayet.* Apart from material gains won at Kut-al-Amarah, our troops once again proved their irresistible gallantry in attack and added another victory to British arms in Mesopotamia.

52. I am glad to place on record my appreciation of the ability and generalship displayed by Major-General C. V. F. Townshend, C.B., D. S. O., throughout these operations. His plan for turning the Turkish left was the manœuvre whereby the position could best be captured without incurring very heavy losses.

53. Brigadier-General Delamain, who commanded the main attack, showed himself to be a resolute and resourceful commander. His leadership during the battle was admirable.

54. The troops under the command of Major-General Townshend displayed high soldierly qualities and upheld the reputation they have earned during this arduous campaign.

55. The conduct of the infantry in the attack was particularly noteworthy. They were set a task involving prolonged exertion and endurance and performed it with an alacrity and resolution which must have been most disconcerting to the enemy.

56. The artillery has established a high reputation for good shooting. The infantry rely on their accuracy and skill; during the attack they welcome the close support of the guns and press forward with the narrowest margin dividing them from the curtain of bursting shells, in a manner that is a tribute to their comrades in the artillery.

57. The services of the Royal Flying Corps, not only during the battle but also in the frequent reconnaissances which preceded the fighting, also call for notice.

The Flying officers displayed courage and devotion in the performance of their duties, which were often carried out under a heavy fire. The accurate information obtained during air reconnaissances was of the utmost value in planning the defeat of the enemy, and the remarkable skill and powers of observation displayed by Flight-Commander Major H. L. Reilly, Royal Flying Corps, contributed in no small degree to the success of the operations.

58. The work of the Royal Navy fully maintained the high standard they have established in these rivers. I much regret the loss of Lieutenant-Commander E. C. Cookson, whose gallant act has already been referred to.

59. Acknowledgments are due to the excellent work done by the commanders and personnel of the river steamers for their unremitting work in connection with operations on the rivers of Mesopotamia.

60. Accompanying this despatch is a list of officers and men whose names I wish to bring to notice in connection with the operations undertaken during the period under report.

I have, etc.,
